

# **5th International Conference on Information Technology and Digital Applications (ICITDA 2020)**

IOP Conference Series: Materials Science and Engineering  
Volume 1077

**Yogyakarta, Indonesia  
13 - 14 November 2020**

## **Editors:**

**Taufiq Hidayat  
Ridho Rahmadi**

ISBN: 978-1-7138-4582-9  
ISSN: 1757-8981

## TABLE OF CONTENTS

|                                                                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Preface                                                                                                                                                    |     |
| Peer review declaration                                                                                                                                    |     |
| Sentiment Analysis on Twitter using Neural Network: Indonesian Presidential Election 2019                                                                  |     |
| Dataset.....                                                                                                                                               | 1   |
| <i>Ahmad Fathan Hidayatullah, Siwi Cahyaningtyas, Anisa Miladya Hakim</i>                                                                                  |     |
| A Method of Simplifying the Asset Dependency Cycle in Security Risk Analysis .....                                                                         | 7   |
| <i>Edri Yunizal, Judhi Santoso, Kridanto Surendro</i>                                                                                                      |     |
| Measurement of Information Security Awareness Level: A Case Study of Digital Wallet Users.....                                                             | 16  |
| <i>A L Fadhilah, Y Ruldeviyani, R Prakoso, K F Arisyah</i>                                                                                                 |     |
| The Performance of Indonesia's President: A Sentiment Analysis in Social Media .....                                                                       | 25  |
| <i>Agus Mansur, Zuhdi Allamsyah, Putri Amalia</i>                                                                                                          |     |
| Analyzing Public's Reaction towards Black Lives Matter Campaign using Machine learning-based Approach through Spark.....                                   | 33  |
| <i>Rio Rizki Aryanto, Dhomas Hatta Fudholi</i>                                                                                                             |     |
| Graph Extraction of Batik Image Using Region Adjacency Graph Representation .....                                                                          | 42  |
| <i>Akmal, R Munir, J Santoso</i>                                                                                                                           |     |
| Middleware Development to Connect Telegram Messenger and Instant Messenger for the Elderly .....                                                           | 51  |
| <i>Charles Eka Swandi, Kristian Adi Nugraha, Danny Sebastian, Restyandito</i>                                                                              |     |
| Comparison of K-Medoids and Self Organizing Maps Algorithm in Grouping Hydrometeorological Natural Disasters in Java Island.....                           | 58  |
| <i>Novendri Isra Asriny, Desy Rizki Ramadhanty, Muthia Dishanur Izzati, Matin Laugija Prawira Putra, Annisa Shofura, Chairani Uli Albi, Edy Widodo</i>     |     |
| Case-based Mobile Tourism Attractions Recommender System .....                                                                                             | 71  |
| <i>Septia Rani, Dimastyo Muhamimin Arifin, Sheila Nurul Huda, Dhomas Hatta Fudholi</i>                                                                     |     |
| Digital Village: Modelling of Public Wireless Internet Development using Supply Chain Structure Approach .....                                             | 81  |
| <i>Wijiyanto, Nurchim</i>                                                                                                                                  |     |
| Smart Bumdes: Innovation of E-Collaboration and E-Commerce for Village Economic Development Solution in the New Normal Era (Case Study in Batu City) ..... | 87  |
| <i>A Prabowo, F Arisha, D Triyana, A F Baharudin</i>                                                                                                       |     |
| Indonesia Infrastructure Development Topic Discovery on Online News with Latent Dirichlet Allocation .....                                                 | 101 |
| <i>Ahmad Fathan Hidayatullah, Muhammad Rifqi Ma'arif, Muhammad Habibie, Siti Khomsah</i>                                                                   |     |
| Stacking Neural Network Models for Automatic Short Answer Scoring.....                                                                                     | 109 |
| <i>Rian Adam Rajagede, Rochana Prih Hastuti</i>                                                                                                            |     |
| Classical and Deep Learning Time Series Prediction Techniques in the Case of Indonesian Economic Growth.....                                               | 117 |
| <i>Hendra Bunyamin, Meyliana</i>                                                                                                                           |     |

|                                                                                                                                                                                                                     |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Classifying Medical Document in Bahasa Indonesia using Semi-Supervised Learning .....                                                                                                                               | 127 |
| <i>Dhomas Hatta Fudholi, Kiki Purnama Juwairi</i>                                                                                                                                                                   |     |
| A Heuristic Load Balancing Algorithm for Cloud Computing in Heterogeneous Resource Environment .....                                                                                                                | 134 |
| <i>Bagus Jati Santoso, Ary Mazharuddin Shiddiqi, Raldo Kusuma</i>                                                                                                                                                   |     |
| A Citation Data Collector Tool of Author's Profiles in Scopus Based on Web and Application Programming Interface (API).....                                                                                         | 142 |
| <i>Adian Fatchur Rochim, Tendi Nugeraha Wijaya, Dania Eridani</i>                                                                                                                                                   |     |
| Analysis and Designing Enterprise Architecture of PT. Adigas Jaya Pratama on Sales and Service Function Using TOGAF Framework.....                                                                                  | 151 |
| <i>Alfian Mulya Rachmandany, Rd. Lugina L. Utama, Muharman Lubis, Nia Ambarsari</i>                                                                                                                                 |     |
| Clustering with Principal Component Analysis and Fuzzy Subtractive Clustering Using Membership Function Exponential and Hamming Distance .....                                                                      | 159 |
| <i>Annisa Eka Haryati, Sugiyarto</i>                                                                                                                                                                                |     |
| Developing a framework for self-isolation app: a case study of Jakarta's COVID-19 mitigation .....                                                                                                                  | 168 |
| <i>R Gultom, A Hirzirahim, Y Nugraha, Z Nursyufa, Hamdi, A L Suherman</i>                                                                                                                                           |     |
| Implementation of Socket Priority Module for Unmanned Aerial Vehicle Network using FlyNetSimulator .....                                                                                                            | 180 |
| <i>Jauzak Hussaini Windiatmaja, Johannes Calvin Tjahaja, Kgs. Al Amin, Riri Fitri Sari</i>                                                                                                                          |     |
| The Implementation of User Centered Design Methods on Public Service Mapping Websites .....                                                                                                                         | 189 |
| <i>Ginanjar Wiro Sasmito, M. Fikri Hidayattullah</i>                                                                                                                                                                |     |
| Acquiring Commonsense Knowledge during Collaborative Storytelling .....                                                                                                                                             | 199 |
| <i>Jilyan Dy, Celina Brito, Vincent Tan, Julius Lola, Ethel Ong</i>                                                                                                                                                 |     |
| Comparison between Butterworth Bandpass and Stationary Wavelet Transform Filter for Electroencephalography Signal .....                                                                                             | 209 |
| <i>Xiaoxi Kang, Dini Oktarina Dwi Handayani, Hamwira Yaacob</i>                                                                                                                                                     |     |
| Word Embeddings Evaluation on Indonesian Translation of AI-Quran and Hadiths.....                                                                                                                                   | 219 |
| <i>Muhammad Zidny Naf'an, Yunita Sari, Yohanes Suyanto</i>                                                                                                                                                          |     |
| Restaurant Recommendation System Based on User Ratings with Collaborative Filtering.....                                                                                                                            | 228 |
