Table of Contents

| | |
|----------------------------|------|
| Preface | ix |
| Organizing Committee | x |
| Additional Reviewers | xiii |
| Keynotes | xiv |

Session 1: System Security

| | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Minimal Schedule with Minimal Number of Agents in Attack-Defence Trees | 1 |
| <i>Jaime Arias (Université Sorbonne Paris Nord, France), Laure Petrucci (Université Sorbonne Paris Nord, France), Lukasz Masko (Institute of Computer Science, Polish Academy of Sciences, Poland), Wojciech Penczek (Institute of Computer Science, Polish Academy of Sciences, Poland), and Teofil Sidoruk (Institute of Computer Science, Polish Academy of Sciences, Poland; Faculty of Math. and Inf. Science, Warsaw University of Technology, Poland)</i> | |
| HoS-ML: Socio-Technical System ADL Dedicated to Human Vulnerability Identification | 11 |
| <i>Paul Perrotin (Ecole Navale, France), Nicolas Belloir (Military Academy of St-Cyr, France), Salah Sadou (Université Bretagne Sud, France), David Hairion (Naval Group), and Antoine Beugnard (Institut Mines-Télécom Atlantique, France)</i> | |
| Reducing Malware Labeling Efforts Through Efficient Prototype Selection | 17 |
| <i>Guanhong Chen (Tianjin University, China) and Shuang Liu (Tianjin University, China)</i> | |

Session 2: System Performance

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Optimizing Parallel Java Streams | 23 |
| <i>Matteo Basso (Università della Svizzera Italiana, Switzerland), Filippo Schiavio (Università della Svizzera Italiana, Switzerland), Andrea Rosà (Università della Svizzera Italiana, Switzerland), and Walter Binder (Università della Svizzera Italiana, Switzerland)</i> | |

| | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Parameterized Design and Formal Verification of Multi-Ported Memory | 33 |
| <i>Mufan Xiang (Shanghai Key Laboratory of Trustworthy Computing, East China Normal University, China), Yongjian Li (Institute of Software, Chinese Academy of Sciences, China; Hangzhou Institute for Advanced Study, UCAS), Sijun Tan (Institute of Software, Laboratory of Computer Science, China), Yongxin Zhao (Shanghai Key Laboratory of Trustworthy Computing, East China Normal University, China), and Yiwei Chi (Institute of Software, Laboratory of Computer Science, China)</i> | |

Session 3: Self-Adaptive Systems

| | |
|-------------------------------------------------------------------------------------------------------|----|
| Self-Adaptation in Microservice Architectures: A Case Study | 42 |
| <i>Sree Ram Boyapati (Atlassian, Australia) and Claudia Szabo (University of Adelaide, Australia)</i> | |
| Multi-Layer Event Analytic Method of Adaptive Software Orienting at Uncertain Environments..... | 52 |
| <i>Xinyue Li (Southwest University, China) and Wu Chen (Southwest University, China)</i> | |

Session 4: Formal Methods

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| A Formal Model for Fault Tolerant Parallel Matrix Factorization | 62 |
| <i>Camille Coti (Université Sorbonne Paris Nord, France; University of Oregon, USA), Laure Petrucci (Université Sorbonne Paris Nord, France), and Daniel Alberto Torres Gonzalez (Université Sorbonne Paris Nord, France)</i> | |
| EB4EB: A Framework for Reflexive Event-B | 71 |
| <i>Peter Rivière (University of Toulouse, France), Neeraj Kumar Singh (University of Toulouse, France), and Yamine Ait-Ameur (University of Toulouse, France)</i> | |
| Formalism-Driven Development of Decentralized Systems | 81 |
| <i>Yepeng Ding (The University of Tokyo, Japan) and Hiroyuki Sato (The University of Tokyo, Japan)</i> | |
| Building Correct Hybrid Systems using EVENT-B and SAGEMATH: Illustration by the Hybrid Smart Heating System Case Study | 91 |
| <i>Meryem Afendi (Univ Paris Est Créteil LACL, France), Amel Mammar (SAMOVAR, Institut Polytechnique de Paris Télécom SudParis Evry, France), and Régine Laleau (Univ Paris Est Créteil LACL, France)</i> | |

