2022 22nd International Symposium on Cluster, Cloud and Internet Computing (CCGrid)

CCGrid 2022

Table of Contents

Message from the General Chairs ..... **xxii**
Message from the Program Chairs ..... **xxiii**
CCGrid 2022 Chairs ..... **xxv**
CCGrid 2022 Program Committee Members ..... **xxvii**
CCGrid 2022 Steering Committee Members ..... **xxxi**

Main Conference

Session 1: Programming models and runtime systems

Accelerating Scientific Workflows on HPC Platforms with In Situ Processing 1
Tu Mai Anh Do (Information Sciences Institute, University of Southern California, USA), Loïc Pottier (Information Sciences Institute, University of Southern California, USA), Orcun Yildiz (Argonne National Laboratory, USA), Karan Vahi (Information Sciences Institute, University of Southern California, USA), Patrycja Krawczuk (Information Sciences Institute, University of Southern California, USA), Tom Peterka (Argonne National Laboratory, USA), and Ewa Deelman (Information Sciences Institute, University of Southern California, USA)

Deverlay: Container Snapshots for Virtual Machines 11
Orestis Lagkas Nikolos (National Technical University of Athens, Greece), Georgios Goumas (National Technical University of Athens, Greece), and Nectarios Koziris (National Technical University of Athens, Greece)

Session 2: Storage and I/O systems

Accelerating Deep Learning Training Through Transparent Storage Tiering 21
Marco Dantas (INESC TEC & University of Minho), Diogo Leitão (INESC TEC & University of Minho), Peter Cui (The University of Texas at Austin), Ricardo Macedo (INESC TEC & University of Minho), Xinlian Liu (Hood College), Weijia Xu (The University of Texas at Austin), and João Paulo (INESC TEC & University of Minho)

VeloxDFS: Streaming Access to Distributed Datasets to Reduce Disk Seeks 31
Sunghwan Ahn (SK Hynix), Hyeongjun Park (Sungkyunkwan University), V. A. Bolea Sanchez (Kitware), Deukyeon Hwang (University of Texas, Austin), Wonbae Kim (Ulsan National Institute of Science and Technology), Alan Sussman (University of Maryland, College Park), and Beomseok Nam (Sungkyunkwan University)

Assembling Portable In-Situ Workflow from Heterogeneous Components using Data Reorganization 41
Bo Zhang (University of Utah, Utah), Pradeep Subedi (Samsung Semiconductor Inc., California), Philip E. Davis (University of Utah, Utah), Francesco Rizzi (NexGen Analytics, Wyoming), Keita Teranishi (Sandia National Laboratories, California), and Manish Parashar (University of Utah, Utah)

SCANNS: Towards Scalable and Concurrent Data Indexing and Searching in High-End Computing System 51
Alexandru Iulian Orhean (Illinois Institute of Technology, USA), Anna Giannakou (Lawrence Berkeley National Lab, USA), Lavanya Ramakrishnan (Lawrence Berkeley National Lab, USA), Kyle Chard (University of Chicago, USA), and Ioan Raicu (Illinois Institute of Technology, USA)

HDF5 Cache VOL: Efficient and Scalable Parallel I/O Through Caching Data on Node-Local Storage 61
Huihuo Zheng (Argonne National Laboratory), Venkatram Vishwanath (Argonne National Laboratory), Quincey Koziol (Amazon.com, Inc), Houjun Tang (Lawrence Berkeley Laboratory), John Ravi (North Carolina State University), John Mainzer (The HDF Group), and Suren Byna (Lawrence Berkeley Laboratory)

VCSR: Mutable CSR Graph Format using Vertex-Centric Packed Memory Array 71
Abdullah Al Raqibul Islam (University of North Carolina at Charlotte), Dong Dai (University of North Carolina at Charlotte), and Dazhao Cheng (Wuhan University, China)

Skyhook: Towards an Arrow-Native Storage System 81
Jayjeet Chakraborty (University of California, Santa Cruz, USA), Ivo Jimenez (University of California, Santa Cruz, USA), Sebastiaan Alvarez Rodriguez (Leiden University, Netherlands), Alexandru Uta (Leiden University, Netherlands), Jeff LeFevre (University of California, Santa Cruz, USA), and Carlos Maltzahn (University of California, Santa Cruz, USA)

An SIMD-Accelerated Metadata Management Scheme for Persistent Memory File Systems 89
Zejie Hu (Sun Yat-sen University, China), Jarvan Law (Sun Yat-sen University, China), Zhiguang Chen (Sun Yat-sen University, China), and Nong Xiao (Sun Yat-sen University, China)

EGEON: Software-Defined Data Protection for Object Storage 99
Raul Saiz-Laudo (Universitat Rovira i Virgili, Spain) and Marc Sánchez-Artigas (Universitat Rovira i Virgili, Spain)

Stimulus: Accelerate Data Management for Scientific AI Applications in HPC 109
Hariharan Devarajan (Lawrence Livermore National Laboratory), Anthony Kougkas (Illinois Institute of Technology, Chicago), Huihuo Zheng (Argonne National Laboratory), Venkatram Vishwanath (Argonne National Laboratory), and Xian-He Sun (Illinois Institute of Technology, Chicago)

Session 3: Future Internet and computing systems

Splice: An Automated Framework for Cost- and Performance-Aware Blending of Cloud Services ... 119
Myungjun Son (The Pennsylvania State University, USA), Shruti Mohanty (The Pennsylvania State University, USA), Jashwant Raj Gunasekaran (Adobe Research, USA), Aman Jain (Microsoft Corporation, USA), Mahmut Taylan Kandemir (The Pennsylvania State University, USA), George Kesidis (The Pennsylvania State University, USA), and Bhuvan Urgaonkar (The Pennsylvania State University, USA)

Divide (CPU Load) and Conquer: Semi-Flexible Cloud Resource Allocation 129
Bartłomiej Przybylski (Institute of Informatics, University of Warsaw, Poland), Paweł Żuk (Institute of Informatics, University of Warsaw, Poland), and Krzysztof Rzadca (Institute of Informatics, University of Warsaw, Poland)

Pushing Serverless to the Edge with WebAssembly Runtimes 140
Philipp Gackstatter (TU Wien, Austria), Pantelis A. Frangoudis (TU Wien, Austria), and Schahram Dustdar (TU Wien, Austria)

