

# **GeoShanghai 2006**

## **Foundation Analysis and Design Innovative Methods**

Proceedings of Sessions of GeoShanghai 2006

Geotechnical Special Publication Number 153

Shanghai, China  
6 – 8 June 2006

### **Editors:**

**Robert L. Parsons  
Limin Zhang  
Wei Dong Guo**

**K. K. Phoon  
Michael Yang**

ISBN: 978-1-7138-5197-4

**Printed from e-media with permission by:**

Curran Associates, Inc.

# Contents

## *Keynote Paper*

|   |            |
|---|------------|
| <b>Pile Group Settlement Estimation—Research to Practice .....</b>  | <b>1</b>   |
| H. G. Poulos  |            |
| <i>Limit State Design in Geotechnical Engineering Practice</i>  |            |
| <b>A Probabilistic Model for Liquefaction Triggering Analysis Using SPT .....</b>   | <b>23</b>  |
| S. Y. Fang, C. H. Juang, and W. H. Tang   |            |
| <b>Optimization of Composite Piled Raft Foundation with Varied Rigidity<br/>of Cushion .....</b>                                | <b>29</b>  |
| F. Liang, J. Li, and L. Chen  |            |
| <b>Sensitivity Analysis of Settlement of Single Piles .....</b>   | <b>35</b>  |
| Y. Xu, L. M. Zhang, and W. H. Tang  |            |
| <b>Case-Based Reasoning System for Optimal Decision of Pile Foundation.....</b>   | <b>42</b>  |
| Y. Yang   |            |
| <b>Establishing Serviceability Limit State in the Design of Bridge Foundations .....</b>  | <b>49</b>  |
| S. G. Paikowsky and Y. Lu   |            |
| <b>Progress Towards Harmonized Geotechnical Design in Europe .....</b>  | <b>59</b>  |
| T. L. L. Orr  |            |
| <b>Statistical Analysis of Kwangyang Marine Clay for Compression Index .....</b>  | <b>67</b>  |
| G. L. Yoon, B. T. Kim, Y. W. Yoon, and J. S. Shim   |            |
| <b>A Statistical Method to Determine Sample Size to Estimate Characteristic Value<br/>of Soil Parameters .....</b>              | <b>76</b>  |
| Y. Honjo, B. Setiawan, and M. Suzuki  |            |
| <b>Characterization of Model Uncertainties for Angered Cast-In-Place (ACIP)<br/>Piles under Axial Compression .....</b>         | <b>82</b>  |
| K. K. Phoon, J. R. Chen, and F. H. Kulhawy  |            |
| <b>Cost-Benefit Analysis of Routine Quality Assurance for Bored Piles.....</b>  | <b>90</b>  |
| D. Q. Li, L. M. Zhang, and W. H. Tang   |            |
| <b>A New Narrow-Bound Method for Computing System Failure Probability .....</b>   | <b>98</b>  |
| Z. Wu, J. Chen, and B. Wen  |            |
| <b>Code Calibration of Designing Open-Type Wharf on Vertical Steel Pipe Piles<br/>based on the Partial Factor Approach.....</b> | <b>103</b> |
| Y. Kikuchi, M. Suzuki, and Y. Yoshinami   |            |
| <b>Variance of the Subgrade Reaction for Estimating the Resistance of a Pile<br/>Perpendicular to Pile Axis .....</b>           | <b>111</b> |
| Y. Kikuchi and M. Suzuki  |            |

