2022 IEEE 28th Real-Time and Embedded Technology and Applications Symposium (RTAS)

RTAS 2022

Table of Contents

Message from the RTAS 2022 Chairs ..... **x**
Organizing Committee ..... **xii**
Program Committee ..... **xiii**
Reviewers ..... **xv**

Session 1: Cyber-Physical Systems

Guaranteeing Safety Despite Physical Errors in Cyber-Physical Systems 1
Jongwoo Han (Seoul National University, South Korea), Seonghyeon Park (Seoul National University, South Korea), Haejoo Jeon (Seoul National University, South Korea), and Chang-Gun Lee (Seoul National University, South Korea)

Deadline-Miss-Adaptive Controller Implementation for Real-Time Control Systems 13
Nils Vreman (Lund University, Sweden), Claudio Mandrioli (Lund University, Sweden), and Anton Cervin (Lund University, Sweden)

Session 2: Fault-Tolerance

A Mixed-Criticality Approach to Fault Tolerance: Integrating Schedulability and Failure Requirements 27
Federico Reghenzani (Politecnico di Milano, Italy), Zishan Guo (University of Central Florida, United States), Luca Santinelli (Airbus Defense & Space, Germany), and William Fornaciari (Politecnico di Milano, Italy)

Compiler-Directed High-Performance Intermittent Computation with Power Failure Immunity 40
Jongouk Choi (Purdue University), Larry Kittinger (Block.one), Qingrui Liu (Annapurna Labs), and Changhee Jung (Purdue University)

Session 3: Systems and Applications I

Jumpstart: Fast Critical Service Resumption for a Partitioning Hypervisor in Embedded Systems 55
Ahmad Golchin (Boston University, USA) and Richard West (Boston University, USA)

FlyOS: Integrated Modular Avionics for Autonomous Multicopters 68
Anam Farrukh (Boston University, USA) and Richard West (Boston University, USA)

Session 4: RTOS

SBIs: Application Access to Safe, Baremetal Interrupt Latencies 82
Runyu Pan (Shandong University, China) and Gabriel Parmer (The George Washington University)

The Thundering Herd: Amplifying Kernel Interference to Attack Response Times 95
Samuel Mergendahl (MIT Lincoln Laboratory), Samuel Jero (MIT Lincoln Laboratory), Bryan Ward (MIT Lincoln Laboratory), Juliana Furgala (MIT Lincoln Laboratory), Gabriel Parmer (The George Washington University), and Richard Skowyra (MIT Lincoln Laboratory)

Session 5: Timing Analysis I

Response Time Analysis for Hybrid Task Sets Under Fixed Priority Scheduling 108
Quan Zhou (Huazhong University of Science and Technology, China), Jihua Huang (Huazhong University of Science and Technology, China), Jianjun Li (Huazhong University of Science and Technology, China), and Zhi Li (Huazhong University of Science and Technology, China)

Partial-Order Reduction for Schedule-Abstraction-based Response-Time Analyses of Non-Preemptive Tasks 121
Sayra Ranjha (Eindhoven University of Technology, Delft University of Technology), Geoffrey Nelissen (Eindhoven University of Technology), and Mitra Nasri (Eindhoven University of Technology)

Session 6: Systems and Applications II

Memory Utilization-Based Dynamic Bandwidth Regulation for Temporal Isolation in Multi-Cores 133
Ahsan Saeed (Robert Bosch GmbH), Dakshina Dasari (Robet Bosch GmbH), Dirk Ziegenbein (Robet Bosch GmbH), Varun Rajasekaran (Bosch Rexroth AG), Falk Rehm (Robert Bosch GmbH), Michael Pressler (Robert Bosch GmbH), Arne Hamann (Robert Bosch GmbH), Daniel Mueller-Gritschneder (Technical University of Munich), Andreas Gerstlauer (The University of Texas at Austin), and Ulf Schlichtmann (Technical University of Munich)

