2021 IEEE 21st International Conference on Software Quality, Reliability and Security (QRS) QRS 2021

Table of Contents

Message from the QRS 2021 Steering Committee Chairs, General Chairs, and Program Chairs	xviii
Steering Committee	xxi
Organizing Committee	xxii
Program Committee	xxiv
Chairs of Workshops Co-Located with QRS 2021	xxviii
Keynote Speakers	xxxii

System and Software Security

A Novel Method to Prevent Multiple Withdraw Attack on ERC20 Tokens	1
<i>Jin-lei Sun (Army Engineering University of PLA, China), Song Huang (Army Engineering University of PLA, China), Chang-you Zheng (Army Engineering University of PLA, China), Mei-juan Wang (Army Engineering University of PLA, China), Zhan-wei Hui (Academy of Military Science, China), and Yi-xian Ding (Liaoning Technical University, China)</i>	
Analyzing Structural Security Posture to Evaluate System Design Decisions	8
<i>Joe Samuel (Carleton University, Canada), Jason Jaskolka (Carleton University, Canada), and George O. M. Yee (Carleton University, Canada; Aptusinnova Inc., Canada)</i>	
Cryptography Vulnerabilities on HackerOne	18
<i>Mohammadreza Hazhirpasand (University of Bern, Switzerland) and Mohammad Ghafari (University of Auckland, New Zealand)</i>	
CTScopy: Hunting Cyber Threats within Enterprise via Provenance Graph-Based Analysis	28
<i>Rui Mei (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Han-Bing Yan (National Computer Network Emergency Response Technical Team/Coordination Center of China, China), Zhi-Hui Han (National Computer Network Emergency Response Technical Team/Coordination Center of China, China), and Jian-Chun Jiang (Institute of Software, Chinese Academy of Sciences, China)</i>	

DeepDetect: A Practical On-Device Android Malware Detector	40
<i>Saurabh Kumar (Indian Institute of Technology Kanpur, India), Debadatta Mishra (Indian Institute of Technology Kanpur, India), Biswabandan Panda (Indian Institute of Technology Bombay, India), and Sandeep Kumar Shukla (Indian Institute of Technology Kanpur, India)</i>	
Dynamic Interval-Based Watermarking for Tracking Down Network Attacks	52
<i>Lian Yu (Peking University, China), Lei Zhang (Peking University, China), Yuanyuan Zhang (Peking University, China), Weiping Wen (Peking University, China), Xuetao Du (Institute of Research and Development, China), and Fei Cao (Peking University, China)</i>	
EcoAndroid: An Android Studio Plugin for Developing Energy-Efficient Java Mobile Applications	62
<i>Ana Ribeiro (University of Lisbon, Portugal), João F. Ferreira (University of Lisbon, Portugal), and Alexandra Mendes (Universidade da Beira Interior, Portugal)</i>	
Explainable APT Attribution for Malware Using NLP Techniques	70
<i>Qinqin Wang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Hanbing Yan (National Computer Network Emergency Response Technical Team/Coordination Center of China, China), and Zhihui Han (National Computer Network Emergency Response Technical Team/Coordination Center of China, China)</i>	
Impact of Datasets on Machine Learning Based Methods in Android Malware Detection: An Empirical Study	81
<i>Xiuting Ge (Nanjing University, China), Yifan Huang (Nanjing University, China), Zhan-wei Hui (Military Academy of Sciences, China), Xiaojuan Wang (Military Academy of Sciences, China), and Xu Cao (Military Academy of Sciences, China)</i>	
Security Header Fields in HTTP Clients	93
<i>Pascal Gadiant (University of Bern, Switzerland), Oscar Nierstrasz (University of Bern, Switzerland), and Mohammad Ghafari (University of Auckland, New Zealand)</i>	
Security-Aware Multi-User Architecture for IoT	102
<i>Marcus Birgersson (KTH Royal Institute of Technology, Sweden), Cyrille Artho (KTH Royal Institute of Technology, Sweden), and Musard Balliu (KTH Royal Institute of Technology, Sweden)</i>	
Sound Predictive Atomicity Violation Detection	114
<i>Xiaoxue Ma (City University of Hong Kong, Hong Kong), Imran Ashraf (City University of Hong Kong, Hong Kong), and W.K. Chan (City University of Hong Kong, Hong Kong)</i>	
Strategies for Reducing Traffic Volume and Security on Smart Grid	126
<i>Chih-Wei Hsu (National Cheng Kung University, Cina) and Sun-Yuan Hsieh (National Cheng Kung University, China)</i>	
The Security Risk of Lacking Compiler Protection in WebAssembly	132
<i>Quentin Stiévenart (Vrije Universiteit Brussel, Belgium), Coen De Roover (Vrije Universiteit Brussel, Belgium), and Mohammad Ghafari (Auckland University, New Zealand)</i>	

