2021 4th World Conference on Mechanical Engineering and Intelligent Manufacturing (WCMEIM)

WCMEIM 2021

Table of Contents

Preface ..... **xxi**
Organizing Committee ..... **xxii**
Reviewers ..... **xxiv**

Session 1: Intelligent Mechanical Control and Mechatronics

Dimension Reduction of Inverse Kinematics of Seven-Degree-of-Freedom Manipulator Based on Pose Separation Method 1
Xinqing Zhang (Hubei University of Technology, China), Dazhang You (Hubei University of Technology, China), Zhou Yang (Hubei University of Technology, China), Yu Zeng (Hubei University of Technology, China), Xi Ai (Hubei University of Technology, China), and Shuai Wang (Hubei University of Technology, China)

Research on Exhaust Steam Temperature Automatic Control of Ultra-Supercritical Unit 6
Shuai Di (Datang Northeast Electric Power Test & Research Institute Co., Ltd, China), Tang Tang (Datang Northeast Electric Power Test & Research Institute Co., Ltd, China), and Chao Wu (Datang Dongying Power Generation Co., LTD, China)

Thermodynamic Simulation and Analysis of Aeronautical Servo Actuator 10
Yaobao Yin (School of Mechanical Engineering Tongji University, China), Wanye Li (School of Mechanical Engineering Tongji University, China), Shuanglu Li (School of Mechanical Engineering Tongji University, China), Chang Lu (China Aero-Engine Changchun Control Technology Co., LTD., China), Qiang Xiao (China Aero-Engine Changchun Control Technology Co., LTD., China), and Hua Liu (School of Mechanical Engineering Tongji University, China)

The State Monitoring System of Numerical Control Machine Tools Spindle Based on LabVIEW 15
Chao Li (University of Technology and Education, China), Hongchang Sun (University of Technology and Education, China), Wanling He (University of Technology and Education, China), Weiwei Yan (University of Technology and Education, China), Yuanhui Hao (University of Technology and Education, China), and Xianglin Wang (University of Technology and Education, China)

Research on SCR Precise Ammonia Injection Control Based on BP Neural Network 19
Shuai Di (Datang Northeast Electric Power Test & Research Institute Co., Ltd, China) and Jiahuan Xuan (Datang Northeast Electric Power Test & Research Institute Co., Ltd, China)

The Cracking Rectification of Condenser Bracket Base on Finite Element 23
Pengfei Bi (Jiangling Motors Co., Ltd., China), Hui Huang (Jiangling Motors Co., Ltd., China), Xianzhong Yu (Jiangling Motors Co., Ltd., China), and Xing Qiu (Jiangling Motors Co., Ltd., China)

Fatigue Reliability Analysis of all Electric Drive Shale gas Fracturing Vehicle Frame 28
Han Pang (China University of Petroleum, China), Wanli Wang (China University of Petroleum, China), Xincheng Li (Yantai Jereh Petroleum Equipment & Technologies Co., Ltd.), Yipeng Wu (Yantai Jereh Petroleum Equipment & Technologies Co., Ltd.), and Xiufu Song (Yantai Jereh Petroleum Equipment & Technologies Co., Ltd)

Research and Design of Kinematics Characteristics of Molded Sole Inspection End-Effector 32
Liqin Zhou (Huaqiao University, China; Xiamen Xingcai Vocational Technical College, China) and Lizhi Gu (Huaqiao University, China; Quanzhou University of Information Engineering, China)

The Finite Element Analysis of Telescopic Boom of Forklift used in Coal Mine 36
Yong Gao (China Coal Technology and Engineering Group Corp, China)

Fuzzy-Feedforward PID Control of Micro gas Turbine 41
Rui Yang (Naval University of Engineering, China), Haodong Li (Naval University of Engineering, China), and Qiaolian Feng (Naval University of Engineering, China)

A Controllable Stiffness Robotics for Natural Orifice Transluminal Endoscopic Surgery 45
Xiaolong Zhu (Soochow University, China) and Haiyan Hu (Soochow University, China)

NR-MNPE Based Ship Gear Fault Detection 49
ShiMin Xin (Shanghai Maritime University, China)

A Monochromatic-Light-Interference System for Measurement of Diamond-Indenter's Angle Parameter 54
Yuanyuan Cui (National Institute of Metrology, China), Feng Zhang (National Institute of Metrology, China), Ming Ye (National Institute of Metrology, China), and Jiping Liu (National Institute of Metrology, China)

Research on Flyback Converter Based on BP Neural Network PID Adaptive Control 58
Quan Sun (Shanghai Institute of Electrical Engineering, China) and Yuan Sun (Shanghai Institute of Electrical Engineering, China)

Active Vibration Control of Thin Plate Milling using Piezoelectric Actuator 62
Chentong Cai (Tsinghua University, China) and Tong Zhao (Tsinghua University, China)

Construction Truck Wheel Loader Driving and Parking Integral Afterburner Pump 70
WeiWei Cai (Ruili Group Ruian Auto Parts Co.LTD, China), YiHui Huang (Ruili Group Ruian Auto Parts Co.LTD, China), Fei Ye (Ruili Group Ruian Auto Parts Co.LTD, China), and GuiLiang Chen (Ruili Group Ruian Auto Parts Co.LTD, China)

Sleep Staging of Mouse Based on Neurochat Implantable Intelligent Control System 74
Minmin Luo (Southern Medical University, China), Fangcai Mai (Southern Medical University, China), Wenbin Qu (Southern Medical University, China), and Kaibin Wu (Southern Medical University, China)

