TABLE OF CONTENTS

PART 1

Preface

Logo

Peer review declaration

Stack fabric felting to get PCM G_{IIc} improvement and LVI tolerance 1
G A Forental, A V Kheruvimov, A V Nikonov, S B Sapozhnikov

The new indicator coating to detect the place of barely visible impacts on aircraft composite structures 9
O S Buslaeva, S B Sapozhnikov, A V Bezmelnitsyn, A V Ignatova, A Kudryavtsev

Solvent-free process for the synthesis of highly stretchable piezoresistive sensors based on polydimethylsiloxane filled with graphene nanoplatelets and carbon nanotubes 17
F. Piscitelli, M. L. Lo Gatto, G. Rollo, G. Filippone, M. Lavorgna

Effect of non-covalent functionalization of graphene-based nanoparticles on the local electrical properties of epoxy nanocomposites 25
Marialuigia Raimondo, Carlo Naddeo, Liberata Guadagno

Tolerance analysis of a GFET transistor for aerospace and aeronautical application 33
P Lamberti, M La Mura, F Pasadas, D Jiménez, V Tucci

Understanding the Role of Graphene on the Moisture Absorption in Graphene/Polymer Nanocomposites 41
F Almudaihesh, H Alfaris, P Sangha, R Pullin, M Eaton

Meshfree Methods of Airframe Stress Analysis 47
N S Kalutskiy

Recycling of Critical Raw Materials from Hydrogen Chemical Storage Stacks (PEMWE), Membrane Electrode Assemblies (MEA) and Electrocatalysts 55
A M Moschovi, E Zagoraiou, E Polyzou, I Yakoumis

Multilayer and high-entropy alloy-based protective coatings for solving the issue of critical raw materials in the aerospace industry 63
Bogdan Postolnyi, Vladimir Buranich, Kateryna Smyrnova, João Pedro Araújo, Luís Rebouta, Alexander Pogrebnjak, Vladyslav Rogoz

Numerical procedure for electro-thermal anti-icing system simulation coupling internal thermal analysis and external multi-physic code 71
A. Carozza, F. Petrosino, G. Mingione

Application of different Lagrangian Particle Tracking techniques for water impingement 79
F. Petrosino, D. De Rosa, G. Mingione

New Aircraft Anti/de-Icing Technologies 85
Luigi Vertuccio, Fabiana Foglia, Roberto Pantani, Liberata Guadagno

Comparison of lightning strike damage in bolted and bonded CFRP joints using a coupled electro-thermal FE model 91
Sofianos Alexandros, Tserpes Konstantinos

Finite Element Analysis of Composite Matrix Material with Micro-damage Healing Ability 99
I. Smojver, D. Ivančević, D. Brezetič

Conceptual design and parametric structural modeling of a FWAV biomimetic flapping wing 106
Saiaf Bin Rayhan

Investigation on Electrically-Assisted Rolling Process of Surface Texture for Drag Reduction 114
Zhenhai Xu, Shaoxi Xue, Chunju Wang, Baosheng Liu, Debin Shan, Bin Guo

On Unsteady Flow Analysis of a Round Spike Blunt Nose Afterbody in Mach 6 Flow 121
A Vashishtha, S Khurana

Design of a composite nose wheel for commercial aircraft 129
J-D Wacker, D Laveuve, C Contell Asins, A Büter

Robotized assembly and inspection of composite fuselage panels: the LABOR project approach 137
Mario Caterino, Pasquale Chiacchio, Cristina Cristalli, Marcello Fera, Gaetano Lettera, Ciro Natale, Matteo Nisi

Aeroelastic optimisation of manufacturable tow-steered composite wings with cruise shape constraint and gust loads 145
Zhijun Wang, Daniël Peeters, De Breuker Roel

Development and trend of unified mechanism-based materials modelling for creep age forming of aluminium alloys 153
Xi Wang, Yong Li, Baoguo Chen, Zhusheng Shi

Repair & maintenance by Metal Additive Manufacturing process on Titanium alloy parts 161
Solène Lhabitant, Florimont Badouaille, Djamel Remache, Guillaume Cohen, Alain Toufine

