SPIE

**Volume 12193**

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Laser Physics, Photonic Technologies, and Molecular Modeling*, edited by Vladimir L. Derbov, Proc. of SPIE 12193, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 1605-7422

ISSN: 2410-9045 (electronic)

ISBN: 9781510653672

ISBN: 9781510653689 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii	<i>Conference Committee</i>
ix	<i>Conference Organizers</i>
xi	<i>Introduction</i>

---

## BEAM AND PULSE PROPAGATION, OPTICAL WAVEGUIDES, AND NONLINEAR OPTICS

---

12193 02	<b>Detection enhancement of the optical medium spatial anisotropy using the lens supplemented with a diffractive axicon [12193-1]</b>
12193 03	<b>Matrix method for calculating vector beams in reflection and transmission by planar anisotropic inhomogeneous structure [12193-133]</b>
12193 04	<b>Optical and electronic properties of Ge-Sb-Ga-Se chalcogenide glasses doped with Tb<sup>3+</sup> and Dy<sup>3+</sup> [12193-22]</b>
12193 05	<b>Single-mode propagation of the adiabatic waveguide mode in a smooth transition between planar waveguide [12193-29]</b>
12193 06	<b>Frequency-modulated normal modes of electromagnetically induced transparency [12193-4]</b>
12193 07	<b>Decay of photoinduced susceptibility under red light [12193-21]</b>
12193 08	<b>Dispersion interaction of 1D filaments [12193-20]</b>
12193 09	<b>Wave optics based modeling of tapered chalcogenide fibers as sensing elements for the mid-IR spectroscopy [12193-8]</b>

---

## PHOTONICS AND TECHNOLOGY OF LOW DIMENSIONAL STRUCTURES, BANDGAP STRUCTURES, AND METAMATERIALS

---

12193 0A	<b>Excitation of the broadband surface plasmon polaritons in planar metal-dielectric structures [12193-3]</b>
12193 0B	<b>Broadband generation of terahertz waves via infrared frequency nondegenerate parametric down-conversion by nonlinear graphene arrays [12193-6]</b>
12193 0C	<b>Energetic and capacitive parameters of few-layer graphene decorated with transition metal oxide Co<sub>3</sub>O<sub>4</sub> [12193-15]</b>
12193 0D	<b>Cavity with graphene hyperbolic medium: optimization of parameters and conditions for efficient THz lasing [12193-17]</b>

- 12193 OE **Unusual optical effects in dielectric mesoscale particles** [12193-39]
- 12193 OF **Propagation of supersonic excitations through the carbon nanotube forest** [12193-33]
- 12193 OG **Electronic and optical properties of layered Van der Waals heterostructures based on blue phosphorus and zinc oxide** [12193-30]
- 12193 OH **Co-deposited Si-Al thin films as a base material to decrease the reflectance in the millimeter-band frequencies** [12193-31]

---

#### LASER AND PHOTONIC TECHNOLOGIES IN MATERIALS SCIENCE AND BIOLOGY

---

- 12193 OI **Mathematical model of the mechanical effect of picosecond laser radiation in high-frequency pulsation mode in creating microstructures by special laser milling** [12193-7]
- 12193 OJ **On the laser micromachining of thin copper-molybdenum alloy films** [12193-38]
- 12193 OK **Microfabrication of the electromagnetic bandgap structure for incorporating into the dielectric substrate of the millimeter-band planar slow-wave structure** [12193-37]
- 12193 OL **Laser self-mixing interferometry for measuring and analyzing micromovements of the eyeball** [12193-32]
- 12193 OM **Analysis of a crowdion propagated in an extremely heated tungsten** [12193-19]
- 12193 ON **Investigation of the composition, structure, and hardness of tool steel after induction nitriding** [12193-9]
- 12193 OO **Prolonged microlattices for generation of green light** [12193-18]

---

#### QUANTUM OPTICS, ENTANGLED STATES

---

- 12193 OP **Coherent states, Kähler manifolds, and quantum dynamics** [12193-46]
- 12193 OQ **Thermal entanglement in Tavis-Cummings models with Kerr media** [12193-11]
- 12193 OR **Thermal entanglement of two atoms with dipole-dipole and Ising interactions** [12193-13]

---

#### MOLECULAR MODELLING AND SPECTROSCOPY

---

- 12193 OS **Study of the complexation reaction between substituted 6,6'-bis(diphenylphosphinoyl)-2,2'-bipyridyls and lanthanum ions** [12193-5]

- 12193 OT **Quantum mechanical model and vibrational spectra of cottonseed oil** [12193-16]
- 12193 OU **Formation of massive electron pairs as a necessary condition for low-temperature nuclear fusion and the existence of a new state of matter** [12193-34]
- 12193 OV **Development of a model of a quasi-molecular state for low-temperature synthesis of nuclei and interpretation of the formation of chemical elements in the process of vacuum melting of a metal by an electron beam** [12193-35]
- 12193 OW **Dynamics of delocalized vibrational modes in bcc W: impact of interatomic potential** [12193-25]
- 12193 OX **Application of Morse potential function to 2D metallic glass simulation** [12193-24]
- 12193 OY **Using method integration transfer learning for neural network solution of an inverse problem in optical spectroscopy** [12193-23]
- 12193 OZ **Proline tautomerism in the solid phase** [12193-10]