Managing Access Control in Large-Scale Multi-Party IoT Systems 150
Pavana Pradeep Kumar (Temple University, USA), Krishna Kant (Temple University, USA), and Amitangshu Pal (Indian Institute of Technology Kanpur, India)

Edgelet Computing: Pushing Query Processing and Liability at the Extreme Edge of the Network 160
Ludovic Javet (Petrus team, France; David Lab., U. Versailles St-Quentin-en-Yvelines, France), Nicolas Anciaux (Petrus team, France; David Lab., U. Versailles St-Quentin-en-Yvelines, France), Luc Bouganim (Petrus team, France; David Lab., U. Versailles St-Quentin-en-Yvelines, France), and Philippe Pucheral (Petrus team, France; David Lab., U. Versailles St-Quentin-en-Yvelines, France)

Tiny Autoscalers for Tiny Workloads: Dynamic CPU Allocation for Serverless Functions 170
Yuxuan Zhao (Leiden University, Netherlands) and Alexandru Uta (Leiden University, Netherlands)

KneeScale: Efficient Resource Scaling for Serverless Computing at the Edge 180
Xue Li (University of Texas at San Antonio), Peng Kang (University of Texas at San Antonio), Jordan Molone (University of Texas at San Antonio), Wei Wang (University of Texas at San Antonio), and Palden Lama (University of Texas at San Antonio)

Energy-Aware Resource Scheduling for Serverless Edge Computing 190
Mohammad Sadegh Aslanpour (Monash University; CSIRO DATA61, Australia), Adel N. Toosi (Monash University, Australia), Muhammad Aamir Cheema (Monash University, Australia), and Raj Gaire (CSIRO DATA61, Australia)

A Distributed Vehicle-Assisted Computation Offloading Scheme Based on DRL in Vehicular Networks 200
Jiayue Wang (Beihang University, China), Hongbo Zhao (Beihang University, China), Haoqiang Liu (Beihang University, China), Liwei Geng (Beihang University, China), and Zebin Sun (Beihang University, China)

A Qualitative Evaluation of Service Mesh-Based Traffic Management for Mobile Edge Cloud ... 210
Aleksandra Obeso Duque (Umeå University, Sweden and Ericsson Research, Sweden), Cristian Klein (Umeå University, Sweden), Jinhua Feng (Ericsson Research, Sweden), Xuejun Cai (Ericsson Research, Sweden), Björn Skubic (Ericsson Research, Sweden), and Erik Elmroth (Umeå University, Sweden)

On Realizing Efficient Deep Learning using Serverless Computing 220
Kevin Assogba (Rochester Institute of Technology, USA), Moiz Arif (Rochester Institute of Technology, USA), M. Mustafa Rafique (Rochester Institute of Technology, USA), and Dimitrios S. Nikolopoulos (Virginia Tech, USA)

Session 4: Security, privacy, trust and resilience

A Scalable Covert Communication Service For Coworkers 230
Xingkong Ma (National University of Defense Technology, China), Weinan Zhai (National University of Defense Technology, China), Shaoyong Li (National University of Defense Technology, China), Xueshu Hong (National University of Defense Technology, China), and Bo Liu (National University of Defense Technology, China)

Train Me to Fight: Machine-Learning Based On-Device Malware Detection for Mobile Devices . 239
Amirmohammad Pasdar (Macquarie University, Australia), Young Choon Lee (Macquarie University, Australia), Tongliang Liu (University of Sydney, Australia), and Seok-Hee Hong (University of Sydney, Australia)

SPRITE: A Scalable Privacy-Preserving and Verifiable Collaborative Learning for Industrial IoT 249
Jayasree Sengupta (Indian Institute of Engineering Science and Technology, Shibpur, India), Sushmita Ruj (University of New South Wales, Sydney, Australia), and Sipra Das Bit (Indian Institute of Engineering Science and Technology, Shibpur, India)

ELSA: A Keyword-Based Searchable Encryption for Cloud-Edge Assisted Industrial Internet of Things 259
Jawhara Aljabri (University of Glasgow, United Kingdom), Anna Lito Michala (University of Glasgow, United Kingdom), and Jeremy Singer (University of Glasgow, United Kingdom)

SGX-Bundler: Speeding up Enclave Transitions for IO-Intensive Applications 269
Jakob Svenningsson (KTH Royal Institute of Technology, Sweden), Nicolae Paladi (Lund University and CanaryBit AB, Sweden), and Arash Vahidi (RISE Research Institutes of Sweden, Sweden)

Protecting Sensitive Data in the Cloud-to-Edge Continuum: The FogProtect Approach 279
Dhouha Ayed (Thales, France), Paul-Andrei Dragan (University of Duisburg-Essen, Germany), Edith Félix (Thales, France), Zoltán Ádám Mann (University of Amsterdam, Netherlands), Eliot Salant (IBM Research, Israel), Robert Seidl (Nokia Bell Labs, Germany), Anestis Sidiropoulos (Athens Technology Center, Greece), Steve Taylor (University of Southampton, UK), and Ricardo Vitorino (Ubiwhere, Portugal)

Restricting the Number of Times That Data Can Be Accessed in Cloud Storage using TrustZone..... 289
Zhengwei Ren (Wuhan University of Science and Technology, China), Xin Li (Wuhan University of Science and Technology, China), Shiwei Xu (Huazhong Agricultural University, China), and Yan Tong (Huazhong Agricultural University, China)

MeDA: Using Blockchain for Patient-Controlled Medical Data Auditing in Institutions 297
Beiji Zou (Central South University, China), Fanbo Nie (Central South University, China), Ling Xiao (Central South University, China), Tao Zhang (Central South University, China), and Chengzhang Zhu (Central South University, China)

Session 5: Artificial Intelligence, Machine Learning and Deep Learning

Adaptive Multi-feature Fusion Visual Target Tracking Based on Siamese Neural Network with Cross-Attention Mechanism 307
Qian Zhou (Southwest University, China), Haoran Xia (Southwest University, China), Hongzheng Yan (Southwest University, China), Ming Yang (Southwest University, China), and Shidong Chen (Chongqing Scivatar Intelligent Technology Co. Ltd, China)

