2022 IEEE International Conference on Software Testing, Verification and Validation Workshops (ICSTW)

ICSTW 2022

Table of Contents

Preface to ICSTW 2022 ..... **xi**
Message from the ITEQS 2022 Workshop Chairs ..... **xii**
Message from the AIST 2022 Chair ..... **xiii**
General Message from the IWCT 2022 Workshop Chairs ..... **xiv**
General Message from the INTUITESTBEDS 2022 Workshop Chairs ..... **xv**
Welcome Message from the Chairs of the NEXTA-2022 Workshop ..... **xvi**
Message from the InSTA 2022 chairs ..... **xvii**
Message from the Mutation 2022 Workshop Chairs ..... **xviii**

ITEQS: The 6th International Workshop on Testing Extra-Functional Properties and Quality Characteristics of Software Systems

Using Search-Based Software Testing to Guide the Strive for Robust Machine Learning Components: Lessons Learned Across Systems and Simulators in the Mobility Domain 1
Markus Borg (RISE Research Institutes of Sweden)

RQCODE – Towards Object-Oriented Requirements in the Software Security Domain 2
Ildar Nigmatullin (Innopolis University and University of Toulouse, France), Andrey Sadovykh (Innopolis University and Softeam, France), Nan Messe (University of Toulouse – IRIT – CNRS, France), Sophie Ebersold (University of Toulouse – IRIT – CNRS, France), and Jean-Michel Bruel (University of Toulouse – IRIT – CNRS, France)

Towards Improving Explainability, Resilience and Performance of Cybersecurity Analysis of 5G/IoT Networks 7
Manh-Dung Nguyen (Montimage), Vinh Hoa La (Montimage), Ana R. Cavalli (Montimage), and Edgardo Montes de Oca (Montimage)

Prioritized Variable-Length Test Cases Generation for Finite State Machines 11
Vaclav Rechtberger (Czech Technical University in Prague, Czechia), Miroslav Bures (Czech Technical University in Prague, Czechia), Bestoun S. Ahmed (Karstad University, Sweden), Youcef Belkhier (Czech Technical University in Prague, Czechia), Jiri Nema (University of Defence, Czechia), and Hynek Schvach (University of Defence, Czechia)

Falsification of Multiple Requirements for Cyber-Physical Systems Using Online Generative Adversarial Networks and Multi-Armed Bandits 21
Jarkko Peltomäki (Åbo Akademi University, Finland) and Ivan Porres (Åbo Akademi University, Finland)

Security Testing as part of Software Quality Assurance: Principles and Challenges 29
Wissam Mallouli (Montimage EURL, France)

Early Detection of Network Attacks Using Deep Learning 30
Tanwir Ahmad (Åbo Akademi University, Finland), Dragos Truscan (Åbo Akademi University, Finland), Jüri Vain (Åbo Akademi University, Finland; Tallinn University of Technology, Estonia), and Ivan Porres (Åbo Akademi University, Finland)

Monitoring Approaches for Security and Safety Analysis: Application to a Load Position System 40
Zujany Salazar (Montimage EURL, France), Ana Rosa Cavalli (Montimage EURL, France), Wissam Mallouli (Montimage EURL, France), Filip Sebek (Marine & Ports, ABB AB, Sweden), Fatiha Zaidi (Université Paris-Saclay, France), and Monika Ewa Rakoczy (Montimage EURL, France)

IWCT: 11th International Workshop on Combinatorial Testing

Applying Combinatorial Testing to High-Speed Railway Automatic Train Protection System 49
Rui Huang (Southwest Jiaotong University, China), Chang Rao (Chongqing Jiaotong University, China; Chongqing Rail Transit (Group) CO. LTD., China), Yu Lei (The University of Texas at Arlington, USA), Jin Guo (Southwest Jiaotong University, China), and Yadong Zhang (Southwest Jiaotong University, China)

Using Unified Combinatorial Interaction Testing for MC/DC Coverage 57
Giray Coskun (Sabanci University, Turkey), Cankut Coskun (Sabanci University, Turkey), Hanefi Mercan (Sabanci University, Turkey), and Cemal Yilmaz (Sabanci University, Turkey)

CA^2: Practical Archival and Compression of Covering Arrays 63
Manuel Leithner (SBA Research, Austria) and Dimitris E. Simos (SBA Research, Austria)

Experience of Combinatorial Testing Toward Fault Detection, Isolation and Recovery Functionality 68
Naoko Okubo (Japan Aerospace Exploration Agency, Japan), Shoma Takatsuki (Japan Aerospace Exploration Agency, Japan), and Yasushi Ueda (Japan Aerospace Exploration Agency, Japan)

A C++ Implementation of the IPO Algorithm 72
Kenya Takemura (Osaka University, Japan)

