The International Society
for Optical Engineering

SPIE is an international technical society dedicated to advancing engineering and scientific applications of optical, photonic, imaging, electronic, and optoelectronic technologies.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

e-First Publication for Proceedings: As of July 2005, papers in the Proceedings of SPIE are first published electronically in the SPIE Digital Library (www.spiedl.org), and subsequently in print and CD-ROM.

Pagination system: The new citation format uses six-digit article identifier numbers (CIDs). Utilization of article CIDs allows proceedings articles to be fully citable as soon as they are published online, using the same identifier for both online and print versions.

The structure of the six-digit article CID number for Proceedings of SPIE is:

- The first four digits indicate the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. The CID number appears on each page, followed by the page number within the actual article.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Photon Echo and Coherent Spectroscopy 2005*, edited by Vitaly V. Samartsev, Proceedings of SPIE Vol. 6181 (SPIE, Bellingham, WA, 2006) Article CID Number.
