Volume 11945

Proceedings of SPIE, 1605-7422, V. 11945

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Clinical and Translational Neurophotonics 2022*, edited by Victor X. D. Yang, Jana M. Kainerstorfer, Proc. of SPIE 11945, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v Conference Committee

CEREBRAL HEMODYNAMICS I

- 11945 02 **Intraoperative real-time and continuous cerebral blood flow visualization with laser speckle contrast imaging [11945-2]**

CEREBRAL HEMODYNAMICS II

- 11945 03 **Dynamic laser-based photomodulation of endovascular hydrogel embolization for the treatment of various cerebrovascular disorders [11945-7]**

CEREBRAL HEMODYNAMICS III

- 11945 04 **Performance improvement of optical coherence tomography angiography for neuroimaging incorporating cortical segmentation [11945-13]**

DIFFUSE OPTICAL TOMOGRAPHY

- 11945 05 **Optimized optode placement strategy for diffuse optical tomography [11945-18]**

- 11945 06 **Modulation frequency improves imaging hemoglobin fluctuation in frequency domain high-density diffuse optical tomography [11945-19]**

SURGERY RELATED

- 11945 07 **Creation of noncontact device for use in brain metastasis margin identification in ex vivo mouse brain [11945-21]**

- 11945 08 **Perception action cycle-related brain networks differentiate experts and novices: a combined EEG, fNIRS study during a complex surgical motor task [11945-23]**

- 11945 09 **A dilated causal convolutional model for surgical skill assessment using optical neuroimaging [11945-24]**
