SPIE

Volume
11987

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Laser Resonators, Microresonators, and Beam Control XXIV*, edited by Vladimir S. Ilchenko, Andrea M. Armani, Julia V. Sheldakova, Proc. of SPIE 11987, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510648456

ISBN: 9781510648463 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

RESONANT CAVITY ENHANCED COMBS

- 11987 02 **11 Tera-OPs/s photonic convolutional accelerator and deep optical neural network based on an integrated Kerr soliton crystal microcomb** [11987-5]
- 11987 03 **Advancing multi-wavelength liquid crystal laser microcavities in a compact prototype device using a laser diode pump source** [11987-12]
- 11987 04 **Effect of noise in miniature optoelectronic oscillators based on whispering-gallery mode modulators with quadratic nonlinearity** [11987-52]

NONLINEAR BEHAVIOR IN RESONANT CAVITY SYSTEMS

- 11987 05 **Adaptive, high-power, dynamically stable ring resonator** [11987-17]
- 11987 06 **High-Q whispering gallery mode germanium microresonators at 8 μm** [11987-26]
- 11987 07 **Adiabatic frequency conversion in microresonators for multi-wavelength holography (Invited Paper)** [11987-11]

RESONANT CAVITY-BASED SENSORS

- 11987 08 **Bio-organism detection using microsphere resonators in fluidics** [11987-31]
- 11987 09 **Challenges in passive resonant miniature optical gyroscope based on integrated optics technologies** [11987-33]
- 11987 0A **$X^{(2)}$ frequency comb generation based on optical parametric oscillation in a lithium niobate microresonator** [11987-4]
- 11987 0B **Refractive index sensing by all-dielectric metasurfaces supporting quasi-bound states in the continuum** [11987-32]

BEAM CONTROL AND STEERING II

- 11987 0C **FPGA based laser beam stabilization system** [11987-43]

11987 OD External optical feedback engineered to reduce and stabilize the linewidth of diode lasers [11987-41]

LASERS

11987 OE A stretched-pulse mode-locked (SPML) wavelength-swept laser source at 1.06 μm [11987-45]

11987 OF Wide-aperture deformable mirror for correcting and improving focusing of multi-petawatt Ti:Sa laser beam [11987-48]

NOVEL RESONANT CAVITY PLATFORMS

11987 OG Mitigation of parasitic junction formation in compact resonant modulators with doped silicon heaters [11987-27]

11987 OH Optical rings as periodic systems (Invited Paper) [11987-28]

11987 OI Novel methods of platicon generation in optical microresonators: numerical study (Invited Paper) [11987-24]

WAVEFRONT SENSORS

11987 OJ Calibration of a Shack-Hartmann wavefront sensor using spherical wavefronts from a point source [11987-50]

11987 OK Shack-Hartmann sensor with B-spline approximation technique [11987-51]

POSTERS-TUESDAY

11987 OL Statistical analysis of a wavefront distorted by laboratory turbulence in terms of Zernike polynomials [11987-55]

11987 OM Robust stack-array deformable mirror for laser beam control [11987-56]

11987 ON The method of designing an optical-electronic imaging system for correcting the parameters of the wavefront of laser radiation transmitted through a turbulent atmosphere [11987-57]
