SPIE

Volume 11993

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Free-Space Laser Communications XXXIV*, edited by Hamid Hemmati, Bryan S. Robinson, Proc. of SPIE 11993, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510648579

ISBN: 9781510648586 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

SUBSYSTEM AND COMPONENT TECHNOLOGIES

- 11993 02 **Implementation of laser communications acquisition function using MEMS FSM and quad detector [11993-1]**
- 11993 03 **MOCA technology and product update with analytical results [11993-2]**

RECEIVER TECHNOLOGIES

- 11993 04 **Robust free space optical communication receiver based on a spatial mode demultiplexer and a silicon photonic coherent combining circuit [11993-7]**
- 11993 05 **Insertion loss of a multi-plane light conversion device with few mode fiber outputs under atmospheric conditions [11993-9]**
- 11993 06 **Qualifying an integrated coherent receiver for space applications [11993-11]**

TRANSMITTER TECHNOLOGIES I

- 11993 07 **Forward error correction and interleaving performance for lasercom terminals in fading channels [11993-12]**
- 11993 08 **Development, assembly, and characterisation of a breadboard CCSDS compliant 4W average power high photon efficiency (HPE) pulsed laser source [11993-13]**
- 11993 09 **Dual band optical amplifier for 1.0 and 1.5 μm communications [11993-14]**
- 11993 0A **Parallelized convolutional interleaver implementation for efficient DDR memory access [11993-15]**
- 11993 0B **High power WDM sources for laser communication [11993-16]**
- 11993 0C **Experimental and theoretical study of TDM based FWM mitigation in 8 channel 50W high power WDM PPM Tx [11993-17]**
- 11993 0D **100W optical amplifier for 10 channel laser communication system with enhanced wall-plug efficiency in the 1 μm wavelength range [11993-18]**

TRANSMITTER TECHNOLOGIES II

- 11993 OE H2020-SPACE-ORIONAS miniaturized optical transceivers and amplifiers for high-speed optical inter-satellite links (Invited Paper) [11993-19]
- 11993 OF Uplink laser assembly for the deep space optical communications payload aboard NASA's Psyche Asteroid Mission [11993-20]
- 11993 OG Qualification and performance of a high-efficiency laser transmitter for deep-space optical communications [11993-21]
- 11993 OH Optical modem enabling broadband datacom links for crewed cis-lunar missions [11993-22]
- 11993 OI A stereoscopic approach for cloud base height assessment over an optical ground station [11993-23]
- 11993 OJ Optical propagation in a marine environment: effects of turbulence spectrum choice on simulation [11993-24]

FLIGHT TRANSCEIVER TECHNOLOGIES I

- 11993 OK HydRON: internet backbone beyond the cloud(s) [11993-25]
- 11993 OL Enabling efficient quantum communications with adaptive optics [11993-26]
- 11993 OM Performance demonstration of 2x1U CubeSat laser communications terminals with over-the-air 10G communications links [11993-29]

FLIGHT TRANSCEIVER TECHNOLOGIES II

- 11993 ON Cobalt optical crosslink terminal [11993-31]
- 11993 OO Space-based adaptive communications node (Space-BACN) (Invited Paper) [11993-32]
- 11993 OP 200 Gbps TBIRD CubeSat downlink: pre-flight test results (Invited Paper) [11993-34]
- 11993 OQ Pointing, acquisition, and tracking for the TBIRD CubeSat mission: system design and pre-flight results [11993-6]

GROUND TRANSCIEVER TECHNOLOGIES

- 11993 OR **Preparation of high-speed optical feeder link experiments with HICALI payload (Invited Paper)** [11993-35]
- 11993 OS **Automatic aircraft avoidance for laser uplink safety** [11993-36]
- 11993 OT **Plenoptic wavefront sensor for free-space optical communications** [11993-37]
- 11993 OU **Numerical phase space optics methods and applications to the analysis of fiber coupling efficiency in atmospheric turbulence** [11993-38]
- 11993 OV **Transportable ground station for OKD using adaptive optics** [11993-39]
- 11993 OW **Implementation and assessment of a non-line-of-sight network cluster operating at the UVC wavelength band** [11993-41]

POST-DEADLINE TALKS

- 11993 OX **Electro-optics sensor with embedded edge AI-computing for atmospheric turbulence refractive index structure parameter (C^2_n) sensing at high temporal resolution** [11993-42]