Software Testing and Verification

A Framework for Progressive Regression Testing PLC Programs	140
<i>Zeyu Lu (East China Normal University, China) and Zhanquan Guo (Beihang University, China)</i>	
A Tool to Support Vibration Testing Method for Automatic Test Case Generation and Test Result Analysis	149
<i>Kenya Saiki (Hiroshima University, Japan), Shaoying Liu (Hiroshima University, Japan), Hiroyuki Okamura (Hiroshima University, Japan), and Tadashi Dohi (Hiroshima University, Japan)</i>	
An Empirical Study on Test Case Prioritization Metrics for Deep Neural Networks	157
<i>Ying Shi (Beihang University, China), Beibei Yin (Beihang University, China), Zheng Zheng (Beihang University, China), and Tiancheng Li (Beihang University, China)</i>	
Analysis of Road Representations in Search-Based Testing of Autonomous Driving Systems ...	167
<i>Ezequiel Castellano (National Institute of Informatics, Japan), Ahmet Cetinkaya (National Institute of Informatics, Japan), and Paolo Arcaini (National Institute of Informatics, Japan)</i>	
Application of Combinatorial Testing to Quantum Programs	179
<i>Xinyi Wang (Nanjing University of Aeronautics and Astronautics, China), Paolo Arcaini (National Institute of Informatics, Japan), Tao Yue (Nanjing University of Aeronautics and Astronautics, China; Simula Research Laboratory, Norway), and Shaukat Ali (Simula Research Laboratory, Norway)</i>	
Automated Testing of Android Applications Integrating Residual Network and Deep Reinforcement Learning	189
<i>Lizhi Cai (East China University of Science and Technology, China; Shanghai Key Laboratory of Computer Software Testing & Evaluating, China), Jilong Wang (East China University of Science and Technology, China; Shanghai Key Laboratory of Computer Software Testing & Evaluating, China), Mingang Chen (Shanghai Key Laboratory of Computer Software Testing & Evaluating, China), and Jin Wang (East China University of Science and Technology, China; Shanghai Key Laboratory of Computer Software Testing & Evaluating, China)</i>	
DroidGamer: Android Game Testing with Operable Widget Recognition by Deep Learning	197
<i>Bo Jiang (Beihang University, China), Wenlin Wei (Beihang University, China), Li Yi (Beihang University, China), and W.K. Chan (City University of Hong Kong, Hong Kong)</i>	
Evaluating and Improving Static Analysis Tools via Differential Mutation Analysis	207
<i>Alex Groce (Northern Arizona University, USA), Iftekhar Ahmed (University of California Irvine, USA), Josselin Feist (Trail of Bits, USA), Gustavo Grieco (Trail of Bits, USA), Jiri Gesi (University of California Irvine, USA), Mehran Meidani (University of California Irvine, USA), and Qi Hong Chen (University of California Irvine, USA)</i>	

