STRUCTURAL MECHANICS AND CONSTRUCTION THEORY, CIVIL AND INDUSTRIAL ENGINEERING

New analytical approach for geometrically nonlinear buckling analysis of a inclined rod using the arc length method	1
<i>Vu Thi Bich Quyen, Dao Ngoc Tien</i>	
Comparison of calculation results of flexible plates on the basis of difference equations of successive approximation method and generalized equations of finite difference method	10
<i>Ngoc Khoa Dao, Radek Gabbasov, Thi Linh Quyen Hoang, Le Thuy Nguyen</i>	
Calculation of three-layer composite beams using difference equations of successive approximation method	19
<i>Vladimir Filatov, Radek Gabbasov, Thi Linh Quyen Hoang</i>	
Reinforced concrete beams with console ribs along their side surfaces	26
<i>Z R Likhov, A J Dzhankulaev, G Kh Tokhaev, A Sh Khussein</i>	
To the calculation of reinforced concrete flexible elements with combined pre-stress, taking into account the complete diagrams of material deformation	32
<i>Z R Likhov, M Kh Dadova, G Kh Tokhaev, A Sh Khussein</i>	
Measures to Increase the Building Steel Structures' Bearing Capacity.....	38
<i>N V Pirumyan, M G Stakyan</i>	
Non-linear optimization of frames with variable section stiffness of columns using Genetic Algorithm	44
<i>Tran Thi Thuy Van, Nguyen Trung Kien</i>	
The stress distribution heterogeneity influence on the limiting state of a bent curvilinear beam	50
<i>S Yu Kalashnikov, E V Gurova, S A Kalinovsky, R Kh Kuramshin</i>	
Mechatronic complex based on sliding formwork for the construction of monolithic high-rise buildings and tower-type structures made of reinforced concrete	57
<i>Vladimir Travush, Vladimir Erofeev, Alexey Bulgakov, Natalia Buzalo</i>	
Calculation of the three-layer cylindrical shells taking into account the creep of the middle layer	64
<i>E G Yanukyan, E O Lotoshnikova, A S Chepurnenko, B M Yazyev, S V Litvinov</i>	
Modeling a “pile-soil array” system under the seismic load action taking into account shock-absorbing properties of the soil	70
<i>V A Pshenichkina, A S Zhidenko, K N Sukhina, K A Sukhin</i>	

To the dynamically loaded reinforced-concrete elements' calculation in the absence of adhesion between concrete and reinforcement	76
<i>A G Tamrazyan, D S Popov, A Ubysz</i>	
Reliability assessment of reinforced concrete structures during commissioning	85
<i>V A Pshenichkina, V S Babalich, K N Sukhina, M E Dubovsky</i>	
Estimation of the output parameters of a numerical model of a cantilever-type piezoelectric generator with attached mass and active termination upon pulsed excitation	90
<i>T V Polyakova, A V Cherpakov, I A Parinov, M N Grigoryan</i>	
Calculation of three-layer rotation shells for an axisymmetric load in conditions of nonlinear creep	99
<i>D A Vysokovskiy, A S Chepurnenko, I M Zotov</i>	
Finite-element analysis of plate stability under conditions of nonlinear creep.....	106
<i>S B Yazyev, A S Chepurnenko, A P Lapina, Song Xuanzhen</i>	
Survey of the damaged closely located buildings in the historical part of the Sanaa city (Yemen)	112
<i>Al-Bukhaiti Ali Yahya Nasser, V V Ledenyov, Ya V Savinov, O V Umnova, Jawad Ahmed Mohammed Hamash</i>	
Analysis of bending plates with mixed boundary conditions using generalized equations of finite difference method.....	121
<i>Radek Gabbasov, Vladimir Filatov, Ngoc Khoa Dao, Thi Linh Quyen Hoang</i>	
Behavior of corrosion-damaged compressed reinforced concrete elements under dynamic loading	126
<i>A G Tamrazyan, M S Mineev, V S Fedorov</i>	
Forced beams vibrations from vector disturbances	134
<i>A M Kaziev, M Kh Dadova, M M Kardanov, I K Mashukov</i>	
Flexural buckling of a revolving bar in a rigid pipe with a gap exposed to axial force and dead weight.....	141
<i>S B Yazyev, P V Ivanova, Yu G Konoplev, B M Yazyev</i>	
Features of the buildings' seismic isolation systems under strong seismic influences with predominant long periods	147
<i>A D Abakarov, H R Zaynulabidova, H M. Omarov</i>	
The energy method for calculating the cantilever strip bending flat form stability taking into account its own weight development.....	153
<i>S B Yazyev, I M Zotov, A P Lapina, A S Chepurnenko, D A Vysokovskiy</i>	
The efficiency of applying bim technologies in the educational process at professional schools	160
<i>A V Yuryev</i>	
Approximation method for the characteristics class related to magnetic cleaning quality of reverse waters from ferrous admixtures	166
<i>E M Bulyzhev, E N Menshov</i>	
The interaction of high intensity seismic rayleigh and rayleigh – lamb waves with structures.....	176
<i>A V Ilyashenko, N F Morozov, T R Rashidov, V A Bratov, B M Mardonov</i>	
The study on the magnetic separation efficiency of the reverse water technological liquids from scales in industrial production. Part 1. The problems' analysis and solutions.....	184
<i>E M Bulyzhev, E N Menshov</i>	

