Volume 12100

Proceedings of SPIE 0277-786X, V. 12100

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Multimodal Image Exploitation and Learning 2022*, edited by Sos S. Agaian, Vijayan K. Asari, Stephen P. DelMarco, Sabah A. Jassim, Proc. of SPIE 12100, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

LIBRARY**

SPIDigitalLibrary.org

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SESSION 1 MULTIMODAL IMAGE PROCESSING CHARACTERIZING ISSUES

- 12100 02 **Sat U-net: a fusion based method for forensic splicing localization in satellite images** [12100-2]
- 12100 03 **DTNet: depth transverse transformer network for monocular depth estimation** [12100-3]
- 12100 04 **An automatic multimodal data registration strategy for 2D/3D information fusion** [12100-4]
- 12100 05 **Improving cybersecurity through deep learning on keystroke and mouse dynamics** [12100-5]

SESSION 2 MACHINE LEARNING FOR MEDICAL IMAGE ANALYSIS

- 12100 06 **Machine learning assessment of border irregularity of thyroid nodules from ultrasound images** [12100-6]
- 12100 07 **Fully convolutional network for breast lesion segmentation in ultrasound image: towards false positive reduction** [12100-7]
- 12100 08 **Ultrasound image augmentation by tumor margin appending for robust deep learning based breast lesion classification** [12100-8]
- 12100 09 **A machine learning approach to predicting new pharmaceutical successes in clinical trials** [12100-10]

SESSION 3 CHALLENGES IN MULTI-MODALITY SENSORS

- 12100 0A **Optimal vision aided navigation in GPS-denied regions (Invited Paper)** [12100-11]

SESSION 4 IMAGE ANALYSIS IN CHALLENGING ENVIRONMENTS

- 12100 0B **BiThermalNet: a lightweight network with BNN RPN for thermal object detection** [12100-15]
- 12100 0C **Transmission map optimization for single image dehazing** [12100-16]

12100 OD **Comprehensive analysis and benchmarking of de-raining techniques through a rain model approach** [12100-17]

POSTER SESSION

12100 OE **Alpha-rooting and correlation method of image enhancement** [12100-18]

12100 OF **Alpha mean trim texture descriptors for optical coherence tomography eye classification** [12100-19]

12100 OG **Automatic system for paddock boundaries recognition using satellite imagery in Chile** [12100-20]

12100 OH **Gradients and compass operators: method of rotations** [12100-21]

12100 OI **QSRNet: towards quaternion-based single image super-resolution** [12100-22]

12100 OJ **Teaching robots to see clearly: optimizing cross-modal domain adaptation models through sequential classification and user evaluation** [12100-25]

12100 OK **Binary vs. multi-class segmentation for off-angle iris images using deep learning frameworks** [12100-26]

12100 OL **Attention-based two-stream high-resolution networks for building damage assessment from satellite imagery** [12100-27]

12100 OM **Highway accident detection and classification from live traffic surveillance cameras: a comprehensive dataset and video action recognition benchmarking** [12100-29]

12100 ON **Gaze-FTNet: a feature transverse architecture for predicting gaze attention** [12100-30]

12100 OO **KTNet: towards automated 2D kidney and tumor segmentation** [12100-32]

12100 OP **Quality assessment with deep learning for imaging applications** [12100-35]

12100 OQ **Adolescent behavioral risk analysis and prediction using machine learning: a foundation for precision suicide prevention** [12100-36]

12100 OR **Modification of the method of multicriteria image processing for preprocessing thermal imaging images with adaptive change in filtering parameters based on neural network approaches** [12100-37]

12100 OS **3-D shape object reconstruction with non-Lambertian surface from multiple views based on deep learning** [12100-38]

12100 OT **Machine learning based classification system using depth-dependent variation encoding for classifying cervical two-photon excited fluorescence image stacks** [12100-39]