TOD – Thermoplastics on Doors: Development of full scale innovative composites doors, surrounds and sub-structure for Regional Aircraft Fuselage barrel on-ground demonstrators. Innovative overall manufacturing and assembly approach and preliminary results obtained at the early stage of the project 169
A Miraglia, F Felline, C Rocco, A Ceresa, Umberto Raganato, M Zavala-Arredondo, B Flipo, G Liaptsis, J Riise, X Cui, M Wu, S Sampethai

SPARE project – improvement of continuous compression moulding process for the production of thermoplastic composite beams 177
Riccaro Angiuli, Federica Dell'Anno, Leonardo Cosma, Umberto Raganato, Alessandra Passaro

Virtual testing activities for the development of a hybrid thermoplastic composite material for the NHYTE project 185
Rosario Dotoli, Antonio Gerardi, Panagiota Polydoropoulou, George Lampeas, Spiros Pantelakis, Alfonso Carpio Rovira

Integration and evaluation of a meander-shaped fibre-optical sensor in GFRP coupons 193
A Preisler, F Wolf-Monheim, D Kaiser, R Wojtczyk, A Dafnis, K-U Schröder, W David, P Zandbergen

Investigation on low velocity impact damage identification with ultrasonic techniques under different sensor network conditions 201
A Beligni, F Cadini, C Sbarufatti, M Giglio, N Cimminiello, P Salvato, E Monaco, F Romano

Eddy Current and Quantum Well Effect Eddy Current Field Measurement of Carbon Fibre Raw Materials and cured parts in the Aerospace Industry 209
C Silva, V James, C Smith, J Hansen, M Missous, J Sexton, J Watson, J Dobson

Advanced Acoustic Emission Source Location in Aircraft Structural Testing 217
S Grigg, C A Featherston, M Pearson, R Pullin

Preliminary studies of flight sensoring for loads and aeroelastic parameters estimation of the NGCTR-TD wing 225
A Cardozo, J Beretta, N Paletta, S Adden, M Belardo, A Chiariello, L Di Palma

Experimental investigation of damage detection on structures with friction stir welding (FSW) junctions 233
A Sorrentino, A Chiariello, L Di Palma, A De Fenza

Robot deployed Laser-Ultrasonic NDT system for inspection of large aircraft structures 242
Vicki James, Dave Carswell, J Riise, P. Ian Nicholson, Norbert Graf, Norbert Huber, Martin Gärtner, Bernhard Reitinger, Edgar Scherleitner, Peter Burgholzer, Jon Phipps, Dave Burns, Ciro Incarnato

Design of a morphing leading edge as a high lift device for a regional aircraft 250
C Contell Asins, V Landersheim, J-D Wacker, S Adachi, S Arnold-Keifer, M May

Methods of analyzing isolated and ducted fixed-pitch propellers under non-axial inflow conditions 258
M Cerny, J Faust, C Breitsamter

Study on a twin-fuselage transport airplane model in a low speed wind tunnel 266
V I Chernousov, A A Krutov, E A Pigusov

Aerial Stability Of An In-Flight Water Scooping System 274
Mario Verhagen, Huub Timmermans, Wouter van den Brink

The dependence of the speed of sound in the Earth's atmosphere on its density and the correction of Mach's number 282
V. Kirtskhalia

Cooling system design for the internal combustion engine of a BWB UAV prototype 289
E Alexiou, S Dimitriou, T Dimopoulos, D Paliaikos, P Panagiotou, K Yakinthos

Aerodynamic and stability analysis of a VTOL flying wing UAV 297
C Bliamis, I Zacharakis, P Kaparos, K Yakinthos

Energy approach to transonic flutter and LCO with shock waves movement 305
S Kuzmina, F Ishmuratov, O Karas

2D optimization of a Small Horizontal Axis Wind Turbine blade using flow control techniques 313
C Papadopoulos, P Kaparos, Z Vlahostergios, D Misirlis, K Yakinthos

Mesh-diverging inviscid adjoint solutions 320
Carlos Lozano, Jorge Ponsin

Steady and Unsteady RANS Modeling of Wake Effects and Grid Resolution Requirements in a Low-Pressure Turbine Cascade 328
Alexander Führing, Dragan Kožulovic, Christoph Bode, Matthias Franke

Development of a Cargo Airdrop Modeling Method for a Tactical Blended-Wing-Body UAV 336
D. Mitridis, N. Mathioudakis, P. Panagiotou, K. Yakinthos

