Volume 12251

Proceedings of SPIE 0277-786X, V. 12251

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Computer Applications for Management and Sustainable Development of Production and Industry (CMSD2021)*, edited by Arthur Gibadullin, Shahriyor Sadullozoda, Proc. of SPIE 12251, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

INFORMATION TECHNOLOGY

- 12251 02 **Algorithmic support of the information and control system with the biofuel distribution process** [12251-15]
- 12251 03 **A research of the flow-pressure relationships of the cascade family sprinkler machines: mathematical modeling** [12251-31]
- 12251 04 **Application of simulation modeling method for elimination of oil spill on railway transport** [12251-5]
- 12251 05 **Attacks on facial biometrics systems: an overview** [12251-8]
- 12251 06 **Automated semantic design system** [12251-43]
- 12251 07 **Determination of effective technical device ensuring the security of transmitted information over a communication channels in industrial control systems at industrial enterprises in the Russian Federation** [12251-20]
- 12251 08 **Development information system of cryptographic protection for enterprise local network** [12251-38]
- 12251 09 **Development of a computer application for intellectualizing monitoring of employee time management** [12251-28]
- 12251 0A **Digital images processing: filtering by pulse characteristic** [12251-40]
- 12251 0B **Image processing and pattern recognition issues** [12251-18]
- 12251 0C **Mathematical and software support for experimental work and algorithms for vibroacoustic diagnostics** [12251-12]
- 12251 0D **Modeling and optimization Internet of things systems in companies** [12251-25]
- 12251 0E **Modeling and optimization of resources in information systems** [12251-24]
- 12251 0F **Multiple regression analysis as an approach to integrated assessment expenses for the repair of the machine and tractor fleet of farms of the Volga federal district** [12251-34]
- 12251 0G **New active reflector antenna made of computer-controlled metamaterial** [12251-3]

- 12251 OH **Numerical study of a circular jet based on a modern turbulence model** [12251-44]
- 12251 OI **Object recognition system for sorting municipal solid waste** [12251-16]
- 12251 OJ **Simulation of an electric slip drive with correction of static and dynamic errors** [12251-7]
- 12251 OK **Solution of the inverse kinematic problem for the KUKA KR AGILUS robotic arm** [12251-22]

INFORMATION TECHNOLOGY IN MANAGEMENT

- 12251 OL **Agent-based human interaction with the digital educational environment, based on a set of digital intelligent agents** [12251-36]
- 12251 OM **Artificial intelligence based on ontology to support decision-making in personnel management** [12251-29]
- 12251 ON **Aspects of the use of digital technologies in the training of specialists for light industry enterprises** [12251-4]
- 12251 OO **Automation of calculation of the workload norms for engineers in the machine-building industry** [12251-35]
- 12251 OP **Computer modeling to support management and organizational decisions in the use of a forest harvester** [12251-21]
- 12251 OQ **Conditions for constructing a schedule of maintenance when using a risk-based strategy of technical operation** [12251-26]
- 12251 OR **Content management of test bases of learning management systems based on dimensionless criteria** [12251-23]
- 12251 OS **Data mining in building a stable HR management model** [12251-6]
- 12251 OT **Improving the efficiency of machine operators' training by using the MTA telemetric operational mode monitoring system** [12251-17]
- 12251 OU **Methodology for optimizing supply chains** [12251-11]
- 12251 OV **Modeling of customer value as the basis of a system for preparing marketing decisions in modern management** [12251-41]
- 12251 OW **Product potential as a method of mathematical modeling of a life cycle management system** [12251-27]
- 12251 OX **The use of software to support management decisions in public procurement** [12251-13]
- 12251 OY **The use of virtual and augmented reality technologies in industrial training** [12251-30]

- 12251 0Z **Use of the geographic information system Kuzbass to support management decisions of public authorities** [12251-14]
- 12251 10 **Using the AR-technologies when studying the discipline of engineering graphics** [12251-9]