BFRT: Blockchained Federated Learning for Real-Time Traffic Flow Prediction 317
Collin Meese (University of Delaware, USA), Hang Chen (University of Delaware, USA), Syed Ali Asif (University of Delaware, USA), Wanxin Li (University of Delaware, USA), Chien-Chung Shen (University of Delaware, USA), and Mark Nejad (University of Delaware, USA)

A Generalized Model for Crowd Violence Detection Focusing on Human Contour and Dynamic Features 327
Zhenche Xia (Northeastern University, China), Zhenhua Tan (Northeastern University, China), Danke Wu (Northeastern University, China), Jingyu Ning (Northeastern University, China), and Bin Zhang (Northeastern University, China)

Towards Low-Overhead Resilience for Data Parallel Deep Learning 336
Bogdan Nicolae (Argonne National Laboratory, USA), Tanner Hobson (University of Knoxville, Tennessee, USA), Orcun Yildiz (Argonne National Laboratory, USA), Tom Peterka (Argonne National Laboratory, USA), and Dmitry Morozov (Lawrence Berkeley National Laboratory, USA)

Failure Identification from Unstable Log Data using Deep Learning 346
Jasmin Bogatinovski (Technical University Berlin, Germany), Sasho Nedelkoski (Technical University Berlin, Germany), Li Wu (Technical University Berlin, Germany), Jorge Cardoso (Huawei Munich Research, Germany), and Odej Kao (Technical University Berlin, Germany)

The Personalized and Multi-objective Optimized Model on Bundle Recommendation .....N/A
Xinyu Liu (Heilongjiang University, China), Nan Wang (Heilongjiang University, China), and Kun Li (Heilongjiang University, China)

SPA: An Efficient Adversarial Attack on Spiking Neural Networks using Spike Probabilistic 366
Xuanwei Lin (Fuzhou University, China), Chen Dong (Fuzhou University, China), Ximeng Liu (Fuzhou University, China), and Yuanyuan Zhang (Fuzhou University, China)

Scanflow-K8s: Agent-Based Framework for Autonomic Management and Supervision of ML Workflows in Kubernetes Clusters 376
Peini Liu (Barcelona Supercomputing Center; Universitat Politècnica de Catalunya, Spain), Gusseppe Bravo-Rocca (Barcelona Supercomputing Center; Universitat Politècnica de Catalunya, Spain), Jordi Guitart (Barcelona Supercomputing Center; Universitat Politècnica de Catalunya, Spain), Ajay Dholakia (Lenovo Infrastructure Solutions Group, USA), David Ellison (Lenovo Infrastructure Solutions Group, USA), and Miroslav Hodak (Lenovo Infrastructure Solutions Group, USA)

Parallelizing Graph Neural Networks via Matrix Compaction for Edge-Conditioned Networks .. 386
Shehtab Zaman (Binghamton University, USA), Tim Moon (Lawrence Livermore National Laboratory, USA), Tom Benson (Lawrence Livermore National Laboratory, USA), Sam Ade Jacobs (Lawrence Livermore National Laboratory, USA), Kenneth Chiu (Binghamton University, USA), and Brian Van Essen (Lawrence Livermore National Laboratory, USA)

SDST-Accelerating GEMM-Based Convolution Through Smart Data Stream Transformation 396
Chunhua Xiao (Chongqing University, China), Chen Shi (Chongqing University, China), Dandan Xu (Chongqing University, China), Fangzhu Lin (Chongqing University, China), and Kun Ning (Chongqing University, China)

Using Multi-Resolution Data to Accelerate Neural Network Training in Scientific Applications 404
Kewei Wang (Northwestern University), Sunwoo Lee (University of Southern California), Jan Balewski (Lawrence Berkeley National Laboratory), Alex Sim (Lawrence Berkeley National Laboratory), Peter Nugent (Lawrence Berkeley National Laboratory), Ankit Agrawal (Northwestern University), Alok Choudhary (Northwestern University), Kesheng Wu (Lawrence Berkeley National Laboratory), and Wei-keng Liao (Northwestern University)

Accelerating Neural Network Training with Processing-in-Memory GPU 414
Xiang Fei (Tsinghua University, China), Jianhui Han (Tsinghua University, China), Jianqiang Huang (Tsinghua University, China; Qinghai University), Weimin Zheng (Tsinghua University, China), and Youhui Zhang (Tsinghua University, China)

Session 6: Distributed middleware and network architectures

Decentralized Allocation of Geo-Distributed Edge Resources using Smart Contracts 422
Jinlai Xu (University of Pittsburgh, USA), Balaji Palanisamy (University of Pittsburgh, USA), Qingyang Wang (Louisiana State University, USA), Heiko Ludwig (IBM Research, USA), and Sandeep Gopisetty (IBM Research, USA)

Optimized Resource Allocation on Virtualized Non-Uniform I/O Architectures 432
Tu Dinh Ngoc (IRIT, Université de Toulouse, CNRS, France), Boris Teabe (IRIT, Université de Toulouse, CNRS, France), Daniel Hagimont (IRIT, Université de Toulouse, CNRS, France), and Georges Da Costa (IRIT, Université de Toulouse, CNRS, France)

Exploring the Impact of Virtualization on the Usability of Deep Learning Applications 442
Davood G. Samani (University of Louisiana at Lafayette, USA) and Mohsen Amini Salehi (University of Louisiana at Lafayetter, USA)

Alleviating Resource Requirements for Spatial Deep Learning Workloads 452
Saptashwa Mitra (Colorado State University, USA), Menuka Warushavithana (Colorado State University, USA), Mazdak Arabi (Colorado State University, USA), Jay Breidt (Colorado State University, USA), Sangmi Pallickara (Colorado State University, USA), and Shrideep Pallickara (Colorado State University, USA)

Adaptive Routing in InfiniBand Hardware 463
Jose Rocher-Gonzalez (University of Castilla-La Mancha, Spain), Ernst Gunnar Gran (HPC at Simula, IIK at NTNU, Norway), Sven-Arne Reinemo (SimulaMet, Norway), Tor Skeie (HPC at Simula, Ifi at UiO, Norway), Jesús Escudero-Sahuquillo (University of Castilla-La Mancha, Spain), Pedro Javier García (University of Castilla-La Mancha, Spain), and Francisco J. Quiles Flor (University of Castilla-La Mancha, Spain)