Multidisciplinary design of the wing for aircraft preliminary design purposes 344
Pavel Hospodár, Armand Drábek

A CSM-CFD methodology applied to the design of a cryogenic WT model 351
S Russo, J. Kirchner, J. Seiler, G Graumann, S Adden, N Paletta

A CFD study on the strut interference on a regional aircraft wind-tunnel model 359
S Russo, J Müller, J Alderman, N Paletta, S Adden, L P Ruiz-Calavera

Reliable method of aerodynamic analysis using computational fluid dynamics and scaled models in the development process of a Very Light Airplane 367
Aleksander Olejnik, Adam Dziubmski, Lukasz Kiszkowiak

A dynamic Immersed Boundary method for moving bodies and FSI applications 375
Francesco Capizzano, Triyantono Sucipto

Progress towards simulation of Krueger device motion with Lattice Boltzmann Methods 383
J Ponsin, C Lozano

Non-intrusive determination of the unsteady surface pressure and aerodynamic loads on a pitching airfoil 391
C Mertens, A Sciacchitano, B W van Oudheusden, J Sodja

Measurements of deformation, schlieren and forces on an OAT15A airfoil at pre-buffet and buffet conditions 399
Alessandro Accorinti, Tim Baur, Sven Scharnowski, Johannes Knebusch, Johannes Dillinger, Yves Govers, Jens Nitzsche, Christian J. Kahler

Sustainability: key to enable next generation supersonic passenger flight 407
A B Hardeman, L Q Maurice

Analysis of fuselage skin reinforcements with beam element models in flexible aircraft panels for ditching simulations 415
C Leon Muñoz, D Kohlgrüber, B Langrand

Towards Energy-Autonomous Unmanned Aerial System: A Bionic Approach on Solar-Electric, Multi-Vehicle Aerial Platforms for Waterborne Operations 423
F M Sendner

Design of a tilting mechanism for a VTOL flying wing UAV 431
D Mitridis, C Bliamis, P Kaparos, K Yakinthos

Enhancing preliminary aircraft design through operational considerations: a data-driven approach 439
Sébastien de Longueville, Joel Jézégou, Emmanuel Bénard, Yves Gourinat

PART 2

Conceptual design of a novel Unmanned Ground Effect Vehicle 447
C Papadopoulos, D Mitridis, K Yakinthos

Conceptual design of an unmanned aerial vehicle for fast container transport 455
V I Chernousov, A A Krutov, E A Pigusov, V.S. Zamaraev

Multi-disciplinary framework for propeller blade design 462
A. Kümmel, C. Breitsamter

Advanced materials and technologies for compressor blades of small turbofan engines 470
Dmytro Pavlenko, Yaroslav Dvirnyk, Radoslaw Przysowa

From FAST to FAST-OAD: An open source framework for rapid Overall Aircraft Design 478
Christophe David, Scott Delbecq, Sebastien Defoort, Peter Schmollgruber, Emmanuel Benard, Valerie Pommier-Budinger

Performance and emissions of a microturbine and turbofan powered by alternative fuels 486
Radoslaw Przysowa, Bartosz Gawron, Tomasz Bialecki, Anna Lçgowik, Jerzy Merkisz, Remigiusz Jasiński

Generative design case study of a CNC machined nose landing gear for an unmanned aerial vehicle 494
I Zaimis, E Giannakis, G Savaidis

An overview of the new research infrastructure for rotating labyrinth seals at COMOTI 502
B Gherman, L Flore, R Carlanescu, M S Enache, O Anghel, A G Radu

Development of a Flight Mechanics Simulation Computer based on a Flexible Aircraft Model for a Regional Aircraft 510
Simone Malisani, Elisa Capello, Giorgio Guglieri

Geometry Model and Approach for Future Blisk LCA 519
Kilian Fricke, Sascha Gierlings, Philipp Ganser, Tommy Venek, Thomas Bergs

The ACONIT project: an innovative design approach of active flow control for surge prevention in gas turbines 527
A Dazin, P Joseph, F Romano, Q Gallas, J Marty, G Aigouy, M Stôßel, R Niehuis

Foundations towards the future: FutPrInt50 TLARs an open approach 534
D Eisenhut, E Windels, R Reis, D Bergmann, C Ilário, F Palazzo, A Strohmayer

