2021 12th Workshop on Latest Advances in Scalable Algorithms for Large-Scale Systems (Scala) **Scala 2021**

Table of Contents

| | |
|----------------------------------------|----|
| Message from the Workshop Chairs | v |
| Workshop Organization | vi |

Session 1

| | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|
| Iterative Methods with Mixed-Precision Preconditioning for ill-Conditioned Linear Systems in Multiphase CFD Simulations | 1 |
| <i>T. Ina (R-CCS, Riken, Kobe, Japan), Y. Idomura (Japan Atomic Energy Agency, Kashiwa, Japan), T. Imamura (R-CCS, Riken, Kobe, Japan), S. Yamashita (Japan Atomic Energy Agency, Tokai, Japan), and N. Onodera (Japan Atomic Energy Agency, Kashiwa, Japan)</i> | |
| Optimized Cascadic Multigrid Parareal Method for Explicit Time-Marching Schemes | 9 |
| <i>Yen-Chen Chen (The University of Tokyo, Japan) and Kengo Nakajima (The University of Tokyo, Japan)</i> | |

Session 2

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Unleashing the Performance of bmSparse for the Sparse Matrix Multiplication in GPUs | 19 |
| <i>Gonzalo Berger (INCO, Universidad de la República, Montevideo, Uruguay), Manuel Freire (INCO, Universidad de la República, Montevideo, Uruguay), Renzo Marini (INCO, Universidad de la República, Montevideo, Uruguay), Ernesto Dufrechou (INCO, Universidad de la República, Montevideo, Uruguay), and Pablo Ezzatti (INCO, Universidad de la República, Montevideo, Uruguay)</i> | |
| Passel: Improved Scalability and Efficiency of Distributed SVM using a Cacheless PGAS Migrating Thread Architecture | 27 |
| <i>Brian A. Page (University of Notre Dame, USA) and Peter M. Kogge (University of Notre Dame, USA)</i> | |

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Batched Sparse Iterative Solvers for Computational Chemistry Simulations on GPUs | 35 |
| <i>Isha Aggarwal (Indian Institute of Information Technology, Sri City, India), Aditya Kashi (Karlsruhe Institute of Technology, Germany), Pratik Nayak (Karlsruhe Institute of Technology, Germany), Cody J. Balos (Lawrence Livermore National Laboratory, USA), Carol S. Woodward (Lawrence Livermore National Laboratory, USA), and Hartwig Anzt (Karlsruhe Institute of Technology, Germany; University of Tennessee (UTK), USA)</i> | |
| Usability of Markov Chain Monte Carlo Preconditioners in Practical Problems | 44 |
| <i>Emre Sahin (UKRI-STFC Hartree Centre, United Kingdom), Anton Lebedev (UKRI-STFC Hartree Centre, United Kingdom), Maksims Abalenkovs (UKRI-STFC Hartree Centre, United Kingdom), and Vassil Alexandrov (UKRI-STFC Hartree Centre, United Kingdom)</i> | |
| Author Index | 51 |
