Table of Content

Session: Optimization and Control

Thomas Florian Klatzer, Udo Bachhiesl, and Sonja Wogrin	Power System Analyses with the Low-carbon Expansion Generation Optimization (LEGO) model	63
Danial Esmaeili Aliabadi, Katrina Chan, Matthias Jordan, Markus Millinger, and Daniela Thrän	Abandoning the Residual Load Duration Curve and Overcoming the Computational Challenge	69
Valentín Rigoni and Andrew Keane	An open-source optimization toolkit for the smart scheduling of DERs in distribution grids	75
Philipp Glücker, Marco Langiu, Thiemo Pesch, Manuel Dahmen, and Andrea Benigni	Incorporating AC Power Flow into the Multi-Energy System Optimization Framework COMANDO	81
Ilka Jahn, Mehrdad Nahalparvari, Staffan Norrga, and Robert Rogersten	Moving Beyond Open-Source Modelling: Why Open Control and Protection Software in Real Converters Will Be Useful	87
Alexander Holtwerth, Andre Xhonneux, and Dirk Müller	Data-Driven Generation of Mixed-Integer Linear Programming Formulations for Model Predictive Control of Hybrid Energy Storage Systems using detailed nonlinear Simulation Models	93

Session: Keynote 2 and Panel

Keynote Speaker • Ravinder Venugopal (OPAL-RT) *Panellists* • Edmund Widl (AIT Austrian Inst. of Technology) • Antonio De Paola (EC Joint Research Center) • Steffen Vogel (RWTH Aachen) • Graeme Burt (University of Strathclyde)	The Simulation Technology for Energy and Power Change *(co-organized by H2020 ERIGrid 2.0 and H2020 HYPER-RIDE)*	99

Session Power System II – Modelling, Analysis, and Markets

Gijs Verhoeven, Bart van der Holst, Shreshtha Sharma, and Koen Kok	A Co-simulation Study Design to Assess the Effectiveness of Flexibility Activation Mechanisms on Congestion in Dutch Distribution Networks	100
Davis Montenegro, Roger Dugan, Jason Taylor, and Mark McGranaghan	Open-source software projects for advancing the power systems analysis	106
Marcelo de Castro Fernandes and Luigi Vanfretti	Multi Time-Scale Modeling of a STATCOM and Power Grid for Stability Studies using Modelica	112
Jan Frederick Unnewehr, Mirko Schäfer, and Anke Weidlich	The value of network resolution - A validation study of the European energy system model PyPSA-Eur	119
Ramiz Qussous, Nick Harder, Mirko Schäfer, and Anke Weidlich	Increasing the realism of electricity market modeling through market interrelations	126

Session: Power System III – Tools

Jose Luis Marin, Vicenç Gaitan, Guiu Oms, Marco Chiaramello, Quentin Cossart, and Adrien Guironnet	An Open Source Tool to Compare Simulators on Large-Scale Cases – Application to Dynawo	132
Ghassen Nakti, Jan Dinkelbach, Markus Mirz, and Antonello Monti	Comparative Assessment of Shifted Frequency Modeling in Transient Stability Analysis using the Open Source Simulator DPsim	138
Anna Büttner, Hans Würfel, Anton Plietzsch, Michael Lindner, and Frank Hellmann	An Open Source Software Stack for Tuning the Dynamical Behavior of Complex Power Systems	144
Sigurd Hofsmo Jakobsen, Junjie Zhang, Tor Inge Reigstad, Lukas Razik, Salvatore D'Arco, and Andrea Benigni	Modelica-based parallel computing framework for power system adaptive special protection schemes	150

Session: Real-Time Simulation

Massimiliano Chiandone, Andrea Alessia Tavagnutti, Andrea Vicenzutti, Nicola Barbini, Daniele Bosich, and Giorgio Sulligoi	Open Source Hardware in the Loop Real-time Simulation of Zonal DC systems	156
Matthew Milton, Michele Difronzo, Dhiman Chowdhury, Herbert Ginn, and Andrea Benigni	A Model of MMCs for Power Electronic System High-Performance Real-Time Simulation	162
Castulo De la O, Michele Difronzo, Matthew Milton, Herbert Ginn, Mark Stanovich, Jacob Park, Karl Schoder, Mischa Steurer, David Wetz, Cole Tschritter, Greg Turner, and Alex Johnston	Remote Site Real-Time Co-Simulation of a Shipboard Microgrid	168
Daniele Carta, Moritz Weber, Philipp Glücker, Thiemo Pesch, Veit Hagenmeyer, Andrea Benigni, and Uwe Kühnapfel	VILLASnode-based Co-simulation of Local Energy Communities	174

Session: Thermal Systems

Patrik Schönfeldt, Adrian Grimm, Bhawana Neupane, Herena Torio, Pedro Duran, Peter Klement, Benedikt Hanke, Karsten von Maydell, and Carsten Agert	Simultaneous optimisation of temperature and energy in linear energy system models	180
Kathryn Hinkelman, Saranya Anbarasu, Michael Wetter, Antoine Gautier, Baptiste Ravache, and Wangda Zuo	Towards Open-Source Modelica Models for Steam-Based District Heating Systems	186
Christian Fester, Iasonas Kouveliotis Lysikatos, Manuel Marin, and Mikael Amelin	Open-Source Modelling and Simulation of a District Heating and Electricity Energy System	192
Moritz Frahm, Felix Langner, Philipp Zwickel, Jörg Matthes, Ralf Mikut, and Veit Hagenmeyer	How to Derive and Implement a Minimalistic RC Model from Thermodynamics for the Control of Thermal Parameters for Assuring Thermal Comfort in Buildings	198
Edmund Widl, Cristopher Wild, Kai Heussen, Evangelos Rikos, and Tran-The Hoang	Comparison of two approaches for modeling the thermal domain of multi-energy networks	204