Study on the Coupling Impact Dynamics of a Launcher Under Sea State 6 78
Xiangyu Li (The 713th Research Institute of China Shipbuilding Industry, China), Yapeng Zhao (The 713th Research Institute of China Shipbuilding Industry, China), Yongkang Li (The 713th Research Institute of China Shipbuilding Industry, China), and Jinghua Tai (The 713th Research Institute of China Shipbuilding Industry, China)

Simulation of Fretting Wear on the Contact Surface Between Cortical Bone and Titanium Alloy 83
Xianyuan Meng (Beijing University of Technology, China), Lihua Chen (Beijing University of Technology, China), Lutong Shan (Beijing University of Technology, China), and Hui Liu (Beijing University of Technology, China)

Foot Trajectory Planning and Prototype Experiment of Double Closed-Chain Walking Leg 87
Yongming Wang (Anhui University of Technology, China; Anhui Province Key Laboratory of Special Heavy Load Robot, China), Guoli Zhang (Anhui University of Technology, China; Anhui Province Key Laboratory of Special Heavy Load Robot, China), and Tengfei Ma (Anhui University of Technology, China; Anhui Province Key Laboratory of Special Heavy Load Robot, China)

Technical Characteristics Analysis of Automotive Electronic Steering System 93
Xiaolong Ren (Beijing Polytechnic, China) and Hongxia Zhao (Beijing Polytechnic, China)

The Modal Analysis of Centrifugal fan Vibration Shaft Based on ANSYS 97
Yong Gao (China Coal Technology and Engineering Group Corp, China) and Zheng Wang (China Coal Technology and Engineering Group Corp, China)

Construction of Intelligent Control Platform for Forging Production Line Based on Cyber-Physical System 101
Dan Yi (Beijing University of Technology, China), DeWei Li (Beijing University of Technology, China), Qiang Cheng (Beijing University of Technology, China), Tao Zhang (Beijing University of Technology, China), and CongBin Yang (Beijing University of Technology, China)

Trotting Gait Control of Quadruped Robot Based on Trajectory Planning 105
Baoping Ma (The 21st Research Institute of China Electronics Technology Group Corporation, China), Ziqian Liu (The 21st Research Institute of China Electronics Technology Group Corporation, China), Changwu Peng (The 21st Research Institute of China Electronics Technology Group Corporation, China), and Xiaoqiang Li (The 21st Research Institute of China Electronics Technology Group Corporation, China)

The Utility Model Relates to an Integral Clutch Booster with a Shift Control Valve 109
Fei Ye (Ruili Group Ruian Auto Parts Co.LTD, China), YiHui Huang (Ruili Group Ruian Auto Parts Co.LTD, China), GuiLiang Chen (Ruili Group Ruian Auto Parts Co.LTD, China), and WeiWei Cai (Ruili Group Ruian Auto Parts Co.LTD, China)

A Scheme and Kinematics Analysis of an Assembly Vehicle for Terminal Optical Component of a Laser Fusion Device 113
Naiji Fan (Laser Fusion Research Center, CAEP, China), Yuan Xue (Harbin Institute of Technology, China), Wenchao Wang (Harbin Institute of Technology, China), Zezhong Sun (Harbin Institute of Technology, China), Zhihai Wang (Harbin Institute of Technology, China), and Qingshun Bai (Harbin Institute of Technology, China)

The Design of Longitudinal Autonomous Landing Control for a Fixed Wing Unmanned Aerial Vehicle 120
Kangwei Chen (The University of Sydney, Australia)

Research on EPB Braking System for Mechanical Execution Elements 128
ZaiWei Zhang (SORL Auto Parts, Inc., China) and Hai Lin (SORL Auto Parts, Inc., China)

Experimental Analysis on Vibration and Noise of Motor Bearing of Washing Machine 132
Xingtong Shi (Shanghai University, China), Guangwei Yu (Shanghai University, China), and Gang Li (Shanghai University, China)

Research on Motion Control of Mobile Robot Based on S-Type Acceleration and Deceleration 137
Xi Ai (Hubei University of Technology, China), Dazhang You (Hubei University of Technology, China), Jiatao Tao (Hubei University of Technology, China), Yu Zeng (Hubei University of Technology, China), Xinqing Zhang (Hubei University of Technology, China), and Shuai Wang (Hubei University of Technology, China)

Study on Intelligent Control of Harvester Hydraulic Leveling 142
Jingyuan Zhao (University of Jinan, China), Shukun Cao (University of Jinan, China), Naijian Chen (University of Jinan, China), Zechao Shangguan (University of Jinan, China), and Hongbin Wang (University of Jinan, China)

Design of Dynamic Data Acquisition System Based on Mechanical Fault Diagnosis 146
MengDi Shi (Beijing Polytechnic, China)

Resistance Response of Carbon Nanofibers to Mutiaxial Strain 150
Jing Zhang (Wuhan University of Science and Technology, China), Xi Lou (Wuhan University of Science and Technology, China), JiaBao Guo (Wuhan University of Science and Technology, China), and HuaSheng Zheng (Wuhan University of Science and Technology, China)

The Stress Analysis of Gear Tooth Root Based on ANSYS 154
Yong Gao (China Coal Technology and Engineering Group Corp, China)

Demonstration of Rectangular Waveguides by Microfabrication Technology 159
Hanyan Li (Guangxi University of Science and Technology, China), Yongtao Li (Guangxi University of Science and Technology, China), Yi Wang (Guangxi University of Science and Technology, China), Xiangsuo Fan (Guangxi University of Science and Technology, China), Jinjun Feng (Beijing Vacuum Electronics Research Institute, China), and Lili Li (Beijing Vacuum Electronics Research Institute, China)