HARS: Heuristic-Enhanced Adaptive Randomized Scheduling for Concurrency Testing	219
<i>Yanzhou Mu (Tianjin University, China), Zan Wang (Tianjin University, China), Shuang Liu (Tianjin University, China), Jun Sun (Singapore Management University, Singapore), Junjie Chen (Tianjin University, China), and Xiang Chen (Nantong University, China)</i>	
Historical Information Stability Based Reward for Reinforcement Learning in Continuous Integration Testing	231
<i>Tiange Cao (Beijing University of Chemical Technology, China), Zheng Li (Beijing University of Chemical Technology, China), Ruilian Zhao (Beijing University of Chemical Technology, China), and Yang Yang (Zhejiang Sci-Tech University, China)</i>	
Increasing Fuzz Testing Coverage for Smart Contracts with Dynamic Taint Analysis	243
<i>Songyan Ji (Harbin Institute of Technology, China), Jian Dong (Harbin Institute of Technology, China), Junfu Qiu (Harbin Institute of Technology, China), Bowen Gu (Harbin Institute of Technology, China), Ye Wang (Harbin Institute of Technology, China), and Tongqi Wang (Harbin Institute of Technology, China)</i>	
MMFC-ART: A Fixed-Size-Candidate-Set Adaptive Random Testing Approach Based on the Modified Metric-Memory Tree	248
<i>Jinfu Chen (Jiangsu University, China), Yiming Wu (Jiangsu University, China), Chengying Mao (Jiangxi University of Finance and Economics, China), Tsong Yueh Chen (Swinburne University of Technology, Australia), and Haibo Chen (Jiangsu University, China)</i>	
On Assessing the Safety of Reinforcement Learning Algorithms Using Formal Methods	260
<i>Paulina Stevia Nouwou Mindom (Polytechnique Montréal, Canada), Amin Nikanjam (Polytechnique Montréal, Canada), Foutse Khomh (Polytechnique Montréal, Canada), and John Mullins (Polytechnique Montréal, Canada)</i>	
On the Automation of Audio Plugin Testing	270
<i>Stephan Valentan (Graz University of Technology, Austria) and Franz Wotawa (Graz University of Technology, Austria)</i>	
OPE: Transforming Programs with Clean and Precise Separation of Tested Intraprocedural Program Paths with Path Profiling	279
<i>Chunbai Yang (City University of Hong Kong, Hong Kong), Imran Ashraf (City University of Hong Kong, Hong Kong), Xiaoxue Ma (City University of Hong Kong, Hong Kong), Hao Zhang (City University of Hong Kong, Hong Kong), and W.K. Chan (City University of Hong Kong, Hong Kong)</i>	
REST API Fuzzing by Coverage Level Guided Blackbox Testing	291
<i>Chung-Hsuan Tsai (National Yang Ming Chiao Tung University, Taiwan), Shi-Chun Tsai (National Yang Ming Chiao Tung University, Taiwan), and Shih-Kun Huang (National Yang Ming Chiao Tung University, Taiwan)</i>	
SQDroid: A Semantic-Driven Testing for Android Apps via Q-Learning	301
<i>Hui Guo (Donghua University, China; Shanghai Key Laboratory of Computer Software Evaluating and Testing, China), Xiaoqiang Liu (Donghua University, China), Baiyan Li (Donghua University, China), Lizhi Cai (Shanghai Key Laboratory of Computer Software Evaluating and Testing, China), Yun Hu (Shanghai Key Laboratory of Computer Software Evaluating and Testing, China), and Jing Cao (Donghua University, China)</i>	

TAF: A Tool for Diverse and Constrained Test Case Generation	311
<i>Clément Robert (Université de Toulouse, France), Jérémie Guiochet (Université de Toulouse, France), Hélène Waeselynck (Université de Toulouse, France), and Luca Viitorio Sartori (Université de Toulouse, France)</i>	
Target Code-Coverage and Efficiency in APP Automatic Compatibility Testing Based on Code Analysis	322
<i>Sen Yang (Army Engineering University of PLA, China), Yifan Huang (Illinois Institute of Technology, USA), Song Huang (Army Engineering University of PLA, China), Zhanwei Hui (Academy of Military Sciences, China), and Changyou Zheng (Army Engineering University of PLA, China)</i>	
Test Benchmarks: Which One Now and in Future?	328
<i>Cyrille Artho (KTH Royal Institute of Technology, Sweden), Adam Benali (KTH Royal Institute of Technology, Sweden), and Rudolf Ramler (Software Competence Center Hagenberg, Austria)</i>	
Unit Crowdsourcing Software Testing of Go Program	337
<i>Run Luo (Guangzhou GRG Metrology & Test Co., Ltd.; Army Engineering University of PLA, China), Song Huang (Army Engineering University of PLA, China), Meijuan Wang (Army Engineering University of PLA, China), JinChang Hu (Army Engineering University of PLA, China), and JinHu Du (Army Engineering University of PLA, China)</i>	

Software Reliability and Defect Analysis

A Simulation Based Intelligent Analysis Framework of Aircraft Reliability, Resilience and Vulnerability	347
<i>Qi Yao (Beihang University, China), Fuping Zeng (Beihang University, China), Yizhuo Zhang (Beihang University, China), Minghao Yang (Beihang University, China), Zhiyu Duan (Beihang University, China), and Shunkun Yang (Beihang University, China)</i>	
Dynamic Detection of AsyncTask Related Defects	357
<i>Qing Liu (Institute of Software, Chinese Academy of Sciences, China), Linjie Pan (Institute of Software, Chinese Academy of Sciences, China), Baoquan Cui (Institute of Software, Chinese Academy of Sciences, China), Jun Yan (Institute of Software, Chinese Academy of Sciences, China), and Jian Zhang (Institute of Software, Chinese Academy of Sciences, China)</i>	
Heterogeneous Defect Prediction through Joint Metric Selection and Matching	367
<i>Haowen Chen (Wuhan University, China), Xiao-Yuan Jing (Wuhan University, China; Guangdong University of Petrochemical Technology, China; Nanjing University, China), and Baowen Xu (Nanjing University, China)</i>	
Multiple Error Types Software Belief Reliability Growth Model Based on Uncertain Differential Equation	378
<i>Zhe Liu (Beihang University, China) and Rui Kang (Beihang University, China)</i>	
Platform Software Reliability for Cloud Service Continuity—Challenges and Opportunities	388
<i>Ning Luo (Intel Asia-Pacific Research & Development Ltd., China) and Yue Xiong (Intel Asia-Pacific Research & Development Ltd., China)</i>	