Resilient Execution of Data-Triggered Applications on Edge, Fog and Cloud Resources 473
Prateeksha Varshney (Microsoft India R&D Pvt. Ltd., India; Indian Institute of Science, India), Shriram Ramesh (Wells Fargo International Solutions Pvt. Ltd., India; Indian Institute of Science, India), Shayal Chhabra (Microsoft India R&D Pvt. Ltd., India; Indian Institute of Science, India), Aakash Khochare (Indian Institute of Science, India), and Yogesh Simmhan (Indian Institute of Science, India)

pSFC: Fine-Grained Composition of Service Function Chains in the Programmable Data Plane 484
Xiaoquan Zhang (Jinan University, Guangzhou, China), Lin Cui (Jinan University, Guangzhou, China), and Fung Po Tso (Loughborough University, UK)

CASY: A CPU Cache Allocation System for FaaS Platform 494
Armel Jeatsa (IRIT, Université de Toulouse, CNRS, France), Boris Teabe (IRIT, Université de Toulouse, CNRS, France), and Daniel Hagimont (IRIT, Université de Toulouse, CNRS, France)

Hummingbird: Leveraging Heterogeneous System Architecture for Deploying Dynamic NFV Chains..... 504
Avinash Kumar Chaurasia (Indian Institute of Technology Bombay, India), Bhaskaran Raman (Indian Institute of Technology Bombay, India), Praveen Kumar Gupta (National Institute of Technology Surathkal, India), Omkar Prabhu (National Institute of Technology Surathkal, India), Shashank P (National Institute of Technology Surathkal, India), and Anshuj Garg (Indian Institute of Technology Bombay, India)

Session 7: Sustainable and green computing

Automating CPU Dynamic Thermal Control for High Performance Computing 514
Ghazanfar Ali (Texas Tech University, USA), Lowell Wofford (Ultrascale Systems Research Center, Los Alamos National Laboratory, USA), Christopher Turner (Texas Tech University, USA), and Yong Chen (Texas Tech University, USA)

Impact of Loosely Coupled Data Dissemination Policies for Resource Challenged Environments.... 524
Issam Raïs (UiT The Arctic University of Norway, Norway), Loic Guegan (UiT The Arctic University of Norway, Norway), and Otto Anshus (UiT The Arctic University of Norway, Norway)

Session 8: Scientific and industrial applications

Efficient Collision-Free MTTKRP Algorithm for Multi-core CPUs with Less Memory Usage 534
Yusuke Nagasaka (FUJITSU LIMITED, Japan) and Naoto Fukumoto (FUJITSU LIMITED, Japan)

Accelerating Spatial Autocorrelation Computation with Parallelization, Vectorization and Memory Access Optimization 544
Anmol Paudel (Marquette University, USA) and Satish Puri (Marquette University, USA)

Scalable Federated Machine Learning with FEDn 555
Morgan Ekmejord (Scaleout Systems, Sweden), Addi Ait-Mlouk (Uppsala University, Sweden), Sadi Alawadi (Uppsala University, Sweden), Mattias Åkesson (Scaleout Systems, Sweden), Prashant Singh (Uppsala University, Sweden), Ola Spjuth (Uppsala University, Sweden), Salman Toor (Uppsala University, Sweden), and Andreas Hellander (Uppsala University, Sweden)

A Federated Learning Framework for IoT: Application to Industry 4.0 565
Hamza Safri (Berger-Levrault, France), Mohamed Mehdi Kandi (Berger-levrault, France), Youssef Miloudi (CARL Software - Berger-Levrault, France), Christophe Bortolaso (Berger-Levrault, France), Denis Trystram (INRIA Grenoble, France), and Frederic Desprez (INRIA Grenoble, France)

A Serverless Engine for High Energy Physics Distributed Analysis 575
Jacek Kusnierz (AGH University of Science and Technology, Poland), Vincenzo Eduardo Padulano (CERN, Switzerland), Maciej Malawski (AGH University of Science and Technology, Poland), Kamil Burkiewicz (AGH University of Science and Technology, Poland), Enric Tejedor Saavedra (CERN, Switzerland), Pedro Alonso-Jordá (Universitat Politècnica de València, Spain), Michael Pitt (CERN, Switzerland), and Valentina Avati (CERN, Switzerland)

Time Series Data Management Optimized for Smart City Policy Decision 585
Mario Colosi (Engineer, Italy), Francesco Martella (Univesity of Messina, Italy; ALMA Digit S.R.L., Italy), Giovanni Parrino (Engineer, Italy), Antonio Celesti (University of Messina, Italy; Gruppo Nazionale per il Calcolo Scientifico (GNCS) - INdAM, Rome, Italy), Maria Fazio (University of Messina, Italy; Gruppo Nazionale per il Calcolo Scientifico (GNCS) - INdAM, Rome, Italy), and Massimo Villari (University of Messina, Italy; ALMA Digit S.R.L., Italy)

RAPTOR: Ravenous Throughput Computing 595
Andre Merzky (Rutgers, the State University of New Jersey, USA), Matteo Turilli (Rutgers, the State University of New Jersey, USA; Brookhaven National Laboratory, USA), and Shantenu Jha (Rutgers, the State University of New Jersey, USA; Brookhaven National Laboratory, USA)

Exploring Spatial Indexing for Accelerated Feature Retrieval in HPC 605
Margaret Lawson (Sandia National Laboratories; University of Illinois Urbana-Champaign), William Gropp (University of Illinois Urbana-Champaign), and Jay Lofstead (Sandia National Laboratories)

Session 9: Performance modeling, scheduling, and analysis

Coeus: Clustering (A)like Patterns for Practical Machine Intelligent Hybrid Memory Management 615
Thaleia Dimitra Doudali (IMDEA Software Institute, Spain) and Ada Gavrilovska (Georgia Institute of Technology, United States)

Evaluating Performance Interference on a Key-Value Store with Storiks ..... N/A
Adriano Lange (Federal University of Paraná, Brazil), Tiago R. Kepe (Federal University of Paraná, Brazil), Eduardo C. de Almeida (Federal University of Paraná, Brazil), and Marcos S. Sunyé (Federal University of Paraná, Brazil)