Key Technologies of Energy Saving and Emission Reduction for Light Electric RTG 163
Yiqin Li (China Waterborne Transport Research Institute, China) and Muhan Deng (China Waterborne Transport Research Institute, China)

Study on Kinematics and Dynamics of Intelligent Connector of Safety Cable to Tower Imitating Crocodile Mouth Action 167
Jinling Song (Quanzhou Normal University, China), Chunyang Gu (The University of Nottingham Ningbo China, China), Shanping Gao (Quanzhou University of Information Engineering, China), Ehui Huang (Quanzhou University of Information Engineering, China), Shuting Li (Quanzhou University of Information Engineering, China), Junqin Zhou (Quanzhou University of Information Engineering, China), Zhenjie Chen (Quanzhou University of Information Engineering, China), and Lizhi Gu (Quanzhou University of Information Engineering, China; Huaqiao University, China)

Session 2: Intelligent Automation and Algorithm Model Application

Welding Quality Analysis and Prediction Based on Deep Learning 173
Jinquan Lin (Wuhan University of Technology, China), Jinli Xu (Wuhan University of Technology, China), Jie Lu (Wuhan University of Technology, China), and Ding Li (Wuhan University of Technology, China)

Research on Fault Diagnosis of Double-Column Roadway Stacker Based on Deep Learning 178
YongLiang Li (Beijing Satellite Manufacturing Co. Ltd., China), YiLong HuangFu (Beijing Satellite Manufacturing Co. Ltd., China), HaiYue Li (Beijing Satellite Manufacturing Co. Ltd., China), and ZeJian Chen (Beijing Satellite Manufacturing Co. Ltd., China)

Digital Automatic Control Precision Assembly Technology 184
Weiwei Zhou (Beijing Institute of Precision Mechatronics and Controls, China), Zengkui Chen (China Academy of Launch Vehicle Technology, China), Jing Huang (Beijing Institute of Precision Mechatronics and Controls, China), Chunying Heng (Beijing Institute of Precision Mechatronics and Controls, China), Fengjiang Liu (Beijing Institute of Precision Mechatronics and Controls, China), and Qiwei Zhang (Beijing Institute of Precision Mechatronics and Controls, China)

Application of Grey Correlation Method in Electronic Information Equipment Evaluation 191
Haomin Wei (North University of China, China), Ruihua Wang (PLA Academy of Military Science, China), Zhangxia Guo (North University of China, China), Zhou Yang (PLA Academy of Military Science, China), and Jiajia Wang (Innovation Center for Intelligent System on Recognition and Decision, China; China Aerospace Science and Industry Corporation Applied Mathematics Research Center, China; Beijing Jinghang Research Institute of Computing and Communication, China)

Analysis of The Influence of Punching Speed on Die Wear Based on DEFORM 195
Xing Wang (Anhui Sanlian University, China) and Mingming Wu (Anhui Sanlian University, China)

Second-Order Counterexample Trajectory Characteristics of the Discrete-Time Kalman Conjecture 200
Danyang Wang (Beijing Institute of Precision Mechatronics and Controls, China), Haobang Xu (Beijing Institute of Precision Mechatronics and Controls, China), Peng Guo (Beijing Institute of Precision Mechatronics and Controls, China), Xiaolu Wang (Beijing Institute of Precision Mechatronics and Controls, China), and Jing Huang (Beijing Institute of Precision Mechatronics and Controls, China)

Research on the Self- Adaption All-Terrain Transportation Platform for Sprinkler Irrigation Operation 206
Na Zhang (Beijing Polytechnic, China), Zhe Sun (Beijing Polytechnic, China), Qingsong Zhu (Beijing Polytechnic, China), Yu Jing (Beijing Polytechnic, China), and Junliang Jia (Beijing Polytechnic, China)

Research on Three Dimensional Measurement Method Based on Focused Evaluation 215
Wenbo Du (National Institute of Measurement and Testing Technology, China), Dongming He (National Institute of Measurement and Testing Technology, China), and Chang'an Hu (National Institute of Measurement and Testing Technology, China)

Research on Prediction of Equipment Remaining Life: Based on Simulated Annealing Algorithm... 219
Sitian Geng (Lanzhou University of Technology, China), Jingfang Fang (Lanzhou University of Technology, China), Yuqiao Zheng (Lanzhou University of Technology, China), and Wenhui Zhang (ZTE Corporation)

Recognition of Material Surfaces with Smart Gloves Based on Machine Learning 224
Yajun Liu (South China University of Technology, China), Shenchao Zhang (South China University of Technology, China), and Qi Luo (South China University of Technology, China)

Research on Trajectory Planning of Numerical Control Drilling for Panel Furniture Based on Elite Ant Colony Algorithm 229
Ping Li (Guangdong Institute of Intelligent, China), FengHua Liu (Guangzhou KDT Machinery Ltd, China), ShenKun Fan (Guangdong Institute of Intelligent, China), Qiyu Chen (Guangdong Institute of Intelligent, China), and Martina Schiffer (Fraunhofer Institute for Manufacturing Engineering and Automation, Germany)

Vehicle State and Tire Parameter Estimation Based on Improved Particle Filter Based on Genetic Algorithm 233
Ruixin Bao (Nanjing University of Aeronautics and Astronautics, China), Yuqun Zhao (Nanjing University of Aeronautics and Astronautics, China), and Fen Lin (Nanjing University of Aeronautics and Astronautics, China)

