

PROCEEDINGS OF SPIE

Smart Photonic and Optoelectronic Integrated Circuits 2022

**Sailing He
Laurent Vivien**
Editors

**22–27 January 2022
San Francisco, California, United States**

**20–24 February 2022
ONLINE**

Sponsored and Published by
SPIE

**Volume
12005**

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Smart Photonic and Optoelectronic Integrated Circuits 2022*, edited by Sailing He, Laurent Vivien, Proc. of SPIE 12005, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

TECHNOLOGY AND INTEGRATION

- 12005 02 **Cutting-edge silicon-on-insulator substrate technology for datacenter transceivers and sensing applications (Invited Paper)** [12005-1]
- 12005 03 **Terahertz nanodevices for photonic integrated circuits (Invited Paper)** [12005-3]
- 12005 04 **UV-written silicon nitride integrated optical phased arrays** [12005-4]

SENSING AND IMAGING

- 12005 05 **MEMS for multispectral imaging (Invited Paper)** [12005-5]

HYBRID AND NONLINEAR MATERIALS AND DEVICES

- 12005 06 **Hybrid memristor optoelectronic integrated circuits for optical computing (Invited Paper)** [12005-11]

ADVANCED DESIGNS AND DEVICES

- 12005 07 **Autocorrective interferometers for photonic integrated circuits (Invited Paper)** [12005-19]
- 12005 08 **Machine learning assisted control of integrated optical phased arrays (Invited Paper)** [12005-20]

ADVANCED DEVICES AND CIRCUITS

- 12005 09 **Programmable silicon photonic circuits powered by MEMS (Invited Paper)** [12005-21]

12005 0A

Subwavelength-engineered metamaterial devices for integrated photonics (Invited Paper)
[12005-25]
