19th IEEE International Symposium on Parallel and Distributed Processing with Applications (IEEE ISPA 2021)

ISPA 1

MiniMCTAD: Minimalist Monte Carlo Transport Architecture Design	1
<i>Siqing Fu (National University of Defense Technology, China), Tiejun Li (National University of Defense Technology, China), Jianmin Zhang (National University of Defense Technology, China), Sheng Ma (National University of Defense Technology, China), and Sheng Liu (Beihang University, China)</i>	
CE-Dedup: Cost-Effective Convolutional Neural Nets Training Based on Image Deduplication ...	11
<i>Xuan Li (McGill University, Canada), Liqiong Chang (McGill University, Canada), and Xue Liu (McGill University, Canada)</i>	
SLAMVis: An Interactive Visualization Approach for Smart Labeling on Multidimensional Data...	19
<i>Aijuan Qian (Shanghai Jiao Tong University, China), Chenlu Li (Shanghai Jiao Tong University, China), Xiaoju Dong (Shanghai Jiao Tong University, China), Shengtao Chen (Shanghai Jiao Tong University, China), Yanling Zhang (Shanghai Jiao Tong University, China), and Guoqiang Li (Shanghai Jiao Tong University, China)</i>	
HFBT: An Efficient Hierarchical Fault-Tolerant Method for Cloud Storage System	27
<i>Ling Xiao (Central South University, China), Beiji Zou (Central South University, China), Chengzhang Zhu (Central South University, China), Meng Zeng (Central South University, China), and Zhi Chen (Central South University, China)</i>	
ATMCC: Design of the Integration Architecture of Cloud Computing and Blockchain for Air Traffic Management	37
<i>Xin Lu (Civil Aviation University of China, China) and Zhijun Wu (Civil Aviation University of China, China)</i>	

ISPA 2

TATA: Throughput-Aware TAsk Placement in Heterogeneous Stream Processing with Deep Reinforcement Learning	44
<i>Xiao Huang (Tsinghua University, China), Yu Jiang (Tsinghua University, China), Hao Fan (ChinaBond Finance and Information Technology Co., Ltd., China), Huayun Tang (ChinaBond Finance and Information Technology Co., Ltd., China), Yiping Wang (ChinaBond Finance and Information Technology Co., Ltd., China), Jin Jin (Maple Growth Research Club Institution, Canada), Hai Wan (Tsinghua University, China), and Xibin Zhao (Tsinghua University, China)</i>	
HTtext: A TextCNN-Based Pre-Silicon Detection for Hardware Trojans	55
<i>Yi Xu (Fuzhou University, China), Zhenyi Chen (University of South Florida, USA), Binhong Huang (Fuzhou University, China), Ximeng Liu (Fuzhou University, China), and Chen Dong (Fuzhou University, China)</i>	

PEBIID: Privacy-Preserving and Efficient Biometric Identification for IoV DApp	63
<i>Chun Liu (Chinese Academy of Military Science, China), Lin Yang (Chinese Academy of Military Science, China), LinRu Ma (Chinese Academy of Military Science, China), LiuCheng Shi (Chinese Academy of Military Science, China), Xuexian Hu (PLA Strategic Support Force Information Engineering University, China), WeiPeng Cao (Shenzhen University, China), and JingJing Zhang (Chinese Academy of Military Science, China)</i>	
PIPArch: Programmable Image Processing Architecture Using Sliding Array	73
<i>Feiyang Wu (Shanghai Jiao Tong University, China), Zhuoran Song (Shanghai Jiao Tong University, China), Jing Ke (Shanghai Jiao Tong University, China), Li Jiang (Shanghai Jiao Tong University, China), Naifeng Jing (Shanghai Jiao Tong University, China), and Xiaoyao Liang (Shanghai Jiao Tong University, China)</i>	
KubeHICE: Performance-Aware Container Orchestration on Heterogeneous-ISA Architectures in Cloud-Edge Platforms	81
<i>Saqing Yang (National University of Defense Technology, China), Yi Ren (National University of Defense Technology, China), Jianfeng Zhang (National University of Defense Technology, China), Jianbo Guan (National University of Defense Technology, China), and Bao Li (National University of Defense Technology, China)</i>	

ISPA 3

RLConfig: Run-Time Configuration of Cluster Schedulers via Deep Reinforcement Learning	92
<i>Xiaohui Wei (Jilin University, China), Changbao Zhou (Jilin University, China), Yong Sheng (Jilin University, China), Yan Wu (Jilin University, China), Lina Li (Changchun University, China), and Shang Gao (Jilin University, China)</i>	
DRL-Deploy: Adaptive Service Function Chains Deployment with Deep Reinforcement Learning	100
<i>Xiaohui Wei (Jilin University, China), Yong Sheng (Jilin University, China), Lina Li (Changchun University, China), and Changbao Zhou (Jilin University, China)</i>	
Vapor: A GPU Sharing Scheduler with Communication and Computation Pipeline for Distributed Deep Learning	108
<i>Xiaorui Zhu (University of Science and Technology of China, China), Lei Gong (University of Science and Technology of China, China), Zongwei Zhu (University of Science and Technology of China, China), and Xuehai Zhou (University of Science and Technology of China, China)</i>	
AddrArmor: An Address-Based Runtime Code-Reuse Attack Mitigation for Shared Objects at the Binary-Level	117
<i>Kunli Lin (Chinese Academy of Sciences, China), Haojun Xia (Chinese Academy of Sciences, China), Kun Zhang (Chinese Academy of Sciences, China), and Bibo Tu (Chinese Academy of Sciences, China)</i>	

HyperKV: A High Performance Concurrent Key-Value Store for Persistent Memory 125
Penghao Sun (Shanghai Jiao Tong University, China), Dongliang Xue (Shanghai Jiao Tong University, China), Litong You (Shanghai Jiao Tong University, China), Yan Yan (Shanghai Jiao Tong University, China), and Linpeng Huang (Shanghai Jiao Tong University, China)

ISPA 4

DRAM: Dragonfly Routing Algorithm on Multi-Objects by Optimal Thresholds 135
Yihuan Qian (University of Shanghai for Science and Technology, China), Songwen Pei (University of Shanghai for Science and Technology, China), Jihong Yuan (University of Shanghai for Science and Technology, China), Dianle Zhou (National University of Defense Technology, China), Tong Liu (Shanghai University, China), and Linghe Kong (Shanghai Jiao Tong University, China)

EPINE: Enhanced Proximity Information Network Embedding 143
Ming Xu (Nanjing University, China), Luoyi Zhang (Nanjing University, China), Baoming Zhang (Nanjing University, China), Meng Cao (Nanjing University, China), Jinliang Yuan (Nanjing University, China), and Chongjun Wang (Nanjing University, China)

