2022 IEEE International Conference on Cluster Computing (CLUSTER)

CLUSTER 2022

Table of Contents

Welcome Message from the IEEE Cluster 2022 General Co-Chairs ..... **xvi**
Welcome Message from the Cluster 2022 Program Chairs ..... **xviii**
IEEE Cluster 2022 Committees ..... **xix**
Welcome Message from HPCEuropeLatAm 2022 ..... **xxv**
HPCEuropeLatAm 2022 Committees ..... **xxvi**
Welcome Message from EA-HPC 2022 Organizers ..... **xxvii**
EA-HPC 2022 Committees ..... **xxviii**
Welcome Message from REX-IO 2022 ..... **xxix**
REX-IO 2022 Committees ..... **xxx**
Welcome Message from HPCMASPA 2022 ..... **xxxi**
HPCMASPA 2022 Committees ..... **xxxii**

Papers

Networking and Security

SKV: A SmartNIC-Offloaded Distributed Key-Value Store 1
Shangyi Sun (Fudan University, China), Rui Zhang (Fudan University, China), Ming Yan (Fudan University, China), and Jie Wu (Fudan University, China)

Bring the BitCODE — Moving Compute and Data in Distributed Heterogeneous Systems 12
Wenbin Lu (Stony Brook University, USA), Luis E. Peña (Arm Research, USA), Pavel Shamis (Arm Research, USA), Valentin Churavy (MIT, USA), Barbara Chapman (Stony Brook University, USA), and Steve Poole (Los Alamos National Laboratory, USA)

Exploring Light-Weight Cryptography for Efficient and Secure Lossy Data Compression 23
Ruiwen Shan (Clemson University, USA), Sheng Di (Argonne National Laboratory, USA), Jon C. Calhoun (Clemson University, USA), and Frank Cappello (Argonne National Laboratory, USA; University of Illinois at Urbana-Champaign, USA)

Scheduling and Multi-tenancy

What does Inter-Cluster Job Submission and Execution Behavior Reveal to Us? 35
Tirthak Patel (Northeastern University, USA), Devesh Tiwari (Northeastern University, USA), Raj Kettimuthu (Argonne National Laboratory, USA), William Allcock (Argonne National Laboratory, USA), Paul Rich (Argonne National Laboratory, USA), and Zhengchun Liu (Argonne National Laboratory, USA)

MRSch: Multi-Resource Scheduling for HPC 47
Boyang Li (Illinois Institute of Technology, USA), Yuping Fan (Illinois Institute of Technology, USA), Matthew Dearing (Illinois Institute of Technology, USA), Zhiling Lan (Illinois Institute of Technology, USA), Paul Rich (Argonne National Laboratory, USA), William Allcock (Argonne National Laboratory, USA), and Michael Papka (Argonne National Laboratory, USA; Northern Illinois University, USA)

Matching-Based Scheduling of Asynchronous Data Processing Workflows on the Computing Continuum 58
Narges Mehran (Alpen-Adria-Universität Klagenfurt, Austria), Zahra Najafabadi Samani (Alpen-Adria-Universität Klagenfurt, Austria), Dragi Kimovski (Alpen-Adria-Universität Klagenfurt, Austria), and Radu Prodan (Alpen-Adria-Universität Klagenfurt, Austria)

MPI

Spark Meets MPI: Towards High-Performance Communication Framework for Spark Using MPI ... 71
Kinan Al-Attar (The Ohio State University), Aamir Shafi (The Ohio State University), Mustafa Abduljabbar (The Ohio State University), Hari Subramoni (The Ohio State University), and Dhabaleswar K. Panda (The Ohio State University)

Deadlock Detection for MPI Programs Based on Refined Match-Sets 82
Shushan Li (Hebei University, China), Meng Wang (Hebei University, China), and Hong Zhang (Hebei University, China)

