SPIE

Volume 11997

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Components and Materials XIX*, edited by Shibin Jiang, Michel J. Dignonet, Proc. of SPIE 11997, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510648654

ISBN: 9781510648661 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

NANOSTRUCTURED STRUCTURES

- 11997 02 MWIR scatter of antireflective nanostructured windows [11997-9]
- 11997 03 Design and analysis of the reconfigurable plasmonic absorbers based on hexagonal periodic gratings [11997-10]

OPTOELECTRONICS DEVICES

- 11997 04 Photoluminescence from two-color quantum dot films [11997-2]
- 11997 05 Low loss titanium dioxide strip loaded waveguide on thin-film lithium niobate at 1550nm [11997-3]
- 11997 06 Rare earth doped perovskites for efficient solar spectrum down-conversion [11997-5]

METAMATERIALS

- 11997 07 Efficient optimization of nonlinear optical devices with ITO/SiO₂ layered hyperbolic metamaterials [11997-12]

PHOTODETECTORS

- 11997 08 Extended-wavelength 1.3-megapixel type-II superlattice SWIR compact camera system with scalable manufacturing [11997-14]
- 11997 09 Low-noise AlGaAsSb avalanche photodiodes for 1550nm light detection [11997-16]
- 11997 0A Crosstalk analysis for mesa-based in-device passivated InGaAs photodetectors [11997-18]
- 11997 0B Comparison of the temperature dependence of impact ionization coefficients in AlAsSb, InAlAs, and InP [11997-19]
- 11997 0C Effect of anode sheet resistance on rise time of black silicon induced junction photodiodes [11997-20]

MID-IR MATERIALS

- 11997 OD **High performance near-IR to longwave-IR broadband omnidirectional antireflection coating by differential evolution** [11997-24]
- 11997 OE **Mechanical alloying and molding by spark plasma sintering of telluride based glasses** [11997-25]

LASERS

- 11997 OF **Compact mid-infrared nanosecond pulsed fiber lasers based on novel saturable absorbers (Invited Paper)** [11997-27]
- 11997 OG **Radiation tolerant frequency comb fiber laser for space applications** [11997-28]
- 11997 OI **Emission properties study of a Nd³⁺-doped TZA glass random laser** [11997-30]
- 11997 OK **Fourier pulse shaper assisted feedback in cascaded Raman lasers for reduced linewidth and wide wavelength tunability** [11997-31]
- 11997 OM **Laser beam control using machine learning technology for particle accelerator** [11997-32]
- 11997 OH **Mid-infrared chalcogenide polarization-maintaining single-mode fiber** [11997-34]
- 11997 OJ **A new polyimide coating for optical fibers: demonstration of advantageous characteristics in harsh environments** [11997-35]
- 11997 OL **Ultra-high-accuracy chromatic dispersion measurement in optical fibers** [11997-36]
- 11997 ON **Two all-optical switching schemes of 1560 nm femtosecond pulses using soft glass asymmetric dual-core fibers** [11997-37]

POSTERS-WEDNESDAY

- 11997 OO **Optical sensor for high voltage applications** [11997-39]
- 11997 OP **Optical characterization of apatite for enhanced optoelectronic properties** [11997-40]
- 11997 OQ **A nano-hybrid plasmon-exciton material with an enhanced biexciton emission increases the efficiency of the photodetector at high excitation intensities** [11997-41]
- 11997 OR **Suppressing fluctuation of chromatic dispersion and signal gain performances in a chalcogenide buffer step-index optical fiber** [11997-42]

- 11997 OS **Modeling temperature-dependent optical absorption in thulium-doped YAG** [11997-43]
- 11997 OT **Stray-light control by using mirrors with engineered substrates** [11997-44]
- 11997 OU **Simulated and experimental demonstration of CO₂ detection using sequentially drilled and non-drilled open-air photonic fiber segments** [11997-45]
- 11997 OV **C-RED 2 ER: an extended range SWIR camera with applications in hyperspectral imaging**
[11997-49]
