Volume 12101

Proceedings of SPIE 0277-786X, V. 12101

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Pattern Recognition and Tracking XXXIII*, edited by Mohammad S. Alam, Vijayan K. Asari, Proc. of SPIE 12101, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510650787

ISBN: 9781510650794 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SESSION 1 IMAGE QUALITY AND TRACKING TECHNIQUES

- 12101 02 **Medical image segmentation using U-Net and progressive neuron expansion (Invited Paper)** [12101-1]
- 12101 03 **Understanding the relationship between image quality and convolutional neural network performance** [12101-2]
- 12101 04 **Geosynchronous satellite detection and tracking with WFOV camera arrays using spatio-temporal neural networks (GEO-SPANN)** [12101-3]
- 12101 05 **Smart system for blurring undesirable objects in road applications** [12101-4]
- 12101 06 **Late fusion of pre-trained networks for satellite image classification** [12101-5]

SESSION 2 TRENDS IN PATTERN RECOGNITION

- 12101 07 **A new approach for removing point cloud outliers using the standard score** [12101-8]
- 12101 08 **A new approach for removing point cloud outliers using box plot** [12101-9]
- 12101 09 **Voronoi diagram based handwritten word segmentation** [12101-10]

SESSION 3 NOVEL DEEP LEARNING TECHNIQUES

- 12101 0A **Investigating the performance of an artificial neural network for selecting priority rules for solving the resource-constrained project scheduling problem (RCPSP)** [12101-12]

SESSION 4 DETECTION AND TRACKING

- 12101 0B **Marker-less motion capture system using OpenPose** [12101-16]
- 12101 0C **Virtual assistant for first responders using natural language understanding and optical character recognition** [12101-17]

SESSION 5 ARTIFICIAL-INTELLIGENCE-BASED TRACKING

- 12101 0D **TruePAL: an AI assistant for first responder safety (Invited Paper)** [12101-19]
- 12101 0E **Re-defining radiology quality assurance (QA): artificial intelligence (AI)-based QA by restricted investigation of unequal scores (AQUARIUS)** [12101-22]
- 12101 0F **Can simpler be better? Review of methods for the detection of GAN-generated imagery** [12101-39]

SESSION 6 MACHINE LEARNING BASED RECOGNITION

- 12101 0G **Neurosymbolic hybrid approach to driver collision warning** [12101-24]

SESSION 7 DEEP NEURAL LEARNING BASED RECOGNITION

- 12101 0H **Crowd detection and estimation for an earthquake early warning system using deep learning** [12101-32]
- 12101 0I **Improving face recognition by pose-aware quality assessment and judgement** [12101-33]
- 12101 0J **Facial expression recognition robust to occlusion using spatial transformer network with triplet loss function** [12101-36]

POSTER SESSION

- 12101 0K **RA-MISNet: multilevel information sharing network based on residual attention for crowd counting** [12101-11]
- 12101 0L **Formation of a method and algorithm for automated analysis of the degree of attention and concentration of an operator** [12101-34]