Reliability-Redundancy Allocation Problem Considering Imperfect Fault Coverage	394
<i>Zixiang Wang (Wuhan University of Technology, China), Siwei Zhou (Wuhan University of Technology, China), Dongdong Zhao (Wuhan University of Technology, China), and Jianwen Xiang (Wuhan University of Technology, China)</i>	

Reliability and Quality Assurance

A Deep Method Renaming Prediction and Refinement Approach for Java Projects	404
<i>Jiahui Liang (Nanjing University of Aeronautics and Astronautics, China), Weiqin Zou (Nanjing University of Aeronautics and Astronautics, China), Jingxuan Zhang (Nanjing University of Aeronautics and Astronautics, China), Zhiqiu Huang (Nanjing University of Aeronautics and Astronautics, China), and Chenxing Sun (Tencent Technology Co. Ltd., China)</i>	
An Online Model Integration Framework for Server Resource Workload Prediction	414
<i>Tong Xu (Inner Mongolian University, China), Hua Li (Inner Mongolia University, China), and YunFei Bai (Inner Mongolia University, China)</i>	
Automated Cause Analysis of Latency Outliers Using System-Level Dependency Graphs	422
<i>Sneh Patel (Brock University, Canada), Naser Ezzati-Jivan (Brock University, Canada), Brendan Park (Brock University, Canada), and Quentin Fournier (Polytechnique Montréal, Canada)</i>	
Automatic Adaptation of Reliability and Performance Trade-Offs in Service- and Cloud-Based Dynamic Routing Architectures	434
<i>Amirali Amiri (University of Vienna, Austria), Uwe Zdun (University of Vienna, Austria), André van Hoorn (University of Hamburg, Germany), and Schahram Dustdar (Technical University of Vienna, Austria)</i>	
Automatic Identification of High Impact Bug Report by Test Smells of Textual Similar Bug Reports	446
<i>Jianshu Ding (East China University of Science and Technology, China), Guisheng Fan (East China University of Science and Technology, China), Huiqun Yu (East China University of Science and Technology, China), and Zijie Huang (East China University of Science and Technology, China)</i>	
ConLAR: Learning to Allocate Resources to Docker Containers under Time-Varying Workloads	458
<i>Diwei Chen (Shanghai Jiao Tong University, China), Beijun Shen (Shanghai Jiao Tong University, China), and Yuting Chen (Shanghai Jiao Tong University, China)</i>	
eCPDP: Early Cross-Project Defect Prediction	470
<i>Sunjae Kwon (Korea Advanced Institute of Science and Technology, South Korea), Duksan Ryu (Jeonbuk National University, South Korea), and Jongmoon Baik (Korea Advanced Institute of Science and Technology, South Korea)</i>	
EPR: A Neural Network for Automatic Feature Learning from Code for Defect Prediction	482
<i>Dingbang Fang (Hiroshima University, Japan), Shaoying Liu (Hiroshima University, Japan), and Ai Liu (Hiroshima University, Japan)</i>	

Estimating the Attack Surface from Residual Vulnerabilities in Open Source Software Supply Chain	493
<i>Dapeng Yan (Nanjing University of Aeronautics and Astronautics, China), Kui Liu (Nanjing University of Aeronautics and Astronautics, China), Zhiming Liu (Southwest University, China), Yuqing Niu (Nanjing University of Aeronautics and Astronautics, China), Zhe Liu (Nanjing University of Aeronautics and Astronautics, China), and Tegawende F. Bissyande (SnT, University of Luxembourg, Luxembourg)</i>	
Heterogeneous Defect Prediction through Correlation-Based Selection of Multiple Source Projects and Ensemble Learning	503
<i>Eunseob Kim (Korea Advanced Institute of Science and Technology, South Korea), Jongmoon Baik (Korea Advanced Institute of Science and Technology, South Korea), and Duksan Ryu (Jeonbuk National University, South Korea)</i>	
Identification of Compromised IoT Devices: Combined Approach Based on Energy Consumption and Network Traffic Analysis	514
<i>Fehmi Jaafar (Computer Research Institute of Montréal, Canada), Darine Ameyed (École de Technologie Supérieure, Canada), Amine Barrak (Quebec University at Chicoutimi, Canada), and Mohamed Cheriet (École de Technologie Supérieure, Canada)</i>	
Predictors of Software Metric Correlation: A Non-Parametric Analysis	524
<i>Daniel Afriyie (Carleton University, Canada) and Yvan Labiche (Carleton University, Canada)</i>	
Reliability of Centralized vs. Parallel Software Models for Composable Storage Systems	534
<i>Mario Blaum (IBM Research Division-Almaden, USA) and Paul Muench (IBM Research Division-Almaden, USA)</i>	
Software Defect Prediction via Multi-Channel Convolutional Neural Network	543
<i>Chen Lang (Tokyo Institute of Technology, Japan), Jidong Li (Tokyo Institute of Technology, Japan), and Takashi Kobayashi (Tokyo Institute of Technology, Japan)</i>	
The Bidirectional Safety Analysis & Validation Framework of System and Software with Its Techniques and Applications	555
<i>Haifeng Li (Beihang University, China), Chang Liu (Beihang University, China), and Huancheng Su (Nanjing Electronic Equipment Institute, China)</i>	
W-SRAT: Wavelet-Based Software Reliability Assessment Tool	564
<i>Jingchi Wu (Hiroshima University, Japan), Tadashi Dohi (Hiroshima University, Japan), and Hiroyuki Okamura (Hiroshima University, Japan)</i>	

