Volume 11840

Proceedings of SPIE 0277-786X, V. 11840

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Developments in X-Ray Tomography XIII*, edited by Bert Müller, Ge Wang, Proc. of SPIE 11840, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

X-RAY, GAMMA-RAY, AND PARTICLE TECHNOLOGIES PLENARY SESSION

- 11840 02 **X-ray imaging meets deep learning (Plenary Paper)** [11840-501]
- 11840 03 **A mummy's secrets: serendipity, computed tomography, and non-invasive x-ray diffraction (Plenary Paper)** [11840-502]

APPLICATIONS I

- 11840 04 **Emerging developments in tomographic imaging with hard x-rays (Invited Paper)** [11840-1]
- 11840 05 **Towards correlative imaging of neuronal tissue by phase-contrast x-ray tomography and SEM (Invited Paper)** [11840-2]
- 11840 07 **Developments in the use of x-ray tomography for the study of ancient mummies (Invited Paper)** [11840-4]

IMAGE ANALYSIS

- 11840 08 **Three-dimensional analysis of aligner gaps and thickness distributions using advanced laboratory-based hard x-ray tomography** [11840-5]
- 11840 09 **Semantic segmentation of mouse jaws using convolutional neural networks** [11840-6]
- 11840 0B **Analysis of industrial x-ray computed tomography data with deep neural networks** [11840-8]

PROPAGATION-BASED OR SPECTRALLY SENSITIVE RECONSTRUCTION

- 11840 0C **Spectral propagation-based x-ray phase-contrast imaging (Invited Paper)** [11840-9]
- 11840 0D **Simultaneous electron density and attenuation coefficient reconstruction: a feasibility study** [11840-10]
- 11840 0E **Density estimation in x-ray computed tomography using the Alvarez-Macovski model** [11840-11]
- 11840 0F **Reconstruction method for grating-based x-ray phase tomographic microscope** [11840-12]

11840 OG **Speckle-based x-ray dark-field tomography of an attenuating object** [11840-13]

INSTRUMENTATION I

11840 OH **Monte-Carlo modeling and design of a high-resolution hyperspectral computed tomography system with multi-material patterned anodes for material identification applications** [11840-14]

11840 OI **New technologies for x-ray microscopy: phase correction and fully automated deep learning based tomographic reconstruction** [11840-15]

11840 OK **High-energy x-ray phase tomography using grating interferometer with structured anode x-ray source (Invited Paper)** [11840-17]

11840 OL **High-speed grating interferometry** [11840-18]

APPLICATIONS II

11840 OM **Utilizing x-ray diffraction tomography to study the effect of biodegradable magnesium implants on the bone ultrastructure** [11840-24]

11840 ON **Microstructure and energy dispersive diffraction reconstruction of 3D patterns of crystallographic texture in shark centrum** [11840-25]

11840 OP **Impact of fixation and paraffin embedding on mouse brain morphology: a synchrotron radiation-based tomography study** [11840-27]

APPLICATIONS IV

11840 OQ **Can laboratory x-ray virtual histology provide intraoperative 3D tumor resection margin assessment? (Invited Paper)** [11840-41]

11840 OR **Exploring the potential of cycloidal computed tomography for advancing intraoperative specimen imaging** [11840-42]

11840 OS **State of the art and recent advances in x-ray speckle-based phase-contrast imaging (Invited Paper)** [11840-43]

11840 OT **Laboratory-based phase and absorption tomography for micro-imaging of annual layers in human tooth cementum, paraffin-embedded nerve and zebrafish embryo** [11840-44]

INSTRUMENTATION II

11840 OU **Brilliant light for materials science: industrial applications of synchrotron radiation based microtomography at the tomography instruments by GEMS at PETRA III (Invited Paper)** [11840-19]

- 11840 0V **Brilliant light for materials science: industrial applications of synchrotron radiation-based microtomography at the tomography instruments by GEMS at PETRA III** [11840-20]
- 11840 0W **High-resolution quantitative phase-contrast x-ray imaging for biomedical samples at PETRA III** [11840-21]

APPLICATIONS III

- 11840 10 **Correlative light microscopy and x-ray microtomography of ground sections of mineralised tissues** [11840-29]
- 11840 12 **X-ray phase-contrast computed tomography for full breast mastectomy imaging at the Australian Synchrotron (Invited Paper)** [11840-31]

ADVANCED RECONSTRUCTION ALGORITHMS I

- 11840 13 **Nonsmooth nonconvex LDCT image reconstruction via learned descent algorithm (Invited Paper)** [11840-32]
- 11840 14 **Least-squares and maximum-likelihood in computed tomography** [11840-34]
- 11840 15 **Multiple window learning for CT metal artifact reduction** [11840-35]
- 11840 16 **Dual-domain reconstruction network for sparse-view CT (Invited Paper)** [11840-36]

ADVANCED RECONSTRUCTION ALGORITHMS II

- 11840 18 **High-resolution interior tomography with a deep neural network trained on a low-resolution dataset** [11840-38]
- 11840 19 **Extended-field synchrotron microtomography for non-destructive analysis of incremental lines in archeological human teeth cementum** [11840-39]
- 11840 1A **Simulation of polychromatic x-ray attenuation to validate and improve two-dimensional beam-hardening correction** [11840-40]

POSTER SESSION

- 11840 1B **A high-order prior for overlapped projections in the real flat-panel x-ray source imaging system** [11840-45]

- 11840 1C **Micro-computed tomography-based characterization of B₄C-C composite for x-ray optics**
[11840-46]
- 11840 1E **Operando and high-throughput multiscale-tomography** [11840-49]