Parallel Test Generation for Combinatorial Models Based on Multivalued Decision Diagrams 74
Andrea Bombarda (University of Bergamo, Italy) and Angelo Gargantini (University of Bergamo, Italy)

A Constrained Covering Array Generator using Adaptive Penalty based Parallel Tabu Search 82
Yan Wang (Nanjing University, China; Nanjing Xiaozhuang University, China), Huayao Wu (Nanjing University, China), Xintao Niu (Nanjing University, China), Changhai Nie (Nanjing University, China), and Jiaxi Xu (Nanjing Xiaozhuang University, China)

Developing Multithreaded Techniques and Improved Constraint Handling for the Tool CAgen 87
Michael Wagner (SBA Research, Austria), Manuel Leithner (SBA Research, Austria), Dimitris E. Simos (SBA Research, Austria), Rick Kuhn (NIST, Information Technology Laboratory, USA), and Raghu Kacker (NIST, Information Technology Laboratory, USA)

A Combinatorial Approach to Fairness Testing of Machine Learning Models 94
Ankita Ramjibhai Patel (The University of Texas at Arlington, USA), Jaganmohan Chandrasekaran (Commonwealth Cyber Initiative (CCI), Virginia Tech, USA), Yu Lei (The University of Texas at Arlington, USA), Raghu N. Kacker (Information Technology Laboratory, National Institute of Standards and Technology, USA), and D. Richard Kuhn (Information Technology Laboratory, National Institute of Standards and Technology, USA)

Systematic Training and Testing for Machine Learning Using Combinatorial Interaction Testing 102
Tyler Cody (Virginia Tech, USA), Erin Lanus (The MITRE Corporation, USA), Daniel D. Doyle (Virginia Tech, USA), and Laura Freeman (Virginia Tech, USA)

Combination Frequency Differencing for Identifying Design Weaknesses in Physical Unclonable Functions 110
D. Richard Kuhn (National Institute of Standards & Technology, USA), M S Raunak (National Institute of Standards & Technology, USA), Charles Prado (National Institute of Metrology, Quality and Technology, Brazil), Vinay C. Patil (University of Massachusetts, USA), and Raghu N. Kacker (National Institute of Standards & Technology, USA)

AIST: Artificial Intelligence in Software Testing

A Preliminary Study on Generating Well-Formed Q# Quantum Programs for Fuzz Testing 118
Miguel Trinca (University of Lisbon), João F. Ferreira (University of Lisbon), and Rui Abreu (University of Porto)

TCP-Net: Test Case Prioritization using End-to-End Deep Neural Networks 122
Mohamed Abdelkarim (Siemens EDA, Egypt) and Reem ElAdawi (Siemens EDA, Egypt)

Testing Deep Learning Models: A First Comparative Study of Multiple Testing Techniques 130
Mohit Kumar Ahuja (Simula Research Laboratory, Norway), Arnaud Gotlieb (Simula Research Laboratory, Norway), and Helge Spieker (Simula Research Laboratory, Norway)

Clustering of Usage Traces for Regression Test Cases Selection 138
Dorcis Vahana (Univ. Bourgogne Franche-Comté, France), Bouquet Fabrice (Univ. Bourgogne Franche-Comté, France), and Dadeau Frédéric (Univ. Bourgogne Franche-Comté, France)

Towards Domain-Specific Automated Testing via Behavioural Cloning 146
Cristina Gatt (University of Malta, Malta), Mark Bugeja (University of Malta, Malta), and Mark Micallef (University of Malta, Malta)

Mutation 2022

Augmenting Equivalent Mutant Dataset Using Symbolic Execution 150
Seungjoon Chung (KAIST, South Korea) and Shin Yoo (KAIST, South Korea)

μBERT: Mutation Testing using Pre-Trained Language Models 160
Renzo Degiovanni (University of Luxembourg, Luxembourg) and Mike Papadakis (University of Luxembourg, Luxembourg)

Random Mutant Selection and Equivalent Mutants Revisited 170
Rowland Pitts (George Mason University, USA)

An Automated Framework for Cost Reduction of Mutation Testing Based on Program Similarity .. 179
Giovanni F. Guarnieri (Federal University of Sao Carlos, Brazil), Alessandro V. Pizzoleto (Federal University of Sao Carlos, Brazil), and Fabiano C. Ferrari (Federal University of Sao Carlos, Brazil)

Re-visiting the Coupling between Mutants and Real Faults with Defects4J 2.0 189
Thomas Laurent (SFI Lero & School of Computer Science, University College Dublin, Ireland), Stephen Gaffney (SFI Lero & School of Computer Science, University College Dublin, Ireland), and Anthony Ventresque (SFI Lero & School of Computer Science, University College Dublin, Ireland)