Program Debugging and Vulnerability Analysis

A Possibilistic Evolutionary Approach to Handle the Uncertainty of Software Metrics Thresholds in Code Smells Detection	574
<i>Sofien Boutaib (University of Tunis, Tunisia), Maha Elarbi (University of Tunis, Tunisia), Slim Bechikh (University of Tunis, Tunisia), Fabio Palomba (University of Salerno, Italy), and Lamjed Ben Said (University of Tunis, Tunisia)</i>	

CONFUZZION: A Java Virtual Machine Fuzzer for Type Confusion Vulnerabilities	586
<i>William Bonnaventure (University of Luxembourg, Luxembourg), Ahmed Khanfir (University of Luxembourg, Luxembourg), Alexandre Bartel (Umeå University, Sweden), Mike Papadakis (University of Luxembourg, Luxembourg), and Yves Le Traon (University of Luxembourg, Luxembourg)</i>	
Exception-Driven Fault Localization for Automated Program Repair	598
<i>Davide Ginelli (University of Milano-Bicocca, Italy), Oliviero Riganelli (University of Milano-Bicocca, Italy), Daniela Micucci (University of Milano-Bicocca, Italy), and Leonardo Mariani (University of Milano-Bicocca, Italy)</i>	
Fuzzing Deep Learning Models against Natural Robustness with Filter Coverage	608
<i>Zhengyuan Wei (City University of Hong Kong, Hong Kong) and W.K. Chan (City University of Hong Kong, Hong Kong)</i>	
Practical Online Debugging of Spark-Like Applications	620
<i>Matteo Marra (Vrije Universiteit Brussel, Belgium), Guillermo Polito (Univ. Lille, CNRS, Inria, France), and Elisa Gonzalez Boix (Vrije Universiteit Brussel, Belgium)</i>	
SSpinJa: Facilitating Schedulers in Model Checking	632
<i>Nhat-Hoa Tran (Hanoi University of Science and Technology, Vietnam) and Toshiaki Aoki (Japan Advanced Institute of Science and Technology, Japan)</i>	
Time-Traveling Debugging Queries: Faster Program Exploration	642
<i>Maximilian Ignacio Willebrinck Santander (Univ. Lille, CNRS, Inria, France), Steven Costiou (Univ. Lille, CNRS, Inria, France), Anne Etien (Univ. Lille, CNRS, Inria, France), and Stéphane Ducasse (Univ. Lille, CNRS, Inria, France)</i>	
Towards More Reliable Automated Program Repair by Integrating Static Analysis Techniques	654
<i>Omar I. Al-Bataineh (Simula Research Laboratory, Norway), Anastasiia Grishina (Simula Research Laboratory, Norway), and Leon Moonen (Simula Research Laboratory, Norway)</i>	
Vulnerability Analysis of Similar Code	664
<i>Azin Piran (New York Institute of Technology, Canada), Che-Pin Chang (New York Institute of Technology, Canada), and Amin Milani Fard (New York Institute of Technology, Canada)</i>	

Fault Localization and Debugging

AGFL: A Graph Convolutional Neural Network-Based Method for Fault Localization	672
<i>Jie Qian (Nantong University, China), Xiaolin Ju (Nantong University, China), Xiang Chen (Nantong University, China), Hao Shen (Nantong University, China), and Yiheng Shen (Nantong University, China)</i>	
CBFL: Improving Software Fault Localization by Analyzing Statement Complexity	681
<i>Haoren Wang (Beijing Information Science and Technology University, China), Haochen Jin (Beijing Information Science and Technology University, China), Zhanqi Cui (Beijing Information Science and Technology University, China), and Rongcun Wang (China University of Mining and Technology, China)</i>	