FA2: Fast, Accurate Autoscaling for Serving Deep Learning Inference with SLA Guarantees 146
Kamran Razavi (Technische Universität Darmstadt, Germany), Manisha Luthra (Technische Universität Darmstadt, Germany), Boris Koldehofe (University of Groningen, The Netherlands; Technische Universität Darmstadt, Germany), Max Mühlhäuser (Technische Universität Darmstadt, Germany), and Lin Wang (VU Amsterdam, The Netherlands; Technische Universität Darmstadt, Germany)

Session 7: Real-Time AI

DNN-SAM: Split-and-Merge DNN Execution for Real-Time Object Detection 160
Woosung Kang (DGIST), Siwoo Chung (DGIST), Jeremy Yuhyun Kim (Hanyang University), Youngmoon Lee (Hanyang University), Kilho Lee (Soongsil University), Jinkyu Lee (Sungkyunkwan University), Kang G. Shin (The University of Michigan, Ann Arbor), and Hoon Sung Chwa (DGIST)

Self-Cueing Real-Time Attention Scheduling in Criticality-Aware Visual Machine Perception 173
Shengzhong Liu (University of Illinois at Urbana-Champaign, USA), Xinzhe Fu (Massachusetts Institute of Technology, USA), Maggie Wigness (US Army Research Labs, USA), Philip David (US Army Research Labs, USA), Shuochao Yao (George Mason University, USA), Lui Sha (University of Illinois at Urbana-Champaign, USA), and Tarek Abdelzaher (University of Illinois at Urbana-Champaign, USA)

Session 8: Mixed-Criticality

Analysis-Runtime Co-design for Adaptive Mixed Criticality Scheduling 187
Iain Bate (University of York, UK), Alan Burns (University of York, UK), and Robert I. Davis (University of York, UK)

MSRP-FT: Reliable Resource Sharing on Multiprocessor Mixed-Criticality Systems 201
Nan Chen (University of York), Shuai Zhao (University of York), Ian Gray (University of York), Alan Burns (University of York), Siyuan Ji (University of York), and Wanli Chang (Hunan University/Huawei Technologies)

Session 9: Timing Analysis II

End-to-End Analysis of Event Chains under the QNX Adaptive Partitioning Scheduler 214
Dakshina Dasari (Robert Bosch GmbH, Germany), Matthias Becker (KTH Royal Institute of Technology, Sweden), Daniel Casini (TeCIP Institute and Department of Excellence in Robotics & AI, Scuola Superiore Sant'Anna, Pisa, Italy), and Tobias Blass (Robert Bosch GmbH and Saarland University, Germany)

WeaklyHard.jl: Scalable Analysis of Weakly-Hard Constraints 228
Nils Vreman (Lund University, Sweden), Richard Pates (Lund University, Sweden), and Martina Maggio (Lund University, Sweden; Saarland University, Germany)

Session 10: Security and Networking

PAC-PL: Enabling Control-Flow Integrity with Pointer Authentication in FPGA SoC Platforms 241
Gabriele Serra (Scuola Superiore Sant'Anna, Italy), Pietro Fara (Scuola Superiore Sant'Anna, Italy), Giorgiomaria Cicero (Scuola Superiore Sant'Anna, Italy), Francesco Restuccia (University of California San Diego, USA), and Alessandro Biondi (Scuola Superiore Sant'Anna, Italy)

RT-WiFi on Software-Defined Radio: Design and Implementation 254
Zelin Yun (University of Connecticut, USA), Peng Wu (University of Connecticut, USA), Shengli Zhou (University of Connecticut, USA), Aloysius K. Mok (University of Texas at Austin, USA), Mark Nixon (Emerson Automation Solutions, USA), and Song Han (University of Connecticut, USA)

Session 11: Scheduling and Verification

Minimizing DAG Utilization by Exploiting SMT 267
Sims Hill Osborne (University of North Carolina at Chapel Hill, USA), Joshua Bakita (University of North Carolina at Chapel Hill, USA), Jingyuan Chen (University of North Carolina at Chapel Hill, USA), Tyler Yandrofski (University of North Carolina at Chapel Hill, USA), and James Anderson (University of North Carolina at Chapel Hill, USA)

