SPIE

Volume 11826

Proceedings of SPIE 0277-786X, V. 11826

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Photonic Fiber and Crystal Devices: Advances in Materials and Innovations in Device Applications XV*, edited by Shizhuo Yin, Ruyan Guo, Proc. of SPIE 11826, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

PHOTONIC FIBER AND CRYSTAL MATERIALS

- 11826 03 **Based on TMPTA two-monomer photopolymer holographic materials** [11826-2]
- 11826 04 **The holographic photopolymers property study based on the compound light initiator** [11826-3]
- 11826 06 **Quantum cutting organic-inorganic nanocomposites (Invited Paper)** [11826-5]

PHOTONIC FIBER AND CRYSTAL DEVICES

- 11826 0A **Improved triggering performance by harnessing GaAs PCSS array** [11826-11]
- 11826 0B **2-dimensional KTN deflector enabled large capacity time division multiplexing based beam combining** [11826-12]
- 11826 0C **Developments in producing optical sapphire windows for extreme environments in large scale** [11826-15]
- 11826 0D **High power laser delivery using anti-resonant hollow core fiber** [11826-24]
- 11826 0G **Comparative analysis of SOI bulk rectangular and nanowire optical waveguide for label-free lung cancer detection** [11826-13]

POSTER SESSION

- 11826 0P **Bessel beam interferometry and measuring refractive index of small volume liquid sample** [11826-23]
