Volume 11940

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Methods for Tumor Treatment and Detection: Mechanisms and Techniques in Photodynamic and Photobiomodulation Therapy XXX*, edited by David H. Kessel, Tayyaba Hasan, Proc. of SPIE 11940, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

PHOTODYNAMIC THERAPY I

11940 02 **Real-time PDT dose dosimetry for pleural photodynamic therapy** [11940-2]

PHOTODYNAMIC THERAPY II

11940 03 **Light-activated drug release using an automated well plate illuminator** [11940-4]

11940 04 **Clinical assessment of a low-cost, hand-held, smartphone-attached intraoral imaging probe for ALA PDT monitoring and guidance** [11940-5]

11940 05 **Evaluation of photodynamic stromal depletion (PSD) to enhance nanoparticle delivery in 3D models of pancreatic ductal adenocarcinoma (PDAC)** [11940-6]

PHOTODYNAMIC THERAPY III

11940 06 **Photo-magnetic imaging: a new functional imaging modality for more accurate photothermal therapy planning** [11940-9]

11940 07 **Reactive oxygen species explicit dosimetry (ROSED) for fractionated photofrin-mediated photodynamic therapy (PDT)** [11940-10]

11940 08 **Evaluation of antibacterial activity of pulsed laser synthesized silver nanoparticles combined with methylene blue for prosthetic joint infection**[11940-14]

PHOTODYNAMIC THERAPY V

11940 09 **Monte Carlo simulation of Cerenkov imaging for total skin electron treatment with CT DICOM realistic patient geometry** [11940-17]

11940 0A **Photoacoustic delivery and imaging methods in PDT** [11940-7]

MECHANISMS OF PHOTOBIMODULATION THERAPY I

- 11940 OB **Effectiveness of photobiomodulation therapy on wavelengths and light pulsing frequencies (Invited Paper)** [11940-22]
- 11940 OC **Real-time respirometry of isolated mitochondria during low irradiance laser exposure (Invited Paper)** [11940-25]
- 11940 OD **Near infrared laser exposure enhancement of cytochrome c oxidase enzyme activity does not exhibit irradiance reciprocity (Invited Paper)** [11940-26]
- 11940 OE **Kinetics of electron transport chain in isolated mitochondria in response to visible light using resonance Raman spectroscopy (Invited Paper)** [11940-27]

MECHANISMS OF PHOTOBIMODULATION THERAPY II

- 11940 OF **Effects of photobiomodulation on the BJ-5ta-hTERT fibroblasts exposed to ionizing radiation** [11940-29]

POSTER SESSION

- 11940 OI **Optimizing conditions for light delivery for intracranial photodynamic therapy for high grade gliomas: a 3D model study of light dosimetry** [11940-37]
- 11940 OJ **Validation of multispectral singlet oxygen luminescence dosimetry (MSOLD) for photofrin-mediated photodynamic therapy** [11940-39]
- 11940 OL **Fluence rate differences in photodynamic therapy efficacy and activation of immune checkpoints of murine colorectal cancer** [11940-44]