Accuracy vs. Efficiency: Achieving Both through Hardware-Aware Quantization and Reconfigurable Architecture with Mixed Precision 151
Libo Chang (Northwestern Polytechnical University, China), Shengbing Zhang (Northwestern Polytechnical University, China), Huimin Du (Xi'an University of Posts and Telecommunication, China), Shiyu Wang (Northwestern Polytechnical University and Engineering Research Center of Embedded System Integration, China), Meikang Qiu (Texas A&M University-Commerce, USA), and Jihe Wang (Northwestern Polytechnical University and Engineering Research Center of Embedded System Integration, China)

AutoTSMM: An Auto-Tuning Framework for Building High-Performance Tall-and-Skinny Matrix-Matrix Multiplication on CPUs 159
Chendi Li (Institute of Computing Technology of the Chinese Academy of Sciences, China), Haipeng Jia (Institute of Computing Technology of the Chinese Academy of Sciences, China), Hang Cao (Institute of Computing Technology of the Chinese Academy of Sciences, China), Jianyu Yao (Institute of Computing Technology of the Chinese Academy of Sciences, China), Boqian Shi (Indiana University Bloomington, USA), Chunyang Xiang (Institute of Computing Technology of the Chinese Academy of Sciences, China), Jinbo Sun (Institute of Computing Technology of the Chinese Academy of Sciences, China), Pengqi Lu (Institute of Computing Technology of the Chinese Academy of Sciences, China), and Yunquan Zhang (Institute of Computing Technology of the Chinese Academy of Sciences, China)

KBP: Mining Block Access Pattern for I/O Prediction with K-Truss 167
Jia Ma (Sun Yat-sen University, China), Xianqi Zheng (Sun Yat-sen University, China), Yubo Liu (Sun Yat-sen University, China), and Zhiguang Chen (Sun Yat-sen University, China)

ISPA 5

ECCH: Erasure Coded Consistent Hashing for Distributed Storage Systems	177
<i>Yinglong Xiong (Institute of Information Engineering, Chinese Academy of Sciences, China, University of Chinese Academy of Sciences, China), Jiang Zhou (Institute of Information Engineering, Chinese Academy of Sciences, China), Lin Su (Institute of Information Engineering, Chinese Academy of Sciences, China, University of Chinese Academy of Sciences, China), Weiping Wang (Institute of Information Engineering, Chinese Academy of Sciences, China), and Yong Chen (Texas Tech University, USA)</i>	
CMSS: Collaborative Modeling of Safety and Security Requirements for Network Protocols	185
<i>Zhihao Liu (East China Normal University, China), Qiang Wang (SUSTech, China), Yongjian Li (Chinese Academy of Sciences, China), and Yongxin Zhao (East China Normal University, China)</i>	
D ² Graph: An Efficient and Unified Out-of-Core Graph Computing Model	193
<i>Baoke Li (University of Chinese Academy of Sciences, China & Institute of Information Engineering, Chinese Academy of Sciences, China), Cong Cao (Institute of Information Engineering, Chinese Academy of Sciences, China), Yuhai Lu (Institute of Information Engineering, Chinese Academy of Sciences, China), Yanbing Liu (Institute of Information Engineering, Chinese Academy of Sciences, China), Baohui Li (Chinese Information Technology Security Evaluation Center, China), Binxing Fang (Institute of Electronic and Information Engineering of UESTC in Guangdong, China), and Jianhui Fu (Shandong Institutes of Industrial Technology, China)</i>	
E-VM: An Elastic Virtual Machine Scheduling Algorithm to Minimize the Total Cost of Ownership in a Hybrid Cloud	202
<i>Milan M. Shetti (Rocket Software, USA), Bingzhe Li (Oklahoma State University, USA), and David H.C. Du (University of Minnesota, USA)</i>	
SM9-Based Anonymous Search over Encrypted Data	212
<i>Ke Ren (Beijing Institute of Technology, China), Peng Jiang (Beijing Institute of Technology, China), Liehuang Zhu (Beijing Institute of Technology, China), and Keke Gai (Beijing Institute of Technology, China)</i>	

ISPA 6

GR-ADMM: A Communication Efficient Algorithm Based on ADMM	220
<i>Xin Huang (Shanghai University, China), Guozheng Wang (Shanghai University, China), and Yongmei Lei (Shanghai University, China)</i>	
FedGroup: Efficient Federated Learning via Decomposed Similarity-Based Clustering	228
<i>Moming Duan (Chongqing University, China), Duo Liu (Chongqing University, China), Xinyuan Ji (Xi'an Jiaotong University, China), Renping Liu (Chongqing University, China), Liang Liang (Chongqing University, China), Xianzhang Chen (Chongqing University, China), and Yujuan Tan (Chongqing University, China)</i>	

FastTune: Timely and Precise Congestion Control in Data Center Network	238
<i>Renjie Zhou (National University of Defense Technology, China), Dezun Dong (National University of Defense Technology, China), Shan Huang (National University of Defense Technology, China), and Yang Bai (National University of Defense Technology, China)</i>	
FGPA: Fine-Grained Pipelined Acceleration for Depthwise Separable CNN in Resource Constraint Scenarios	246
<i>Chunhua Xiao (Chongqing University, China), Dandan Xu (Chongqing University, China), Shi Qiu (Chongqing University, China), Chen Shi (Chongqing University, China), and Kun Ning (Chongqing University, China)</i>	
PAARD: Proximity-Aware All-Reduce Communication for Dragonfly Networks	255
<i>Junchao Ma (National University of Defense Technology, China), Dezun Dong (National University of Defense Technology, China), Cunlu Li (National University of Defense Technology, China), Ke Wu (National University of Defense Technology, China), and Liquan Xiao (National University of Defense Technology, China)</i>	

ISPA 7

WST+iMPT: A High-Performance Incremental Verification World State Model for Massive Accounts	263
<i>Lanju Kong (Shandong University & Dareway Software Co., Ltd., China), Yaming Dou (Shandong University, China), Qingqing Yin (Shandong University, China), Xinping Min (Shandong University & Dareway Software Co., Ltd., China), and Qingzhong Li (Shandong University & Dareway Software Co., Ltd., China)</i>	
NetANNS: A High-Performance Distributed Search Framework Based on In-Network Computing ..	271
<i>Penghao Zhang (Institute of Computing Technology Chinese Academy of Sciences, China & University of Chinese Academy of Sciences, China), Heng Pan (Institute of Computing Technology Chinese Academy of Sciences, China & Purple Mountain Laboratories, China), Zhenyu Li (Institute of Computing Technology Chinese Academy of Sciences, China & Purple Mountain Laboratories, China), Gaogang Xie (Computer Network Information Center Chinese Academy of Sciences, China), and Penglai Cui (Institute of Computing Technology Chinese Academy of Sciences, China & University of Chinese Academy of Sciences, China)</i>	
PCGraph: Accelerating GNN Inference on Large Graphs via Partition Caching	279
<i>Lizhi Zhang (National University of Defense Technology, China), Zhiquan Lai (National University of Defense Technology, China), Yu Tang (National University of Defense Technology, China), Dongsheng Li (National University of Defense Technology, China), Feng Liu (National University of Defense Technology, China), and Xiaochun Luo (PLA News Media Center, China)</i>	
QuickCDC: A Quick Content Defined Chunking Algorithm Based on Jumping and Dynamically Adjusting Mask Bits	288
<i>Zhen Xu (Institute of Software, Chinese Academy of Sciences, China & University of Chinese Academy of Sciences, China) and Wenbo Zhang (Institute of Software, Chinese Academy of Sciences, China)</i>	

