Volume 11942

Proceedings of SPIE, 1605-7422, V. 11942

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Lasers in Dentistry XXVIII*, edited by Peter Rechmann, Daniel Fried, Proc. of SPIE 11942, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

LASERS IN CARIES DETECTION: OCT, RAMAN, AND SWIR

- 11942 02 **Signal collection through water-immersion objectives improves Raman spectral quality from dental tissues** [11942-5]
- 11942 03 **Evaluating interproximal and occlusal lesion severity with a dual SWIR transillumination/reflectance probe** [11942-2]
- 11942 04 **Assessing lesion activity of secondary lesions on extracted teeth by thermal dehydration measurement and optical coherence tomography** [11942-3]

LASERS IN TOOTH WHITENING, COLOR IDENTIFICATION, AND 3D PRINT

- 11942 05 **Effectiveness of whitening treatments employing violet illumination alone or combined with bleaching agents** [11942-6]
- 11942 06 **Methods of dental shade determination** [11942-7]
- 11942 07 **3D stereolithography print (SLA) in clinical orthodontic and dental applications** [11942-8]

OCT/LASERS IN PERIODONTOLOGY, BIOFILM, AND BACTERIA REDUCTION AND EROSION PREVENTION

- 11942 08 **Effect of CO₂ laser (9.3 μm) irradiation and AmF/NaF/SnCl₂ solution in prevention and control of erosive tooth wear, an in-situ study** [11942-13]

POSTER SESSION

- 11942 09 **Dehydration imaging of dental fluorosis at 1950 nm** [11942-18]
- 11942 0A **Use of SWIR dehydration and OCT to assess the complete arrest of simulated incipient caries lesions** [11942-19]
- 11942 0B **Caries inhibition of simulated active caries lesions with CO₂ laser irradiation and fluoride** [11942-20]
