TABLE OF CONTENTS

40th International Deep-Drawing Research Group Conference 2021

Peer review declaration

Towards an adaptable quality monitoring process for self-piercing riveting 1
Vanessa Noller, Ulrich Walther, Gerson Meschut, Thomas Bäck

Experimental analysis of the influence of the embossing and upsetting process on joint strength in resistance element welding with upset auxiliary joining elements 9
M Meinhardt, M Lechner, M Merklein

Numerical and experimental investigation of the transmission moment of clinching points 17
C Steinfelder, J Kalich, A Brosius, U Füssel

Inverse parameter identification of an anisotropic plasticity model for sheet metal 25
J Friedlein, S Wituschek, M Lechner, J Mergheim, P Steinmann

Joining suitability of cast aluminium for self-piercing riveting 33
M Neuser, F Kappe, M Busch, O Grydin, M Bobbert, M Schaper, G Meschut, T Hausotte

Safe mechanical joining processes by digital manufacturing supervision in steel coil productions 42
H C Schmale, T Geddert

Joining with Friction Spun Joint Connectors – Manufacturing and Analysis 55
C Wischer, C Steinfelder, W Homberg, A Brosius

The influence of coating porosity on friction and wear during hot stamping of AlSi coated ultra-high strength steel 63
J Venema, P C J Beentjes

Investigation of the impact of heat treatment on the layer formation of AlSi-coated boron-manganese steel 71
F He, M Merklein

A Thermography-based Online Control Method for Press Hardening 79
E. Garcia-Llamas, J. Pujante, P. Torres, F. Bonada

Bending behavior of a hot stamped complex phase steel with tailored properties by local carburization 87
A Horn, M Merklein

Constitutive characterization of an 1800 MPa press hardening steel under hot stamping conditions 95
S Lu, S DiCecco, M Worswick, C Chiriac, G Luckey, J Tjong, J Boettger, C Shi

Parameter study on press hardened components with tailored properties 103
M Nestler, J Schönherr, R Haase, A Albert, A Stoll, V Kräusel

Effect of heat treatment conditions on the fatigue resistance of press hardened 22MnB5 steel evaluated through rapid testing technique 115
S. Parareda, D. Casellas, D. Frómeta, E. Garcia-Llamas, A. Lara, J. Pujante, A. Mateo

MBW 1200 – Hot Stamping Steel with Increased Ductility 123
D Rosenstock, J Banik, R P Rottger, S Graff, T Gerber

Investigation of Material Softening and Increase of Deep Drawing Capacity of 22MnB5 during Press Hardening using CRP Technology 131
P. Birnbaum, Y. Xu, X. Zhuang, Z. Zhao, V. Kraeusel

Friction Characterization of Al-Si Coated Ultra-High Strength Steel under Hot Stamping Conditions 141
R He, S DiCecco, R George, M Worswick, C Chiriac, G Luckey, J Tjong, C Shi, J Boettger

Effect of heating temperatures on AlSi coating microstructure and fracture during hot-tensile tests 149
S B Zaman, J Hazrati, M B de Rooij, A H van den Boogaard

Advanced Data Acquisition for Hot Stamping and its Application 156
C Rouet, G Trattnig

Application of an Advanced Friction Model in Hot Stamping Simulations: A Numerical and Experimental Investigation of an A-Pillar Reinforcement Panel from Volvo Cars 164
A. Güner, J. Hol, J. Venema, M. Sigvant, F. Dobrowolski, A. Komodromos, A. E. Tekkaya

Increasing the energy absorption of monolithic manganese boron steels in oxygen-free environment 172
Bernd-Arno Behrens, Sven Hübner, Ulrich Holländer, André Langohr, Chris Pfeffer, Lorenz Albracht

Effect of strain rate on formability of 22MnB5 steel during hot stamping process 180
Amarjeet Kumar Singh, K Narasimhan

Numerical investigation of introduction of HFQ® process manufacturing of A-pillar part 187
Zsolt Lukacs