The study on the magnetic separation efficiency of the reverse water technological liquids from scales in industrial production. Part 2. Improving the design efficiency of magnetic separators by determining the cleaning modes' rational parameters	193
<i>E M Bulyzhev, E N Menshov</i>	
The study on the magnetic separation efficiency of the reverse water technological liquids from scales in industrial production. Part 3. improving the magnetic separation technology	203
<i>E N Menshov</i>	
Numerical methods for determining the stressed-deformed state of the electric transmission lines supports	213
<i>L S Sabitov, L R Maylyan, A D Ziganshin, I Z Gatiyatov</i>	
The interaction of the steel shell and the core concrete element in operation	222
<i>E N Peresyarkin, S E Peresyarkin, B Z Tutarishev</i>	
Comparative analysis of the various types of structures for the electric transmission power cables supports' static work in the software complexes implementing the finite elements method.....	229
<i>L S Sabitov, A D Ziganshin, O V Radaykin, L Sh Akhtyamova, S B Yazyev</i>	
To the multi-hollow reinforced concrete floor panels' calculation according to the two groups of the limit states.....	240
<i>A S Vasiliev, E A Plekhanova</i>	
The generalized load statistical parameters' assessment on the building structures.....	248
<i>V A Pshenichkina, A V Glukhov, B S Gritsenko, N Yu Sidorova</i>	
The building structures' bearing capacity assessment with the nomogram method.....	254
<i>N V Pirumyan, M G Stakyan</i>	
The strengthening technologies' application in building steel structural elements	261
<i>N V Pirumyan, M G Stakyan</i>	
On the heterogeneous rock mass stress condition at the unsteady temperature condition.....	268
<i>I I Frolova</i>	
Fiber reinforcement as an alternative to the compressed zone linear reinforcement and the flexible concrete elements stretched zone prestressing.....	274
<i>L R Mayilyan, P A Shilov, A A Shilov</i>	
Optimization of steel frames with the choice of materials' grades with restrictions on general and local stability, strength and stiffness.....	281
<i>I N Serpik, A S Averin</i>	
The shear span influence on the crack formation and fracture features in the experimental samples in the external conditions of composite reinforcement presence or absence	289
<i>A A Shilov, P A Shilov, A V Shilov</i>	
Determination of the snow cover weight and altitude coefficient values in mountainous and poorly studied areas for assessing loads on buildings and structures.....	297
<i>A Kh Adzhiev, M Yu Bekkiev, N V Kondratyeva, N V Yurchenko</i>	
Calculation of Damage to Buildings and Structures by Lightning According to the Thunderstorms' Visual and Instrumental Observations.....	304
<i>A Kh Adzhiev, R A Gyatov, Z M Kerefova</i>	

