

PROCEEDINGS OF SPIE

AOPC 2021: Optical Information and Networks

Gangxiang Shen
Yongli Zhao
Minmin Zhang
Editors

20–22 June 2021
Beijing, China

Organized by
University of Electronic Science and Technology of China (China)
Science and Technology on Low-light-level Night Vision Laboratory (China)
Science and Technology on Electro-Optical Information Security Control (China)
Nano-Optoelectronics Laboratory, Department of Electronic Engineering, Tsinghua University
(China)

Sponsored by
Chinese Society for Optical Engineering (China)

SPIE

Volume 12068

Proceedings of SPIE 0277-786X, V. 12068

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *AOPC 2021: Optical Information and Networks*, edited by Gangxiang Shen, Yongli Zhao, Minmin Zhang, Proc. of SPIE 12068, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

OPTICAL INFORMATION AND NETWORKS

- 12068 02 **Performance analysis of heterodyne DPSK-based all-optical relaying free-space optical communication system [12068-1]**
- 12068 03 **Generation of entangled coherent states for distant Bose-Einstein condensates via Faraday rotation of the photonic polarization [12068-2]**
- 12068 04 **Integrated optical current sensor (IOCS): a state-of-the-art review [12068-3]**
- 12068 05 **Performance analysis of free space optical communication based on cat's eye modulating retro-reflector [12068-4]**
- 12068 06 **Bandwidth-limited orbital angular momentum mode of deflection Bessel Gaussian beams in the weak turbulent seawater [12068-5]**
- 12068 07 **Capacity of the wireless communication links with shift and deflection Bessel Gaussian beams in the weak turbulent seawater [12068-6]**
- 12068 08 **Numerical study on the internal stress of optical fiber connector in the aerospace wide temperature range [12068-7]**
- 12068 09 **Incremental upgrade planning algorithm for WSON based on link scoring [12068-8]**
- 12068 0A **Demonstration of optical and radio orchestration for isolated network slicing mapping and front-/backhaul bandwidth optimization [12068-9]**
- 12068 0B **Demonstration of latency control for distributed data aggregation in a micro-data center empowered metro optical network [12068-10]**
