# 2021 5th International Conference on Power and Energy Engineering (ICPEE 2021)

## Table of Contents

|                            |      |
|----------------------------|------|
| Preface .....              | viii |
| Conference Committee ..... | ix   |

---

---

### Session 1: High Voltage Technology and Relay Protection

|                                                                                                                                                                   |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Characteristic Analysis of the On-line Input of the Third Station of Lu-Gao-Zhao Three-Terminal DC Project .....                                                  | 1  |
| <i>HAN Fengshou, LUO Yuhang, ZHENG Jiongguang, LI Dongyang, XIAO Yipeng</i>                                                                                       |    |
| Strategy for Switchover between the Ground Return and the Metallic Return Operation Modes of MTDC Systems.....                                                    | 6  |
| <i>Manxi Huang, Hengyi Pan, Gen Li, Jianzhong Xu, Xiufang Jia</i>                                                                                                 |    |
| Single Phase Grounding Fault Line Selection Method of Coal Mine Power Grid Based on Smooth Decomposition Modified Threshold Denoising and Waveform Diversity..... | 14 |
| <i>Weijian Cheng, Xiaojun Shi, Jingzhong Wen</i>                                                                                                                  |    |
| A Condition Evaluation Method of Isolation Circuit Breaker Based on Triangular Fuzzy Analytic Hierarchy Process .....                                             | 22 |
| <i>Zhaoqiang Zeng, Jian Gan, Weiyu Zeng, Qing Wang, Jin Yi</i>                                                                                                    |    |
| Voltage Sag Assessment in Distribution System with Neutral Grounding Resistance by Methods of Fault Position and Monte Carlo Simulation .....                     | 26 |
| <i>Rittipad Posree, Somporn Sirisumrannukul</i>                                                                                                                   |    |
| Research on Live Cleaning Technology of External Insulation of Power Equipment.....                                                                               | 32 |
| <i>Zhaoqiang Zeng, Qiliang Liu, RuiLin Duan, Weiyu Zeng, Jin Yi</i>                                                                                               |    |

## Session 2: Power Electronic Technology and Power System Control

|                                                                                                                                                  |    |
|--------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Dynamic Simulation and Optimization of Mechanical Switching Characteristics of On-load Tap Changer .....                                         | 36 |
| <i>Shuqi Zhang, Yao Zhang, Ke Wang, Jinzhong Li, Gang Li, Fan Yang, Geqi Li</i>                                                                  |    |
| Research on Mine-Used Combination Switch Control System Based on Dual CAN Bus.....                                                               | 41 |
| <i>DING Junfeng, RONG Xiang, CHEN Jiang, YUAN Fengpei</i>                                                                                        |    |
| Generalized State Space Average-value Model of MAB Based Power Electrical Transformer .....                                                      | 46 |
| <i>Zhengang Lu, Jieying Song, Conghui Zheng, Wanying Xu, Xiaoting Wang</i>                                                                       |    |
| Comparative Study of AC / DC Side Loop-Closing Strategy Based on Back-to-Back VSC-HVDC Flexible Loop-Closing Device in Distribution Network..... | 53 |
| <i>Zhi Xu, Risheng Qin, Hongsheng Ma, Jia Lu, Chaoqun Niu, Yongchun Yang</i>                                                                     |    |
| 3-Dimensional Simulation of On-load Tap Changer Subjected to Short Circuit Current .....                                                         | 61 |
| <i>Peng Li, Huaze Sui, Ke Wang, Shuqi Zhang, Gang Li, Geqi Li</i>                                                                                |    |
| Modelling and Control Development of an MVDC Converter Implemented for Albaha Power Network .....                                                | 66 |
| <i>Thamer A. H. Alghamdi, Fatih J. Anayi</i>                                                                                                     |    |
| DC Bus Voltage Control of a Remote Renewable Minigrd in a Converterless Topology.....                                                            | 73 |
| <i>Syed Furqan Rafique, Zhang Dongsheng, Qi Zhiping, Fan Miao</i>                                                                                |    |
| Design and Application of Portable Feeder Automation Hardware-in-loop Test Platform .....                                                        | 78 |
| <i>Liang Weichen, Wang Yajuan, Zhang Xiaohan, Zhao Zhiyu, Li Xuan</i>                                                                            |    |