BA-BNN: Detect LDoS Attacks in SDN Based on Bat Algorithm and BP Neural Network	300
<i>Xinmeng Li (Hunan University, China), Nengguang Luo (Hunan University, China), Dan Tang (Hunan University, China), Zhiqing Zheng (Hunan University, China), Zheng Qin (Hunan University, China), and Xinxiang Gao (Hunan University, China)</i>	

ISPA 8

Alter: Towards Optimizing Persistent Indexes in Hybrid Memory Systems	308
<i>Ziyue Xu (Nankai University, China), Lixiao Cui (Nankai University, China), Gang Wang (Nankai University, China), and Xiaoguang Liu (Nankai University, China)</i>	
MADC: Multi-Scale Attention-Based Deep Clustering for Workload Prediction	316
<i>Jiaming Huang (Sun Yat-sen University, China), Chuming Xiao (Sun Yat-sen University, China), Weigang Wu (Sun Yat-sen University, China), Ye Yin (Tencent Inc., China), and Hongli Chang (Tencent Inc., China)</i>	
Treator: A Fast Centralized Cluster Scheduling at Scale Based on B+ Tree and BSP	324
<i>Yuzhao Wang (Huazhong University of Science and Technology, China), Junqing Yu (Huazhong University of Science and Technology, China), and Zhibin Yu (Shenzhen Institute of Advanced Technology, CAS, China)</i>	
Dyacon: JointCloud Dynamic Access Control Model of Data Security Based on Verifiable Credentials	336
<i>Tao Zhong (Science and Technology on Parallel and Distributed Processing Laboratory, China), Junsheng Chang (National University of Defense Technology, China), Peichang Shi (Science and Technology on Parallel and Distributed Processing Laboratory, China), Linhui Li (Science and Technology on Parallel and Distributed Processing Laboratory, China), and Fei Gao (Science and Technology on Parallel and Distributed Processing Laboratory, China)</i>	
BTDetect: An Insider Threats Detection Approach Based on Behavior Traceability for IaaS Environments	344
<i>Li Lin (Beijing University of Technology, China), Shuang Li (Beijing University of Technology, China), Xuhui Lv (Beijing University of Technology, China), and Bo Li (Beihang University, China)</i>	

ISPA 9

Encrypt DNS Traffic: Automated Feature Learning Method for Detecting DNS Tunnels	352
<i>Shuai Ding (Institute of Information Engineering, Chinese Academy of Sciences, China & University of Chinese Academy of Sciences, China), Daoqing Zhang (Institute of Information Engineering, Chinese Academy of Sciences, China), Jingguo Ge (Institute of Information Engineering, Chinese Academy of Sciences, China & University of Chinese Academy of Sciences, China), Xiaowei Yuan (Institute of Information Engineering, Chinese Academy of Sciences, China & University of Chinese Academy of Sciences, China), and Xinhui Du (Institute of Information Engineering, Chinese Academy of Sciences, China & University of Chinese Academy of Sciences, China)</i>	

IMOPSOQ: Offloading Dependent Tasks in Multi-Access Edge Computing	360
<i>Shuyue Ma (Shandong Normal University, China), Shudian Song (Shandong Normal University, China), Lingyu Yang (Shandong Normal University, China), Jingmei Zhao (Shandong Normal University, China), Feng Yang (Shandong Normal University, China), and Linbo Zhai (Shandong Normal University, China)</i>	
BEADS: Blockchain-Empowered Auction in Decentralized Storage	368
<i>Xinxuan Huang (Guangdong University of Technology, China), Jigang Wu (Guangdong University of Technology, China), Jiaying Li (Guangdong University of Technology, China), and Chengpeng Xia (Guangdong University of Technology, China)</i>	
Finding Runtime Usable Gadgets: On the Security of Return Address Authentication	374
<i>Qizhen Xu (Institute of Information Engineering, Chinese Academy of Sciences & University of Chinese Academy of Sciences, China), Zhijie Zhang (Institute of Information Engineering, Chinese Academy of Sciences & University of Chinese Academy of Sciences, China), Lin Zhang (Center of Engineering and Construction Service, China), Liwei Chen (Institute of Information Engineering, Chinese Academy of Sciences & University of Chinese Academy of Sciences, China), and Gang Shi (Institute of Information Engineering, Chinese Academy of Sciences & University of Chinese Academy of Sciences, China)</i>	
ConvMB: Improving Convolution-Based Knowledge Graph Embeddings by Adopting Multi-Branch 3D Convolution Filters	382
<i>Xiaobo Guo (Institute of Information Engineering, Chinese Academy of Sciences, China & University of Chinese Academy of Sciences, China), Fali Wang (Institute of Information Engineering, Chinese Academy of Sciences, China), Neng Gao (Institute of Information Engineering, Chinese Academy of Sciences, China), Zeyi Liu (Institute of Information Engineering, Chinese Academy of Sciences, China), and Kai Liu (Institute of Information Engineering, Chinese Academy of Sciences, China)</i>	

ISPA 10

Understanding the Runtime Overheads of Deep Learning Inference on Edge Devices	390
<i>Xiu Ma (Jilin University, China), Guangli Li (Institute of Computing Technology, Chinese Academy of Sciences, China & University of Chinese Academy of Sciences, China), Lei Liu (Jilin University, China), Huaxiao Liu (Jilin University, China), Lei Liu (Institute of Computing Technology, Chinese Academy of Sciences, China), and Xiaobing Feng (Institute of Computing Technology, Chinese Academy of Sciences, China & University of Chinese Academy of Sciences, China)</i>	
Parameter Servers Placement for Distributed Deep Learning in Edge Computing	398
<i>Jiaquan Yan (Guangdong University of Technology, China), Yalan Wu (Guangdong University of Technology, China), Jigang Wu (Guangdong University of Technology, China), and Long Chen (Guangdong University of Technology, China)</i>	