Research on Three-Stage Point Cloud Registration Mode Optimized by Simulated Annealing Algorithm 237
Fengyun Huang (Wuhan University of Technology, China), Junsong Chen (Wuhan University of Technology, China), and Jianning Xu (Wuhan University of Technology, China)

Computer Aided Synthesis Method for Movable Soil-Blocking Plate of Micro-Cultivator 246
Yehui Zhao (Shandong Agricultural University, China), Shutian Liu (Shandong Agricultural University, China), Guangming Wang (Shandong Agricultural University, China), and Yanqiang Yang (Shandong Provincial Key Laboratory of Horticultural Machineries and Equipment, China)

Curve Fitting and Software Realization of Electronic Cam 252
Shuai Wang (Hubei University of Technology, China), DaZhang You (Hubei Key Laboratory of Modern Manufacturing Quality Engineering, China), YiMing Lei (Hubei University of Technology, China), XinQing Zhang (Hubei University of Technology, China), Yu Zeng (Hubei University of Technology, China), and Xi Ai (Hubei University of Technology, China)

Research on Regenerative Braking Distribution Method of Pure Electric Vehicle Based on Firefly Algorithm 258
Yunchang Shen (Anhui Polytechnic University, China) and Huacai Lu (Anhui Polytechnic University, China)

A Deep Learning Method to Realize The Load-Sensing Control 264
Shengye Zhu (The George Washington University, USA)

Multi-Scale Residual Reconstruction Algorithm Based on Compressed Sensing Image 268
Ningyuan Mao (Lanzhou Jiaotong University, China), Yuhong Liu (Lanzhou Jiaotong University, China), Xiaoyan Liu (Lanzhou Jiaotong University, China), and Manyin Chen (Lanzhou Jiaotong University, China)

Joint Optimization of Flow-Shop Scheduling and Maintenance Planning with Processing Speed Selection by an Improved Genetic Algorithm 272
Junwei Jiang (Chongqing University, China), Xiaohui Chen (Chongqing University, China), and Youjun An (Chongqing University, China)

Research on Decoupling Motion Path Planning of Two Manipulators of Live Working Robot Based on Hybrid RRT Algorithm 278
Zhe Liu (State Grid Shanghai Municipal Electric Power Company, China), Aiqiang Pan (State Grid Shanghai Municipal Electric Power Company, China), Anfeng Jiang (State Grid Shanghai Municipal Electric Power Company, China), Wenhe Li (State Grid Shanghai Energy Interconnection Research Institute, China), Jiawei Zhang (Harbin Institute of Technology, China), and Chengchao Bai (Harbin Institute of Technology, China)

Research on Thermal Error Measuring Point Optimization and Modeling of Machine Tool Spindle 283
Li Bao (Harbin University of Science and Technology, China; Qiqihar University, China; Qizhong CNC Co., Ltd, China), Yulong Xu (Qiqihar University, China), Haipeng Li (Qiqihar University, China), Jingjing Shi (Qiqihar University, China), La Ta (Qiqihar University, China), Ruichao Jia (Qiqihar University, China), MinLi Zheng (Harbin University of Science and Technology, China), and Hui Jiang (Qi Zhong CNC Co., Ltd, China)

Dynamics Modeling and Servomotor Parameter Estimation of a 3-Spherical-Prismatic-Revolute Parallel Mechanism 288
Manxin Wang (Nanjing University of Science and Technology, China) and Minghao Wang (Nanjing University of Science and Technology, China)

The AGV Guidance of Giant Grinding-Polishing Coalescence Robot by Machine Vision and Ackermann Steering System Design 297
Lizhi Gu (Quanzhou University of Information Engineering, China; Huaqiao University, China), Shanping Gao (Quanzhou University of Information Engineering, China), Jinling Song (Quanzhou Normal University, China), Sisi Chen (Quanzhou University of Information Engineering, China), Bingzhang Lin (Quanzhou University of Information Engineering, China), Chun Liu (Quanzhou University of Information Engineering, China), Li Zhou (Quanzhou University of Information Engineering, China), and Jingying Zheng (Quanzhou University of Information Engineering, China)

Research on high Precision Location Algorithm for Trajectory Tracking of Service Robot 302
Menglong Cao (Qingdao University of Science and Technology, China) and Fei Liu (Qingdao University of Science and Technology, China)

Tool Wear Monitoring of Milling Center Based on Optimize Variational Mode Decomposition 307
Jingshu Wang (Chongqing University of Technology, China), Yingchun Chen (Chongqing University of Technology, China), Tao Chen (Chongqing University of Technology, China), and Wanhua Zhao (Chongqing University of Technology, China)

Research on the Aerospace Mechatronic Servo System's Digital Production Line Construction 311
Dongyan Chang (Beijing Institute of Precision Mechatronics and Controls, China; Laboratory of Aerospace Servo Actuation and Transmission, China), Bo Yang (Beijing Institute of Precision Mechatronics and Controls, China; Laboratory of Aerospace Servo Actuation and Transmission, China), Wei Lv (X Military Representative Office of the PLA Rocket Force, China), and Jing Huang (Beijing Institute of Precision Mechatronics and Controls, China; Laboratory of Aerospace Servo Actuation and Transmission, China)

Research on Soil Thermal Conductivity Prediction Algorithm Based on Improved BP Neural Network 316
Jian Liu (Beijing University of Technology, China), Donglai Xu (Beijing University of Technology, China), Wenjie Zhang (Beijing University of Technology, China), and Changcheng Wu (Beijing University of Technology, China)

