SPIE

**Volume 11995**

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Physics and Simulation of Optoelectronic Devices XXX*, edited by Bernd Witzigmann, Marek Osinski, Yasuhiko Arakawa, Proc. of SPIE 11995, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510648616

ISBN: 9781510648623 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## NONLINEAR DYNAMICS

---

- 11995 02 **Chaos-based mid-infrared communications (Invited Paper)** [11995-1]
- 11995 03 **Simulation of optical feedback propagating through tapered amplifiers** [11995-3]
- 11995 04 **Period-one oscillations of quantum cascade lasers for modulation spectroscopy applications** [11995-4]

---

## ACTIVE MATERIALS

---

- 11995 05 **Investigation of structural changes in shock compressed III-V materials** [11995-8]
- 11995 06 **Investigations on variations of the number of QW layers on optical properties of GaN/AlGaIn based LEDs** [11995-36]

---

## ELECTROMAGNETICS AND PLASMONICS

---

- 11995 07 **Highly efficient spin qubit to photon interface assisted by a photonic crystal cavity (Invited Paper)** [11995-9]
- 11995 08 **Three wave mixing in epsilon-near-zero plasmonic waveguides for signal regeneration** [11995-11]
- 11995 09 **Metamaterials in waveguide to fiber couplers** [11995-13]
- 11995 0A **Effect of localized current distributions in periodically nanostructured OLEDs on the resonant light outcoupling** [11995-14]

---

## SILICON-BASED PHOTONICS

---

- 11995 0B **Silicon-based electrically injected GeSn lasers (Invited Paper)** [11995-15]
- 11995 0C **Effects of external optical feedback in InAs/InP quantum dot frequency comb lasers on silicon** [11995-17]

11995 OD **Multi-micron dimensioning of amorphous silicon rib waveguides** [11995-18]

---

**SYSTEMS**

---

11995 OE **Progress in optical interconnects for harsh environments (Invited Paper)** [11995-22]

11995 OF **Wide-angle emission grating using a supervised genetic optimization for LIDAR integration**  
[11995-23]

11995 OG **Characterization and optimization of coupled-wave simulations for complex heterogeneous samples** [11995-24]

11995 OH **Differential evolution and transfer matrix simulations for designing high performance broadband near-IR to longwave-IR optical coatings** [11995-25]

---

**SEMICONDUCTOR LASERS**

---

11995 OI **Analysis of short pulse generation from excited state of InAs-InP (113)B quantum dot laser based on multi-population rate equations** [11995-29]

---

**POSTER SESSION**

---

11995 OJ **Silicon photonics avalanche photodetector behavioral model** [11995-30]

11995 OK **Multi-layer dielectric film for selective transmission of sun light** [11995-31]

11995 OL **Improved structural and optical behaviour of InAs Stranski-Krastanov (SK) quantum dot heterostructures using analog, digital, and linear alloy techniques** [11995-33]

11995 OM **A comparative study of single layer InAs SK, SML, and coupled SK-on-SML QDs heterostructure by incorporating InGaAsSb (Type-II) as capping layer** [11995-34]

11995 ON **Thermal extinction and image misregistration on metallic nanowire arrays** [11995-35]

11995 OO **Recent advance in phase transition of vanadium oxide based solar reflectors and the fabrication progress** [11995-37]