Alleviating Imbalance in Synchronous Distributed Training of Deep Neural Networks	405
<i>Haiyang Lin (Institute of Computing Technology, Chinese Academy of Sciences, China & University of Chinese Academy of Sciences, China), Mingyu Yan (Institute of Computing Technology, Chinese Academy of Sciences, China & University of Chinese Academy of Sciences, China), Duo Wang (Institute of Computing Technology, Chinese Academy of Sciences, China & University of Chinese Academy of Sciences, China), Wenming Li (Institute of Computing Technology, Chinese Academy of Sciences, China & University of Chinese Academy of Sciences, China), Xiaochun Ye (Institute of Computing Technology, Chinese Academy of Sciences, China & University of Chinese Academy of Sciences, China; State Key Laboratory of Mathematical Engineering and Advanced Computing, China), Zhimin Tang (Institute of Computing Technology, Chinese Academy of Sciences, China & University of Chinese Academy of Sciences, China), and Dongrui Fan (Institute of Computing Technology, Chinese Academy of Sciences, China & University of Chinese Academy of Sciences, China)</i>	
A Distributed Computation Offloading Scheduling Framework Based on Deep Reinforcement Learning	413
<i>Bin Dai (Beihang University, China), Tao Ren (Beihang University, China), Jianwei Niu (Beihang University, China, Zhengzhou University, China), Zheyuan Hu (Beihang University, China), Shucheng Hu (Beihang University, China), and Meikang Qiu (Texas A&M University-Commerce, USA)</i>	
Exploration of the Influence on Training Deep Learning Models by Watermarked Image Dataset... 421	
<i>Shiqin Liu (China University of Geosciences, China), Shiyuan Feng (China University of Geosciences, China), Jinxia Wu (China University of Geosciences, China), Wei Ren (China University of Geosciences, China), Weiqi Wang (China University of Geosciences, China), and Wenwen Zheng (China University of Geosciences, China)</i>	

ISPA 11

Grouping Synchronous to Eliminate Stragglers with Edge Computing in Distributed Deep Learning	429
<i>Zhiyi Gui (Beijing University of Posts and Telecommunications, China), Xiang Yang (Beijing University of Posts and Telecommunications, China), Hao yang (Huawei, China), Wei Li (Beijing University of Posts and Telecommunications, China), Lei Zhang (Beijing University of Posts and Telecommunications, China), Qi Qi (Beijing University of Posts and Telecommunications, China), Jingyu Wang (Beijing University of Posts and Telecommunications, China), Haifeng Sun (Beijing University of Posts and Telecommunications, China), and Jianxin Liao (Beijing University of Posts and Telecommunications, China)</i>	
Novel Resource Allocation Algorithm of Edge Computing Based on Deep Reinforcement Learning Mechanism	437
<i>Degan Zhang (Tianjin University of Technology, China), Hongrui Fan (Tianjin University of Technology, China), and Jie Zhang (Tianjin University of Technology, China)</i>	

Intrusion Detection Method Based on Deep Learning	445
<i>Zhijun Wu (Civil Aviation University of China, China), Cheng Liang (Civil Aviation University of China, China), and Yuqi Li (Civil Aviation University of China, China)</i>	
A Two-Stage Replica Management Mechanism for Latency-Aware Applications in Multi-Access Edge Computing	453
<i>Yang Liang (Central South University, China), Zhigang Hu (Central South University, China), and Liu Yang (Central South University, China)</i>	
Joint Optimization of Data Caching and Task Scheduling Based on Information Entropy for Mobile Edge Computing	460
<i>Pengwei Wang (Donghua University, China, Engineering Research Center of Digitalized Textile and Fashion Technology, Ministry of Education, China), Yajun Zhao (Donghua University, China), and Zhaohui Zhang (Donghua University, China)</i>	

ISPA 12

Towards Fast Network Intrusion Detection Based on Efficiency-Preserving Federated Learning	468
<i>Tian Dong (Shanghai Jiao Tong University, China), Han Qiu (Tsinghua University, China), Jialiang Lu (Shanghai Jiao Tong University, China), Meikang Qiu (Texas A&M University, USA), and Chun Fan (Peng Cheng Laboratory, China & Peking University, China)</i>	
Unsupervised Anomaly Detection with Variational Auto-Encoder and Local Outliers Factor for KPIs	476
<i>Shili Yan (Hunan University of Science and Technology, China), Bing Tang (Hunan University of Science and Technology, China), Jincheng Luo (Hunan University of Science and Technology, China), Xing Fu (Hunan University of Science and Technology, China), and Xiaoyuan Zhang (Hunan University of Science and Technology, China)</i>	
An Application-Level Failure Detection Algorithm Based on a Robust and Efficient Torus-Tree for HPC	484
<i>Yingjun Ye (Sun Yat-sen University, China), Yongdong Zhang (Sun Yat-sen University, China), and Weicai Ye (Sun Yat-sen University, China)</i>	
Diagnosing Performance Issues in Microservices with Heterogeneous Data Source	493
<i>Chuanjia Hou (Peking University, China), Tong Jia (Peking University, China), Yifan Wu (Peking University, China), Ying Li (Peking University, China), and Jing Han (ZTE Corp., China)</i>	
Entropy and Autoencoder-Based Outlier Detection in Mixed-Type Network Traffic Data	501
<i>Zhongyang Wang (National University of Defense Technology, China), Yijie Wang (National University of Defense Technology, China), Zhenyu Huang (National University of Defense Technology, China), and Yongjun Wang (National University of Defense Technology, China)</i>	

ISPA 13

Domain Adaptive Semantic Segmentation via Image Translation and Representation Alignment ... 509	
<i>Jingxuan Kang (University of Liverpool, UK), Bin Zang (Beijing Institute of Technology, China), and Weipeng Cao (Shenzhen University, China)</i>	
Image Distillation Based Screening for X-Ray Crystallography Diffraction Images 517	
<i>Lingyao Chen (Shanghai Information Technology Research Center, China), Kang Xu (Shanghai Advanced Research Institute, Chinese Academy of Sciences, China), Xiaoying Zheng (Shanghai Advanced Research Institute, Chinese Academy of Sciences, China), Yongxin Zhu (Shanghai Advanced Research Institute, Chinese Academy of Sciences, China), and Yi Jing (Shanghai Information Technology Research Center, China & Shanghai Advanced Research Institute, Chinese Academy of Sciences, China)</i>	
Synthesis and Segmentation Method of Cross-Staining Style Nuclei Pathology Image Based on Adversarial Learning 522	
<i>Ziheng Zhou (Wuhan University of Science and Technology, China), Hong Guo (Wuhan University of Science and Technology, China), Yuwen Guo (Wuhan University of Science and Technology, China), and Huanhuan Sheng (Wuhan University of Science and Technology, China)</i>	
Real-Time Ship Detection from Infrared Images through Multi-Feature Fusion 533	
<i>Rui Miao (Beihang University, China), Hongxu Jiang (Beihang University, China), Fangzheng Tian (Beihang University, China), Xiaobin Li (Beihang University, China), Yonghua Zhang (Beihang University, China), and Dong Dong (Beihang University, China)</i>	
Movie Big Data Intelligent Recommendation System Based on Knowledge Graph 539	
<i>Gang Qiu (Shandong University, China) and Yanli Guo (Changji University, China)</i>	