A Formal Correctness Proof for an EDF Scheduler Implementation 281
Florian Vanhems (Université de Lille, France), Vlad Rusu (Inria Lille-Nord Europe, France), David Nowak (Université de Lille, France), and Gilles Grimaud (Université de Lille, France)

Brief Presentations

Brief Industry Paper: The Necessity of Adaptive Data Fusion in Infrastructure-Augmented Autonomous Driving System 293
Shaoshan Liu (PerceptIn), Jianda Wang (The University of Texas at Dallas), Zhendong Wang (The University of Texas at Dallas), Bo Yu (PerceptIn), Wei Hu (PerceptIn), Yahui Liu (PerceptIn), Jie Tang (South China University of Technology), Shuaiwen Leon Song (University of Sydney), Cong Liu (The University of Texas at Dallas), and Yang Hu (The University of Texas at Dallas)

Brief Industry Paper: Enabling Level-4 Autonomous Driving on a Single $1k Off-the-Shelf Card 297
Hsin-Hsuan Sung (North Carolina State University, Raleigh, USA), Yuanchao Xu (North Carolina State University, Raleigh, USA), Jiexiong Guan (College of William and Mary, Williamsburg, USA), Wei Niu (College of William and Mary, Williamsburg, USA), Bin Ren (College of William and Mary, Williamsburg, USA), Yanzhi Wang (Northeastern University, USA), Shaoshan Liu (PerceptIn, USA), and Xipeng Shen (North Carolina State University, Raleigh, USA)

Work in Progress: Exploring Schedule-Based Side-Channels in TrustZone-Enabled Real-Time Systems 301
Mohamed Anis Aguida (Wichita State University, USA) and Monowar Hasan (Wichita State University, USA)

Work in Progress: Automatic Construction of Pipeline Datapaths from High-Level HDL Code 305
Samira Ait Bensaid (Université Paris-Saclay, CEA List, France), Mihail Asavoae (Université Paris-Saclay, CEA List, France), Farhat Thabet (Université Paris-Saclay, CEA List, France), and Mathieu Jan (Université Paris-Saclay, CEA List, France)

Work in Progress: KDBench — Towards Open Source Benchmarks for Measurement-Based Multicore WCET Estimators 309
Marwan Wehaiba El Khazen (StatInf and Inria), Kevin Zagalo (Inria), Hadrien Clarke (Inria), Mehdi Mezouak (Inria), Yasmina Abdeddaïm (UGE-ESIEE and Inria), Avner Bar-Hen (CNAM and Inria), Slim Ben Amor (StatInf), Rihab Bennour (Inria and StatInf), Adriana Gogonel (StatInf), Kossivi Kougblenou (StatInf), Yves Sorel (Inria), and Liliana Cucu-Grosjean (Inria)

Work In Progress: A Solution Based on Dynamic User Equilibrium Toward the Selfless Traffic Routing Model 313
Thomas Carroll (Univserity of Houston, USA), Albert Cheng (University of Houston, USA), and Guangli Dai (University Of Houston, USA)

Work in Progress: Automatic Response-Time Analysis for Arbitrary Real-Time Linux Workloads.. 317
Marco Perronet (Max Planck Institute for Software Systems, Germany), Marco Maida (Max Planck Institute for Software Systems, Germany), Cédric Courtaud (Max Planck Institute for Software Systems, Germany), and Björn B. Brandenburg (Max Planck Institute for Software Systems, Germany)

Demo Abstract: Open RT-WiFi Platform on Software-Defined Radio 321
Zelin Yun (University of Connecticut, USA), Peng Wu (University of Connecticut, USA), Shengli Zhou (University of Connecticut, USA), Aloysius K. Mok (University of Texas at Austin, USA), Mark Nixon (Emerson Automation Solutions, USA), and Song Han (University of Connecticut, USA)