Development of top-level requirements for regional aircraft based on the needs of the Russian market 541
A.E. Karpov, B.G. Nesterenko, M.A. Ovdienko, A.N. Varyukhin, A.V Vlasov

Selecting figures of merit for a hybrid-electric 50-seat regional aircraft 549
N Moebs, D Eisenhut, D Bergmann, A Strohmayer

Hybrid electric distributed propulsion overall aircraft design process and models for general aviation (FAST GA) 554
J P Ruscio, J Jezegou, E Benard, A Gomez Pacheco, P Laonet, R Alonso Castilla

Power control system for lightweight electric aircraft 562
F A Zagumennov, A N Varyukhin, A V Kazakov, D I Zhuravlev, V S Zakharchenko, G.S. Ivanov

Optimal Energy Management of a Hybrid Electric Helicopter for Urban Air-Mobility 567
Teresa Donateo, Claudia Lucia de Pascalis, Luciano Strafella, Antonio Ficarella

Thermal Management challenges for HEA – FUTPRINT 50 575
Walter Affonso, Ricardo Gandolfi, Ricardo Jose Nunes dos Reis, Carlos Roberto Ilário da Silva, Nicolas Rodio, Timoleon Kipouros, Panagiotis Laskaridis, Andrei Chekin, Yury Ravikovich, Nikolay Ivanov, Leonid Ponyaev, Dmitry Holobtsev

Safety and Certifiability Evaluation of Distributed Electric Propulsion Airplane in EASA CS-23 Category 583
Joël Jézégou, Umair Sufyan

Wing conceptual design for the airplane with distributed electric propulsion..... 591
Pavel Hospodár, Jan Klesa, Nikola Zizkovsky

Innovation design analysis of the optimal aerodynamic adaptive smart structures for disk-body solar Hybrid Electric aircraft and airship concepts..... 597
Yury Ravikovich, Leonid Ponyaev, Mikhail Kuprikov, Raphael Domjan

Economically driven requirements for a hybrid-electric 19-passenger commuter aircraft..... 605
G Schuh, M Spangenberg, Q Zhang

Determination of the 1st Buckling and Collapse Loads for Integrally Stiffened Panels by Artificial Neural Network and Design of Experiment Methodology 613
S Guzel, E Gurses

Development of a prototype test system for certification of curved fuselage panels 624
M. Jiménez, R. Cabrera, J.L. Armario, E. Graciani, A. Estefani, K. Muñoz, E. García, F. París

Numerical Methodology for Aerostructures Hail Impact Damage Prediction 632
D. Ivancevic, I.Badurina Zakan, I. Smojver

Identification of resonant vibrations of the miniature unmanned airplane with contact and non-contact measuring techniques..... 640
Aleksander Olejnik, Robert Rogólski, Michal Szczesniak

Sloshing induced damping in vertically vibrating systems..... 648
J J De Courcy, L Constantin, B Titurus, T C S Rendall, J E Cooper

Tactical Separation System for Small Air Transport Vehicles: design advancements in the COAST Project..... 656
V Di Vito, G Torrano, G Cerasuolo, M Ferrucci

Advanced Weather Awareness System for Small Air Transport vehicles: design advancements in the COAST project..... 664
M Montesarchio, A L Zollo, M Ferrucci, E Bucchignani

A concept for an Integrated Mission Management System for Small Air Transport vehicles in the COAST project..... 672
V Di Vito, P Grzybowski, T Rogalski, P Maslowski

Compact Computing Platform for Future General Aviation in the COAST Project 680
Pavel Zaykov, Jan Beran, Petr Axman

Flight management enabling technologies for single pilot operations in Small Air Transport vehicles in the COAST project..... 688
V Di Vito, J Beran, T Kabrt, P Grzybowski, T Rogalski, P Maslowski, M Montesarchio

Concept of Operation for integrating RPAS into terminal airspace 696
JA Perez-Castan, J Aznar Olmos, F Gómez Comendador, A Rodríguez-Sanz, RM Arnaldo Valdes

Validation of the simulation tool for environmentally friendly aircraft cargo fire protection system 704
A. Pathak, V. Norrefeldt

