SPIE

Volume 11914

Proceedings of SPIE 0277-786X, V. 11914

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *SPIE Future Sensing Technologies 2021*, edited by Masafumi Kimata, Joseph A. Shaw, Christopher R. Valenta, Proc. of SPIE 11914, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

COMPONENT TECHNOLOGY

- 11914 06 **Van der Waals heterostructures photodetectors for mid-infrared silicon photonics** [11914-9]
- 11914 07 **GaN laser diodes for quantum sensing and optical atomic clocks** [11914-14]

SENSORS

- 11914 09 **Distributed strain sensing using slope assisted BOTDA based on virtual Brillouin gain spectrum synthesized by multi-frequency light** [11914-26]
- 11914 0A **Basic study of temperature independent fiber bending sensor for catheters using multicore fiber Bragg grating and two-photon absorption process in Si-APD** [11914-27]
- 11914 0B **Particle velocity measurement by low-coherence Doppler lidar** [11914-43]
- 11914 0C **Quantitative measurement of 10cm³ LED mini-lidar for Mars rover** [11914-44]
- 11914 0D **Determination of the coastal edge using on-board radar** [11914-29]
- 11914 0G **Material selection methodology for RF MEMS switch design** [11914-88]

MACHINE LEARNING AND ALGORITHMS

- 11914 0H **Two-dimensional deep regression for early yield prediction of winter wheat (Invited Paper)** [11914-100]
- 11914 0I **Automatic adaptive wireless demodulator using incremental learning in real time** [11914-4]
- 11914 0J **Evaluation of a concept for classification of micromobility vehicles based on thermal-infrared imaging and neuromorphic processing** [11914-6]
- 11914 0K **Wildfire detection CubeSat based on convolution neural network** [11914-23]
- 11914 0M **Surface breaking crack detection algorithm for flying spot and line thermography based on the Canny approach** [11914-25]

- 11914 0N **Deep learning based water feature mapping using Sentinel-2 satellite image** [11914-34]
- 11914 0O **High-resolution 3D fusion method for optical-resolution photoacoustic microscopy using deep learning** [11914-67]

IMAGING I

- 11914 0P **Synthetic hyperspectral sensing simulator: a tool for optimizing applications in mineral exploration** [11914-35]
- 11914 0R **Exploration of feasible methods for detecting nighttime clouds using a digital camera without a NIR-cut filter** [11914-42]
- 11914 0S **Investigations on photothermal super resolution reconstruction using 2D-structured illumination patterns** [11914-22]
- 11914 0T **The research on OPT imaging system combining polarization and super-resolution algorithm** [11914-57]
- 11914 0U **Study on the light transmission and photothermal conversion of nanosecond laser pulse with brain using multiple physical field coupling** [11914-65]
- 11914 0V **A measurement method of curvature radius and shell thickness of laser fusion capsule by combining computer vision and virtual laser differential confocal technology** [11914-70]
- 11914 0W **Parameter analysis of freeform surface description method with automatically configurable Gaussian radial basis function** [11914-73]

IMAGING II

- 11914 0Y **OCT sample detection in scattering media using ghost imaging** [11914-41]
- 11914 0Z **Optical distortion correction for an ultra-short throw with a wrinkled-surface target** [11914-16]
- 11914 10 **Imaging quality of optically transparent antennas on shared apertures** [11914-32]
- 11914 11 **Radio frequency imaging detector for energetic nuclear events** [11914-12]
- 11914 12 **Image processing of advance milling cutters to automate the measurement of the geometric parameters of the cutting edge on optical measuring systems** [11914-53]
- 11914 13 **A new method definition of cutting surface of drills by image processing flank surface** [11914-56]
- 11914 14 **Divided-aperture dual-differential confocal microscopy** [11914-83]

POSTER SESSION

- 11914 15 **2D/3D single-pixel NIR image reconstruction method for outdoor applications in presence of rain** [11914-3]
- 11914 16 **Comparative study of deep neural networks for very short-term prediction of torrential rains using polarimetric Phased-Array Weather Radar (MP-PAWR)** [11914-5]
- 11914 19 **Robust stereo infrared camera calibration for 3D depth estimation and measurement** [11914-37]
- 11914 1A **Forecasting flight trajectories of air objects temporarily hidden by urban buildings in spatial distributed monitoring systems** [11914-39]
- 11914 1B **Non-diffractive beam generation with partially blocked annular beam in scattering media** [11914-40]
- 11914 1C **Sensor information processing in the control of quality parameters of functional coatings of products deposited by vacuum-arc spraying** [11914-52]
- 11914 1E **A novel 3D fusion method for the depth-of-field enhancement in optical-resolution photoacoustic microscopy based on cross bilateral filter algorithm** [11914-62]
- 11914 1F **Research on the influence of skull on the photothermal effect of mouse brain based on MCmatlab** [11914-63]
- 11914 1H **Three-dimensional high-resolution information fusion method for optical-resolution photoacoustic microscopy using principal component analysis transform** [11914-66]
- 11914 1I **Connected component labeling algorithm in streaming image processing with FPGAs** [11914-68]
- 11914 1J **Remote sensing of agricultural crops seeds for size determination within radar technology** [11914-69]
- 11914 1K **Hyperspectral imaging approach for the identification of construction and demolition waste from earthquake sites** [11914-74]
- 11914 1L **A wideband spectrometer for space-borne telescopes III: spectral disperser made of infrared transmitting glass** [11914-80]