Session 5: Verification and Testing

| | |
|----------------------------------------------------------------------------------------------------------------------------------------------|----|
| A Bounded Semantics for Improving the Efficiency of Bounded Model Checking | 97 |
| <i>Wenhui Zhang (University of the Chinese Academy of Sciences, China) and Ya Gao (University of the Chinese Academy of Sciences, China)</i> | |

| | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Distributed Explicit State Space Exploration with State Reconstruction for RDMA Networks | 107 |
| <i>Sami Evangelista (Université Sorbonne Paris Nord, France), Laure Petrucci (Université Sorbonne Paris Nord, France), and Lars Michael Kristensen (Faculty of Engineering and Science, Western Norway University of Applied Sciences, Norway)</i> | |
| A Digital Twin Runtime Verification Framework for Protecting Satellites Systems from Cyber Attacks | 117 |
| <i>Zhe Hou (Griffith University, Australia), Qinyi Li (Griffith University, Australia), Ernest Foo (Griffith University, Australia), Jin Song Dong (National University of Singapore, Singapore), and Paulo de Souza (Griffith University, Australia)</i> | |

Session 6: Formal Semantics

| | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Denotational and Algebraic Semantics for Cyber-Physical Systems | 123 |
| <i>Ran Li (East China Normal University, China), Huibiao Zhu (East China Normal University, China), and Richard Banach (University of Manchester, UK)</i> | |
| The Operational and Denotational Semantics of rMECal Calculus for Mobile Edge Computing | 133 |
| <i>Jiaqi Yin (East China Normal University, China) and Huibiao Zhu (East China Normal University, China)</i> | |

Session 7: Static Analysis

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Characterizing Java Streams in the Wild | 143 |
| <i>Eduardo Rosales (Università della Svizzera Italiana, Switzerland), Andrea Rosà (Università della Svizzera Italiana, Switzerland), Matteo Basso (Università della Svizzera Italiana, Switzerland), Alex Villazón (Universidad Privada Boliviana, Bolivia), Adriana Orellana (Universidad Privada Boliviana, Bolivia), Angel Zenteno (Universidad Privada Boliviana, Bolivia), Jhon Rivero (Universidad Privada Boliviana, Bolivia), and Walter Binder (Università della Svizzera Italiana, Switzerland)</i> | |
| Combining Global and Local Representations of Source Code for Method Naming | 153 |
| <i>Cong Zhou (Central South University, China) and Li Kuang (Central South University, China)</i> | |
| Parameter Sensitive Pointer Analysis for Java | 162 |
| <i>Yulin Bao (Jinan University, China), Chenyi Zhang (Jinan University, China), Xilong Zhuo (Department of Quality Management, Tencent, China), and Yongliang Wang (Research and Development, Tinnove, China)</i> | |
| A Novel Intelligent-Building-Fire-Risk Classification Method | 168 |
| <i>Weilin Wu (East China Normal University, China), Na Wang (Shanghai Polytechnic University, China), and Yixiang Chen (East China Normal University, China)</i> | |

Session 8: Deep Learning

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| Generating Adversarial Source Programs using Important Tokens-Based Structural Transformations | 173 |
| <i>Penglong Chen (Hebei University, China), Zhen Li (Hebei University, China), Yu Wen (Hebei University, China), and Lili Liu (Hebei University, China)</i> | |
| DLGR: A Rule-Based Approach to Graph Replacement for Deep Learning | 183 |
| <i>Enze Ma (Beijing Forestry University, China)</i> | |
| Extending Tensor Virtual Machine to Support Deep-Learning Accelerators with Convolution Cores | 189 |
| <i>Yanzhao Wang (Portland State University, USA) and Fei Xie (Portland State University, USA)</i> | |
| Extension-Compression Learning: A Deep Learning Code Search Method that Simulates Reading Habits | 195 |
| <i>Lian Gu (National University of Defense Technology, China), Zihui Wang (National University of Defense Technology, China), Jiaxin Liu (National University of Defense Technology, China), Yating Zhang (National University of Defense Technology, China), Dong Yang (National University of Defense Technology, China), and Wei Dong (National University of Defense Technology, China)</i> | |
| Author Index | 201 |