Multi-Parameter Discrete Grey Prediction With Few Observations 320
Wei Niu (Xi'an Aeronautics Computing Technique Research Institute, China), Pan Lei (AVIC First Aircraft Institute, China), Wei Wang (Xi'an Aeronautics Computing Technique Research Institute, China), Xiaogang Song (Xi'an University of Technology, China), and Juan Cheng (Xi'an Institute of Applied Optics, China)

Multi AGV Simulation System of Intelligent Workshop Based on Digital Twin 325
Sheng Wang (Beijing Institute of Technology, China), Tie Fu (Beijing Institute of Technology, China), Pan Luo (Beijing Xing Hang Electromechanical Equipment Co., Ltd, China), and Aimin Wang (Beijing Institute of Technology, China)

The Path Planning of Grinding and Polishing for Wind-Driven Generator Vane Based on Curvature Gradient and Shortest Route 330
Lizhi Gu (Quanzhou University of Information Engineering, China; Huaqiao University, China), Yixiang Huang (Quanzhou University of Information Engineering, China), Mingrui Li (Yiyang Xintong Co., LTD. Beijing Branch, China), Ying Li (Quanzhou University of Information Engineering, China), Tieming Xiang (Xiamen Institute of Technology and Technology, China), Zifan Wang (Quanzhou University of Information Engineering, China), Chengtao Nie (Quanzhou University of Information Engineering, China), and Zhibin Yu (Quanzhou University of Information Engineering, China)

Research on High Speed Machining Programming Technology the Whole Impeller 336
Shaojie Zhang (Zhoukou Vocational Technical College, China)

Research on Intelligent Collaboration of Two-Layer Self-Organizing Network 340
Ting Wang (Inner Mongolia University, China), Xiaodong Cheng (Inner Mongolia University, China), Jinling Xu (Inner Mongolia University, China), Chenjie Su (Inner Mongolia University, China), and Zengping Zhang (Inner Mongolia University of Finance and Economics, China)

Study on Thermal Dynamics Modeling and Simulation of Inflatable Shock Absorber 345
Yijie Chen (China North Vehicle Research Institute, China), Wenlun Ma (FAW Jiefang Automotive CO., LTD, China), Long Xu (China North Vehicle Research Institute, China), Mengyan Xu (China North Vehicle Research Institute, China), and Long Huang (China North Vehicle Research Institute, China)

Planning and Analysis of Flexible Production Line Based on Simulation 351
Wei Cao (AVIC Manufacturing Technology Institute, China)

Research on Robust Navigation Algorithm for Soft Landing of Small Celestial Body 355
Menglong Cao (Qingdao University of Science and Technology, China), Xiaoyu Wang (Qingdao University of Science and Technology, China), Mengge Shi (Qingdao University of Science and Technology, China), and Yue Gao (Qingdao University of Science and Technology, China)

Basic Models and Applications of Resistor-Capacitor Circuits and Simulations using Falstad..... 360
Ruozhou Wang (University of Southern California, USA)

Optimal Path Planning of Mobile Robot Based on Improved ant Colony Algorithm 366
Yu Zeng (Hubei University of Technology, China), Dazhang You (Hubei University of Technology, China), Xi Ai (Hubei University of Technology, China), Xinqing Zhang (Hubei University of Technology, China), Shuai Wang (Hubei University of Technology, China), and Zhijie Yang (Hubei University of Technology, China)

Research on Man-Robot Serial Cooperative Two-Sided Assembly Line Balancing Based on NSGA-II 371
Hongying Shan (Jilin University, China), Cungang Zou (Jilin University, China), Mengyao Qin (Jilin University, China), Zunyan Meng (Jilin University, China), and Peiyang Peng (Jilin University, China)

Mobile Robot Path Planning Based on Improved Genetic Algorithm 378
Fengyun Huang (Wuhan University of Technology, China), Hao Fu (Wuhan University of Technology, China), Junsong Chen (Wuhan University of Technology, China), and Xinqiang Wang (Wuhan University of Technology, China)

Identification of key Quality Characteristics of Triple-Extrusion Process of Power Cable Based on Extreme Gradient Boosting Algorithm 384
Shize Zhang (China Electric Power Research Institute, China), Chao Peng (China Electric Power Research Institute, China), Fanwu Chu (China Electric Power Research Institute, China), and Qiang Cui (State Grid Materials Co., Ltd, China)

Research on Task Scheduling Algorithm Based on Multi-Time Period Merging 389
Minghao Xia (Beijing University of Technology, China), Haibin Liu (Beijing University of Technology, China), Jian Li (Beijing University of Technology, China), and Mingfei Li (Beijing University of Technology, China)

Road Sign Detection and Recognition System Based on Multi-Layers Convolutional Neural Network Model Trained with German Traffic Sign Recognition Benchmark 395
Siwei Fan (Chengdu Jinjiang Jiaxiang Foreign Languages High School, China)

Degradation Feature Extraction of Quay Side Crane Lifting Gearbox Based on Katz Fractal Dimensional-Singular Value Decomposition 400
Ming Wang (Shanghai Maritime University, China) and Bing Wang (Shanghai Maritime University, China)

Surface Defect Detection of Carbon Fiber Prepreg Based on Image Processing 405
Yi-Qi Wang (Dalian University of Technology, China), Cong Bu (Dalian University of Technology, China), Xiaofeng Hou (Dalian University of Technology, China), and Tete Cao (Dalian University of Technology, China)