ISPA 14

A Heterogeneous Stochastic Computing Multiplier for Universally Accurate and Energy-Efficient DNNs 547	
<i>Jihe Wang (Northwestern Polytechnical University, China), Hao Chen (Northwestern Polytechnical University, China), Danghui Wang (Northwestern Polytechnical University, China), Kuizhi Mei (Xi'an Jiaotong University, China), Shengbing Zhang (Northwestern Polytechnical University, China), and Xiaoya Fan (Northwestern Polytechnical University, China)</i>	
Energy-Efficient Scheduling Algorithms with Reliability Goal on Heterogeneous Embedded Systems 555	
<i>Yu Han (Wuhan University of Science and Technology, China), Wei Hu (Wuhan University of Science and Technology, China), Jing Liu (Wuhan University of Science and Technology, China), and Yu Gan (Wuhan University of Science and Technology, China)</i>	

An Efficient Hybrid MPI/OpenMP Parallelization of the Asynchronous ADMM Algorithm	563
<i>Qinnan Qiu (Shanghai University, China), Yongmei Lei (Shanghai University, China), Dongxia Wang (Shanghai University, China), and Guozheng Wang (Shanghai University, China)</i>	
Task Tree Partition and Subtree Allocation for Heterogeneous Multiprocessors	571
<i>Suna He (Guangdong University of Technology, China), Jigang Wu (Guangdong University of Technology, China), Bing Wei (Guangdong University of Technology, China), and Jiaxin Wu (Guangdong University of Technology, China)</i>	
An Efficient Scheduling Algorithm for Distributed Heterogeneous Systems with Task Duplication Allowed	578
<i>Hao Shi (East China Normal University, China), Yixiang Chen (East China Normal University, China & MOE Engineering Research Center for Software/Hardware Co-Design Technology and Application, China), and Jinyi Xu (East China Normal University, China)</i>	

ISPA 15

An Effective Outlier Detection Method for EAF Based on an Iterative Heterogeneous Ensemble.....	588
<i>Jiong Zhang (Shandong University, China & Shandong Institute of Commerce and Technology, China), Biao Wang (Shenyang Aerospace University, China), and Hongjun Dai (Shandong University, China)</i>	
A Genetic Algorithm for Scheduling in Heterogeneous Multicore System Integrated with FPGA	594
<i>Qingyuan Jiang (East China Normal University, China), Jinyi Xu (East China Normal University, China), and Yixiang Chen (East China Normal University & Research Center for Software/Hardware Co-Design Technology and Application, China)</i>	
Learning Heterogeneous DAG Tasks Scheduling Policies with Efficient Neural Network Evolution	603
<i>Weiyu Tan (Hangzhou Dianzi University, China), Tian Ling (Hangzhou Dianzi University, China), Zhenyu Zeng (Hangzhou Dianzi University, China), Ying Tao (Hangzhou Dianzi University, China), and Yuxia Cheng (Hangzhou Dianzi University, China)</i>	
An Edge Computing Architecture and Application Oriented to Distributed Microgrid	611
<i>Hong Guo (Wuhan University of Science and Technology, China) and Hanjing Cui (Wuhan University of Science and Technology, China)</i>	
Application Virtualization: An Agent Encapsulation of Software in Virtual Machines to Archive the Execution Performance in Hosts	618
<i>Yifan Liang (Shandong University, China) and Hongjun Dai (Shandong University, China)</i>	

ISPA 16

Analysis of BBR's Non-Queuing Optimal Model	626
<i>Zhijun Wu (Civil Aviation University of China, China), Junjun Guo (Civil Aviation University of China, China), and Weihang Cui (Civil Aviation University of China, China)</i>	
Fault Tolerant XY-YX Routing Algorithm Supporting Backtracking Strategy for NoC	632
<i>Jianfeng An (Northwestern Polytechnical University, China), Hongjun You (Shanghai Academy of Spaceflight Technology, China), Jinhua Sun (Northwestern Polytechnical University, China), and Jiawei Cao (Northwestern Polytechnical University)</i>	
Research and Application of a Multidimensional Association Rules Mining Algorithm Based on Hadoop	636
<i>Hong Guo (Wuhan University of Science and Technology, China) and Nan Guo (Wuhan University of Science and Technology, China)</i>	
A Lightweight, Privacy-Preserving Tensor Completion Framework for Internet of Things	644
<i>Shuyu Wu (Shanghai Jiao Tong University, China), Linghe Kong (Shanghai Jiao Tong University, China), Qiao Xiang (Xiamen University, China), Zhenzhe Zheng (Shanghai Jiao Tong University, China), Luoyi Fu (Shanghai Jiao Tong University), and Guihai Chen (Shanghai Jiao Tong University, China)</i>	
Hashing Based Data Distribution in Heterogeneous Storage	652
<i>Jiang Zhou (Institute of Information Engineering, Chinese Academy of Sciences, China), Lin Su (Institute of Information Engineering, Chinese Academy of Sciences, China & University of Chinese Academy of Sciences, China), Weiping Wang (Institute of Information Engineering, Chinese Academy of Sciences, China), and Yong Chen (Texas Tech University, USA)</i>	

ISPA 17

A Novel Shape-Based Robotic Sorting Approach Based on Computer Vision	660
<i>Tanhong Chen (Beihang University, China), Tao Ren (Beihang University, China), Jianwei Niu (Beihang University, China & Zhengzhou University, China), and Qingfeng Li (Beihang University, China)</i>	
Trajectory Privacy Protection Method Based on Shadow Vehicles	668
<i>Yaqiong Ma (Mongolia University, China), Xiangyu Bai (Mongolia University, China), and Zhaoran Wang (Mongolia University, China)</i>	

CPU-GPU Collaborative Acceleration of Bulletproofs--A Zero-Knowledge Proof Algorithm	674

ISPA 35

An Adaptive Time Stepping Algorithm and Its Application to Platelet Aggregation Simulation.	1360
<i>Weicai Ye (Sun Yat-sen University, China), Hao Wu (Sun Yat-sen University, China), Zhijun Tan (Sun Yat-sen University, China), and Qingsong Zou (Sun Yat-sen University, China)</i>	
PANDA: Population Automatic Neural Distributed Algorithm for Deep Learning	1370
<i>Jia Wei (Xi'an Jiaotong University, China), Xingjun Zhang (Xi'an Jiaotong University, China), Zeyu Ji (Xi'an Jiaotong University, China), Jingbo Li (Xi'an Jiaotong University, China), and Zheng Wei (Xi'an Jiaotong University, China)</i>	
Modeling and Solution Algorithm of Virtual Machines Optimization Provision Problem for Application Deployment in Public Cloud	1378
<i>Fanchao Meng (Harbin Institute of Technology, China), Qingran Ji (Harbin Institute of Technology, China), Dianhui Chu (Harbin Institute of Technology, China), and Xuequan Zhou (Harbin Institute of Technology, China)</i>	
Multi-Network Embedding for Missing Point-of-Interest Identification	1386
<i>Junhang Wu (Wuhan University, China), Ruimin Hu (Wuhan University, China), Dengshi Li (Jiangnan University, China), Yilin Xiao (Wuhan University, China), Lingfei Ren (Wuhan University, China), and Wenyi Hu (Wuhan University, China)</i>	