A Framework for Hierarchical Single-Copy MPI Collectives on Multicore Nodes 94
George Katevenis (Institute of Computer Science (ICS), Foundation for Research and Technology – Hellas (FORTH), Greece), Manolis Ploumidis (Institute of Computer Science (ICS), Foundation for Research and Technology – Hellas (FORTH), Greece), and Manolis Marazakis (Institute of Computer Science (ICS), Foundation for Research and Technology – Hellas (FORTH), Greece)

Runtimes

Pythia: An Oracle to Guide Runtime System Decisions 106
Alexis Colin (Télécom SudParis, Institut Polytechnique de Paris, France), François Trahay (Télécom SudParis, Institut Polytechnique de Paris, France), and Denis Conan (Télécom SudParis, Institut Polytechnique de Paris, France)

Pushing the Boundaries of Small Tasks: Scalable Low-Overhead Data-Flow Programming in TTG . 117
Joseph Schuchart (The University of Tennessee, USA), Poornima Nookala (Stony Brook University, USA), Thomas Herault (University of Tennessee, USA), Edward F. Valeev (Virginia Polytechnic Institute and State University, USA), and George Bosilca (University of Tennessee, USA)

Distributed Continuation Stealing is More Scalable than You Might Think 129
Shumpei Shiina (The University of Tokyo, Japan) and Kenjiro Taura (The University of Tokyo, Japan)

MPI Collectives

Fast(er) Construction of Round-Optimal n-Block Broadcast Schedules 142
Jesper Larsson Träff (TU Wien, Austria)

Lossy all-to-all Exchange for Accelerating Parallel 3-D FFTs on Hybrid Architectures with GPUs 152
Sébastien Cayrols (University of Tennessee Knoxville, USA), Jiali Li (University of Tennessee Knoxville, USA), George Bosilca (University of Tennessee Knoxville, USA), Stanimire Tomov (University of Tennessee Knoxville, USA), Alan Ayala (Univervsity of Tennessee Knoxville, USA), and Jack Dongarra (University of Tennessee Knoxville, USA; Oak Ridge National Laboratory, USA)

ACCLAiM: Advancing the Practicality of MPI Collective Communication Autotuning Using Machine Learning 161
Michael Wilkins (Northwestern University), Yanfei Guo (Argonne National Laboratory), Rajeev Thakur (Argonne National Laboratory), Peter Dinda (Northwestern University), and Nikos Hardavellas (Northwestern University)

Serverless and Virtual Networks

Call Scheduling to Reduce Response Time of a FaaS System 172
Paweł Żuk (University of Warsaw, Poland), Bartłomiej Przybylski (University of Warsaw, Poland), and Krzysztof Rzadca (University of Warsaw, Poland)

FaaSt: Optimize Makespan of Serverless Workflows in Federated Commercial FaaS 183
Sashko Ristov (University of Innsbruck, Austria) and Philipp Gritsch (University of Innsbruck, Austria)

Last-Mile Matters: Mitigating the Tail Latency of Virtualized Networks with Multipath Data Plane 195
Dian Shen (Southeast University, China), Yi Zhai (Southeast University, China), Fang Dong (Southeast University, China), and Junzhou Luo (Southeast University, China)

Applications

Towards Virtual Certification of Gas Turbine Engines with Performance-Portable Simulations..... 206
Gihan R. Mudalige (University of Warwick, UK), Istvan Z. Reguly (Pazmany Peter Catholic University, Hungary), Arun Prabhakar (University of Warwick, UK), Dario Amirante (University of Surrey, UK), Leigh Lapworth (Rolls-Royce plc., UK), and Stephen A. Jarvis (University of Birmingham, UK)