## Session 3: Renewable Energy Technology and Energy Chemical

### Engineering

|                                                                                                                            |    |
|----------------------------------------------------------------------------------------------------------------------------|----|
| Solar Biomass Pyrolysis with Latent Heat Ballast .....                                                                     | 85 |
| <i>Zhang Huili, Baeyens Jan, Dewil Raf, Li Shuo, Deng Yimin, Reyes-Urrutia Andrés, Venier César Martin, Mazza Germán</i>   |    |
| Maximum Power Point Tracking of Partial Shading Photovoltaic Array Base on Particle Swarm Optimization .....               | 91 |
| <i>Meng Ren, Tianfa Liao</i>                                                                                               |    |
| Power Generation upon Demand by Using Thermal Energy Storage in Concentrated Solar Power Plants: Recent Developments ..... | 96 |
| <i>Zhang Huili, Baeyens Jan, Li Shuo, Dewil Raf, Deng Yimin</i>                                                            |    |

|                                                                                                                                         |     |
|-----------------------------------------------------------------------------------------------------------------------------------------|-----|
| Photovoltaic Power Prediction of BP Neural Network Based on Singular Spectrum Analysis .....                                            | 103 |
| <i>Dingmei Wang, Qiang Zhou, Yan Jin, Haiying Dong</i>                                                                                  |     |
| Predictive Regression Models for Solar Energy Harvesting and Sustainable, Low Energy, Highly Efficient Solar-Desalination Systems ..... | 111 |
| <i>Hisham A. Maddah</i>                                                                                                                 |     |
| Entropy Production Analysis of Steam Ejector under Typical Working Conditions .....                                                     | 116 |
| <i>Hongjie Chen, Liping Tan, Jing Ge, Wei Lu</i>                                                                                        |     |
| Research on Economic Competitiveness of Centralized and Distributed Wind and Solar Power .....                                          | 122 |
| <i>Dong Zhang, Chao Yang, Qian Ai, Zheng Yan</i>                                                                                        |     |
| Study on Modified Process of Maifan Stone and Its Phosphorus Removal Performance for Rural Domestic Wastewater.....                     | 127 |
| <i>Li Xu, Yan Tang, Lai Wei, Zixiang Xu</i>                                                                                             |     |

## **Session 4: Power Big Data Processing and Machine Learning in Power**

### **System**

|                                                                                                                                                        |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Power System Transient Stability Prediction Based on Sample Pre-screening of SVM Algorithm and AdaBoost Algorithm.....                                 | 133 |
| <i>Xingyun Chen, Kejian Nie</i>                                                                                                                        |     |
| Research on Heterogeneous Data Transfer Method for Power Energy Management.....                                                                        | 139 |
| <i>Zhao Lin, Jiang Chi, Sun Jianqiao, Wang Weifeng, Bi Fengjuan</i>                                                                                    |     |
| A Comparative Study on the Performance of Hidden Markov Model in Appliance Modeling.....                                                               | 145 |
| <i>Hebatullah M. Malik, Nema Salem, Maha S. AlSabban</i>                                                                                               |     |
| A Robust Classification Method for Power Transformer Status Recognition Based on Sound Signals .....                                                   | 153 |
| <i>Xiaoning Li, Xiao Liao, Dawei Lu, Zhen Qiu</i>                                                                                                      |     |
| A Business Intelligence Application for the Failure Detection in Automatic Recloser Assets: A Preliminary Investigation .....                          | 158 |
| <i>Sabryna Vendramin Fernandes, Marcos Aurelio Izumida Martins, Marcio Lins, Silvia De Francisci, Edgar Gerevini Carvalho, Leandro Takeshi Hattori</i> |     |
| Prediction of Electricity Demand Considering Interactions among Economic Factors Using a Bayesian Least Squares Support Vector Machine Method .....    | 165 |
| <i>Y Zhang, J Liu, X Li</i>                                                                                                                            |     |

## Session 5: Power System Planning and Dispatching

|                                                                                                                      |     |
|----------------------------------------------------------------------------------------------------------------------|-----|
| High-Proportion New Energy Microgrid Planning and Design Method Based on Benders Decomposition .....                 | 169 |
| <i>Ge Sangjinmei, Ma Wen, Li Xi, Du Ninggang, Ma Shoulong</i>                                                        |     |
| Fault-recovery Provisioned Multipaths Planning of Wide Area Measurement System in Smart Grid .....                   | 175 |
| <i>Xi Song, Hailong Wang, Xia Cai, Yufei Guo, Enze Zhang, Renping Song, Qun Guo</i>                                  |     |
| Optimal Dispatch of Integrated Energy System Based on Unified Energy Path Theory.....                                | 181 |
| <i>Hao Chen, Zehao Wang, Yi Lin, Guilian Wu, Zhao Dong</i>                                                           |     |
| Optimal Configuration Planning of Combined Cooling Heating and Power – Heat Pump Coupled Energy Supply in Park ..... | 189 |
| <i>Xiaoyan Hu, Bingjie Li, Xiaoyun Yuan, Yizhe Jiang, Shuran Liu</i>                                                 |     |
| A Novel Integrated Energy System Planning Model Incorporating Operation Constraints .....                            | 194 |
| <i>Ning Zhang, Xiaoyu Wu, Jun Wang, Siyu Zhang</i>                                                                   |     |
| Power System Day-ahead Optimal Dispatch under Typhoon Disasters .....                                                | 198 |
| <i>Lei Wang, Yong Huang, Tong Wang, Ruizeng Wei, Hui Hou</i>                                                         |     |
| Optimal Dispatch Considering the Power System Operation Risk under Typhoon Disasters.....                            | 202 |
| <i>Tong Liu, Ruizeng Wei, Lei Wang, Enze Zhou, Hui Hou</i>                                                           |     |
| Collaborative Optimal Scheduling Strategy of Regional Integrated Energy System.....                                  | 208 |
| <i>Qinghan Wang, Yanbo Wang, Zhe Chen</i>                                                                            |     |
| Review on Optimal Dispatch Considering Power System Risk under Typhoon Disaster.....                                 | 214 |
| <i>Sheng Guo, Ruizeng Wei, Yongchao Liang, Yuan Shen, Hui Hou</i>                                                    |     |