Coupled Self-Exciting Process for Information Diffusion Prediction	1394
<i>Yuyang Liu (Chinese Academy of Sciences, China & University of Chinese Academy of Sciences, China), Yuxiang Ma (Henan University, China), Junruo Gao (Chinese Academy of Sciences, China & University of Chinese Academy of Sciences, China), Zefang Zhao (Chinese Academy of Sciences, China & University of Chinese Academy of Sciences, China), and Jun Li (Chinese Academy of Sciences, China & University of Chinese Academy of Sciences, China)</i>	

ISPA 36

Practical Deanonymization Attack in Ethereum Based on P2P Network Analysis	1402
<i>Yue Gao (Institute of Information Engineering, Chinese Academy of Sciences, China & National Engineering Laboratory for Information Security Technologies, China), Jinqiao Shi (Institute of Information Engineering, Chinese Academy of Sciences, China & Beijing University of Post and Telecommunications, China), Xuebin Wang (Institute of Information Engineering, Chinese Academy of Sciences, China & National Engineering Laboratory for Information Security Technologies, China), Ruisheng Shi (Beijing University of Post and Telecommunications, China), Zelin Yin (Institute of Information Engineering, Chinese Academy of Sciences, China & National Engineering Laboratory for Information Security Technologies, China), and Yanyan Yang (People's Public Security University of China, China)</i>	
Lossless Compression of Bitstream Configuration Files: Towards FPGA Cloud	1410
<i>Jinyu Wang (Xi'an Jiaotong University, China), Yifei Kang (Xi'an Jiaotong University, China), Yaqi Feng (Xi'an Jiaotong University, China), Yiwen Li (Xi'an Jiaotong University, China), Weiguo Wu (Xi'an Jiaotong University, China), and Guoliang Xing (Chinese University of Hong Kong, China)</i>	
ORIC: A Self-Adjusting Blockchain Protocol with High Throughput	1422
<i>Ting Xiong (National University of Defense Technology, China), Tao Xie (National University of Defense Technology, China), Jin Xie (Peking University, China), and Xiaochun Luo (PLA News Media Center, China)</i>	
Practical Multi-Authority Ciphertext Policy Attribute-Based Encryption from R-LWE	1435
<i>Jianguo Sun (Harbin Engineering University, China), Yuqing Qiao (Harbin Engineering University, China), Zechao Liu (Harbin Engineering University, China), Yitao Chen (Wuhan Maritime Communication Research Institute, China), and Yang Yang (Harbin Engineering University, China)</i>	
Parallel Counterfactual Regret Minimization in Crowdsourcing Imperfect-Information Expanded Game	1444
<i>Jie Zhang (Nanjing University, China), Kefan Li (Nanjing University, China), Baoming Zhang (Nanjing University, China), Ming Xu (Nanjing University, China), and Chongjun Wang (Nanjing University, China)</i>	

ISPA 37

Attention-Based Encoder-Decoder Recurrent Neural Networks for HTTP Payload Anomaly Detection	1452
<i>Shang Wu (National University of Defense Technology, China) and Yijie Wang (National University of Defense Technology, China)</i>	
Fast Settlement Scheme of Aviation Business Privacy Preservation Based on Consortium Blockchain	1460
<i>Xingguang Zhou (Civil Aviation Management Institute of China, China), Ziyu Meng (Beihang University, China), and Yi Liu (Civil Aviation Management Institute of China, China)</i>	
Off-Chain Anonymous Payment Channel Scheme Based on Mimblewimble	1469
<i>Zhenyu Guan (Beihang University, China), Lixin Zhang (Beihang University, China), Yingpeng Zhang (Beihang University, China), Dawei Li (Beihang University, China), Yu Sun (Beihang University, China), and Jian Cui (Beihang University, China)</i>	
Base Station Handover Based on User Trajectory Prediction in 5G Networks	1476
<i>Yuxiang Ma (Henan University, China), Xuefei Chen (Henan University, China), and Lei Zhang (Henan University, China)</i>	
Efficient Wireless Static Chargers Deployment for UAV Networks	1483
<i>Mengqi Li (Nanjing University of Aeronautics and Astronautics, China), Liang Liu (Nanjing University of Aeronautics and Astronautics, China), Yanlin Wang (Nanjing University of Aeronautics and Astronautics, China), Jianfei Peng (Nanjing University of Aeronautics and Astronautics, China), Jie Xi (Nanjing University of Aeronautics and Astronautics, China), and Lisong Wang (Nanjing University of Aeronautics and Astronautics, China)</i>	

11th IEEE International Conference on Big Data and Cloud Computing (IEEE BDCloud 2021)

The Effect of Text Ambiguity on Creating Policy Knowledge Graphs	1491
<i>Anantaa Kotal (University of Maryland, USA), Anupam Joshi (University of Maryland, USA), and Karuna Pande Joshi (University of Maryland, USA)</i>	
An Optimum Decision Making Framework for Allocating Spot Instances to Execute Batch Workload in Cloud	1501
<i>Naghmeah Dezhhabad (University of Victoria, Canada), Sudhakar Ganti (University of Victoria, Canada), and Gholamali C. Shoja (University of Victoria, Canada)</i>	

14th IEEE International Conference on Social Computing and Networking (IEEE SocialCom 2021)

An Analysis of Multi-Modal Deep Learning for Art Price Appraisal	1509
<i>Bin Li (Columbia University, USA) and Teng Liu (New Jersey, USA)</i>	

A Survey on Privacy Approaches for Social Networks	1514
<i>Regina Marin (Instituto Federal Goiano, Brazil) and Luciano Gallegos (University of Fortaleza, Brazil)</i>	
Using Content Analysis and Machine Learning to Identify COVID-19 Information Relevant to Low-Income Households on Social Media	1522
<i>Sarthak Khanal (Kansas State University, USA), Rus Refati (University of Tennessee-Knoxville, USA), Kyle Glandt (Kansas State University, USA), Doina Caragea (Kansas State University, USA), Sifan Xu (University of Tennessee-Knoxville, USA), and Chien-fei Chen (University of Tennessee-Knoxville, USA)</i>	
Semi-Supervised Self Training to Assess the Credibility of Tweets	1532
<i>Leyu Gao (North Carolina Agricultural and Technical State University, USA), Sandeep Shah (North Carolina Agricultural and Technical State University, USA), Nasser Assery (North Carolina Agricultural and Technical State University, USA), Xiaohong Yuan (North Carolina Agricultural and Technical State University, USA), Xiuli Qu (North Carolina Agricultural and Technical State University, USA), and Kaushik Roy (North Carolina Agricultural and Technical State University, USA)</i>	
Sarcasm Detection in Politically Motivated Social Media Content	1538
<i>Hieu Nguyen (University of Connecticut, USA), Jihye Moon (University of Connecticut, USA), Nijhum Paul (University of Connecticut, USA), and Swapna Gokhale (University of Connecticut, USA)</i>	
MediNER: Understanding Diabetes Management Strategies Based on Social Media Discourse	1546
<i>Oladapo Oyeboode (Dalhousie University, Canada) and Rita Orji (Dalhousie University, Canada)</i>	

