Volume 12023

Proceedings of SPIE 0277-786X, V. 12023

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Emerging Liquid Crystal Technologies XVII*, edited by Liang-Chy Chien, Igor Mušević, Nelson V. Tabiryan, Proc. of SPIE 12023, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

LIQUID-CRYSTAL LENSES AND MICROLENS ARRAYS

- 12023 02 **Study of a liquid crystal impregnated diffraction grating for active waveguide addressing**
[12023-5]
- 12023 03 **Large aperture 0 D-2.5 D tunable liquid crystal (LC) lens based on segmented phase profile for tunable focus application** [12023-7]

PHOTOPATTERNING AND PHOTOALIGNMENT

- 12023 04 **Submicrometer photoalignment for photonic components based on tilted chiral liquid crystal (Invited Paper)** [12023-11]
- 12023 05 **Azodyes for liquid crystal photoalignment in displays and diffraction optical elements (Invited Paper)** [12023-12]

POLYMER AND LIQUID CRYSTAL COMPOSITES

- 12023 06 **SSD molecules' director switching behavior to an applied electric field: a consideration by probe light wavelength dependence of the switching dynamic profile (Invited Paper)**
[12023-20]
- 12023 07 **Switching effects of dual frequency liquid crystals in grating devices** [12023-22]
- 12023 08 **Image encoding with unconventional appearance through direct ink writing of a cholesteric liquid crystal oligomer ink** [12023-23]

LASING, WAVEGUIDES, NONLINEAR OPTICS, AND FLAT OPTICS

- 12023 09 **Controlling the spectrum of a supercontinuum laser using a liquid crystal on silicon spatial light modulator (Invited Paper)** [12023-16]
- 12023 0A **Optical gain and photostability of different laser dyes, quantum dots and quantum rods for liquid crystal micro lasers (Invited Paper)** [12023-17]

CHIRAL OPTICS AND DEVICES

12023 0B **Steering cholesteric liquid crystal elastomer properties by positional variation of chiral molecular building blocks (Invited Paper) [12023-2]**

POSTER SESSION

12023 0C **Apparatuses for preparing and investigation of liquid crystal devices [12023-28]**
