SPIE

Volume 12026

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Practical Holography XXXVI: Displays, Materials, and Applications*, edited by Hans I. Bjelkhagen, Seung-Hyun Lee, Proc. of SPIE 12026, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

ISBN: 9781510649231
ISBN: 9781510649248 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

MATERIALS AND PROCESSES

- 12026 02 **Reliable photopolymer for new applications: vHOEs recorded into Bayfol HX film resisting the environment (Invited Paper)** [12026-1]
- 12026 03 **Development of pixelated holograms recording strategies and aging study of different holographic photopolymer mechanisms for Augmented Reality applications** [12026-3]
- 12026 04 **Evaluating automated reconstruction methods for digital inline holographic images of plankton** [12026-5]

APPLICATIONS OF DISPLAY AND ART HOLOGRAPHY

- 12026 05 **Full-color holographic stereogram printing based on effective digital content generation using IDP algorithm (Invited Paper)** [12026-6]
- 12026 06 **Digital art holograms: approaches for the development of color choreographies** [12026-7]
- 12026 07 **Single-wavelength writing for free space WDM holograms at arbitrary wavelengths** [12026-9]

ELECTRONIC AND DIGITAL HOLOGRAPHY I

- 12026 08 **Modulating both amplitude and phase in a single-spatial light modulator (SLM)** [12026-12]
- 12026 09 **Compact phase-only spatial light modulator with pixel pitch of 4.25 μm and high photostability** [12026-13]
- 12026 0A **High dynamic range (HDR) imaging for camera-in-the-loop computer-generated holography (CGH) using spatially varying pixel exposures** [12026-14]

ELECTRONIC AND DIGITAL HOLOGRAPHY II

- 12026 0B **Mastering challenges in holography with widely tunable CW optical parametric oscillators (Invited Paper)** [12026-15]

12026 0C **Method for reducing speckle contrast in electro-holography illuminated by multimode optical fiber** [12026-16]

12026 0D **Optical phase association beyond memory effect in weak scattering media** [12026-18]

POSTER SESSION

12026 0E **The full-color 3D image for holographic waveguide-type AR system using optical elements**
[12026-25]

12026 0F **Full-color reflection hologram with optimized diffraction efficiency in a one-layer photopolymer**
[12026-27]

12026 0G **Holographic art applications in new architectural practices** [12026-30]