Die material properties needed for Hot Stamping of High Strength Sheet Materials 195
S Sivertsen, R Oliver

Implementation of Real Contact Areas into Sheet metal Forming Simulations using Digital Spotting Images 202
P. Essig, M. Liewald, J. Hol

A new machine learning based method for sampling virtual experiments and its effect on the parameter identification for anisotropic yield models 213
A Wessel, L Morand, A Butz, D Helm, W Volk

On appropriate Finite Element discretization in simulation of gas-based hot sheet metal forming processes 222
N. K. Baru, T. Teeuwen, M. Teller, S. Hojda, A. Braun, G. Hirt

Virtual die spotting: Advanced setup for coupling of forming and structure simulation 230
F Zgoll, T Götze, W Volk

Towards forming simulations by means of reduced integration-based solid-shell elements considering gradient-extended damage 239
O. Barfusz, T. van der Velden, T. Brepols, S. Reese

New sheet metal forming process for springback reduction by continuous stress superposition 247
D Briesenick, M Liewald, K R Riedmueller

Reduction of Young's modulus for a wide range of steel sheet materials and its effect during springback simulation 255
L. Wagner, M. Wallner, P. Larour, K. Steineder, R. Schneider

Development of a springback prediction for a hybrid laminate with sensor functionality 266
A. Graf, V. Kräusel, A. Rodio, A. Lanzotti

Enhancement of springback prediction of AHSS parts by advanced friction modelling..... 274
U Durmaz, S Heibel, T Schweiker, M Merklein, S Berahmani, J Hol, P Naegele

Springback Behaviour due to Die Deflection during Bending 282
H Tsutamori, Y Nakamoto, T Nishiwaki

Parameterized data handling for forming tool tryout: reverse engineering, data consolidation and springback compensation 289
L Maier, C Hartmann, W Volk

Effect of blank-holder force on springback of ultra-thin copper sheets..... 297
N Ayachi', N Guermazi, PY Manach

Compensating the springback of ultra-high-strength steel parts by specific stress superposition during sheet metal forming..... 304
R Radonjic, M Liewald

Adapted part design methods for springback minimization of stamped sheet metal car body components..... 312
A Birkert, F Dreiseitel, B Hartmann, T Held, O Hetterle, M Markin, M Scholle

Dimensionally accurate parts made of high-strength steels - compressive stress superposition instead of tool compensation 320
M Linnepe, P Sieczkarek, M Kibben, F Botz

Structural springback analysis of car body closure assemblies using finite element process chain simulations 328
F. Schuler, M. Liewald

A Numerical Study on Chain-Die Forming of the aluminium profiles with variable cross-section..... 335
K Lu, Z Liang, Y Liu, T Zou, D Li, S Ding

Experimental and numerical study of springback effect of advanced high strength steel in a V-shape bending..... 344
W Julsri, A Sanrutsadakorn, V Uthaisangsuk

Study on the influence of the strain rate sensitivity on the springback of the AA5086 alloy under warm forming conditions 353
D M Neto, M C Oliveira, J L Alves, L F Menezes

Springback and compensation in sheet metal forming reconsidered as an ill-posed problem..... 361
Christoph Hartmann, Lorenz Maier, Wolfram Volk

A critical assessment of notched tensile tests for formability mapping of AHSS sheets..... 369
L. Wagner, P. Larour, F. Sonnleitner, A. Felbinger, J. Angeli

Alternative characterization method for the failure behavior of sheet metals derived from Nakajima test 377
D Kohl, M Merklein

The Effects of Piercing Methods on Burring Formability under Practical Hole Diameter..... 385
R Urushibata, Y Ito

Comparison of different forming methods on deep drawing and springback behavior of high-strength aluminum alloys 393
N Rigas, H Schmid, M Merklein

Study on the impact of temperature on the warm bending of aluminium alloy sheets 402
A Mauduit, A Maillard

Influence of pass reduction in cold rolling on damage evolution in deep drawing of rotationally symmetric cups 410
M Nick, C Liebsch, M Müller, IF Weiser, G Hirt, T Bergs