11th IEEE International Conference on Sustainable Computing and Communications (IEEE SustainCom 2021)

A Survey of Stochastic Computing in Energy-Efficient DNNs On-Edge	1554
<i>Danghui Wang (Northwestern Polytechnical University, China), Zhaoqing Wang (Northwestern Polytechnical University, China), Linfan Yu (Northwestern Polytechnical University, China), Ying Wu (Northwestern Polytechnical University, China), Jiaqi Yang (Northwestern Polytechnical University, China), Kuizhi Mei (Xi'an Jiaotong University, China), and Jihe Wang (Northwestern Polytechnical University, China)</i>	

14th IEEE International Conference on Security, Privacy, and Anonymity in Computation, Communication, and Storage (IEEE SpaCCS 2021)

SpaCCS 1

Modelling a Communication Channel under Jamming: Experimental Model and Applications	1562
<i>Pietro Tedeschi (Hamad Bin Khalifa University, Qatar), Savio Sciancalepore (Eindhoven University of Technology, The Netherlands), and Roberto Di Pietro (Hamad Bin Khalifa University, Qatar)</i>	
Synthetic Differential Privacy Data Generation for Revealing Bias Modelling Risks	1574
<i>Matthew Wilchek (George Washington University, USA) and Yingjie Wang (Georgetown University, USA)</i>	
Designing a User Interface for Improving the Usability of a Statistical Disclosure Control Tool	1581
<i>Anshika Rawat (Delft University of Technology, The Netherlands), Marijn Janssen (Delft University of Technology Delft, The Netherlands), Mortaza S. Bargh (Research and Documentation Centre at Ministry of Justice and Security, The Netherlands), Mortaza S. Bargh (Rotterdam University of Applied Sciences, The Netherlands), and Sunil Choenni (Rotterdam University of Applied Sciences, The Netherlands)</i>	
Machine Learning with Reconfigurable Privacy on Resource-Limited Computing Devices	1592
<i>Sana Imtiaz (KTH Royal Institute of Technology, Sweden & Université Catholique de Louvain, Belgium), Zannatun N. Tania (KTH Royal Institute of Technology, Sweden), Hassan Nazeer Chaudhry (Politecnico di Milano, Italy), Muhammad Arsalan (Technische Universität Braunschweig, Germany), Ramin Sadre (Université Catholique de Louvain, Belgium), and Vladimir Vlassov (KTH Royal Institute of Technology, Sweden)</i>	

SpaCCS 2

SPLinux: An Information Flow Secure Linux	1603
<i>Parjanya Vyas (IIT Bombay, India), RK Shyamasundar (IIT Bombay, India), Bhagyesh Patil (IIT Bombay, India), Snehal Borse (IIT Bombay, India), and Satyaki Sen (IIT Bombay, India)</i>	
A Comparative Study of Credentialed Vulnerability Scanning and Non-Credentialed Vulnerability Scanning	1613
<i>Anjie Chen (Communication University of China, China) and Zhibing Zhang (China Academy of Information and Communications Technology, China)</i>	
Identifying GDPR Privacy Violations Using an Augmented LSTM: Toward an AI-Based Violation Alert System	1617
<i>Ahmed Aleroud (Augusta University, USA), Faten Masalha (Yarmouk University, Jordan), and Ahmad Saifan (Yarmouk University, Jordan)</i>	

Malicious Conspiracy on Permissioned Blockchain to Mount Denial-of-Endorsement Attacks 1625

Siyuan Zheng (Tongji University, China), Changqing Yin (Tongji University, China), and Bin Wu (Institute of Information Engineering, Chinese Academy of Sciences, China & University of Chinese Academy of Sciences, China)

Workshops

International Workshop on Artificial Intelligence for Intelligent Network Management (AINets 2021)

Artificial Accurate Time-Stamp in Network Adapters 1631

Wojciech Wásko (Nvidia, Poland), Dotan David Levi (Nvidia, Israel), Teferet Geula (Nvidia, Israel), and Amit Mandelbaum (Nvidia, Israel)

Centralized Graph Based TSCH Scheduling for IoT Network Applications 1639

Nikumani Choudhury (BITS Pilani, India), Moustafa M. Nasralla (Prince Sultan University, Saudi Arabia), Prakhar Gupta (BITS Pilani, India), and Ikram Ur Rehman (University of West London, UK)

13th International Workshop on Cyberspace Security and Artificial Intelligence (CAI 2021)

A Study of Classifying Advanced Persistent Threats with Multi-Layered Deep Learning Approaches 1645

Yen-Hung (Frank) Hu (Norfolk State University, USA) and Chung-Chu (George) Hsieh (Norfolk State University, USA)

Perturbation of Image-Based Malware Detection with Smali Level Morphing Techniques 1651

Federico Gerardi (Geckosoft, Italy), Giacomo Iadarola (National Research Council of Italy, Italy), Fabio Martinelli (National Research Council of Italy-Pisa, Italy), Antonella Santone (University of Molise, Italy), and Francesco Mercaldo (National Research Council of Italy, Italy & University of Molise, Italy)

Generative Adversarial Analysis of Phishing Attacks on Static and Dynamic Content of Webpages 1657

Alexander O'Mara (Syracuse University, USA), Izzat Alsmadi (Texas A&M-San Antonio, USA), and Ahmed Aleroud (Augusta University, USA)

12th International Workshop on Trust, Security and Privacy for Big Data (TrustData 2021)

