Volume 11934

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Photonics in Dermatology and Plastic Surgery 2022*, edited by Bernard Choi, Haishan Zeng, Proc. of SPIE 11934, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 1605-7422

ISSN: 2410-9045 (electronic)

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIEDigitalLibrary.org

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

WIDE-FIELD IMAGING I

11934 02 **Multimodal optical monitoring of auto and allografts of skin on a burn wound** [11934-2]

MICROSCOPY, OCT I AND THERMAL IMAGING

11934 03 **Morpho-molecular characterization of a tattooed skin biopsy using co-localized line-field confocal optical coherence tomography (LC-OCT) and confocal Raman microspectroscopy** [11934-7]

11934 04 **Efficacy comparison on various optical clearing agents for in vivo human skin imaging** [11934-10]

11934 05 **Sequential staining technique for acquiring paired images with H&E and microscopy with ultraviolet surface excitation (MUSE)** [11934-11]

11934 06 **Enhanced thermal imaging: a real-time imaging technique to delineate blood vessels embedded in soft tissue** [11934-5]

OPTICS AND MACHINE LEARNING

11934 08 **AI-driven discrimination of benign from malignant pigmented skin lesions based on multispectral autofluorescence lifetime dermoscopy imaging** [11934-28]

11934 09 **Three-dimensional microscopic quantification of in vivo healthy epidermis based on line-field confocal optical coherence tomography (LC-OCT) assisted by artificial intelligence** [11934-30]

WIDE-FIELD IMAGING II

11934 0A **Reliability of handheld laser speckle contrast perfusion imaging demonstrated in psoriasis lesions** [11934-34]

11934 0B **DICOM file for total body photography: a work item proposal** [11934-35]

MICROSCOPY AND OCT II

11934 OD **Quantitative and qualitative analysis of healthy skin by anatomic site utilizing optical coherence tomography and attenuation coefficient [11934-38]**

BIOPHOTONICS AND IMAGING IN COSMETICS II

11934 OE **Multiphoton microscopy in cosmetic research: a mini review on recent advancements (Invited Paper) [11934-14]**

POSTER SESSION

11934 OF **Informative OCT radiomic features towards improved melanoma detection [11934-43]**

11934 OG **Epidermal thickness measurement on skin OCT using time-efficient deep learning with graph search [11934-44]**

11934 OH **A novel image quality metrics for evaluation of optical coherence tomography images of skin [11934-45]**

11934 OI **Line-field confocal optical coherence tomography (LC-OCT) for ex-vivo skin imaging with extended field-of-view [11934-46]**

11934 OJ **Determination of the condition and changes in skin containing artificial pigment using optical coherence tomography [11934-47]**

11934 OL **Skin mimicking solid optical tissue phantom fulfillment and its characterization [11934-49]**

11934 OM **Three-dimensional optical coherence tomography: possibilities in assessing the microvasculature of the skin [11934-50]**

Conference Committee

Symposium Chairs

Jennifer Barton, The University of Arizona (United States)
Wolfgang Drexler, Medical University of Vienna (Austria)

Program Track Chairs

Brian Jet-Fei Wong, Beckman Laser Institute and Medical Clinic,
University of California, Irvine (United States)
Eva M. Sevick, The University of Texas Health Science Center at
Houston (United States)

Conference Chairs

Bernard Choi, Beckman Laser Institute and Medical Clinic
(United States)
Haishan Zeng, BC Cancer Research Center (Canada)

Conference Program Committee

Anthony J. Durkin, Beckman Laser Institute and Medical Clinic
(United States)
Conor L. Evans, Wellman Center for Photomedicine (United States)
Yusuke Hara, Shiseido Co., Ltd. (Japan)
Manu Jain, Memorial Sloan-Kettering Cancer Center (United States)
Hanna Jonasson, Linköping University (Sweden)
Kristen M. Kelly, University of California, Irvine School of Medicine
(United States)
Boris Majaron, Jožef Stefan Institute (Slovenia)
Milind Rajadhyaksha, Memorial Sloan-Kettering Cancer Center
(United States)
Jessica C. Ramella-Roman, Florida International University
(United States)
Lise Lyngsnes Randeberg, Norwegian University of Science and
Technology (Norway)
Rolf B. Saager, Beckman Laser Institute and Medical Clinic
(United States)
InSeok Seo, Johnson & Johnson Consumer Products (United States)
Eric R Tkaczyk, Department of Veterans Affairs, Vanderbilt University
Medical Center (United States)
Hequn Wang, Johnson & Johnson Consumer Products (United States)

Ruikang K. Wang, University of Washington (United States)
Mihaela Balu, Beckman Laser Institute and Medical Clinic
(United States)