Hybrid Analysis of Fusion Data for Online Understanding of Complex Science on Extreme Scale Computers 218
Eric Suchyta (Oak Ridge National Laboratory, USA), Jong Youl Choi (Oak Ridge National Laboratory, USA), Seung-Hoe Ku (Princeton Plasma Physics Laboratory, USA), David Pugmire (Oak Ridge National Laboratory, USA), Ana Gainaru (Oak Ridge National Laboratory, USA), Kevin Huck (University of Oregon, USA), Ralph Kube (Princeton Plasma Physics Laboratory, USA), Aaron Scheinberg (Jubilee Development), Frédéric Suter (Oak Ridge National Laboratory, USA), Choongseock Chang (Princeton Plasma Physics Laboratory, USA), Todd Munson (Argonne National Laboratory, USA), Norbert Podhorzski (Oak Ridge National Laboratory, USA), and Scott Klasky (Oak Ridge National Laboratory, USA)

High Performance Adaptive Physics Refinement to Enable Large-Scale Tracking of Cancer Cell Trajectory 230
Daniel F. Puleri (Duke University, USA), Sayan Roychowdhury (Duke University, USA), Peter Balogh (New Jersey Institute of Technology, USA), John Gounley (Oak Ridge National Laboratory, USA), Erik W. Draeger (Lawrence Livermore National Laboratory, USA), Jeff Ames (Duke University, USA), Adebayo Adebiyi (Duke University, USA), Simbarashe Chidyagwai (Duke University, USA), Benjamín Hernández (Oak Ridge National Laboratory, USA), Seyong Lee (Oak Ridge National Laboratory, USA), Shirley V. Moore (University of Texas at El Paso, USA), Jeffrey S. Vetter (Oak Ridge National Laboratory, USA), and Amanda Randles (Duke University, USA)

I/O

Extracting and Characterizing I/O Behavior of HPC Workloads 243
Hariharan Devarajan (Lawrence Livermore National Laboratory, USA) and Kathryn Mohror (Lawrence Livermore National Laboratory, USA)

Be SMART, Save I/O: A Probabilistic Approach to Avoid Uncorrectable Errors in Storage Systems 256
Md Arifuzzaman (University of Nevada, USA), Masudul Bhuiyan (CISPA, Germany), Mehmet Gumus (University of Nevada, USA), and Engin Arslan (University of Nevada, USA)

The Role of Storage Target Allocation in Applications' I/O Performance with BeeGFS 267
Francieli Boito (Univ. Bordeaux, France), Guillaume Pallez (Univ. Bordeaux, France), and Luan Teylo (Univ. Bordeaux, France)

Best Paper Nominees

ecoHMEM: Improving Object Placement Methodology for Hybrid Memory Systems in HPC 278
Marc Jordà (Barcelona Supercomputing Center), Siddharth Rai (Barcelona Supercomputing Center), Eduard Ayguadé (Barcelona Supercomputing Center), Jesús Labarta (Barcelona Supercomputing Center), and Antonio J. Peña (Barcelona Supercomputing Center)

Efficient Hierarchical State Vector Simulation of Quantum Circuits via Acyclic Graph Partitioning 289
Bo Fang (Pacific Northwest National Laboratories, USA), M. Yusuf Özkaya (Georgia Institute of Technology, USA), Ang Li (Pacific Northwest National Laboratories, USA), Ümit V. Çatalyürek (Georgia Institute of Technology, USA), and Sriram Krishnamoorthy (Pacific Northwest National Laboratories, USA)

Deep Learning

AutoPipe: A Fast Pipeline Parallelism Approach with Balanced Partitioning and Micro-Batch Slicing 301
Weijie Liu (National University Of Denfense Technnology, China), Zhiquan Lai (National University Of Denfense Technnology, China), Shengwei Li (National University Of Denfense Technnology, China), Yabo Duan (National University Of Denfense Technnology, China), Keshi Ge (National University Of Denfense Technnology, China), and Dongsheng Li (National University Of Denfense Technnology, China)

HPH: Hybrid Parallelism on Heterogeneous Clusters for Accelerating Large-Scale DNNs Training 313
Yabo Duan (National University of Defence Technology, China), Zhiquan Lai (National University of Defence Technology, China), Shengwei Li (National University of Defence Technology, China), Weijie Liu (National University of Defence Technology, China), Keshi Ge (National University of Defence Technology, China), Peng Liang (National University of Defence Technology, China), and Dongsheng Li (National University of Defence Technology, China)