The effect of contact friction forces on the stress - strain state of an inclined base during the construction of buildings on complex terrain	310
<i>B Yu Barykin, A B Barykin</i>	
Energy-efficient double-row masonry of the exterior walls in the buildings made of cellular concrete blocks	316
<i>L A Suleymanova, I A Pogorelova, M V Marushko, I S Ryabchevsky</i>	
The effect of a polymer material coating on the stress state of plate building structures with holes.....	323
<i>S I Koryagin, N L Velikanov, O V Sharkov</i>	
Strength of the monolithic coverings with non-fixable formwork of steel fibro-tuffcrete elements	330
<i>Yu M Khasauov, M M Atabieva, A A Chochuev</i>	
The seismic activity analysis in the republic of Crimea	336
<i>V V Razumov, A H Adzhiev, N V Razumova, S I Shagin</i>	
The antenna mast reconstruction structure's technical support	342
<i>O A Fil</i>	
The stress state numerical study of a rectangular cross-section beam with round drillings	350
<i>S G Saiyan, A G Paushkin</i>	
The influence analysis of the structures and applied software systems' soil foundations design models	358
<i>T Yu Khashirova, I V Olgarenko, N V Kozhenko</i>	
The results of determining the structural elements' displacements when using various soil models and software systems.....	366
<i>O G Degtyareva, S M Vasiliev</i>	
The design criteria evaluation for the rigidity of the structure foundation with various models for moving the grillage and head wall.....	374
<i>V G Degtyarev, N V Kozhenko, N A Bakhtamyan</i>	
The water structures' operability analysis, taking into account damage and certain negative factors.....	382
<i>G V Degtyarev, N A Bakhtamyan</i>	
Assessment of the damage impact to particular water structures on their performance	389
<i>V I Olgarenko, T Yu Khashirova, N V Kozhenko</i>	
The base soil local sagging zones' influence assessment on the water retaining structure's operability.....	396
<i>O G Degtyareva, S M Vasiliev</i>	
Assessment of the hydraulic structures' technical condition by means of the amplitude-frequency characteristics' analysis	403
<i>G V Degtyarev, F K Abdrazakov, N P Lavrov</i>	
Possibilities of a dynamic survey method for hydraulic structures	410
<i>V G Degtyarev, G V Degtyarev</i>	
Oscillations of the variable cross beams under seismic and technogenic influences (part I)	417
<i>Kh P Kulterbaev, L A Baragunova, M M Shogenova, S G Bulanov</i>	
Oscillations of the variable cross beams under seismic and technogenic influences (part II)	424
<i>Kh P Kulterbaev, L A Baragunova, M M Shogenova, S G Bulanov</i>	

The work research of two-layer combined reinforced elements in pure bending	434
<i>A V Zhurtov, R A Edokov, A Kh Khutezhev, N N Stas</i>	
Parametric research of the two-layered grouted shells' bearing strength	442
<i>A V Zhurtov, A M Bashiev, U A Dzhandigov, R V Mazikhov</i>	
Deflection of beams with sinusoidal perforation	449
<i>A I Pritykin</i>	
Assessment of the pit influence area on the stress state foundations of the nearby buildings	456
<i>A V Tkachenko, I M Yudina</i>	
Experimental studies of the "foundation-soil" system operation with sudden loading	463
<i>I N Diakov, N V Tsarenko, M I Diakov</i>	
Experimental studies of the reinforcement percentage effect on the modulus of soil deformation fixed by cementation	470
<i>A Yu Prokopov, I V Sychev, A A Revyakin, O N Soboleva</i>	
Complex model of fractal architecture building	477
<i>G M Kravchenko, L I Pudanova</i>	
Engineering solutions for the reinforced concrete structures' reinforcement of a multi-storey administrative amenity buildings.....	483
<i>G V Voronkova, S S Rekunov, L M Arzamaskova, E E Evdokimov</i>	
Analysis of various factors' influence on the interaction forces of the concrete element's steel case and core	489
<i>E N Peresykin, S E Peresykin, B Z Tutarishev, Z N Tutarishev</i>	
Determination of the ultimate load for centrally compressed concrete filled steel tubular columns based on the deformation theory of plasticity.....	497
<i>M N Grigoryan, P M Urvachev, A S Chepurmenko, T V Polyakova</i>	
Architectural bionics and the search for optimal solutions in the unique structures' design.....	504
<i>I A Mayatskaya, S B Yazyeva, A P Lapina, V V Davydova</i>	
Integrated construction and technical structural analysis of the industrial buildings	511
<i>I A Serebryanaya, I O Egorochkina, E A Shlyakhova, A A Matrosov, Ds Serebryanaya</i>	
Architectural design and manual graphics in the student's educational activities, their relationship with the mental peculiarities of a future specialist	517