Improving Server Re-Consolidation for Datacenters via Resource Exchange and Load Adjustment 635
Kaiyue Duan (Nankai University, China), Yusen Li (Nankai University, China), Gang Wang (Nankai University, China), and Xiaoguang Liu (Nankai University, China)

A Multi-agent Deep Reinforcement Learning Approach for Computation Offloading in 5G Mobile Edge Computing 645
Zhaoyu Gan (Beijing University of Posts and Telecommunications, China), Rongheng Lin (Beijing University of Posts and Telecommunications, China), and Hua Zou (Beijing University of Posts and Telecommunications, China)

Generic and Robust Performance Diagnosis via Causal Inference for OLTP Database Systems 655
Xianglin Lu (Tsinghua University, China; Beijing National Research Center for Information Science and Technology (BNRist)), Zhe Xie (Shanghai Jiao Tong University, China), Zeyan Li (Tsinghua University, China; Beijing National Research Center for Information Science and Technology (BNRist)), Mingjie Li (Tsinghua University, China; Beijing National Research Center for Information Science and Technology (BNRist)), Xiaohui Nie (BizSeer, China), Nengwen Zhao (Tsinghua University, China; Beijing National Research Center for Information Science and Technology (BNRist)), Qingyang Yu (Tsinghua University, China; Beijing National Research Center for Information Science and Technology (BNRist)), Shenglin Zhang (Nankai University, China; Haihe Laboratory of Information Technology Application Innovation (HL-IT)), Kaixin Sui (BizSeer, China), Lin Zhu (China Mobile Research, China), and Dan Pei (Tsinghua University, China; Beijing National Research Center for Information Science and Technology (BNRist))

ELITE: Near-Optimal Heuristics for Coflow Scheduling 665
Afaf Arfaoui (LIA, University of Avignon, France; NEST Research Group ENSEM, Hassan II University of Casablanca, Morocco), Rachid Elazouzi (LIA, University of Avignon, France), Francesco De Pellegrini (LIA, University of Avignon, France), Cédric Richier (LIA, University of Avignon, France), and Jeremie Leguay (Huawei Technologies, France Research Center)

First Experiences in Performance Benchmarking with the New SPEChpc 2021 Suites 675
Holger Brunst (TU Dresden, Germany), Sunita Chandrasekaran (University of Delaware), Florina M. Ciorba (University of Basel, Switzerland), Nick Hagerty (Oak Ridge National Lab, USA), Robert Henschel (Indiana University, USA), Guido Juckeland (Helmholtz-Zentrum Dresden Rossendorf, Germany), Junjie Li (Texas Advanced Computing Center, USA), Veronica G. Melesse Vergara (Oak Ridge National Laboratory, USA), Sandra Wienke (RWTH Aachen University, Germany), and Miguel Zavala (University of Delaware, USA)

RAISE: Efficient GPU Resource Management via Hybrid Scheduling 685
Yue Weng (Sun Yat-sen University, China), Tianao Ge (Sun Yat-sen University, China), Xi Zhang (Sun Yat-sen University, China), Xianwei Zhang (Sun Yat-sen University, China), and Yutong Lu (Sun Yat-sen University, China)

SCHEDTUNE: A Heterogeneity-Aware GPU Scheduler for Deep Learning 695
Hadeel Albahar (Virginia Tech, USA), Shruti Dongare (Virginia Tech, USA), Yanlin Du (Virginia Tech, USA), Nannan Zhao (Northwestern Polytechnical University, China), Arnab K. Paul (BITS Pilani, K K Birla Goa Campus, India), and Ali R. Butt (Virginia Tech, USA)

QSketch: GPU-Aware Probabilistic Sketch Data Structures 706
Huanyi Qin (Binghamton University, USA), Zongpai Zhang (Binghamton University, USA), Bo Yan (Binghamton University, USA), Madhusudhan Govindaraju (Binghamton University, USA), and Kenneth Chiu (Binghamton University, USA)

Toward an In-Depth Analysis of Multifidelity High Performance Computing Systems 716
Shilpika Shilpika (University of California, Davis; Argonne National Laboratory), Bethany Lusch (Argonne National Laboratory, USA), Murali Emani (Argonne National Laboratory, USA), Filippo Simini (Argonne National Laboratory, USA), Venkatram Vishwanath (Argonne National Laboratory, USA), Michael E. Papka (Argonne National Laboratory; Northern Illinois University), and Kwan-Liu Ma (University of California, Davis, USA)

On Task Assignment and Scheduling for Distributed Job Execution 726
Yitong Guan (Nanyang Technological University, Singapore) and Xueyan Tang (Nanyang Technological University, Singapore)

One Core Dedicated to MPI Nonblocking Communication Progression? A Model to Assess Whether it is Worth it 736
Alexandre Denis (INRIA, France), Julien Jaeger (CEA, France; LIHPC, Université Paris-Saclay), Emmanuel Jeannot (INRIA, France), and Florian Reynier (CEA, France; INRIA, France)

Poster Papers

Stragglers' Detection in Big Data Analytic Systems: The Impact of Heartbeat Arrival 747
Thomas Lambert (Université de Lorraine, Inria, LORIA, France), Shadi Ibrahim (Inria, Univ. Rennes, CNRS, IRISA, France), Twinkle Jain (Northeastern University, USA), and David Guyon (Inria, IMT Atlantique, LS2N, France)

VARIoT - Vulnerability and Attack Repository for the Internet of Things 752
Marek Janiszewski (Research and Academic Computer Network (NASK)), Marcin Rytel (Research and Academic Computer Network (NASK)), Piotr Lewandowski (Research and Academic Computer Network (NASK)), and Hubert Romanowski (Research and Academic Computer Network (NASK))

An Open-Source Cloud Testbed for Security Experimentation 756
Francesco Minna (Vrije Universiteit Amsterdam, Netherlands) and Fabio Massacci (Vrije Universiteit Amsterdam, Netherlands, University of Trento, Italy)

Towards Distributed Coordination for Fog Platforms 760
Tobias Pfandzelter (Technische Universität Berlin & Einstein Center Digital Future), Trever Schirmer (Technische Universität Berlin & Einstein Center Digital Future), and David Bermbach (Technische Universität Berlin & Einstein Center Digital Future)