HVAC: Removing I/O Bottleneck for Large-Scale Deep Learning Applications 324
Awais Khan (Oak Ridge National Laboratory, USA), Arnab K. Paul (BITS Pilani, K K Birla Goa Campus, India), Christopher Zimmer (Oak Ridge National Laboratory, USA), Sarp Oral (Oak Ridge National Laboratory, USA), Sajal Dash (Oak Ridge National Laboratory, USA), Scott Atchley (Oak Ridge National Laboratory, USA), and Feiyi Wang (Oak Ridge National Laboratory, USA)

Node Technologies

Enabling Dynamic Virtual Frequency Scaling for Virtual Machines in the Cloud 336
Emile Cadorel (Inria / Univ. Lille, France) and Romain Rouvoy (Univ. Lille / Inria, France)

The Cost of Flexibility: Embedded Versus Discrete Routers in CGRAs for HPC 347
Boma Adhi (Center for Computational Science (R-CCS), RIKEN, Japan), Carlos Cortes (Center for Computational Science (R-CCS), RIKEN, Japan), Yiyu Tan (Iwate University, Japan), Takuya Kojima (Center for Computational Science (R-CCS), RIKEN, Japan; The University of Tokyo, Japan), Artur Podobas (KTH Royal Institute of Technology, Sweden), and Kentaro Sano (Center for Computational Science (R-CCS), RIKEN, Japan)

SVAGC: Garbage Collection with a Scalable Virtual Address Swapping Technique 357
Ismail Ataie (Florida State University, USA) and Weikuan Yu (Florida State University, USA)

Operations and ML Training Strategies

ALBADross: Active Learning Based Anomaly Diagnosis for Production HPC Systems 369
Burak Aksar (Boston University, USA), Efe Sencan (Boston University, USA), Benjamin Schwaller (Sandia National Laboratories, USA), Omar Aaziz (Sandia National Laboratories, USA), Vitus J. Leung (Sandia National Laboratories, USA), Jim Brandt (Sandia National Laboratories, USA), Brian Kulis (Boston University, USA), and Ayse K. Coskun (Boston University, USA)

HPC Storage Service Autotuning Using Variational-Autoencoder-Guided Asynchronous Bayesian Optimization 381
Matthieu Dorier (Argonne National Laboratory, USA), Romain Egele (Argonne National Laboratory, USA; Université Paris-Saclay, France), Prasanna Balaprakash (Argonne National Laboratory, USA), Jaehoon Koo (Argonne National Laboratory, USA), Sandeep Madireddy (Argonne National Laboratory, USA), Srinivasan Ramesh (University of Oregon, USA), Allen D. Malony (University of Oregon, USA), and Rob Ross (Argonne National Laboratory, USA)

fairDMS: Rapid Model Training by Data and Model Reuse 394
Ahsan Ali (Argonne National laboratory, USA), Hemant Sharma (Argonne National laboratory, USA), Rajkumar Kettimuthu (Argonne National laboratory, USA), Peter Kenesei (Argonne National laboratory, USA), Dennis Trujillo (Argonne National laboratory, USA), Antonino Miceli (Argonne National laboratory, USA), Ian Foster (Argonne National laboratory, USA; University of Chicago, USA), Ryan Coffee (SLAC National Accelerator Laboratory, USA), Jana Thayer (SLAC National Accelerator Laboratory, USA), and Zhengchun Liu (Argonne National laboratory, USA; University of Chicago, USA)

Distributed Memory Applications

Painless Transposition of Reproducible Distributed Environments with NixOS Compose 406
Quentin Guilloteau (Univ. Grenoble Alpes, France), Jonathan Bleuzen (Univ. Grenoble Alpes, France), Millian Poquet (Univ. Grenoble Alpes, France), and Olivier Richard (Univ. Grenoble Alpes, France)

