PROCEEDINGS OF SPIE

AOPC 2021: Infrared Device and Infrared Technology

HaiMei Gong Zelin Shi Jin Lu Editors

20–22 June 2021 Beijing, China

Organized by

University of Electronic Science and Technology of China (China)
Science and Technology on Low-light-level Night Vision Laboratory (China)
Science and Technology on Electro-Optical Information Security Control (China)
Nano-Optoelectronics Laboratory, Department of Electronic Engineering, Tsinghua University (China)

Sponsored by Chinese Society for Optical Engineering (China)

Published by SPIE

Volume 12061

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in AOPC 2021: Infrared Device and Infrared Technology, edited by HaiMei Gong, Zelin Shi, Jin Lu, Proc. of SPIE 12061, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510649972

ISBN: 9781510649989 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

INFRARED DEVICE AND INFRARED TECHNOLOGY

12061 02	High-quality reconstruction in non-line-of-sight imaging via transient multiplied photon count data [12061-1]
12061 03	A low-cost mid-infrared polarizer with double-sided silica anti-reflection films fabricated using nanoimprint [12061-2]
12061 04	Reconfigurable high-order radio frequency filters based on a wide-bandwidth optical frequency comb [12061-3]
12061 05	InAsSb/AlAsSb nBn HOT focal plane array [12061-6]
12061 06	Design of infrared small-target adaptive detection system based on DSP and FPGA [12061-11]
12061 07	High-speed fringe projection profilometry based on convolutional neural network [12061-12]
12061 08	Research on the ranging method of point target by monocular vision based on constraints on trajectory and line of sight [12061-13]
12061 09	Binocular stereo vision technology based on human visual characteristics [12061-14]
12061 0A	Exploration and application of convolutional neural network to improve the quality of DAS voice print machine recognition and acoustic reduction [12061-15]
12061 OB	Pose estimation of non-cooperative target based on depth image [12061-16]
12061 OC	Adjustable electromagnetically induced transparency based on terahertz metamaterial embedded with vanadium dioxide [12061-17]
12061 0D	Estimation method of infrared detection range for reentry target based on signal-to-clutter ratio [12061-18]
12061 OE	A real-time local path planning method in complex scenes [12061-19]
12061 OF	Modelling effects of GaN HEMTs terahertz detectors with spiral antennas [12061-20]
12061 OG	Research on nonuniformity correction based on deep learning [12061-21]
12061 OH	VHF coverage analysis for quasi-equatorial Earth satellites [12061-22]
12061 01	Design of terahertz IMPATT device [12061-23]

12061 OJ	The THz imager instrument for ice cloud remote sensing [12061-24]
12061 OK	Method for calibrating heat flow meter for small heat flow [12061-26]
12061 OL	Ultra-thin terahertz devices based on Pancharatnam-Berry phase [12061-27]
12061 OM	FOV expanded upconversion imaging based on tight focusing system [12061-28]
12061 ON	Switchable narrowband THz metasurface filter based on vanadium dioxide [12061-29]
12061 00	Research on optical fiber compact terahertz time-domain spectroscopy system and cluster analysis of hyperspectral images [12061-32]
12061 OP	Mismatches removal in unmanned aerial vehicle image registration using density based method [12061-33]
12061 0Q	Design of fast Fourier transform spectrometer in THz atmospheric limb sounder (TALIS) system [12061-35]
12061 OR	3D small-scale object recognition network in cluttered point cloud scenes [12061-40]
12061 OS	Infrared thermal imaging high-precision temperature measurement technology [12061-42]
12061 OT	Better depth images create better motion recognition [12061-43]
12061 OU	3D topological Dirac semimetal $(Zn_xCd_{1-x})_3As_2/Sb_2Se_3$ film heterojunction for high performance visible to near-infrared photo detection [12061-44]
12061 OV	Prototype for infrared detector front end electronics based on COTS devices under cryogenic temperature [12061-47]
12061 OW	Real-time infrared small target search and tracking algorithm based on adaptive track correlation [12061-48]
12061 OX	Design of an infrared target simulator for military testing [12061-56]
12061 OY	Infrared unmanned aerial vehicle detection based on generative adversarial network data augmentation [12061-57]
12061 OZ	A GAN-based visible and infrared image fusion algorithm [12061-58]
12061 10	Inversion of input signal energy using FWHM of output waveform [12061-64]
12061 11	Focused micro-lens array design and performance testing [12061-67]
12061 12	Analysis of the influence of outer plate inclination on infrared and radar detection of ships at sea [12061-68]

1	12061 13	Infrared image detail enhancement based on guided filtering with APHE [12061-69]
1	12061 14	Angle measurement method based on axicon lens [12061-70]
1	12061 15	Non-uniformity correction for infrared cameras with variable integration time based on two-point correction [12061-71]
1	12061 16	Calibration and application of radiometer for low-temperature infrared radiation source [12061-72]
1	12061 17	Design and experimental study for lens working at both room and low temperature [12061-73]
1	12061 18	An adaptive fringe projection method for measuring three-dimensional profile of surface with high reflectivity using sub-pixel coordinate mapping [12061-74]
1	12061 19	A calculation approach for shock layer radiation and transmittance towards hypersonic infrared homing vehicle $[12061\mbox{-}76]$
1	12061 1A	Multi-wavelength QCL laser system for on-line detection of multi-component gases [12061-77]
1	12061 1B	Terahertz characteristics of amino acids based on microfluidic technology [12061-78]
1	12061 1C	Design of dual-channel projection collimator for dynamic infrared scene projector [12061-79]
1	12061 1D	Analysis of the internal stray radiation in infrared imaging system based on ambient temperature [12061-81]
1	12061 1E	A dual-polarization mode terahertz modulator based on metamaterial and HEMT structures [12061-82]
1	12061 1F	Terahertz spectra of sodium carboxymethyl cellulose and guar gum [12061-84]
1	12061 1G	Wavelength modulation spectrometer using interband cascade laser for exhaled breath carbon monoxide measurement [12061-85]
1	12061 1H	Banknotes anti-counterfeiting system based on THz-TDS confocal imaging [12061-89]
1	12061 11	Recent progress in dark current suppression and efficiency enhancement methods for antimonide superlattice detectors [12061-92]
1	12061 1J	Spectral emissivity measurement based on radiation at multiple temperatures [12061-93]
1	12061 1K	Innovative thermo-mechanical design for large format cryogenic infrared focal plane assembly [12061-94]
1	12061 1L	Sensitive parameters affecting dark current characteristics of SCD [12061-95]
1	12061 1M	Design and research on calibration method of multi-channel self-calibration infrared radiation thermometer [12061-96]

12061 1N	Space-based infrared staring sensor design method integrating detection and information processing technology [12061-97]
12061 10	Convergent trinocular stereo measurement model for non-cooperative target [12061-99]
12061 1P	High frame frequency dynamic infrared scene projector based on dual-DMD [12061-101]
12061 1Q	Infrared emission enhancement of a black coating doped with multiwall carbon nanotubes using multi-spraying method [12061-102]
12061 1R	InGaAs short wavelength infrared detector based on carrier collection effect [12061-106]
12061 18	The method for predicting laser interference image in infrared detection system [12061-107]
12061 1T	Study on closed loop frequency tracking circuit of resonant infrared sensor [12061-108]
12061 1U	Weak infrared radiation intensity measurement based on extended Duffing oscillator [12061-110]
12061 1V	A novel velocity measurement method based on contact image sensor [12061-111]
12061 1W	An analytical method for cold optical lens design based on LightTools [12061-112]
