PROCEEDINGS OF SPIE

# *International Conference on Network Communication and Information Security (ICNCIS 2021)*

**Yaqiong Liu**
**Fushuan Wen**
*Editors*

**3–5 December 2021**
**Sanya, China**

*Organized by*
Noroff University College (Norway)

*Sponsored by*
AEIC Academic Exchange Information Center

*Published by*
SPIE

**Volume 12175**

Proceedings of SPIE 0277-786X, V. 12175

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Network Communication and Information Security (ICNIS 2021)*, edited by Yaqiong Liu, Fushuan Wen, Proc. of SPIE 12175, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

ISBN: 9781510653276
ISBN: 9781510653283 (electronic)

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

NETWORK COMMUNICATION TECHNOLOGY AND SIGNAL MODEL RECOGNITION

12175 02 **Modulation recognition method of wireless communication digital signal considering multi-dimensional characteristics** [12175-35]

12175 03 **A network attack evaluation model based on variable weight theory** [12175-30]

12175 04 **A dual-path network for source-robust spatial image steganalysis** [12175-15]

12175 05 **joint coding of underwater acoustic communication source channel based on polar code** [12175-26]

12175 06 **Analysis and research on current situation of structured data desensitization technology** [12175-14]

12175 07 **Spectrum-efficient wireless backhaul with renewable energy powered base stations** [12175-33]

12175 08 **A comparison of low-speed communication modes** [12175-12]

12175 09 **Forward denoising neural network for underground mine images** [12175-4]

12175 0A **Research on image trading system based on Blockchain and IPFS** [12175-27]

12175 0B **Environmental domain embedding for far-field speaker verification** [12175-5]

12175 0C **The analysis on the direct sequence spread spectrum communication system** [12175-9]

12175 0D **Research on the realization method of the docking function between Wechat payment system and supermarket cashier system** [12175-1]

12175 0E **Design of high gain maritime satellite antenna** [12175-2]

12175 0F **Integral fault analysis of Midori64 lightweight cipher** [12175-24]

12175 0G **Influence of atmospheric turbulence on laser time-frequency transmission** [12175-36]

12175 0H **Discussion on the degree of influence on the performance of scene semantic classification after applying SRCNN reconstruction model** [12175-11]

12175 0I **Technical applications of using 5G in industrial internet** [12175-39]

12175 0J **Study and implementation of encryption algorithm based on SM2** [12175-38]

12175 0K **Key management technology analysis based on UAV cluster communication security** [12175-28]

12175 0L **Detecting DoH tunnels with privacy protection using federated learning** [12175-20]

12175 0M **Study on the deployment of national top-level nodes** [12175-17]

12175 0N **Research on secure communication module based on subscriber identity module as root of trust** [12175-18]

12175 0O **A highly secure C2C-PAKE cross-domain protocol** [12175-25]

12175 0P **A quantitative approach to the competence of trainees based on the cyber security skills framework** [12175-3]

12175 0Q **Color restoration of murals based on the latent space in machine learning** [12175-37]

12175 0R **The SIM card-based security identification scheme of Internet of Things device** [12175-19]

12175 0S **Safety risk assessment and control to operation control system of the virtual power plant based on COBIT 5 for risk** [12175-10]

12175 0T **Chosen-message forgery attack on SCREAM** [12175-29]

12175 0U **A method to analysis the risk factors in information system** [12175-23]

12175 0V **Analyze the application of digital communication in the library information security based on RFID** [12175-13]

12175 0W **Intrusion detection method for complex network environment based on security situation awareness** [12175-34]

12175 0X **Performance optimization and simulation of SDN fat tree network based on Dijkstra's algorithm** [12175-32]

12175 0Y **Mobile edge computing offload strategy based on energy aware** [12175-6]