Session 3: Intelligent Manufacturing and Optimal Design of Mechanical Structure

Development of a Large Range Piezoelectric Hot Stamping Forming Force Measurement Sensor ... 409
Yazhou Hu (University of Jinan, China), Yingjun Li (University of Jinan, China), Changlong Zhou (University of Jinan, China), and Shuai Zhang (University of Jinan, China)

Design of Intelligent Trash Can Based on STC89C54 Microcontroller Unit 413
Shuang Liang (Shanghai Ocean University, China), Jie Su (Shanghai Ocean University, China), Xiaoying Li (Shanghai Ocean University, China), Chao Ouyang (Shanghai Ocean University, China), and Yuan Liu (Shanghai Ocean University, China)

Control of Microstructure and Properties for Tantalum-Tungsten Alloy Component Manufacturing in Cold Forging and Subsequent Annealing Process 417
Hong Zhan (Southwest Technology and Engineering Research Institute, China), Ming Chen (Hunan Vanguard Group Co., Ltd, China), Dayu Shu (Southwest Technology and Engineering Research Institute, China), Qiang Chen (Southwest Technology and Engineering Research Institute, China), Mengmeng Liu (Northwestern Polytechnical University, China), Han Xiao (Southwest Technology and Engineering Research Institute, China), Xiangsheng Xia (Southwest Technology and Engineering Research Institute, China), and Gaozhan Zhao (Southwest Technology and Engineering Research Institute, China)

Optimal Design of Vibration Fixture and Analysis of its Vibration Characteristics 423
Xiaofei Chen (China Electronics Technology Group Corporation No.14 Research Institute), Xuelin Peng (China Electronics Technology Group Corporation No.14 Research Institute), and Zhangqi Gu (China Electronics Technology Group Corporation No.14 Research Institute)

Intelligent Design Technology of Aircraft Structural Parts Based on Model and Knowledge 427
B. Hao (Northeastern University at Qinhuangdao, China) and J. Wang (Northeastern University, China)

Research on Optimization of Dispensing Process of a Chinese Medicine Granule Dispensing Equipment Based on Improved Genetic Algorithm 433
Wenjie Zhang (Beijing University of Technology, China), Donglai Xu (Beijing University of Technology, China), and Jian Liu (Beijing University of Technology, China)

Design of Quadruped Robot Articulated Motor Body 437
XiaoQiang Li (The 21st Research Institute of China Electronics Technology Group Corporation, China), ChangWu Peng (The 21st Research Institute of China Electronics Technology Group Corporation, China), and BaoPing Ma (The 21st Research Institute of China Electronics Technology Group Corporation, China)

Research Progress and Development Direction of Structural Optimization and Modeling of Traveling Wave Rotating Ultrasonic Motor 442
Dongqing Ma (Shandong University of Science and Technology, China)

Structure Design and Manufacture of Thermal Car 448
Han Xiao (Wuhan University of Technology, China)

Influence of Heat Source Location on Heat Dissipation Performance of an Underwater Scientific Instrument Interface Module 453
Zhengwei Wu (Tongji University, China) and Yaobao Yin (Tongji University, China)

Research on the Structure Compensation Technology of Multiple Parallel Mechanisms for Large Antenna Array 458
Wenhua Xu (Nanjing Research Institute of Electronics Technology, China), Yajing Ma (Nanjing Research Institute of Electronics Technology, China), and Baofu Tang (Nanjing Research Institute of Electronics Technology, China)

Vibration Characteristics of High-Speed EMU Considering Car Body Structural Vibration Mode.... 465
Xiaojie Sun (Shanghai Institute of Technology, China), Jian Yan (Shanghai Institute of Technology, China), Bingbin Guo (CRRC Zhuzhou Locomotive Co.Ltd, China), and Hengliang Wang (Shanghai Railway Bureau, China)

Effects of Composite Processing on Microstructures and Properties of Al-Mg Alloy 470
Fangwei Jin (Guizhou University of Engineering Science, China) and Xueying Ji (Guizhou University of Engineering Science, China)

Research on Switch with Locking Device 475
Chuanbiao Mao (Ruili Group Ruian Auto Parts Co., Ltd., China), Jiaqing Wang (Ruili Group Ruian Auto Parts Co., Ltd., China), YanTao Shi (Ruili Group Ruian Auto Parts Co., Ltd., China), and Zhenhua Chen (Ruili Group Ruian Auto Parts Co., Ltd., China)

Numerical Study of the Hydrodynamic Properties of a mid-Water Sensors Mounting Structure 480
Zhengwei Wu (Tongji University, China) and Yaobao Yin (Tongji University, China)

Design of a Magnetic Gear Reducer 485
Ning Li (University of Jinan, China), YuanYuan Li (Weichai Power Co., Ltd., China), Cheng Wang (University of Jinan, China), and YuHao Zhang (University of Jinan, China)

A Local Resonance Metamaterial For Vibration Reduction 489
Yuxuan Ma (Beijing University of Technology, China), Lihua Chen (Beijing University of Technology, China), Mengjiao Zhang (Beijing University of Technology, China), and Yadi Zhang (Beijing University of Technology, China)

Simulation and Optimization Analysis of Vehicle Cooling System 493
Hongxia Zhao (Beijing Polytechnic, China), Jiangyi Lv (Beijing Polytechnic, China), Minjie Liu (Beijing Polytechnic, China), and Xiaolong Ren (Beijing Polytechnic, China)