Improving Quality of Counterexamples in Model Checking via Automated Planning	691
<i>Xu Lu (Xidian University, China), Cong Tian (Xidian University, China), Bin Yu (Xidian University, China), and Zhenhua Duan (Xidian University, China)</i>	
Sdft: A PDG-Based Summarization for Efficient Dynamic Data Flow Tracking	702
<i>Xiao Kan (Xidian University, China), Cong Sun (Xidian University, China), Shen Liu (NVIDIA, USA), Yongzhe Huang (Pennsylvania State University, USA), Gang Tan (Pennsylvania State University, USA), Siqi Ma (University of Queensland, Australia), and Yumei Zhang (Xidian University, China)</i>	
Towards Repairing Neural Networks Correctly	714
<i>Guoliang Dong (Zhejiang University, China), Jun Sun (Singapore Management University, Singapore), Xingen Wang (Zhejiang University, China), Xinyu Wang (Zhejiang University, China), and Ting Dai (Huawei International Pte. Ltd., Singapore)</i>	

AI for Software Engineering

A Novel API Recommendation Approach by Using Graph Attention Network	726
<i>Zijie Chen (Macau University of Science and Technology, China), Tao Zhang (Macau University of Science and Technology, China), and Xiao Peng (Macau University of Science and Technology, China)</i>	
A Novel Tree-Based Neural Network for Android Code Smells Detection	738
<i>Jing Yu (Tsinghua University, China), Chenguang Mao (Soochow University, China), and Xiaojun Ye (Tsinghua University, China)</i>	
A Protocol-Based Intrusion Detection System Using Dual Autoencoders	749
<i>Yu-Lun Huang (National Yang Ming Chiao Tung University, Taiwan), Ching-Yu Hung (National Yang Ming Chiao Tung University, Taiwan), and Hsiao-Te Hu (National Yang Ming Chiao Tung University, Taiwan)</i>	
ACLM: Software Aging Prediction of Virtual Machine Monitor Based on Attention Mechanism of CNN-LSTM Model	759
<i>Xueyong Tan (Inner Mongolia University, China) and Jing Liu (Inner Mongolia University, China)</i>	
An Efficient Network Intrusion Detection Model Based on Temporal Convolutional Networks .	768
<i>JinFu Chen (Jiangsu University, China), Shang Yin (Jiangsu University, China), Saihua Cai (Jiangsu University, China), Chi Zhang (Jiangsu University, China), Yemin Yin (Jiangsu University, China), and Ling Zhou (Jiangsu University, China)</i>	
Applying a Deep-Learning Approach to Predict the Quality of Web Services	776
<i>Siao-Fang Lin (National Tsing Hua University, Taiwan), Chin-Yu Huang (National Tsing Hua University, Taiwan), and Neil C. Fang (National Tsing Hua University, Taiwan)</i>	
DG-Trans: Automatic Code Summarization via Dynamic Graph Attention-Based Transformer .	786
<i>Jianwei Zeng (Macau University of Science and Technology, China), Tao Zhang (Macau University of Science and Technology, China), and Zhou Xu (Macau University of Science and Technology, China)</i>	

Event Stream Classification with Limited Labeled Data for E-Commerce Monitoring	796
<i>Alexander Zimin (Amazon.com, Inc., USA), Igor Mishchenko (Amazon.com, Inc., USA), and Rebecca Steinert (Amazon.com, Inc., USA)</i>	
Generating Adversarial Examples of Source Code Classification Models via Q-Learning-Based Markov Decision Process	807
<i>Junfeng Tian (Hebei University, China), Chenxin Wang (Hebei University, China), Zhen Li (Hebei University, China), and Yu Wen (Hebei University, China)</i>	
GrasP: Graph-to-Sequence Learning for Automated Program Repair	819
<i>Ben Tang (Yangzhou University, China), Bin Li (Yangzhou University, China), Lili Bo (Yangzhou University, China), Xiaoxue Wu (Yangzhou University, China), Sicong Cao (Yangzhou University, China), and Xiaobing Sun (Yangzhou University, China)</i>	
Hunter in the Dark: Discover Anomalous Network Activity Using Deep Ensemble Network	829
<i>Shiyi Yang (University of New South Wales, Australia), Hui Guo (University of New South Wales, Australia), and Nour Moustafa (University of New South Wales, Australia)</i>	
MINTS: Unsupervised Temporal Specifications Miner	841
<i>Pradeep K. Mahato (University of British Columbia, Canada) and Apurva Narayan (University of British Columbia, Canada)</i>	
Multilevel Traceability Links Establishments between SOFL Formal Specifications and Java Codes Using Multi-Dimensional Similarity Measures	852
<i>Jiandong Li (Hiroshima University, Japan), Shaoying Liu (Hiroshima University, Japan), Ai Liu (Hiroshima University, Japan), and Runhe Huang (Hosei University, Japan)</i>	
On the Effects of Data Sampling for Deep Learning on Highly Imbalanced Data from SCADA Power Grid Substation Networks for Intrusion Detection	864
<i>Wotawa Franz (Graz University of Technology, Austria) and Mühlburger Herbert (Graz University of Technology, Austria)</i>	
Recovering Semantic Traceability between Requirements and Source Code Using Feature Representation Techniques	873
<i>Meng Zhang (Nanjing University of Aeronautics and Astronautics, China), Chuanqi Tao (Nanjing University of Aeronautics and Astronautics, China; Nanjing University, China; Collaborative Innovation Center of Novel Software Technology and Industrialization, China), Hongjing Guo (Nanjing University of Aeronautics and Astronautics, China), and Zhiqiu Huang (Nanjing University of Aeronautics and Astronautics, China; Collaborative Innovation Center of Novel Software Technology and Industrialization, China)</i>	