## Session 6: Power Internet of Things and Energy Internet

|                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------|-----|
| On the Robustness of Power IOT against Attack Based on General Framework.....                         | 220 |
| <i>Tianyu Wang, Weiwei Miao, Jianming Zhao, Bowen Zhang</i>                                           |     |
| Research on the Quantitative Evaluation of the Synergetic Degree of the Energy Internet Industry..... | 227 |
| <i>LI Suxiu, LIU Lin, KANG Xi, CHEN Xingtong</i>                                                      |     |
| Research on Collaboration Method of Edge IoT Agent Based on Actor Model.....                          | 233 |
| <i>Bowen Zhang, Weiwei Miao, Lei Wei</i>                                                              |     |
| Research on Key Technologies of Message and Service Framework for Heterogeneous Systems.....          | 239 |
| <i>Jijia Pan, Lei Yan, Hong Zhang, Zhifang He, Ting Wang</i>                                          |     |

|                                                                                          |     |
|------------------------------------------------------------------------------------------|-----|
| Research about Big Data Unified Supporting Platform Oriented to the Energy Internet..... | 244 |
| <i>Zhao Huang, Pengbo Ma, Mengmeng Wang</i>                                              |     |

## **Session 7: Issues Related to Electric Vehicles and Power Market**

|                                                                                                                       |     |
|-----------------------------------------------------------------------------------------------------------------------|-----|
| Electric Vehicle Load Modeling for Uncontrollable Charging and Genetic Algorithm-based Dynamic Pricing Strategy ..... | 250 |
|-----------------------------------------------------------------------------------------------------------------------|-----|

*Nattavit Piamvilai, Somporn Sirisumrannukul*

|                                                                                                |     |
|------------------------------------------------------------------------------------------------|-----|
| Investigations on Real-road Energy Consumption Characteristics of Electric Passenger Car ..... | 256 |
|------------------------------------------------------------------------------------------------|-----|

*Hanzhengnan Yu, Yu Liu, Jingyuan Li, Kunqi Ma*

|                                                                                                                                             |     |
|---------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Optimization of Electrical Substation Location for Distribution Loss Reduction from Power Demand of Electric Vehicle Charging Stations..... | 262 |
|---------------------------------------------------------------------------------------------------------------------------------------------|-----|

*Pokpong Prakobkaew, Somporn Sirisumrannukul*

|                                                                                                        |     |
|--------------------------------------------------------------------------------------------------------|-----|
| Analysis and Evaluation of PHEV Development and Technical Routes of Major Manufacturers in China ..... | 268 |
|--------------------------------------------------------------------------------------------------------|-----|

*Baodi Zhang, Fuyu Yang, Hewu Wang, Hongren Zhao, Xin Zhang*

|                                                                                |     |
|--------------------------------------------------------------------------------|-----|
| Joint Generation and Reserve Optimization in Multi-province Power System ..... | 276 |
|--------------------------------------------------------------------------------|-----|

*Zhi Cai, Sai Dai, Qiang Li, Qiang Ding*

|                                                                                     |     |
|-------------------------------------------------------------------------------------|-----|
| Research and Design of Decision Support Platform for Integrated Energy Market ..... | 282 |
|-------------------------------------------------------------------------------------|-----|

*LiuJun Zhao, Chunming Wang, Yongfang Jian*

|                                                                                            |     |
|--------------------------------------------------------------------------------------------|-----|
| A Study on the Business Data Evaluation Method of the Power Grid Value-Added Service ..... | 288 |
|--------------------------------------------------------------------------------------------|-----|

*Jianfei Lu, Suxiu Li, Xinsheng Zhang*