INTUITESTBEDS: International Workshop on User Interface Test Automation and Testing Techniques for Event Based Software

An Industrial Case-Study on GUI Testing With RPA 199
Mats Holmberg (Mid Sweden University, Sweden) and Felix Dobslaw (Mid Sweden University, Sweden)

Overview of Test Coverage Criteria for Test Case Generation from Finite State Machines Modelled as Directed Graphs 207
Vaclav Rechtberger (Czech Technical University, Czechia), Miroslav Bures (Czech Technical University in Prague, Czechia), and Bestoun S. Ahmed (Karlstad University, Sweden)

Gamified Exploratory GUI Testing of Web Applications: A Preliminary Evaluation 215
Tommaso Fulcini (Politecnico di Torino, Italy) and Luca Ardito (Politecnico di Torino, Italy)

Win GUI Crawler: A Tool Prototype for Desktop GUI Image and Metadata Collection 223
Marko Savic (University of Oulu, Finland), Mika Mäntylä (University of Oulu, Finland), and Maëlick Claes (University of Oulu, Finland)

InSTA: 9th International Workshop on Software Test Architecture

Software Bug Prediction Model Based on Mathematical Graph Features Metrics 229
Tomohiro Takeda (University of Tsukuba, Japan), Satoshi Masuda (Tokyo City University, Japan), and Kazuhiko Tsuda (University of Tsukuba, Japan)

Obtaining Fuzzing Results with Different Timeouts 236
Wenxi Zhang (Waseda University, Japan)

Patterns to Improve Fidelity for Model-Based Testing 240
Yasuaki Hiruta (VeriServe Corporation, Japan), Hidetoshi Suhara (VeriServe Corporation, Japan), and Yasuharu Nishi (The University of Electro-Communications, Japan)

Software Test Architecture Definition by Analogy with Software Architecture 244
Satoshi Masuda (Tokyo City University, Japan), Jon Hagar (Grand Software Testing, LLC, USA), Yasuharu Nishi (University of Electro-Communications, Japan), and Kazuhiro Suzuki (Hitachi, Ltd., Japan)

Software Architecture Elements Applied to Software Test: View, Viewpoints and Containers 248
Jon D Hagar (Grand Software Testing, USA)

NEXTA: 5th IEEE Workshop on NEXt level of Test Automation

Cross-Device Difference Detector for Mobile Application GUI Compatibility Testing 253
Yanwei Ren (Baidu China Co. Ltd, China), Youda Gu (Baidu China Co. Ltd, China), Zongqing Ma (Beijing Information Science & Technology University, China), Hualiang Zhu (Baidu China Co. Ltd, China), and Fei Yin (Baidu China Co. Ltd, China)

Systematic Generation of XSS and SQLi Vulnerabilities in PHP as Test Cases for Static Code Analysis 261
Felix Schuckert (HTWG Konstanz, Germany; Norwegian University of Science and Technology, Norway), Hanno Langweg (HTWG Konstanz, Germany; Norwegian University of Science and Technology, Norway), and Basel Katt (Norwegian University of Science and Technology, Norway)

AcoFuzz: Adaptive Energy Allocation for Greybox Fuzzing 269
You Wu (Ocean University of China, China), Qi Zhan (Ocean University of China, China), Haipeng Qu (Ocean University of China, China), and Xiaoqi Zhao (Ocean University of China, China)

Choosing a Test Automation Framework for Programmable Logic Controllers in CODESYS Development Environment 277
Mikael Ebrahimi Salari (Mälardalen University, Sweden), Eduard Paul Enoiu (Mälardalen University, Sweden), Wasif Afzal (Mälardalen University, Sweden), and Cristina Seceleanu (Mälardalen University, Sweden)

Pinpointing Anomaly Events in Logs from Stability Testing - N-Grams vs. Deep-Learning 285
Mika Mäntylä (University of Oulu, Finland), Martín Varela (Profilence, Finland), and Shayan Hashemi (University of Oulu, Finland)

Identifying Randomness Related Flaky Tests through Divergence and Execution Tracing 293
Azeem Ahmad (Linköping University, Sweden), Erik Norrestam Held (Linköping University, Sweden), Ola Leifler (Linköping University, Sweden), and Kristian Sandahl (Linköping University, Sweden)

Removing Uninteresting Bytes in Software Fuzzing 301
Aftab Hussain (University of Houston, USA) and Mohammad Amin Alipour (University of Houston, USA)

New Ranking Formulas to Improve Spectrum Based Fault Localization Via Systematic Search 306
Qusay Idrees Sarhan (University of Szeged, Hungary; University of Duhok, Iraq), Tamás Gergely (University of Szeged, Hungary), and Árpád Beszédes (University of Szeged, Hungary)

Author Index **311**