Models and Algorithms

A K-Means Improved CTGAN Oversampling Method for Data Imbalance Problem	883
<i>Chunsheng An (Chongqing Engineering Research Center of Software Quality Assurance, China), Jing Tong Sun (Seaquam Secondary, Canada), Yifeng Wang (Chongqing Engineering Research Center of Software Quality Assurance, China), and Qingjie Wei (Chongqing Engineering Research Center of Software Quality Assurance, China)</i>	

An Effective Crowdsourced Test Report Clustering Model Based on Sentence Embedding	888
<i>Hao Chen (Army Engineering University of PLA, China), Song Huang (Army Engineering University of PLA, China), Yuchan Liu (Army Engineering University of PLA, China), Run Luo (Army Engineering University of PLA, China), and Yifei Xie (Army Engineering University of PLA, China)</i>	
An Incomplete Unsatisfiable Cores Extracting Algorithm to Promote Routing	900
<i>Jianmin Zhang (National University of Defense Technology, China), Tiejun Li (National University of Defense Technology, China), and Siqing Fu (National University of Defense Technology, China)</i>	
Hybrid Collaborative Filtering-Based API Recommendation	906
<i>Yongchao Wang (Nanjing University of Aeronautics and Astronautics, China), Yu Zhou (Nanjing University of Aeronautics and Astronautics, China; Nanjing University, China; Key Laboratory of Safety-Critical Software, Ministry of Industry and Information Technology, China), Taolue Chen (University of London, UK; Nanjing University, China), Jingxuan Zhang (Nanjing University of Aeronautics and Astronautics, China; Key Laboratory of Safety-Critical Software, Ministry of Industry and Information Technology, China), Wenhua Yang (Nanjing University of Aeronautics and Astronautics, China; Key Laboratory of Safety-Critical Software, Ministry of Industry and Information Technology, China), and Zhiqiu Huang (Nanjing University of Aeronautics and Astronautics, China; Key Laboratory of Safety-Critical Software, Ministry of Industry and Information Technology, China)</i>	
ReDefender: A Tool for Detecting Reentrancy Vulnerabilities in Smart Contracts Effectively.....	915
<i>Zhenyu Pan (Southeast University, China), Tianyuan Hu (Southeast University, China), Chen Qian (Southeast University, China), and Bixin Li (Southeast University, China)</i>	
WANA: Symbolic Execution of Wasm Bytecode for Extensible Smart Contract Vulnerability Detection	926
<i>Bo Jiang (Beihang University, China), Yifei Chen (Beihang University, China), Dong Wang (Beihang University, China), Imran Ashraf (City University of Hong Kong, Hong Kong), and W.K. Chan (City University of Hong Kong, Hong Kong)</i>	

Empirical Study

A Preliminary Investigation of Developer Profiles Based on Their Activities and Code Quality: Who Does What?	938
<i>Cristina Aguilera González (Universitat Politècnica de Catalunya, Spain), Laia Albors Zumel (Universitat Politècnica de Catalunya, Spain), Jesús Antoñanzas Acero (Universitat Politècnica de Catalunya, Spain), Valentina Lenarduzzi (LUT University, Finland), Silverio Martínez-Fernández (Universitat Politècnica de Catalunya, Spain), and Sonia Rabanaque Rodríguez (Universitat Politècnica de Catalunya, Spain)</i>	