A Cybersecurity Framework to Guarantee Reliability and Trust for Digital Service Chains - GUARD 763
Matteo Repetto (IMATI-CNR, Italy), Armend Duzha (Maggioli, Sant'Arcangelo di Romagna, Italy), and Joanna Kolodziej (Research and Academic, Computer Network (NASK), Poland)

An Efficient Approach to Move Elements in a Distributed Geo-Replicated Tree 767
Parwat Singh Anjana (Indian Institute of Technology, India), Adithya Rajesh Chandrassery (National Institute of Technology Karnataka, India), and Sathya Peri (Indian Institute of Technology, India)

ERA: ECN-Ratio-Based Congestion Control in Datacenter Networks 771
Yukun Zhou (National University of Defense Technology, China), Dezun Dong (National University of Defense Technology, China), Zhengbin Pang (National University of Defense Technology, China), Junhong Ye (Tencent Inc, China), and Feng Jin (Tencent Inc, China)

Workshops

SIoTEC 2022 - 3rd Workshop on Secure IoT, Edge and Cloud systems

A Distributed Peer to Peer Identity and Access Management for the Osmotic Computing 775
Christian Sicari (University of Messina, Italy), Alessio Catalfamo (University of Messina, Italy), Antonino Galletta (University of Messina, Italy), and Massimo Villari (University of Messina, Italy)

Neural Network Model Obfuscation Through Adversarial Training 782
Jakob Sternby (Ericsson Research, Sweden), Björn Johansson (Ericsson Research, Sweden), and Michael Liljenstam (Ericsson Resarch, USA)

NODEGUARD: A Virtualized Introspection Security Approach for the Modern Cloud Data Center ... 790
Maha Shamseddine (Texas A&M University - Corpus Christi, USA), Auday Al-Dulaimy (Mälardalen University, Sweden), Wassim Itani (University of Houston-Victoria, USA), Thomas Nolte (Mälardalen University, Sweden), and Alessandro V. Papadopoulos (Mälardalen University, Sweden)

Type, Pad, and Place: Avoiding Data Leaks in Cloud-IoT FaaS Orchestrations 798
Alessandro Bocci (University of Pisa, Italy), Stefano Forti (University of Pisa, Italy), Gian-Luigi Ferrari (University of Pisa, Italy), and Antonio Brogi (University of Pisa, Italy)

Intrusion Detection using a Graphical Fingerprint Model 806
Chenyang Nie (University of Victoria, Canada), Paulo Gustavo Quinan (University of Victoria, Canada), Issa Traoré (University of Victoria, Canada), and Isaac Woungang (Ryerson University, Canada)

Improving Cellular Automata for Distributed Ledgers 814
Piotr Macek (IOTA Foundation, Germany), Daria Dziubałtowska (IOTA Foundation, Germany), Bartosz Kuśmierz (IOTA Foundation, Germany), and Radosław Michalski (Wrocław University of Science and Technology, Poland)

Toward a High-Performance Clustering Algorithm for Securing Edge Computing Environments 820
Giuliano Laccetti (University of Naples Federico II, Italy), Marco Lapegna (University of Naples Federico II, Italy), and Raffaele Montella (University of Naples Parthenope, Italy)

Cloud2Things 2022 - 2nd Workshop on Cloud-to-Things continuum: towards the convergence of IoT, Edge and Cloud Computing

Automating Edge-to-Cloud Workflows for Science: Traversing the Edge-to-Cloud Continuum with Pegasus 826
Ryan Tanaka (University of Southern California, USA), George Papadimitriou (University of Southern California, USA), Sai Charan Viswanath (University of Southern California, USA), Cong Wang (University of North Carolina at Chapel Hill, USA), Eric Lyons (University of Massachusetts at Amherst, USA), Komal Thareja (University of North Carolina at Chapel Hill, USA), Chengyi Qu (University of Missouri Columbia, USA), Alicia Esquivel (University of Missouri Columbia, USA), Ewa Deelman (University of Southern California, USA), Anirban Mandal (University of North Carolina at Chapel Hill, USA), Prasad Calyam (University of Missouri Columbia, USA), and Michael Zink (University of Massachusetts at Amherst, USA)

Enabling the CUDA Unified Memory Model in Edge, Cloud and HPC Offloaded GPU Kernels 834
Raffaele Montella (University of Naples "Parthenope", Italy), Diana Di Luccio (University of Naples "Parthenope", Italy), Ciro Giuseppe De Vita (University of Naples "Parthenope", Italy), Gennaro Mellone (University of Naples "Parthenope", Italy), Marco Lapegna (University of Naples "Federico II", Italy), Giuliano Laccetti (University of Naples "Federico II", Italy), Sokol Kosta (Aalborg University Copenhagen, Denmark), and Giulio Giunta (University of Naples "Parthenope", Italy)

OTE: Optimal Trustworthy EdgeAI Solutions for Smart Cities 842
Vasileios Mygdalis (Aristotle University of Thessaloniki, Greece), Lorenzo Carnevale (University of Messina, Italy; Gruppo Nazionale per il Calcolo Scientifico (GNCS)), Jose Ramiro Martinez-de-Dios (University of Seville, Spain), Dmitriy Shutin (German Aerospace Center (DLR), Germany), Giovanni Aiello (Engineering Ingegneria Informatica S.p.A, Italy), Massimo Villari (University of Messina, Italy), and Ioannis Pitas (Aristotle University of Thessaloniki, Greece)

Towards a Model-Based Serverless Platform for the Cloud-Edge-IoT Continuum 851
Nicolas Ferry (Université Côte d'Azur, France), Rustem Dautov (SINTEF Digital, Norway), and Hui Song (SINTEF Digital, Norway)

Network-Aware Container Placement in Cloud-Edge Kubernetes Clusters 859
Angelo Marchese (University of Catania, Italy) and Orazio Tomarchio (University of Catania, Italy)

A Supervised Learning Solver for Proactive Optimization of Cross-Cloud Applications 866
Marta Różańska (University of Oslo, Norway), Katarzyna Karnas (7bulls.com, Poland), and Geir Horn (University of Oslo, Norway)

