SPIE

Volume 11996

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Physics, Simulation, and Photonic Engineering of Photovoltaic Devices XI*, edited by Alexandre Freundlich, Stéphane Collin, Karin Hinzer, Proc. of SPIE 11996, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510648630

ISBN: 9781510648647 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

PEROVSKITES

11996 02 **Physical simulation of perovskite/silicon three-terminal tandems based on bipolar transistor structure** [11996-4]

HOT CARRIERS AND LOW DIMENSIONALITY

11996 03 **Energy transfer between photons, carriers, and phonons in hot-carrier solar cells: a theoretical investigation (Invited Paper)** [11996-16]

11996 04 **Theoretical evidence of hot-ballistic-carriers in ultra-thin solar cell** [11996-18]

LIGHT MANAGEMENT

11996 05 **Light management for improved photon absorption in thin-film radiation-tolerant multijunction space photovoltaics** [11996-11]

11996 06 **Passive radiative cooling of solar cells by low-cost and scalable metamaterials: physical simulation and efficiency limits** [11996-15]

ADVANCED CONCEPTS

11996 07 **Extremely low material consumption III/V solar cell** [11996-20]

11996 08 **Sub-millimeter-scale multijunction solar cells for concentrator photovoltaics (CPV) (Invited Paper)** [11996-27]

11996 09 **Thermodynamics of a nanowire solar cell towards the radiative limit** [11996-28]

PHOTOVOLTAIC MODULES AND SYSTEMS

11996 0A **Impact of reflective torque tube on rear side irradiance in bifacial photovoltaic modules** [11996-25]

11996 0B **Probabilistic description of short-term cloud dynamics from rapid sampling of the solar spectral irradiance** [11996-26]

POSTER SESSION

11996 0C **Three-dimensional v-trough solar concentrator with diffuser for uniform cell illumination**
[11996-35]

11996 0D **Towards ultimate limit InP nanowire solar cells** [11996-36]

11996 0E **Dynamic urban solar harvesting: anisotropic shadows in energy estimation** [11996-38]

11996 0F **Optimization of n-type silicon solar cell front side contacts** [11996-39]

11996 0G **Determination of the complex refractive index for glass/ITO/PEDOT:PSS/MAPbI₃ film stack for perovskite solar cells applications** [11996-40]
