SPIE

**Volume 11994**

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-Power Laser Materials Processing: Applications, Diagnostics, and Systems XI*, edited by Stefan Kaierle, Stefan W. Heinemann, Proc. of SPIE 11994, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510648593

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## BEAM SHAPING

---

- 11994 02 **Advances in beam shaping of high-power CW lasers with BrightLine weld technology** [11994-1]
- 11994 03 **Remote welding with ultra-high-power CW lasers** [11994-2]
- 11994 04 **Influence of high feed rates during laser beam welding on the capillary geometry and the resulting weld seam quality** [11994-3]
- 11994 05 **Evaluation of productivity scaling approaches for laser powder bed fusion of nickel-base alloy 625** [11994-5]

---

## PROCESS CONTROL AND SIMULATION

---

- 11994 06 **The potential of photonic technologies in battery production: measurement, monitoring, control** [11994-7]
- 11994 07 **Thermal process control for laser micro-drilling of thin CFRP-laminates** [11994-8]
- 11994 08 **On the selection of materials for high-power laser optics with reduced thermal lensing** [11994-10]
- 11994 09 **High-accuracy calibration technique for passive pre-alignment of a laser autofocus system** [11994-11]
- 11994 0A **High-speed x-ray imaging of the melt flow during laser beam cutting** [11994-12]
- 11994 0B **A multiscale model for ultrashort pulsed parallel laser structuring, part II: the macro-scale model** [11994-13]

---

## APPLICATIONS

---

- 11994 0C **Laser-based repair of carbon fiber reinforced polymers with polyamide 6 matrix material** [11994-15]
- 11994 0D **On melt flow visualization in high-power fiber laser cutting** [11994-16]

- 11994 OE      **Development and optimization of fast laser shock peening (FLSP) using most advanced laser architectures** [11994-17]
- 11994 OF      **Effect of laser shock peening with square laser spot on hardness and residual stress of Ti6Al4V alloy** [11994-18]
- 11994 OG      **Laser welding of additively manufactured thermoplastic components assisted by a neural network-based expert system** [11994-19]
- 11994 OH      **Detoxification and scattering suppression of asbestos-containing material using a laser beam** [11994-20]
- 11994 OI      **Development of a deep drilling process in metals by means of ultrashort laser pulses** [11994-25]

---

**MULTI WAVELENGTH, MULTI SPOT**

- 11994 OJ      **Comparison between wavelengths of 940nm and 1530nm for laser transmission welding of glass fiber reinforced PPS** [11994-21]
- 11994 OK      **Multi-mJ ultrafast laser machining with flexible multi-spot patterns** [11994-23]
- 11994 OL      **Remote laser processing of highly reflective materials with ultra-bright lasers operating at 445nm** [11994-24]
