Volume 12118

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Ocean Sensing and Monitoring XIV*, edited by Weilin "Will" Hou, Linda J. Mullen, Proc. of SPIE 12118, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510651128

ISBN: 9781510651135 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SEA SURFACE TEMPERATURE FROM SPACE

- 12118 02 **Evaluation of the NOAA AVHRR GAC RAN2 SST dataset** [12118-1]
- 12118 03 **Mitigation of the AVHRR instrumental issues in historical SST retrievals during NOAA AVHRR GAC SST RAN2** [12118-2]
- 12118 04 **Analysis of ABI bands and regressors in the ACSPO GEO NLSST algorithm (Invited Paper)** [12118-3]
- 12118 05 **Towards global daily gridded super-collated SST product from low earth orbiting satellites (L3S-LEO-Daily) at NOAA** [12118-4]

UNDERWATER COMMUNICATION

- 12118 06 **Introducing network security module in simulators to support secure robot coordination protocols** [12118-7]
- 12118 07 **An acoustic model for underwater communications based on Markov chain approach** [12118-6]

OPTICAL DETECTION AND RANGING

- 12118 08 **Range-Doppler technique applied to underwater pulsed laser system** [12118-9]
- 12118 09 **Parallel line lidar with frequency domain filtering** [12118-10]
- 12118 0A **Tracking of light beacons in highly turbid water and application to underwater docking** [12118-8]

UNDERWATER TURBULANCE AND IMPACTS

- 12118 0C **Optical heterodyne detection of orthogonal orbital angular momentum modes for sensing through turbid media** [12118-12]

OCEAN SURFACE IMAGING

12118 0E **Physics-based wake modeling for marine vehicles activity recognition based on simulated synthetic aperture radar** [12118-25]

UNDERWATER IMAGING AND COMMUNICATIONS

12118 0F **Experiments using a 525 nm time-of-flight camera for object imaging and ranging in clear and turbid water** [12118-14]

12118 0G **Improving underwater object classification: BC-ViT** [12118-15]

12118 0H **Frugal hyperspectral imaging via low rank tensor reconstruction** [12118-17]

12118 0I **Evaluating Texas instruments Phase Light Modulator (PLM)** [12118-18]

12118 0J **Atmospheric mitigation for imaging applications** [12118-19]

POSTER SESSION

12118 0K **Seawater intake monitoring using low cost sensor network** [12118-22]

12118 0L **Online and low-cost monitoring system to measure water conductivity in the Arabian Gulf** [12118-23]
