

PROCEEDINGS OF SPIE

# ***Metro and Data Center Optical Networks and Short-Reach Links V***

**Atul K. Srivastava  
Madeleine Glick  
Youichi Akasaka**  
*Editors*

**22–27 January 2022  
San Francisco, California, United States**

**20–24 February 2022  
ONLINE**

*Sponsored by*  
SPIE

*Cosponsored by*  
Corning Incorporated (United States)  
NTT Electronics Corporation (Japan)

*Published by*  
SPIE

**Volume 12027**

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Metro and Data Center Optical Networks and Short-Reach Links V*, edited by Atul K. Srivastava, Madeleine Glick, Youichi Akasaka, Proc. of SPIE 12027, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510649255

ISBN: 9781510649262 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## NETWORK ARCHITECTURE

---

- 12027 03 **Flexible optical interconnects for efficient resource utilization and distributed machine learning training in disaggregated architectures (Invited Paper)** [12027-3]
- 12027 04 **Remotely biasing, controlling, and monitoring a network routing node based on optically provided signals (Invited Paper)** [12027-4]
- 12027 05 **Transmission-aware multiple lightpath reconfiguration in flexgrid optical networks** [12027-5]
- 12027 06 **PON WDM network architecture for the future aircraft cabin** [12027-6]

---

## PHOTONIC COMPONENTS AND SUB-SYSTEMS

---

- 12027 07 **Accurate analysis and low-complexity compensation of transceiver nonlinear distortion for higher-order modulation** [12027-11]
- 12027 08 **Measurement method of transmitter IQ imbalance in digital coherent communication systems** [12027-12]
- 12027 0A **Recent progress of Raman assisted phase sensitive amplifier (Invited Paper)** [12027-14]
- 12027 0C **Polarized intensity rotational FSK modulation for SOP change robust in optical access networks** [12027-16]
- 12027 0D **Investigation of NOMA-CAP modulation format for cost-effective and short reach next-generation optical networking applications (Invited Paper)** [12027-17]
- 12027 0E **Optical combs and multicore fiber as technology enablers for next-generation datacenter infrastructure (Invited Paper)** [12027-18]

---

## DISAGGREGATION AND NEW NETWORK

---

- 12027 0F **Photonics as a means to implement intra-rack resource disaggregation (Invited Paper)** [12027-27]
- 12027 0G **Functional block-based disaggregation approach for optical network automation supporting diverse node structures (Invited Paper)** [12027-28]

- 12027 OH **Towards efficient and reconfigurable next-generation optical fronthaul networks for massive MIMO (Invited Paper)** [12027-29]
- 12027 OJ **Recent progress of fiber diagnostic technologies for optical fiber networks: distributed fiber sensing and fiber characterization (Invited Paper)** [12027-31]

---

#### RF OVER FIBER AND FREE SPACE LINKS

---

- 12027 OK **3x3 MIMO RF transmission in radio over multimode fiber link** [12027-19]
- 12027 OL **Multiport optical concentrator for multimode fibers and high-speed detector interfacing** [12027-20]
- 12027 OM **High-capacity and high-fidelity analog radio-over-fiber mobile fronthaul** [12027-21]
- 12027 ON **Compensation technique against back-reflected signals in minimalist-designed linear frequency discriminator for microwave photonic links** [12027-22]
- 12027 OO **Plasmonic devices for transparent radio-over-fiber networks (Invited Paper)** [12027-32]

---

#### CO-PACKAGED OPTICS AND STANDARDS

---

- 12027 OR **Global insights into the co-packaged technology platforms enabling transceivers with capacities of 1.6 Tbps and higher** [12027-25]
- 12027 OS **Latest standardization trend for next-gen high speed optical transceivers** [12027-26]

---

#### VISIBLE LIGHT COMMUNICATION

---

- 12027 OT **Development of ultra-wide field-of-view white light laser-based visible light communication system** [12027-7]
- 12027 OU **VLC-based geo-localization for automated logistics control using AVGs** [12027-8]
- 12027 OV **Lighting fixture compatible NIR laser-based 16QAM-OFDM modulated visible light communication** [12027-9]
- 12027 OW **Navigation, routing and geolocation through visible light communication** [12027-10]