Workload Prediction in Edge Computing Based on Graph Neural Network	1663
<i>Weiwei Miao (State Grid Jiangsu Electric Power Co., Ltd., China), Zeng Zeng (State Grid Jiangsu Electric Power Co., Ltd., China), Mingxuan Zhang (State Grid Jiangsu Electric Power Co., Ltd., China), Siping Quan (State Grid Taizhou Power Supply Company, China), Zhen Zhang (State Grid Jiangsu Electric Power Co., Ltd., China), Shihao Li (State Grid Jiangsu Electric Power Co., Ltd., China), Li Zhang (State Grid Jiangsu Electric Power Co., Ltd., China), and Qi Sun (State Grid Jiangsu Electric Power Co., Ltd., China)</i>	
Estimation of Ransomware Payments in Bitcoin Ecosystem	1667
<i>Ali Raheem (City University of London, UK), Rand Raheem (Middlesex University, UK), Thomas.M Chen (City University of London, UK), and Ahmed Alkhayyat (Islamic University, Iraq)</i>	
Provisioning with Fine-Grained Affinity for Container-Enabled Cloud-Edge System	1675
<i>Dingkun Yang (Jiangsu Electric Power Information Technology Co. Ltd, China), Nan Zhao (Jiangsu Electric Power Information Technology Co. Ltd, China), Hongshuang Ma (Jiangsu Electric Power Information Technology Co. Ltd, China), and Jiasheng Yang (Jiangsu Electric Power Information Technology Co. Ltd, China)</i>	
Adaptive Task Scheduling in Cloud-Edge System for Edge Intelligence Application	1682
<i>Zeng Zeng (State Grid Jiangsu Electric Power Co., Ltd., China), Weiwei Miao (State Grid Jiangsu Electric Power Co., Ltd., China), Shihao Li (State Grid Jiangsu Electric Power Co., Ltd., China), Xiaoyun Liao (State Grid Taizhou Power Supply Company, China), Mingxuan Zhang (State Grid Jiangsu Electric Power Co., Ltd., China), Rui Zhang (State Grid Jiangsu Electric Power Co., Ltd., China), and Changzhi Teng (State Grid Jiangsu Electric Power Co., Ltd., China)</i>	

7th International Symposium on Sensor-Cloud Systems (SCS 2021)

The Design of Network Query System for Automobile Inspection Data	1690
<i>Bo Ma (Sany Heavy Industry Co., Ltd., China), Kuncheng Zhuo (Xiamen Great Power Geo Information Technology Co., Ltd., China), Zanyou Su (Xiamen Great Power Geo Information Technology Co., Ltd., China), Donghai Huang (Xiamen Great Power Geo Information Technology Co., Ltd., China), and Yonglong Zou (Xiamen University of Technology, China)</i>	
Optimization of Key and Value Storage in Vector Map Rendering	1697
<i>Feng Jing (State Grid Shanxi Electric Power Company, China), Ying Jiang (Xiamen Great Power Geo Information Technology Co., Ltd., China), Shengbin Chen (Xiamen Great Power Geo Information Technology Co., Ltd., China), Xirong Lv (Xiamen Great Power Geo Information Technology Co., Ltd., China), and Jiayi He (Xiamen University of Technology, China)</i>	

Intelligent Movement Method for Trajectory Map Matching	1705
<i>Bo Zhang (Shanxi Yitong Power Grid Protection Automation Co., China), Kuncheng Zhuo (Xiamen Great Power Geo Information Technology Co., Ltd., China), Yifan Lan (Xiamen Great Power Geo Information Technology Co., Ltd., China), and Dayuan Chen (Xiamen University of Technology, China)</i>	
Research and Development of Enterprise Data Security Transmission Management System .	1710
<i>Bo Ma (Sany Heavy Industry Co. Ltd., China), Zanyou Su (Xiamen Great Power Geo Information Technology Co., Ltd., China), Kuncheng Zhuo (Xiamen Great Power Geo Information Technology Co., Ltd., China), Meng Li (Xiamen Great Power Geo Information Technology Co., Ltd., China), Donghai Huang (Xiamen Great Power Geo Information Technology Co., Ltd., China), Chuyi Yu (Xiamen University of Technology, China), and Ying Ma (Xiamen University of Technology, China)</i>	
Remote Sensing Data Backup and Recovery System for Power Industry	1717
<i>Feng Jing (State Grid Shanxi Electric Power Company, China), Donghai Huang (Xiamen Great Power Geo Information Technology Co., Ltd., China), Yifei Wang (Xiamen Great Power Geo Information Technology Co., Ltd., China), Xirong Lv (Xiamen Great Power Geo Information Technology Co., Ltd., China), and Qi Du (Xiamen University of Technology, China)</i>	
A Software Defect Detection Algorithm Based on Asymmetric Classification Evaluation	1724
<i>Yanqi Xie (Xiamen University of Technology, China), Xirong Lv (Xiamen Great Power Geo Information Technology Co., Ltd., China), Ying Jiang (Xiamen Great Power Geo Information Technology Co., Ltd., China), Zanyou Su (Xiamen Great Power Geo Information Technology Co., Ltd., China), Nan Luo (Xiamen University of Technology, China), and Ying Ma (Xiamen University of Technology, China)</i>	

11th International Symposium on Trust, Security and Privacy for Emerging Applications (TSP 2021)

Multi-Agent Reinforcement Learning for Edge Resource Management with Reconstructed Environment	1729
<i>Weiwei Miao (State Grid Jiangsu Electric Power Co., Ltd., China), Zeng Zeng (State Grid Jiangsu Electric Power Co., Ltd., China), Mingxuan Zhang (State Grid Jiangsu Electric Power Co., Ltd., China), Siping Quan (State Grid Taizhou Power Supply Company, China), Zhen Zhang (State Grid Jiangsu Electric Power Co., Ltd., China), Shihao Li (State Grid Jiangsu Electric Power Co., Ltd., China), Li Zhang (State Grid Jiangsu Electric Power Co., Ltd., China), and Qi Sun (State Grid Jiangsu Electric Power Co., Ltd., China)</i>	
Microservice Replacement Algorithm in Cloud-Edge System for Edge Intelligence	1737
<i>Weiwei Miao (State Grid Jiangsu Electric Power Co., Ltd., China), Zeng Zeng (State Grid Jiangsu Electric Power Co., Ltd., China), Shihao Li (State Grid Jiangsu Electric Power Co., Ltd., China), Lei Wei (State Grid Jiangsu Electric Power Co., Ltd., China), Chengling Jiang (State Grid Jiangsu Electric Power Co., Ltd., China), Siping Quan (State Grid Taizhou Power Supply Company, China), and Yong Li (State Grid Taizhou Power Supply Company, China)</i>	

10th International Symposium on Security and Privacy on the Internet of Things (SPIoT 2021)

Revisiting IoT Fingerprinting behind a NAT	1745
<i>Christelle Nader (University of Texas at San Antonio, USA) and Elias Bou-Harb (University of Texas at San Antonio, USA)</i>	
Private Drivers Identification Based on Users' Routine	1753
<i>Gianpiero Costantino (IIT-CNR, Italy), Ilaria Matteucci (IIT-CNR, Italy), Davide Micale (University of Catania, Italy), and Giuseppe Patanè (Park Smart Srl, Italy)</i>	
Reverse-Engineering the Physical Configuration of Smart Homes	1763
<i>Martin Vivian and Ramin Sadre</i>	
A Randomized Switched-Mode Voltage Regulation System for IoT Edge Device to Defend against Power Analysis Based Side Channel Attack	1771
<i>Mohd Khan (Binghamton University, USA) and Yu Chen (Binghamton University, USA)</i>
