

PROCEEDINGS OF SPIE

# ***Real-time Measurements, Rogue Phenomena, and Single-Shot Applications VII***

**Daniel R. Solli**  
**Georg Herink**  
**Serge Bielawski**  
*Editors*

**22–27 January 2022**  
**San Francisco, California, United States**

**20–24 February 2022**  
**ONLINE**

*Sponsored and Published by*  
SPIE

**Volume**  
**11986**

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Real-time Measurements, Rogue Phenomena, and Single-Shot Applications VII*, edited by Daniel R. Solli, Georg Herink, Serge Bielawski, Proc. of SPIE 11986, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## NONLINEAR DYNAMICS, SOLITONS, AND ROGUES WAVES

---

- 11986 02 **Cage solitons (Invited Paper)** [11986-2]
- 11986 03 **Experimental investigation of spontaneous and seeded modulation instability competition: route to the thermalization of the Fermi Pasta Ulam Tsingou recurrences** [11986-4]
- 11986 04 **Simulating the polarization dynamics of ultrafast solitons** [11986-7]

---

## REAL-TIME SPECTROSCOPY AND ULTRAFAST MEASUREMENTS

---

- 11986 05 **Terabit sampling system with photonic time-stretch analog-to-digital converter (Invited Paper)** [11986-9]
- 11986 06 **Rapid and high-sensitivity measurements of broadband optical activity with interferometric Fourier-transform balanced detection (Invited Paper)** [11986-10]
- 11986 07 **Nonlinear aberrations in time lenses** [11986-14]