Accept or Not? An Empirical Study on Analyzing the Factors That Affect the Outcomes of Modern Code Review	946
<i>Dandan Wang (Institute of Software, Chinese Academy of Sciences, China), Qing Wang (Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Junjie Wang (Institute of Software, Chinese Academy of Sciences, China), and Lin Shi (Institute of Software, Chinese Academy of Sciences, China)</i>	
Analyzing Software Security-Related Size and Its Relationship with Vulnerabilities in OSS	956
<i>Elaine Venson (University of Southern California, USA), Ting Fung Lam (University of Southern California, USA), Bradford Clark (Software Metrics Inc., USA), and Barry Boehm (University of Southern California, USA)</i>	
Analyzing the Impact of Cyberattacks on Industrial Control Systems Using Timed Automata ...	966
<i>Alvi Jawad (Carleton University, Canada) and Jason Jaskolka (Carleton University, Canada)</i>	
Are the Scala Checks Effective? Evaluating Checks with Real-World Projects	978
<i>Xin Zhang (Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Jiwei Yan (Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Baoquan Cui (Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Jun Yan (Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), and Jian Zhang (Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)</i>	
Evaluating Code Summarization with Improved Correlation with Human Assessment	990
<i>Juanjuan Shen (Nanjing University of Aeronautics and Astronautics, China), Yu Zhou (Nanjing University of Aeronautics and Astronautics, China; Nanjing University, China), Yongchao Wang (Nanjing University of Aeronautics and Astronautics, China), Xiang Chen (Nantong University, China), Tingting Han (Birkbeck, University of London, UK), and Taolue Chen (Birkbeck, University of London, UK; Nanjing University, China)</i>	
Log Severity Levels Matter: A Multivocal Mapping	1002
<i>Eduardo Mendes (Université du Québec à Chicoutimi, Canada) and Fabio Petrillo (Université du Québec à Chicoutimi, Canada)</i>	
Mapping Breakpoint Types: An Exploratory Study	1014
<i>Eduardo Andreetta Fontana (University of Quebec at Chicoutimi, Canada) and Fabio Petrillo (University of Quebec at Chicoutimi, Canada)</i>	
Multi-Agent Automata and Its Application to LDLK Satisfiability Checking	1024
<i>Ya Gao (SKLCS, Institute of Software, Chinese Academy of Sciences, China; University of the Chinese Academy of Sciences, China), Wenhui Zhang (SKLCS, Institute of Software, Chinese Academy of Sciences, China; University of the Chinese Academy of Sciences, China), and Xue-Yang Zhu (SKLCS, Institute of Software, Chinese Academy of Sciences, China; University of the Chinese Academy of Sciences, China)</i>	

On Understanding Contextual Changes of Failures	1036
<i>Francisco Ribeiro (University of Minho, Portugal), Rui Abreu (University of Porto, Portugal), and João Saraiva (University of Minho, Portugal)</i>	
Phish What You Wish	1048
<i>Pascal Gadiet (University of Bern, Switzerland), Pascal Gerig (University of Bern, Switzerland), Oscar Nierstrasz (University of Bern, Switzerland), and Mohammad Ghafari (University of Auckland, New Zealand)</i>	
Research on Mining of Government Data Based on Enhanced-Object Exchange Model	1060
<i>Kejin Sa (National Engineering Laboratory, China), Yu Bai (Harbin Engineering University, China), and Chenggang Wang (Southwest China Institute of Electronic Technology, China)</i>	
SRTEF: Automatic Test Function Recommendation with Scenarios for Implementing Stepwise Test Case	1069
<i>Kaiqi Liu (Beihang University, China), Ji Wu (Beihang University, China), Haiyan Yang (Beihang University, China), Qing Sun (Beihang University, China), and Ruiyuan Wan (Huawei Technologies Co., Ltd., China)</i>	
The Challenge of Reproducible ML: An Empirical Study on the Impact of Bugs	1079
<i>Emilio Rivera-Landos (Polytechnique Montréal, Canada), Foutse Khomh (Polytechnique Montréal, Canada), and Amin Nikanjam (Polytechnique Montréal, Canada)</i>	
The Relation between Bug Fix Change Patterns and Change Impact Analysis	1089
<i>Ekinan Ufuktepe (University of Missouri–Columbia, USA), Tugkan Tuglular (Izmir Institute of Technology, Turkey), and Kannappan Palaniappan (University of Missouri–Columbia, USA)</i>	
Understanding the Resilience of Neural Network Ensembles against Faulty Training Data	1100
<i>Abraham Chan (University of British Columbia, Canada), Niranjana Narayanan (University of British Columbia, Canada), Arpan Gujarati (University of British Columbia, Canada), Karthik Pattabiraman (University of British Columbia, Canada), and Sathish Gopalakrishnan (University of British Columbia, Canada)</i>