Integrating Process, Control-flow, and Data Resiliency Layers Using a Hybrid Fenix/Kokkos Approach 418
Matthew Whitlock (Sandia National Laboratories, USA; Georgia Institute of Technology, USA), Nicolas Morales (Sandia National Laboratories, USA), George Bosilca (University of Tennessee, Knoxville, USA), Aurelien Bouteiller (University of Tennessee, Knoxville, USA), Bogdan Niocolae (Argonne National Laboratory, USA), Keita Teranishi (Sandia National Laboratories, USA), Elisabeth Giem (University of California, Riverside, Sandia National Laboratories, USA), and Vivek Sarkar (Georgia Institute of Technology, USA)

Fast Dynamic Updates and Dynamic SpGEMM on MPI-Distributed Graphs 429
Alexander van der Grinten (Humboldt-Universität zu Berlin, Germany), Geert Custers (Delft University of Technology, Netherlands), Duy Le Thanh (Humboldt-Universität zu Berlin, Germany), and Henning Meyerhenke (Humboldt-Universität zu Berlin, Germany)

Tensors and Linear Algebra

BALA-CPD: BALanced and Asynchronous Distributed Tensor Decomposition 440
Zheng Miao (Hangzhou Dianzi University), Jiajia Li (North Carolina State University), Jon C. Calhoun (Clemson University), and Rong Ge (Clemson University)

Optimizing Irregular-Shaped Matrix-Matrix Multiplication on Multi-core DSPs 451
Shangfei Yin (National University of Defense Technology, China), Qinglin Wang (National University of Defense Technology, China), Ruochen Hao (National University of Defense Technology, China), Tianyang Zhou (National University of Defense Technology, China), Songzhu Mei (National University of Defense Technology, China), and Jie Liu (National University of Defense Technology, China)

Optimizations of H-Matrix-Vector Multiplication for Modern Multi-core Processors 462
Tetsuya Hoshino (The University of Tokyo, Tokyo), Akihiro Ida (Center for Earth Information Science and Technology Japan Agency for Marine-Earth Science and Technology, Japan), and Toshihiro Hanawa (The University of Tokyo, Japan)

Shared Memory

Recursive Multi-section on the Fly: Shared-Memory Streaming Algorithms for Hierarchical Graph Partitioning and Process Mapping 473
Marcelo Fonseca Faraj (Heidelberg University, Germany) and Christian Schulz (Heidelberg University, Germany)

MemGaze: Rapid and Effective Load-Level Memory Trace Analysis 484
Ozgur O. Kilic (Pacific Northwest National Laboratory, USA), Nathan R. Tallent (Pacific Northwest National Laboratory, USA), Yasodha Suriyakumar (Portland State University, USA), Chenhao Xie (Pacific Northwest National Laboratory, USA), Andrés Marquez (Pacific Northwest National Laboratory, USA), and Stephane Eranian (Google Inc.)

Poster Papers

Empirical Study on the GPU-Accelerated HPL Performance: Effects of PCIe Communication 496
Jieun Choi (Korea Institute of Science and Technology Information, Republic of Korea), Yosang Jeong (Korea Institute of Science and Technology Information, Republic of Korea), Ji-Hoon Kang (Korea Institute of Science and Technology Information, Republic of Korea), Gibeom Gu (Korea Institute of Science and Technology Information, Republic of Korea), and Hoon Ryu (Korea Institute of Science and Technology Information, Republic of Korea)

H2M: Towards Heuristics for Heterogeneous Memory 498
Clément Foyer (Inria, Univ. Bordeaux, LaBRI, France), Brice Goglin (Inria, Univ. Bordeaux, LaBRI, France), Emmanuel Jeannot (Inria, Univ. Bordeaux, LaBRI, France), Jannis Klinkenberg (RWTH Aachen University, Germany), Anara Kozhokanova (RWTH Aachen University, Germany), and Christian Terboven (RWTH Aachen University, Germany)

