Volume 12021

Proceedings of SPIE 0277-786X, V. 12021

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Novel In-Plane Semiconductor Lasers XXI*, edited by Alexey A. Belyanin, Peter M. Smowton, Proc. of SPIE 12021, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

SPIDigitalLibrary.org

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

DFB AND DBRS

- 12021 02 **Full-C-band high-speed high-reliability wavelength switching at tunable DFB laser array with current/temperature cooperative control** [12021-1]
- 12021 03 **Electrically wavelength adjustable DBR laser for background-free Raman spectroscopy at 785 nm** [12021-3]
- 12021 04 **Slotted Y-branch laser for cw-THz thickness measurements at 1 THz** [12021-6]

MATERIALS AND STRUCTURE DEVELOPMENT

- 12021 05 **Investigation of deep level defects in n-type GaAsBi** [12021-10]
- 12021 06 **Integrated multi-wavelength DFB laser with 200 GHz channel spacing** [12021-51]

LASERS FOR INTEGRATION

- 12021 07 **Towards fully monolithic silicon-based integrated photonics: MOCVD grown lasers on silicon by blanket and selective area heteroepitaxy (Invited Paper)** [12021-18]
- 12021 08 **Optical degradation of InAs quantum-dot lasers on silicon: dependence on temperature and on diffusion processes** [12021-19]
- 12021 09 **Stability of a III-V/Si hybrid laser with a frequency-selective SiN mirror** [12021-20]
- 12021 0A **Control strategy for a monolithically integrated widely tunable laser system on InP for optical coherence tomography** [12021-21]

MID-IR LASERS AND INTEGRATED SYSTEMS

- 12021 0B **Electrically pumped epitaxially regrown $\lambda > 2 \mu\text{m}$ GaSb-based photonic crystal surface-emitting lasers (Invited Paper)** [12021-30]

Mid-IR QCLs: Modeling and New Architectures

- 12021 0C **Evaluation and analysis of operating characteristics for mid-infrared surface-emitting quantum cascade lasers** [12021-41]

MID-IR QCLS AND APPLICATIONS

- 12021 0D **High-definition video broadcasting with a room-temperature quantum cascade laser emitting in the long-wave infrared domain** [12021-46]
- 12021 0E **Quartz-enhanced photoacoustic spectroscopy employing a Vernier-effect distributed feedback-quantum cascade laser for multiple analytes detection** [12021-47]

HIGH BRIGHTNESS

- 12021 0F **Longitudinal spatial hole burning and associated non-uniform current and carrier density profile as a power limit in high power diode lasers (Invited Paper)** [12021-35]
- 12021 0G **Investigation of astigmatism in tapered edge-emitting diode amplifiers at 980 nm** [12021-37]
- 12021 0H **Comparison of electro-optical, spectral, and spatial beam parameters of 785 nm DBR tapered lasers with different grating lengths** [12021-38]