A Vibration Reduction of a Lightweight Metamaterial Beam 498
Hui Liu (Beijing University of Technology), Lihua Chen (Beijing University of Technology), Lutong Shan (Beijing University of Technology), and Xianyuan Meng (Beijing University of Technology)

Design and Implementation of MES System for Intelligent Manufacturing Reducer Production Line 502
Miaomiao Wang (Tianjin University of Technology and Education, China), Xiaojun Guo (Tianjin University of Technology and Education, China), Yanxu Lei (Tianjin University of Technology and Education, China), and Qiangqiang Liu (Tianjin University of Technology and Education, China)

Development of Static Characteristic Test System for TMR Sensors 506
Jixiong Liu (Xiangtan University, China), Jieping Liang (Xiangtan University, China), Zhiyuan Xu (Xiangtan University, China), Zhen Zhou (Xiangtan University, China), and Jingjing Zhai (1st Class Weak Magnetic Metering Station of NDM, China)

Optimal Design of the High Speed Blend Machine Control System 511
Qixu Wang (Northeastern University, USA) and Yajun Liu (South China University of Technology, China)

Temperature Field Simulation and Structure Optimization of Asphalt Heating Furnace 516
Qingan Liu (University of Jinan, China), Jiankui Dang (University of Jinan, China), Rongyu Ge (University of Jinan, China), and Xiuli Fu (University of Jinan, China)

Design of High Loading Joint Bearing Testing Machine Based on ANSYS Finite Element Simulation 521
Yongqiang Wang (Shanghai University, China), Wen Wang (Shanghai University, China), Wenxun Jiang (Shanghai University, China), and Yujuan Li (Shanghai University, China)

Design of Virtual Training System for Virtual Reality Intelligent Production Line of Optical Fiber Router Based on Industrial Robot 525
R.B. Zhou (Wuchang Shouyi University, China) and Z. Jin (Wuhan Youkeruite Information Technology Co., Ltd, China)

Design and Research of non-Contact Optical Density Measuring Device 530
Hongbo Gao (National Institute of Measurement and Testing Technology, China), Yan Zhou (National Institute of Measurement and Testing Technology, China), Hongyu Su (National Institute of Measurement and Testing Technology, China), Changlin Su (National Institute of Measurement and Testing Technology, China), Xueying Cao (National Institute of Measurement and Testing Technology, China), and Weigang Wu (National Institute of Measurement and Testing Technology, China)

High Precision Gear Manufacturing with Three Thermal Error Measuring Methods and Performance Comparison 534
Jinghua Ma (Chongqing University of Technology, China), Zhuang Liu (Chongqing Chuanyi Automation Co., Ltd, China), Wanhua Zhao (Chongqing University of Technology, China), and Zheng Zou (Chongqing University of Technology, China)

Structural Design and Experiment of a Vertical Bicycle Parking Device Based on TRIZ Theory..... 539
Wenhui Li (Wenhua College, China), Jiajun Yang (Huazhong University of Science and Technology, China), and Xun Lian (Wenhua College, China)

Manufacturing Execution System Driven by Industrial Big Data 543
Qiangqiang Liu (Tianjin University of Technology and Education, China), Xiaojun Guo (Tianjin University of Technology and Education, China), Yanxu Lei (Tianjin University of Technology and Education, China), and Miaomiao Wang (Tianjin University of Technology and Education, China)

Research on Working Principle and Realization Mode of Electronic Controlled air Dryer 547
GuiLiang Chen (Ruili Group Ruian Auto Parts Co. LTD, China), YiHui Huang (Ruili Group Ruian Auto Parts Co. LTD, China), WeiWei Cai (Ruili Group Ruian Auto Parts Co. LTD, China), and Fei Ye (Ruili Group Ruian Auto Parts Co. LTD, China)

Parametric Design of Gears Based on Secondary Development of SolidWorks Macros 551
Yunping Pan (Wuhan University of Technology, China) and Wenzhe Wan (Wuhan University of Technology, China)

Study on Microstructure and Properties of TiC Reinforced Stellite F Alloy Laser Cladding Layer 556
Gen Li (Huadian Electric Power Research Institute, China) and Xiuzhong Liu (Shandong University, China)

Design and Analysis of Space-Borne Ring Antenna Mechanism for Deployment Smoothness 561
Liwei Yu (Tianjin University, China) and Baiyan He (Tianjin University, China)

Cardioid Crank Mechanism and its Application 568
Jiguang Han (Jiangsu Normal University, China) and Haotong Han (Jiangsu Huai Gong Vehicle Testing Research Institute Co. LTD, China)

Damping Analysis of Disk Resonator Gyroscope in Rarefied Gas 572
Shenhu Huang (Nanjing University of S&T NJUST, China), Bo Jiang (Nanjing University of S&T NJUST, China), Yixuan Li (Nanjing University of S&T NJUST, China), Yi Zhou (Nanjing University of S&T NJUST, China), and Yan Su (Nanjing University of S&T NJUST, China)

Mechanical Structure Design of Compact Intelligent Dustbin 576
Yu Liu (Nantong University, China), Wei Meng (Nantong University, China), and Zhisong Zhu (Nantong University, China)

Layout Optimization of Manufacturing Workshop Based on System Analysis 581
Lei Liu (Jilin University, China), Xiangdong Kong (Jilin University, China), Haoyang Wu (Jilin University, China), and Ruihang Ma (Jilin University, China)

Failure Analysis and Performance Optimization of Mechanical Limit of a Radar Turntable 587
Yang Jiang (Structural Technology Departmentdept, China)

