Volume 12011

Proceedings of SPIE 0277-786X, V. 12011

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High Contrast Metastructures XI*, edited by Connie J. Chang-Hasnain, Jonathan A. Fan, Weimin Zhou, Proc. of SPIE 12011, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

DIELECTRIC METASURFACES II

- 12011 02 **Multifunctional conformal grayscale electromagnetic metamaterials (3D Printing Best Paper Award)** [12011-4]
- 12011 03 **Quasi-bound states in resonant dielectric metastructures for integrated photonics** [12011-52]

BOND-STATE-IN-CONTINUUM AND HIGH-Q RESONANCE

- 12011 04 **Quasi-BIC resonances in amorphous germanium zero contrast gratings with dual asymmetric step profile for mid infrared frequency up-conversion** [12011-54]
- 12011 05 **Enhanced third harmonic generation in layered guided mode resonant structures using pupil engineered conical excitation** [12011-55]

TOPOLOGICAL PHOTONICS

- 12011 06 **Low threshold nanolasers based on topological resonant modes (Invited Paper)** [12011-47]
- 12011 07 **Metasurfaces for spin-control of surface waves** [12011-46]

IMAGING AND SENSING I

- 12011 08 **Understanding wide field-of-view metalenses (Invited Paper)** [12011-19]
- 12011 09 **Graphene-metasurface-based biosensor for SARS-CoV-2 detection** [12011-21]

IMAGING AND SENSING II

- 12011 0A **Optimizing achromaticity in metalenses, and development of a layered thin-film metalens** [12011-31]

THERMAL AND INFRARED META-OPTICS

12011 0B **Ultra-high quality van der Waals hyperbolic polariton resonators** [12011-32]

DESIGN METHODS AND ALGORITHMS

12011 0C **WaveY-Net: physics-augmented deep-learning for high-speed electromagnetic simulation and optimization** [12011-42]
