

53rd ANNUAL LASER DAMAGE SYMPOSIUM
Proceedings

**SPIE. LASER
DAMAGE**

**LASER-INDUCED DAMAGE
IN OPTICAL MATERIALS 2021**

**12–15 October 2021
Online Only, United States**

Editors

Christopher Wren Carr, Vitaly E. Gruzdev, Detlev Ristau, Carmen S. Menoni

Organized by
SPIE

Cosponsored by

Spica Technologies, Inc. (United States)
Ultrafast Innovations GmbH (Germany)
Optimax Systems, Inc. (United States)
Lawrence Livermore National Laboratory (United States)
Plymouth Grating Laboratory (United States)

Founding Organizers

Arthur H. Guenther and Alexander J. Glass

Published by
SPIE

Proceedings of SPIE, 0277-786X, v. 11910

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Laser-Induced Damage in Optical Materials 2021*, edited by Christopher W. Carr, Vitaly E. Gruzdev, Detlev Ristau, Carmen S. Menoni, Proc. of SPIE 11910, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

§ The first five digits correspond to the SPIE volume number.

§ The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	Conference Committee
vii	Symposium Welcome
xi	Summary of Meeting

DAMAGE COMPETITION RESULTS AND MINI-SYMPOSIUM

11910 0B	515-nm, femtosecond laser mirror thin film damage competition [11910-28]
----------	---

FUNDAMENTAL MECHANISMS I

11910 0F	The effect of chirp and wavelength for ultrafast bulk modification of solids with tightly focused laser pulses [11910-3]
----------	---

MATERIALS AND MEASUREMENTS II

11910 0M	Analysis of cumulative probability of growth of damage sites at the National Ignition Facility [11910-11]
----------	--

MATERIALS AND MEASUREMENTS III

11910 0O	Generation of UV-defects in UV fibers: comparison between different pulsed UV lasers [11910-14]
11910 0P	Ultraviolet fatigue testing of laser optics [11910-15]
11910 0R	Bulk LIDT variances of fused silica: a material developer's perspective [11910-17]

THIN FILMS II

11910 0Y	The influence of oxygen partial pressure on the properties of evaporated alumina thin films [11910-33]
----------	---

THIN FILMS III

- 11910 12 **Spatio-temporal evolution of femtosecond laser pulses in dielectric multi-layers controlling the damage behavior [11910-36]**
- 11910 13 **Thermal laser induced damage in optical coatings due to an incident pulse train [11910-37]**

SURFACES, MIRRORS, AND CONTAMINATION

- 11910 15 **Detection of contamination of protective windows in Laser Powder Bed Fusion by means of a line scan camera [11910-41]**
- 11910 17 **In-situ cleaning organic contaminants on SiO₂ sol-gel antireflection film by low-pressure air plasma [11910-44]**

POSTER SESSION: MATERIALS AND MEASUREMENTS

- 11910 1E **Laser damage metrology with small and large beams on a unique testbed [11910-64]**

POSTER SESSION: THIN FILMS

- 11910 1I **Laser damage comparisons of E-beam evaporated HfO₂/SiO₂ antireflection coatings at 0% and 40% relative humidity for 532 nm and 1064 nm [11910-46]**
- 11910 1L **Degradation of optical coatings induced by high-intensity, 515 nm, sub-picosecond burst-mode laser beam [11910-49]**

POSTER SESSION: SURFACES, MIRRORS, AND CONTAMINATION

- 11910 1T **Ultra-sensitive laser-based contamination detection for space applications [11910-69]**
- 11910 1U **Surface damage evolution of KDP crystals induced by conical cracks under irradiation of nanosecond laser**
- 11910 1V **Investigation on the influence of the CO₂ laser parameters on the defect healing process of fused silica**
- 11910 1W **Particle simulation of the initial dynamic damage behaviors of KDP crystals under intense laser irradiation**