A Emergency Power Equipment Design of Direct Current Full Hydraulic Tunnel for Coal Mine 591
Yong Gao (China Coal Technology and Engineering Group Corp, China)

Design and Position & Gesture Matrix Expression of 3-DOF Wrist of Two-Color Sole Molding Robot 596
Lizhi Gu (Quanzhou University of Information Engineering, China; Huaqiao University, China), Shanping Gao (Quanzhou University of Information Engineering, China), Sisi Chen (Quanzhou University of Information Engineering, China), Jinling Song (Quanzhou Normal University, China), Chun Liu (Quanzhou University of Information Engineering, China), Li Zhou (Quanzhou University of Information Engineering, China), Qingying Zheng (Quanzhou University of Information Engineering, China), and Liqin Zhou (Huaqiao University, China)

Analysis of Impact-Resistant Design for Ship-Borne Rigid Installed Electronic Equipment 602
Shixin Zhou (Nanjing Research Institute of Electronics Technology, China) and Bin Yang (Nanjing Research Institute of Electronics Technology, China)

Study of Quenching Device Design Method and Flow Regulation Theory Based on "Solid Contact-Fluid Heat Transfer" Mode 606
Hongchen Zhang (Qingdao University, China), Qing Wang (Qingdao University, China), Shuowei Bai (Qingdao University, China), Runze Liu (Qingdao University, China), and Peng Chen (China Productivity Center for Machinery, China)

Design of Underground Tunnel Monitoring System Based on CAN BUS Local Area Network 613
Zezhong Li (Hainan University, China), Wenjin Liu (Hainan University, China), Yukuan Du (Hainan University, China), and Shifan Xu (Hainan University, China)

Size Design and Parameter Optimization of Embolization Coil for Cerebral Aneurysm Based on Finite Element Compliance Analysis 618
An Qu (Dalian Jiaotong University, China), Tianmin Guan (Dalian Jiaotong University, China), Tianxiang Gan (Jianghan University, China), Liang Xuan (Jianghan University, China), and Zhuang Lin (Jianghan University, China)

Manufacturing Heterojunction Based on 2D Materials for Artificial Neural Network Construction 622
En Zhao (Southwest University, China), Bao Li (Southwest University, China), Ling Chen (Southwest University, China), and Zhiyuan Zhu (Southwest University, China)

Effect of Alloying Treatment on Properties and Cost of High Manganese Steel 626
Yan Zhuang (Jiangxi Open University), Piao Zhang (East China University of Technology, China), and Wenwei Zhuang (East China University of Technology, China)

Design of ICRD Multifunctional Cold Water Recovery System Based on the Internet of Things Technology 631
ChangYu Ni (Shenyang Aerospace University, China), YanCheng Zhu (Shenyang Aerospace University, China), ZiTong Zhang (Shenyang Aerospace University, China), Xu Yang (Shenyang Aerospace University, China), and Ying Zhang (Shenyang Aerospace University, China)

Study and Test of Integrated Performance Test of Intelligent Management air Handling System 635
Liu Yang (SORL Auto Parts, Inc., China), XianYan Wang (SORL Auto Parts, Inc., China), Gang Liu (SORL Auto Parts, Inc., China), and YongHong Yu (SORL Auto Parts, Inc., China)

Effect of Mo Alloying on Properties of High Manganese Steel Castings and Cost Analysis 639
Yan Zhuang (Jiangxi Open University), Piao Zhang (East China University of Technology, China), and Xiaorong Wang (East China University of Technology, China)

Design of a New Cylindrical Manipulator Based on TRIZ Conflict Theory 644
Yizhuo Wang (Nanjing University of Science and Technology, China) and Libo Ding (Nanjing University of Science and Technology, China)

Optimized Design of Compound Power Supply System for Explosion-Proof Electric Rubber-Tyred Vehicles 649
Zhiwei Wang (China Coal Science and Industry Group Taiyuan Research Institute, China), Yuan Zhao (Shanxi Tiandi Coal Machinery Equipment Co., Ltd, China), Fan Zhang (Shanxi Tiandi Coal Machinery Equipment Co., Ltd, China), and Zhijun Hao (China Coal Science and Industry Group Taiyuan Research Institute, China)

Design of a new Tubular Structure Transfer Tool 655
Gaolin Ren (China Academy of Aerospace Aerodynamics, China), Xuewei Zhang (China Academy of Aerospace Aerodynamics, China), Yongliang Wang (China Academy of Aerospace Aerodynamics, China), Wei Qin (China Academy of Aerospace Aerodynamics, China), Yihui Xu (China Academy of Aerospace Aerodynamics, China), Wenxin Ma (China Academy of Aerospace Aerodynamics, China), and Chaochao Liu (China Academy of Aerospace Aerodynamics, China)

Study on Negative Pressure Handling of Carbon Fiber Prepreg 661
Yi-Qi Wang (Dalian University of Technology, China), Xiaofeng Hou (Dalian University of Technology, China), Cong Bu (Dalian University of Technology, China), and Bochuan Liu (Dalian University of Technology, China)

Automatic Winding Forming Technology for Manufacturing Glass Fiber Reinforced Plastic Pipes 665
Yi-Qi Wang (Dalian University of Technology, China), Cong Bu (Dalian University of Technology, China), Xiaofeng Hou (Dalian University of Technology, China), and Junfeng Du (Dalian University of Technology, China)

Study on Compressive Properties of Fiber Metal Laminates with Nail Reinforced Structure 669
YiQi Wang (Dalian University of Technology, China) and Jiali Yu (Dalian University of Technology, China)

Author Index **673**