Effect of increased cabin recirculation airflow fraction on relative humidity, CO_2 and TVOC 712
Victor Norrefeldt, Florian Mayer, Britta Herbig, Ria StrÖhlein, Ivana Ivandic, Pawel Wargocki, Fang Lei

Direct method of rigidity using Mathcad Software 720
Odhise Koça, Anis Sulejmani, Parid Alimhilli

Integration of rule-based 'Expert Systems' on RPAS capable of Specific Category Operations within the U-space: an original mitigation strategy for operational safety risks 729
F Bonfante, M D L Dalla Vedova, P Maggiore, F Grimaccia, E Filippone

Optical fibers applied to aerospace systems prognostics: design and development of new FBG-based vibration sensors 737
G Quattrocchi, P C Berri, M D L Vedova Dalla, P Maggiore

Diagnostics of Electro-Mechanical Actuators Based Upon the Back-EMF Reconstruction 745
G Quattrocchi, P C Berri, M D L Vedova Dalla, P Maggiore

High gear ratio mechanical transmissions for actuators: Simplified models for efficiency under opposing and aiding loads 752
P C Berri, M D L Dalla Vedova, P Maggiore, A Manuello Bertetto

Learning how to escape the unthinkable with virtual reality: the case of pilots' training on emergency procedures 759
Ioanna K. Lekea, Dimitrios G. Stamatelos, Pantelis Raptis

The effects of Virtual Reality technology application in the aircraft pilot training process 767
Pawel Dymora, Bartosz Kowal, Miroslaw Mazurek, Sliwa Romana

Mini-Multi Interface Box Simulator (MMIBS) 775
A Barea, J G Doblado, D Crespo, A Garcia, I Soldado, G Barrera, A Leopoldo, M M Prats, R M Cabanas

Model-based strategy and surrogate function for health condition assessment of actuation devices 783
P C Berri, M D L Dalla Vedova, G Quattrocchi, P Maggiore

A Team Allocation Decision for Aircraft Fleet Maintenance 791
D P Pereira, R Melicio, V M F Mendes

Building Digital Transformation to improve NGCTR design and simulation 799
Michele Sesana, Alessandro Pietro Bardelli

Capabilities of the Regional Cabin Demonstrator as digital twin for a future test mock-up 806
A J M Lindner, V Norrefeldt

A human factors' approach for multimodal collaboration with Cognitive Computing to create a Human Intelligent Machine Team: a Review 813
Charles Dormoy, Jean-Marc André, Alain Pagani

Applying Machine Learning Modeling to Enhance Runway Throughput at A Big European Airport 821
G Stempfel, I De Visscher, M Ellejmi, V Brossard, A Bonnefoy, V Treve

Impact of Weather Conditions on Airport Arrival Delay and Throughput..... 829
Álvaro Rodríguez-Sanz, Javier Cano, Beatriz Rubio Fernández

Tactical Runway Scheduling for Demand and Delay Management..... 837
Álvaro Rodríguez-Sanz, Pablo López Cózar, Javier A. Pérez-Castán, Fernando Gómez Comendador

Methodologies for the initial design studies of an innovative community-friendly miniliner..... 845
Lorenzo Trainelli, Carlo E.D. Riboldi, Alberto Rolando, Francesco Salucci

Drag Control by Hydrogen Injection in Shocked Stagnation Zone of Blunt Nose..... 853
Ashish Vashishtha, Dean Callaghan, Cathal Nolan

High mach number drag analysis of a modern lightweight launch vehicle 861
Ainslie D French, Antonio Schettino, Luca Romano

HERA Mission LIDAR Altimeter Implementation..... 869
Nicole G. Dias, Beltran N. Arribas, Paulo Gordo, Tiago Sousa, João Marinho, Rui Melicio, António Amorim, Patrick Michel

Alternative fuels for aviation: possible alternatives and practical prospects of biofuels 877
Renata Adami, Patrizia Lamberti, Vincenzo Tucci, Liberata Guadagno, Arnaldo Rosa Valdés, Oleksandr Zaporozhets, Pawel Wacnik, Serhat Burmaoglu

The role of Climate Change Levy schemes in aviation decarbonization by 2050..... 883
Rosa M Arnaldo Valdés, V Fernando Gómez Comendador

Artificial neural networks in panel method for solving aerodynamics problem..... 894
D Yu Strelets, A A Kataev, A L Khrustalev
