

PROCEEDINGS OF SPIE

# *Vertical External Cavity Surface Emitting Lasers (VECSELs) XI*

**Mircea Guina**  
*Editor*

**22–27 January 2022**  
San Francisco, California, United States

**20–24 February 2022**  
**ONLINE**

*Cosponsored by*  
Coherent, Inc. (United States)

*Sponsored and Published by*  
SPIE

**Volume**  
**11984**

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Vertical External Cavity Surface Emitting Lasers (VECSELs) XI*, edited by Mircea Guina, Proc. of SPIE 11984, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## MECSEL I

---

- 11984 02 **Thermal behavior and management of membrane external-cavity surface-emitting lasers (MECSELS)** [11984-4]
- 11984 03 **High-power in-well pumped MECSEL emitting at 1178 nm for sodium guide star applications** [11984-5]
- 11984 04 **Design and characterization of MECSELS for widely tunable (>25 THz) continuous wave operation (Best Student Paper Award)** [11984-6]

---

## MODE-LOCKING / MECSEL II

---

- 11984 05 **Analysis of MECSEL mode-locking** [11984-12]

---

## HIGH POWER

---

- 11984 06 **High peak power GaSb-based VECSELS** [11984-15]
- 11984 07 **High-power, single-frequency intracavity doubled VECSEL at 589 nm for sodium guide stars (Invited Paper)** [11984-16]