An Analysis of Performance Variability on Dragonfly+ Topology 500
Majid Salimi Beni (University of Salerno, Italy) and Biagio Cosenza (University of Salerno, Italy)

An Asynchronous Parallel Algorithm to Improve the Scalability of Finite Element Solvers 502
Zhuo Tian (Laboratory of Parallel Software and Computational Science Institute of Software Chinese Academy of Sciences, China) and Changyou Zhang (Laboratory of Parallel Software and Computational Science Institute of Software Chinese Academy of Sciences, China)

An Efficient Sparse CNNs Accelerator on FPGA 504
Yonghua Zhang (Beihang University, China), Hongxu Jiang (Beihang University, China), Xiaobin Li (Beihang University, China), Haojie Wang (Tsinghua University, China), Dong Dong (Beihang University, China), and Yongxiang Cao (Beihang University, China)

Workshops

HPC for International Collaboration Between Europe and Latin America: HPCEuropeLatAm2022

A Performance Evaluation of Adaptive MPI for a Particle-in-Cell Code 506
Christian Asch (National High Technology Center, Costa Rica), Diego Jiménez (National High Technology Center, Costa Rica), Markus Rampp (Max Planck Computing and Data Facility, Germany), Erwin Laure (Max Planck Computing and Data Facility, Germany), and Esteban Meneses (National High Technology Center and Costa Rica Institute of Technology, Costa Rica)

Scalable Architectures to Support Sustainable Advanced Information Technologies 512
Oscar Carrillo (Univ Lyon, CPE, INSA Lyon, France), Carlos Jaime Barrios Hernández (Universidad Industrial de Santander, Colombia), Frédéric Le Mouël (Univ Lyon, INSA Lyon, Inria, France), Harold E. Castro Barrera (Universidad de los Andes, Colombia), Yves Denneulin (Université de Grenoble-Alpes, France), José Tiberio Hernández (Universidad de los Andes, Colombia), Fernando Jiménez Vargas (Universidad de los Andes, Colombia), Lola Xiomara Bautista Rozo (Universidad Industrial de Santander, Colombia), Claudia Roncancio (Université de Grenoble Alpes, France), and Michel Riveill (Université Côte d'Azur, France)

Early Experiences of Noise-Sensitivity Performance Analysis of a Distributed Deep Learning Framework 516
Elvis Rojas (Costa Rica National High Technology; National University of Costa Rica), Michael Knobloch (Jülich Supercomputing Centre, Germany), Nour Daoud (Jülich Supercomputing Centre, Germany), Esteban Meneses (Costa Rica National High Technology; Costa Rica National High Technology Center), and Bernd Mohr (Jülich Supercomputing Centre, Germany)

Learning Tenant Behavior and Evolutionary Approach for Demand Response in Colocation Datacenters 523
Jonathan Muraña (Universidad de la República, Uruguay), Santiago Iturriaga (Universidad de la República, Uruguay), and Sergio Nesmachnow (Universidad de la República, Uruguay)

Impact of Containerization on Low-Cost Post Moore Computing Architectures 528
Pablo Josue Rojas Yepes (Universidad Industrial de Santander, Colombia), Carlos Jaime Barrios Hernandez (Universidad Industrial de Santander, Colombia), and Luiz Angelo Steffenel (Université de Reims Champagne Ardenne, France)

Automatic Vehicle Counting area Creation Based on Vehicle Deep Learning Detection and DBSCAN 535
Gerardo Alvarez Piña (Universidad Autónoma de Gualadajara, Mexico), E. Ulises Moya-Sánchez (Coordinación general de innovación and Universidad Autónoma de Guadalajara, Mexico), Abraham Sánchéz (Coordinación general de innovación, Gobierno de Jalisco), and Ulises Cortés (Barcelona Supercomputing Center/UPC, Spain)