Effect of various shearing shape conditions for the scrap-used coining method on tensile residual stress on sheared edge 418
Y Honda, T Yasutomi, M Yamagata

A new Device for Determination of Forming-Limit-Curves under Hot-Forming Conditions 428
M Triebus, J Gierse, T Marten, T Trôster

Cryogenic deep drawing of aluminum alloy AA6014 using macro-structured tools 436
M Tulke, A Wolf, A Brosius

Local formability assessment of AHSS steels with shear cut tensile tests 444
P Larour, J Freudenthaler, H Pauli, M Kerschbaum, L Wagner, A Felbinger, F. Sonnleitner, J Angeli

On the mechanics of edge cracking and the reliable determination of edge formability limits 457
N Manopulo, A R Chezan, E Atzema, I Picas Anfruns, B Carleer, J Pilthammar, M Sigvant

Influence of synthetically generated inclusions on the stress accumulation and concentration in X65 pipeline steel 465
N. Fehlemann, Y. Sparrer, F. Pütz, M. Konemann, S. Münstermann

Equivalence between Localization Criteria and Fracture Criteria as Forming Limit in Failure Evaluation for 7xxx Series Aluminum Alloy Sheets 478
J-H Hong, D Kim

Simplified measurement of the strain to fracture for plane strain tension: On the use of 2D DIC for dual hole plane strain tension mini Nakazima specimens with dihedral punch 486
M. Adlafi, B. Galpin, L. Mahéo, C. C. Roth, D. Mohr, V. Grolleau

Comparison of different testing approaches to describe the fracture behaviour of AHSS sheets using experimental and numerical investigations 492
B-A Behrens, D Rosenbusch, H Wester, M Dykiert

A new specimen for investigating shear fracture strain 501
V Gál, Zs Lukács

Experimental research of formability limits in different thicknesses of polycarbonate sheets 509
A Rosa-Sainz, JP Magrinho, M B Silva, G Centeno, A J Martínez-Donaire, C Vallellano

Influence of the strain dependent material behaviour under plane strain on the yield locus modelling 517
M Lenzen, M Merklein

Performance Evaluation of Planar Anisotropy Yield Criteria for Aluminum Sheet Forming Analysis 525
B Ghoo, N Ichijo, M Selig, N Manopulo, B Carleer, W Suzuki, H Takizawa

Potential use of machine learning to determine yield locus parameters 533
C Karadogan, P Cyron, M Liewald

Effects of initial microstructure before cold rolling on microstructure evolution and mechanical behaviour of CGLcompatible Q&P steel 541
Yu Wang, Yunbo Xu, Tianyu Zhang

Evaluation of Simple Shear Test Geometries for Constitutive Characterization using Virtual Experiments 549
A Narayanan, A Abedini, A Weinschenk, M J Worswick, C Butcher

Potentials for material card validation using an innovative tool 557
M Eder, M Gruber, N Manopulo, W Volk

Modeling continuous dynamic recrystallization of lightweight alloys by coupling polycrystal plasticity approach 565
S F Chen, S H Zhang, H W Song, M G Lee

Virtual design of formability for Zircaloy-4 sheet through texture control 572
H Liu, S Deng, S Chen, H Song, S Zhang

A novel approach for characterising the cause of disc formation by the shear cutting process in a punching machine 579
S Niessner, M Liewald

Constitutive modelling of Usibor® 1500 sheets after intercritical quenching 588
M. S. Dastgiri, R. Thakkar, J. Shi, I.S. Sarraf, D. E. Green

Influence of the orthotropic behaviour on defects prediction in cup drawing, reverse redrawing and expansion 597
M C Oliveira, D M Neto, J L Alves, L F Menezes

Validation of Part Holder Models of Car Body Upper Line Dies for Return Stroke Loads 605
M Burkart, M Liewald, J Wied, C Kaminsky

Zero-error-production through inline-quality control of presshardened automotive parts by multi-camera systems 615
A Pierer, T Wiener, L Gjakova, J Koziorek

