Proceedings of SPIE, 1605-7422, V. 11976

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Nanoscale Imaging, Sensing, and Actuation for Biomedical Applications XIX*, edited by Dror Fixler, Ewa M. Goldys, Sebastian Wachsmann-Hogiu, Proc. of SPIE 11976, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

NANOSCALE IMAGING, SENSING, AND ACTUATION FOR BIOMEDICAL APPLICATIONS I

- 11976 02 **All-dielectric nanophotonic optical tweezers for lossless manipulation of biologically-relevant molecules** [11976-2]
- 11976 03 **Nanospeckle illumination microscopy via randomly localized near-field speckle by nanocomposite islands** [11976-4]
- 11976 04 **Spectral ghost imaging with a speckle pattern** [11976-7]
- 11976 05 **Extracting the reduced scattering coefficient in different optical magnifications in the blue regime: theory and experiments** [11976-9]

NANOSCALE IMAGING, SENSING, AND ACTUATION FOR BIOMEDICAL APPLICATIONS IV

- 11976 06 **Nanobeam and nanoneedle technology study new biomarker and single molecular interaction** [11976-103]

POSTER SESSION

- 11976 07 **Nano logic gates based on gold nanoparticles: carbon dots hybrid and its FLIM imaging** [11976-5]
- 11976 08 **Engineering of multi-photoluminescence properties for hybrid structure of metal nanoparticles/semiconductor quantum dots for bio-imaging applications** [11976-8]
- 11976 09 **Extraction of absorption coefficients from two-layer phantoms based on crossover point in diffuse reflectance** [11976-10]
- 11976 0A **Scattering detection in multi-layer tissue: phantom experiments and in vivo applications** [11976-11]
- 11976 0B **Preferential uptake of glucose-functionalized liposomes by cancer cells** [11976-15]
- 11976 0C **Designing a quantifiable detection method for the optimization of gold nanoparticle based gene therapy** [11976-16]
- 11976 0D **Golden exosomes: a new platform for cancer theranostics** [11976-17]