|  |            |
|--|------------|
| <b>The Role of Favourable and Unfavourable Actions in the Design of Shallow Foundations according to Eurocode 7.....</b> | <b>119</b> |
| K. Lesny   |            |
| <b>Serviceability Considerations in Reliability-Based Foundation Design.....</b>   | <b>127</b> |
| L. M. Zhang and K. K. Phoon  |            |
| <i>Pile Foundations and Drilled Shafts</i>   |            |
| <b>Discussion on the Bearing Capacity of a Bored Pile with Reamed Enlargements .....</b>                                 | <b>137</b> |
| L. Cai, Y. Li, and H. Zhou   |            |
| <b>Centrifuge Model Study on Pile Responses due to Adjacent Excavation.....</b>  | <b>145</b> |
| D. Choudhury, R. F. Shen, C. F. Leung, and Y. K. Chow  |            |
| <b>A New Hyperbolic p-y Curve Model for Laterally Loaded Piles in Soft Clay.....</b>                                     | <b>152</b> |
| D. M. Dewaikar and P. A. Patil   |            |
| <b>An ANFIS Based Approach for Predicting the Ultimate Bearing Capacity of Single Piles.....</b>                         | <b>159</b> |
| Z. Zhang, D. Ding, L. Rao, and Z. Bi   |            |
| <b>A Case Study on Load Transfer Law of Long Piles in Soft Soil.....</b>   | <b>167</b> |
| P. Fang, K. Jiang, and X. Zhu  |            |
| <b>Behavior of Axially Loaded Pile Groups Subjected to Lateral Soil Movement .....</b>                                   | <b>174</b> |
| W. D. Guo and E. H. Ghee   |            |
| <b>Vibration, Energy, and Pile Embedment Relationships during Driven Pile Installation .....</b>                         | <b>182</b> |
| E. L. Hajduk, J. C. Adams, T. E. Hill, and L. R. Chernauskas   |            |
| <b>Numerical Modeling of Some Features of Heat Exchanger Pile.....</b>   | <b>189</b> |
| L. Laloui and M. Nuth  |            |
| <b>Field Studies on Effect of Jacked Pile on Adjacent Buildings and Roads in Clay.....</b>                               | <b>195</b> |
| Z. Y. Luo, X. R. Zhu, and L. F. Wang   |            |
| <b>Effects of Drilling Tools on Rock Socket Roughness in Soft Clay Shale .....</b>                                       | <b>203</b> |
| M. S. Nam, C. Vipulanandan, and Y. Choi  |            |
| <b>Observed and Predicted Skin Friction Capacity of Auger Cast-in-Place Piles .....</b>                                  | <b>211</b> |
| D. E. Ott and E. C. Drumm  |            |
| <b>Study on the Interaction Law between Squeezed Branch Pile and Soil.....</b>   | <b>218</b> |
| D. Qian, C. Sun, and D. Wang   |            |
| <b>Methodology for Design of Piled Raft for 5-Storey Buildings on Very Soft Clay.....</b>                                | <b>226</b> |
| Y. C. Tan, S. W. Cheah, and M. R. Taha   |            |
| <b>Experimental Study on Behavior of Pile Foundation in Lacustrine Deposits Area .....</b>                               | <b>234</b> |
| J. Chen, J. Wang, K. Wang, and J. Shen   |            |
| <b>Experimental Study on Bearing Capacity of Doubled Steel Tubular Piles .....</b>                                       | <b>242</b> |
| H. Wei, H. Wang, H. Akira, and J. Yang   |            |
| <b>Evaluation of Lateral Response of Drilled Shafts in Rock.....</b>   | <b>249</b> |
| K. Yang, R. Liang, and J. Nusairat   |            |

|   |            |
|---|------------|
| <b>Lateral Capacity Design of Prestressed High Strength Concrete Piles in Soft Clay .....</b> | <b>257</b> |
| W. Zheng and M. M. Petersen   |            |
| <b>Liquefaction Effects on Lateral Pile Behavior for Bridges .....</b>                        | <b>264</b> |
| W. Zheng and R. Luna  |            |
| <b>Analysis of Soil Heave Due to Pile-Sinking in Soft Clay.....</b>                           | <b>271</b> |
| F. Zhou, J. Zai, G. Mei, and G. Zhou  |            |
| <b>Development of Negative Skin Friction of Piles on Soft Ground.....</b>                     | <b>277</b> |
| W. Zhou, R. Chen, and Y. Chen   |            |
| <b>The Origin, Application, and Development of Piles in China .....</b>                       | <b>285</b> |
| P. Shi, S. Bao, and H. Yin  |            |
| <b>Prediction of Ground Displacement and Deformation Induced by Large Diameter Piles.....</b> | <b>293</b> |
| S. Qiao, L. Fang, and B. Liu  |            |
| <b>Examining Productivity of Foundation Construction .....</b>                                | <b>300</b> |
| W. K. Chong and J. S. Chou  |            |
| <b>Stress and Safety Analysis of Pile Based on the Unified Strength Theory .....</b>          | <b>308</b> |
| L. Cao, J. Zhao, X. Wei, and L. Ji  |            |
| <b>Analysis of Settlement of Pile Foundations for the High-Speed Rail .....</b>               | <b>315</b> |
| Z. Lin and Z. Zhou  |            |

*Shallow Foundations*

|   |            |
|---|------------|
| <b>A New Method for Calculating the Final Settlement of Soft Clay Ground—The Geometric Progression Method .....</b> | <b>323</b> |
| L. H. Kuang, Kang Li, J. D. Niu, and L. R. Xu   |            |
| <b>Optimization Forecasting Model of Foundation Settlement Based on Grey Model Groups.....</b>                      | <b>330</b> |
| J. Sun and Q. Gao   |            |
| <b>Parameter Estimation for Settlement Prediction Model Using Bayesian Inference Approach .....</b>                 | <b>336</b> |
| Y. P. Zhang   |            |