Development of an automatic crack detection method for cupping tests on sheets and foils with a wall thickness below 0.1 mm 623
J-L Schneider, D Staupendahl, L Wahlers

New press deflection measuring methods for the creation of substitutive models for efficient die cambering 631
J. Pilthammar, T. Skâre, L. Galdos, K. Frojdh, P. Ottosson, D. Wiklund, J. Carlholmer, M. Sigvant, M. Ohlsson, E. Sáenz de Argandoña, F. Abbasi, O. Sarasua, A. Garro, W. Rutgersson

Data-driven analysis of cold-formed pin structure characteristics in the context of versatile joining processes 639
D Romisch, C Zirngibl, B Schleich, S Wartzack, M Merklein

Process data based estimation of tool wear on punching machines using TCN-Autoencoder from raw time-series information 647
Shota Asahi, Celalettin Karadogan, Satoshi Tamura, Satoru Hayamizu, Mathias Liewald

Deformation and thinning field prediction for HFQ® formed panel components using convolutional neural networks 656
H R Attar, H Zhou, N Li

Prediction of forming limit diagrams from tensile tests of automotive grade steels by a machine learning approach 666
F P Finamor, M A Wolff, V S Lage

Parametric Shape Optimization of Stretch Webs in a Progressive Die Process using a Neural Network Surrogate Model 673
S Athreya, A Weinschenk, F Steinlehner, D Budnick, M Worswick, W. Volk, S. Huhn

Autoencoder based Wear Assessment in Sheet Metal Forming 681
P Niemietz, M Unterberg, D Trauth, T Bergs

Lightweight design of an automotive lower control arm using topology optimization for forming process 690
K Sookchanchai, S Olarnrithinun, V Uthaisangsuk

On the use of fixed point translations as input variable for digital twins in deep drawing compared to current methods 699
Matthias Ryser, Pavel Hora, Markus Bambach

Simulation of Dynamic Effects in Progressive Die Operation and Control 707
D. Budnick, F. Steinlehner, A. Weinschenk, W. Volk, W. Melek, M. Worswick, S. Huhn

Temperature-controlled tools for multi-stage sheet metal forming of high-strength aluminium alloys 715
J Günzel, J Hauß, P Groche

On thermal compensation of Hot-Form-Quench stamping die 723
D Szegda, M Mohamed, M Ziane

Robustness analysis with LS-OPT® and LS-DYNA® for sheet metal forming simulations 730
M Merten, K Liebold, A Haufe

Variance based sensitivity analysis of deep drawing processes based on neural networks using Sobol indices 738
M Kott, M Kraft, A Emrich, P Groche

Process Linearization for Closed-Loop Control of Incremental Sheet Forming 748
Jos Havinga, Dylan Sikkelbein, Ton van den Boogaard

Approaches to analysing scatter in forming simulations: from fundamental to pragmatic 756
E. H. Atzema, M.E. Scholting, M. Abspoel

Predicting springback variation and process-reliable tolerance limits of outer car-body panels by stochastic sheet metal forming simulation 766
P. Brix, M. Liewald, J. Eckstein

Load-specific variant generation of bead cross sections in sheet metal components by unidirectional carbon fibre reinforcement 774
M Ott, P Haberkern, M Gruber, C Hartmann, T Risch, C Wunderling, A Albers, W Volk

A new cracking resistance index based on fracture mechanics for high strength sheet metal ranking 782
D. Frómeta, S. Parareda, A. Lara, L. Grifé, I. Tarhouni, D. Casellas

Simulation based approach for light weighting of Connecting rod by tube hydro forming process..... 793
A K Pandey, B S Walunj, P P Date

Prediction and assessment of skid line formation during deep drawing of sheet metal components by using FEM simulation 801
P Cyron, M Liewald

Study on new hot stamping tool with low cost and high cooling efficiency 810
S Peng, J Zhou, S Qian, M Zhang, J Liu, Y Meng