Collaborative Edge Computing to Bring Services in Rural Areas 872
Jacques Tene Koyazo (ISTA University Kinshasa, DR.Congo), Celesti Antonio (University of Messina, Italy; Gruppo Nazionale per il Calcolo Scientifico (GNCS) - INdAM, Italy), Massimo Villari (University of Messina, Italy), Aime' Lay-Ekuakille (University of Salento, Italy), and Maria Fazio (University of Messina, Italy)

STEERS 2022 - 2nd International Workshop on Serverless To sErvE moRe at Scale

LatEst: Vertical Elasticity for Millisecond Serverless Execution 879
Yannis Sfakianakis (FORTH-ICS, Greece), Manolis Marazakis (FORTH-ICS, Greece), Christos Kozanitis (FORTH-ICS, Greece), and Angelos Bilas (FORTH-ICS, Greece)

AIBLOCK: Blockchain Based Lightweight Framework for Serverless Computing using AI 886
Muhammed Golec (Queen Mary University of London, United Kingdom), Deepraj Chowdhury (International Institute of Information Technology Naya Raipur, India), Shivam Jaglan (Indian Institute of Technology (IIT), Delhi, India), Sukhpal Singh Gill (Queen Mary University of London, United Kingdom), and Steve Uhlig (Queen Mary University of London, United Kingdom)

A Cloud-Based Architecture using Micro-Services for the IoT-Based Applications 893
Yash Jangir (BITS Pilani Goa, India), Rohan Kumar (BITS Pilani Goa, India), Nrupesh Surya U (BITS Pilani Goa, India), Manik Mahajan (BITS Pilani Goa, India), and Vinayak Naik (BITS Pilani Goa, India)

AI4Health 2022 - International Workshop on Artificial Intelligence for Health

COVID-19 and Viral Pneumonia Classification using Radiomic Features and Deep Learning .....N/A
Fernando Lucas de Lima Martins (Federal Institute of Education, Science and Technology of Southeast of Minas Gerais, Brazil), Alessandra Martins Coelho (Federal Institute of Education, Science and Technology of Southeast of Minas Gerais, Brazil), Joaquim Cezar Felipe (University of São Paulo, Brazil), and Matheus de Freitas Oliveira Baffa (University of Sâo Paulo, Brazil)

Social Isolation Detection in Palliative Care using Social Network Analysis 905
Bahareh Rahmatikargar (Univerisy of Windsor, Canada), Pooya Moradian Zadeh (University of Windsor, Canada), and Ziad Kobti (University of Windsor, Canada)

How to Increase and Balance Current DBT Datasets via an Evolutionary GAN: Preliminary Results 913
Mariacarla Staffa (University of Naples Parthenope, Italy), Lorenzo D'Errico (University of Naples Federico II, Italy), Roberta Ricciardi (University of Naples Federico II, Italy), Paola Barra (University of Naples Parthenope, Italy), Elena Antignani (Azienda Ospedaliera Cardarelli di Napoli, Italy), Salvatore Minelli (Azienda Ospedaliera Cardarelli di Napoli, Italy), and Giovanni Mettivier (University of Naples Federico II, Italy)

Artificial Intelligence to Evaluate Diagnosed COVID-19 Chest Radiographs .....N/A
Bruno Yukio Takara (UFCSPA, Brazil), Felipe Ferreira de Freitas (University of Aveiro, Portugal), Alexandre Bacelar (Hospital de Clínicas de Porto Alegre, Brazil), Rochelle Lykawka (Hospital de Clínicas de Porto Alegre, Brazil), and Mirko Salomón Alva-Sánchez (UFCSPA, Brazil)

Multimorbidity Profiles and Stochastic Block Modeling Improve ICU Patient Clustering 925
Valerio Restocchi (University of Edinburgh, United Kingdom), Jorge Gaete Villegas (University of Edinburgh, United Kingdom), and Jacques D. Fleuriot (University of Edinburgh, United Kingdom)

Shapley Value as an Aid to Biomedical Machine Learning: a Heart Disease Dataset Analysis 933
Daniele Scapin (University of Padova, Italy), Giulia Cisotto (University of Milano-Bicocca, Italy; Inter-University Consortium for Telecommunications (CNIT), Italy), Elvina Gindullina (University of Padova, Italy), and Leonardo Badia (University of Padova, Italy; Inter-University Consortium for Telecommunications (CNIT), Italy)

Predicting Dengue Outbreaks with Explainable Machine Learning 940
Robson Aleixo (University of São Paulo, Brazil), Fabio Kon (University of São Paulo, Brazil), Rudi Rocha (São Paulo School of Business Adm. (FGV), Institute for Health Policy Studies (IEPS)), Marcela Santos Camargo (São Paulo School of Business Adm. (FGV), Institute for Health Policy Studies (IEPS)), and Raphael Y. de Camargo (Federal University of ABC)

Let the Data Speak: Analysing Data from Multiple Health Centers of the São Paulo Metropolitan Area for COVID-19 Clinical Deterioration Prediction 948
Maria Gabriela Valeriano (Universidade Federal de São Paulo, Brasil; Instituto Tecnológico de Aeronáutica, São José dos Campos, Brasil), Carlos R. V. Kiffer (Universidade Federal de São Paulo, Brasil; Rede D'Or Hospital São Luiz, Brasil), Giane Higino (Universidade Federal de São Paulo, Brasil), Paloma Zanão (Universidade Federal de São Paulo, Brasil), Dulce A. Barbosa (Universidade Federal de São Paulo, Brasil), Patrícia A. Moreira (Universidade de São Paulo - Hospital Santa Paula, Brasil), Paulo Caleb J. L. Santos (Universidade Federal de São Paulo - Universidade de São Paulo, Brasil; Faculdade de Medicina da USP, São Paulo, Brasil), Renato Grinbaum (Rede D'Or Hospital São Luiz, Brasil), and Ana Carolina Lorena (Instituto Tecnológico da Aeronáutica, Brasil)

Anatomical Landmarks Annotation on 2D Lateral Cephalograms with Channel Attention 952
Dongfeng Du (Hangzhou Innovation Institute, Beihang University, China), Tao Ren (Hangzhou Innovation Institute, Beihang University, China), Chen Chen (Beihang University, China), Yiran Jiang (Peking University School and Hospital of Stomatology, China), Guangying Song (Peking University School and Hospital of Stomatology, China), Qingfeng Li (Hangzhou Innovation Institute, Beihang University, China), and Jianwei Niu (Hangzhou Innovation Institute, Beihang University, China)