Embracing Arm for High Performance Computing Workshop: EAHPC-2022

On Using Linux Kernel Huge Pages with FLASH, an Astrophysical Simulation Code 539
Alan C. Calder (Stony Brook University, USA), Catherine Feldman (Stony Brook University, USA), Eva Siegmann (Stony Brook University, USA), John Dey (Stony Brook University, USA), Anthony Curtis (Stony Brook University, USA), Smeet Chheda (Stony Brook University, USA), and Robert J. Harrison (Stony Brook University, USA)

Performance of an Astrophysical Radiation Hydrodynamics Code Under Scalable Vector Extension Optimization 545
Dennis C. Smolarski (Santa Clara Universtiy, USA), F. Douglas Swesty (Stony Brook University, USA), and Alan C. Calder (Stony Brook University, USA)

Productivity Meets Performance: Julia on A64FX 549
Mosè Giordano (UCL, United Kingdom), Milan Klöwer (University of Oxford, United Kingdom), and Valentin Churavy (Massachusetts Institute of Technology, USA)

Assessing the State of Autovectorization Support Based on SVE 556
Bine Brank (Forschungszentrum Jülich, Germany) and Dirk Pleiter (KTH Royal Institute of Technology, Germany)

Performance Analysis of a State Vector Quantum Circuit Simulation on A64FX Processor 563
Miwako Tsuji (RIKEN Center for Computational Science, Japan) and Mitsuhisa Sato (RIKEN Center for Computational Science, Japan)

The 2nd Workshop on Re-Envisioning Extreme-Scale I/O for Emerging Hybrid HPC Workloads (REX-IO)

Protecting Metadata Servers From Harm Through Application-Level I/O Control 573
Ricardo Macedo (TACC & UTAustin), Mariana Miranda (INESC TEC & University of Minho), Yusuke Tanimura (AIST), Jason Haga (AIST), Amit Ruhela (TACC & UTAustin), Stephen Lien Harrell (TACC & UTAustin), Richard Todd Evans (Intel), and João Paulo (INESC TEC & University of Minho)

A Comprehensive I/O Knowledge Cycle for Modular and Automated HPC Workload Analysis 581
Zhaobin Zhu (Goethe University Frankfurt, Germany), Sarah Neuwirth (Goethe University Frankfurt, Germany; Juelich Supercomputing Centre, Germany), and Thomas Lippert (Goethe University Frankfurt, Germany; Juelich Supercomputing Centre, Germany)

Assessment of the I/O and Storage Subsystem in Modular Supercomputing Architectures 589
Sarah Neuwirth (Goethe University Frankfurt, Germany)

Workshop on Monitoring and Analysis for HPC Systems Plus Applications (HPCMASPA)

Towards Real-Time Classification of HPC Workloads via Out-of-Band Telemetry 597
Steven Presser (University of Stuttgart, Germany)

Shasta Log Aggregation, Monitoring and Alerting in HPC Environments with Grafana Loki and ServiceNow 602
Elizabeth Bautista (Lawrence Berkeley National Lab, USA), Nitin Sukhija (Slippery Rock University of Pennsylvania, USA), and Siqi Deng (Lawrence Berkeley National Lab, USA)

Bridging the Gap Between Application Performance Analysis and System Monitoring 611
Thomas Ilsche (Technische Universität Dresden, Germany), Mario Bielert (Technische Universität Dresden, Germany), and Christian von Elm (Technische Universität Dresden, Germany)

IncProf: Efficient Source-Oriented Phase Identification for Application Behavior Understanding 616
Omar Aaziz (Sandia National Laboratories, USA), Mohammad Al-Tahat (New Mexico State University, USA), Strahinja Trecakov (New Mexico State University, USA), and Jonathan Cook (New Mexico State University, USA)

LDMS Darshan Connector: For Run Time Diagnosis of HPC Application I/O Performance 626
Sara Walton (Sandia National Laboratories, USA), Omar Aaziz (Sandia National Laboratories, USA), Ana Luisa V. Solórzano (Northeastern University, USA), and Ben Schwaller (Sandia National Laboratories, USA)

Author Index **635**
