Volume 11937

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Endoscopic Microscopy XVII*, edited by Guillermo J. Tearney, Thomas D. Wang, Melissa J. Suter, Proc. of SPIE 11937, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 1605-7422

ISSN: 2410-9045 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

MULTIMODALITY IMAGING

11937 02 **Simultaneous white light and laser speckle contrast imaging for in-vivo blood flow imaging during laparoscopic surgery: an alternative to fluorescence-based endoscopy** [11937-8]

FLUORESCENCE, TWO-PHOTON, AND MULTIPHOTON MICROSCOPY

11937 05 **Configurable multi-wavelength laser light engine for endoscopic fluorescence imaging** [11937-27]

11937 06 **Endoscopic MPM objective designed for depth scanning** [11937-30]

CONFOCAL AND OTHER NOVEL IMAGING APPROACHES

11937 07 **Computational super-resolution imaging with multimode fiber using optimized illuminations** [11937-32]

11937 08 **Phononic endo-microscopy in 3D** [11937-34]