Exploring AI-Based Speaker Dependent Methods in Dysarthric Speech Recognition 958
Davide Mulfari (University of Messina, Italy), Antonio Celesti (University of Messina, Italy), and Massimo Villari (University of Messina, Italy)

CCGrid Life 2022 - Workshop on Clusters, Clouds and Grids for Life Sciences

A Secure Workflow for Shared HPC Systems 965
Hendrik Nolte (Gesellschaft für wissenschaftliche Datenverarbeitung mbH Göttingen, Germany), Simon Hernan Sarmiento Sabater (Gesellschaft für wissenschaftliche Datenverarbeitung mbH Göttingen, Germany), Tim Ehlers (Gesellschaft für wissenschaftliche Datenverarbeitung mbH Göttingen, Germany), and Julian Kunkel (Gesellschaft für wissenschaftliche Datenverarbeitung mbH Göttingen, Germany)

Portability for GPU-Accelerated Molecular Docking Applications for Cloud and HPC: Can Portable Compiler Directives Provide Performance Across all Platforms? 975
Mathialakan Thavappiragasam (Oak Ridge National Laboratory, USA), Wael Elwasif (Oak Ridge National Laboratory, USA), and Ada Sedova (Oak Ridge National Laboratory, USA)

On the Building of Self-Adaptable Systems to Efficiently Manage Medical Data 985
Genaro Sanchez-Gallegos (Cinvestav Tamaulipas, Mexico), Dante D. Sánchez-Gallegos (Cinvestav Tamaulipas, Mexico; Universidad Carlos III de Madrid, Spain), J. L. Gonzalez-Compean (Cinvestav Tamaulipas, Mexico), and Jesus Carretero (Universidad Carlos III de Madrid, Spain)

Multi-bed Stitching Tool for 3D Computed Tomography Accelerated by GPU Devices 993
Javier Garcia-Blas (University Carlos III of Madrid, Spain), Pablo Brox (University Carlos III of Madrid, Spain), Manuel Desco (Instituto de Investigación Sanitaria Gregorio Marañón (IiSGM), Spain; University Carlos III of Madrid, Spain; Centro de Investigación en Red de Salud Mental, Spain; Centro Nacional de Investigaciones Cardiovasculares Carlos III (CNIC), Spain), and Monica Abella (Instituto de Investigación Sanitaria Gregorio Marañón (IiSGM), Spain; University Carlos III of Madrid, Spain; Centro Nacional de Investigaciones Cardiovasculares Carlos III (CNIC), Spain)

Evaluating the Spread of Omicron COVID-19 Variant in Spain 999
Miguel Guzman Merino (Universidad Carlos III de Madrid, Spain), Maria Cristina Marinescu (Barcelona Supercomputing Center, Spain), and David E. Singh (Universidad Carlos III de Madrid, Spain)

SparkFlow: Towards High-Performance Data Analytics for Spark-Based Genome Analysis 1007
Rosa Filgueira (University of St. Andrews, UK), Feras M. Awaysheh (University of Tartu, Estonia), Adam Carter (University of Edinburgh, UK), Darren J. White (University of Edinburgh, UK), and Omer Rana (Cardiff University, UK)

The EMPAIA Platform: Vendor-Neutral Integration of AI Applications into Digital Pathology Infrastructures 1017
Christoph Jansen (Institute of Pathology, Charité – Universitätsmedizin Berlin, Germany), Klaus Strohmenger (Institute of Pathology, Charité – Universitätsmedizin Berlin, Germany), Daniel Romberg (Institute for Digital Medicine, Fraunhofer MEVIS, Germany), Tobias Küster (Distributed AI Laboratory, Technische Universität Berlin, Germany), Nick Weiss (Institute for Digital Medicine, Fraunhofer MEVIS, Germany), Björn Lindequist (Institute of Pathology, Charité – Universitätsmedizin Berlin, Germany), Michael Franz (Institute of Pathology, Charité – Universitätsmedizin Berlin, Germany), André Homeyer (Institute for Digital Medicine, Fraunhofer MEVIS, Germany), and Norman Zerbe (Institute of Pathology, Charité – Universitätsmedizin Berlin, Germany)

IWoSeMC-22 - 3rd International Workshop on Secure Mobile Cloud Computing

Continuous Authentication on Mobile Devices using Behavioral Biometrics 1028
Jakub Dybczak (AGH University of Science and Technology, Poland) and Piotr Nawrocki (AGH University of Science and Technology, Poland)

Dynamic Service Placement Algorithm for Partitionable Applications in Mobile Edge Computing 1036
Kun Lu (Dalian University of Technology, China; Key Laboratory for Ubiquitous Network and Service Software of Liaoning Province, China), Jianyu Song (Dalian University of Technology, China; Key Laboratory for Ubiquitous Network and Service Software of Liaoning Province, China), Linlin Yang (Dalian University of Technology, China; Key Laboratory for Ubiquitous Network and Service Software of Liaoning Province, China), Guorui Xu (Dalian University of Technology, China; Key Laboratory for Ubiquitous Network and Service Software of Liaoning Province, China), and Mingchu Li (Dalian University of Technology, China; Key Laboratory for Ubiquitous Network and Service Software of Liaoning Province, China)

A Continuous Risk Assessment Methodology for Cloud Infrastructures 1042
Immanuel Kunz (Fraunhofer AISEC, Germany), Angelika Schneider (Fraunhofer AISEC, Germany), and Christian Banse (Fraunhofer AISEC, Germany)

Holistic Runtime Performance and Security-Aware Monitoring in Public Cloud Environment . 1052
Devki Nandan Jha (University of Oxford, United Kingdom; 100 Percent IT Ltd. (CyberHive), United Kingdom), Graham Lenton (100 Percent IT Ltd. (Cyberhive), United Kingdom), James Asker (100 Percent IT Ltd. (Cyberhive), United Kingdom), David Blundell (100 Percent IT Ltd. (Cyberhive), United Kingdom), and David Wallom (University of Oxford, United Kingdom)
