

PROCEEDINGS OF SPIE

# ***Nonlinear Optics and its Applications 2022***

**Neil G. R. Broderick**  
**John M. Dudley**  
**Anna C. Peacock**  
*Editors*

**3—7 April 2022**  
**Strasbourg, France**

**9—20 May 2022**  
**ONLINE**

*Sponsored by*  
SPIE

*Cosponsored by*  
City of Strasbourg (France)  
IdEx University of Strasbourg (France)  
CNRS (France)  
iCube (France)  
Université de Strasbourg (France)

*Cooperating Organisations*  
Photonics 21 (Germany)  
EOS—European Optical Society (Germany)  
Photonics Public Private Partnership (Belgium)  
Photonics France (France)

*Published by*  
SPIE

**Volume 12143**

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:  
Author(s), "Title of Paper," in *Nonlinear Optics and its Applications 2022*, edited by Neil G. R. Broderick, John M. Dudley, Anna C. Peacock, Proc. of SPIE 12143, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## NONLINEAR SOURCES AND COMBS

12143 02 **Exploiting the geometry of optical fibers for igniting helical-shape plasma filaments** [12143-13]

---

## MULTIMODE DYNAMICS I

12143 03 **Towards a new understanding of optical poling efficiency in multimode fibers** [12143-21]

---

## NONLINEAR MATERIAL SYSTEMS I

12143 04 **Turbulence control by time-symmetry breaking** [12143-28]

12143 05 **All-optical Fredkin gate using silicon nitride microring resonator** [12143-29]

---

## NONLINEAR MATERIAL SYSTEMS II

12143 06 **Polyvinylcarbazole: a new polymer host for passive optical limiting** [12143-31]

12143 07 **Experimental and theoretical study of second and third harmonic generation in amorphous silicon** [12143-32]

12143 08 **Electric-field poling of silicon nitride waveguides for the linear phase modulation** [12143-33]

---

## NONLINEAR SOURCES AND DYNAMICS

12143 09 **Computation of Kerr lensing effect in laser amplifiers** [12143-38]

---

## MULTIMODE DYNAMICS II

12143 0A **Light propagation in disordered aperiodic Mathieu lattices generated with two different randomization methods** [12143-41]

- 12143 0B     **Photonic crystals for suppression of filamentation** [12143-42]
- 12143 0C     **Dynamics of localized spectral modes in random fiber Raman lasers with point-like mirror assisted feedback** [12143-43]

---

**NOVEL MATERIALS AND SOURCES**

---

- 12143 0D     **THz generation in GaSe crystal pumped below and around the bandgap** [12143-45]

---

**POSTER SESSION**

---

- 12143 0E     **Propagation of broadband light pulses through LIPSS nanoripples fabricated on diamond**  
[12143-52]
- 12143 0F     **Investigation of femtosecond supercontinuum generation in different length photonic crystal fiber** [12143-54]
- 12143 0G     **One- and two-photon absorption circular dichroism of optically active chiral systems**  
[12143-56]
- 12143 0H     **Nonlinear optical properties of core-shell silver nanoparticles with sodium citrate and ligand claddings** [12143-57]
- 12143 0I     **Modeling of Brillouin-like amplification in rare-earth-doped optical fibers** [12143-58]
- 12143 0J     **Nonlinear optical methacrylate-based filters for optical limiting** [12143-61]
- 12143 0K     **Application of two-photon absorption technique for single-event effects simulation in silicon microelectronic devices** [12143-62]
- 12143 0L     **Impact of phase modulation on the performance of photonic delay-based reservoir computing with semiconductor lasers** [12143-71]
- 12143 0M     **Effective soliton order and universal scaling laws for pulse self-compression over large dispersion variations** [12143-75]
